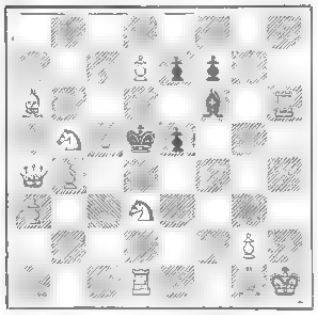
Correct solutions received from Digamma, W.H.S., O.B., Omega, J.D., and J.W.E.

Problem No. 99
By Thos. Guest.



White to play and mate in two moves.

There is very little of interest in the local Chess world. The Tournaments go on quietly in both Clubs, and we observe that the Tokyo Chess Club has changed its day of meeting from Tuesday to Friday. Play for the Championship of the Yokohama Club commences on Monday, 4th December.

The Nagasaki-Yokohama correspondence games are finished. Game A (Ruy Lopez) has resulted in a draw, while Nagasaki is the victor in Game B (Petroff's defence). We are preparing the games for publication at an early date, with notes.

We take the following from the *Manchester Examiner* and are delighted to find that some fine Chess is being played both in Europe and America.

Tarrasch v. Tchigorin.

The match of ten games up, draws not counting, between Tarrasch and Tchigorin, is now in progress at St. Petersburg. Latest score: Tchigorin 2, Tarrasch 1.

The following are the moves of the first game, from which it will be seen that Tchigorin avoided many very ingenious traps set for him, but fell into a beautiful combination on his 21st move, after which his game was lost.

Ruy Lopez.

WHITE. Tarrasch.	BLACK. Tchigorin.

International Tournament at New York.

An international tournament was begun at the Manhattan Chess Club, New York, on Saturday week. There were fourteen competitors viz: E. Lasker, of Berlin; A. Albin, of Vienna; M. Taubenhaus, of Paris; F. J. Lee, G. H. D. Gossip, and N. Jasnagrodsky, of London; and the following American players: Showalter, Pollock, Delmar, Pillsbury, L. Schmidt, Hanham, Olly, and Ryan. Lasker won his first two games—against Ryan and Hanham. The following is his game with Hanham:—

Queen's Gambit declined.

WHITE Lasker.	BLACK Hanham.

Per Japanese steamer *Kobe Maru*, for Shanghai and ports:—Treasure, $2,400.00.

REPORTS.

The Japanese steamer *Fushiki Maru*, Captain Wilson, reports:—Left Misumi the 18th November at 11.30 a.m. and Nagasaki the 19th at 1.30 p.m.; had moderate N.N.W. winds with fine and clear weather to Shimonoseki, where arrived the 20th at 7 a.m. Left the 21st at 6.45 a.m.; had light variable winds with clear weather through Inland Sea and arrived at Kobe the 22nd at 7.30 a.m. Left the 24th at 10.45 p.m.; had fresh to moderate N.W. winds with continuing fine, clear weather

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

throughout the passage. Arrived at Yokohama the 26th November at 8 15 a m.

The Japanese steamer *Takasago Maru*, Captain Nirei, reports:—Left Hakodate the 24th November at 8 a.m.; had fine weather and strong westerly winds and heavy easterly swell. Arrived at Ogi-nohama the 25th at 7.15 a.m. and left the same day at 0.30 p.m.; had fine, clear weather and moderate sea with strong westerly breeze; passed Inuboye the 26th at 3 a.m.; thence to port moderate to light northerly breeze and fine weather. Arrived at Yokohama the 26th November at 1.40 p m.

The Japanese steamer *Omi Maru*, Captain J. W. Ekstrand, reports:—Left Kobe the 25th November at noon; had moderate to fresh N.W. winds and fine weather; passed Oshima the same day at 8 p.m., had same weather to Rock Island; thence light N.W. winds and fine weather. Arrived at Yokohama the 26th November at 4.55 p.m.

The Japanese steamer *Miike Maru*, Captain W. Thompson, reports:—Left Hakodate the 25th November at 1 p.m; passed Kinkasan the 26th at 10.16 a.m.; passed Inuboye at midnight. Arrived at Yokohama the 27th November at 10 50 a.m.; from Hakodate to Kinkasan experienced strong N.W. breeze with heavy snow squalls; thence to port fresh to moderate westerly winds and fine, clear weather.

The American steamer *City of Peking*, Captain R. R. Seaile, reports:—Left San Francisco the 9th November at 4.05 p m.; had pleasant run to the 180th Meridian which we crossed on the 18th in lat. 35°.45'; from the 18th to the 22nd had moderate to fresh N.W. winds with moderate sea and swell; on the 22nd increasing to violent gale and swell, continually shipping water but doing no damage until 12 20 p.m. when a sea came aboard just abaft the starboard main rigging, carrying away lifeboats No. 2, 4, 6, 8, and 12, engine room skylight, social hall, and captain's room, damaging after wheel-house and the saloon. Captain and several passengers hurt, but no one seriously; barometer 29 77; cleared away wreck, wind and sea moderating towards evening, continued stiff breeze shifting to S S.W.; on the 23rd wind again hauled to N.W.; on the 24th, wind blowing fresh with moderately rough sea and swell, clear and fine with occasional rain squalls; on the 26th passed steamer *Oceanic* bound south and east; wind falling off, by evening fine, clear, and cool weather; thence to port N.W. to W.N.W. breeze and sea. Time, 18 days, 4 hours, 10 minutes.

The Japanese steamer *Yamashiro Maru*, Captain Young, reports:—Left Kobe the 28th November at noon; had light variable airs and fine weather and smooth sea throughout the passage. Arrived at Yokohama the 29th November at 6.15 p m

The Japanese steamer *Nagato Maru*, Captain Pender reports:—Left Otaru the 24th November at 2 p.m.; had strong westerly gale with high sea and heavy snow to Hakodate, arrived the 25th at 11.15 a.m. and left the 27th at 8 a.m.; had fine weather and fresh N.W. winds. Arrived at Ogi-nohama the 28th at 5 a.m. and left the same day at 11.30 a.m., had light variable winds and fine weather. Arrived at Yokohama the 29th November at 11.18 a.m.

The American steamer *City of Rio de Janeiro*, Captain J T. Smith, reports:—Left Hongkong the 23rd November at 6.48 a m., viâ Nagasaki, and Kobe. Arrived at Yokohama the 30th November at 8 12 p.m. Passage, 7 days, 11 hours, 42 minutes. From Oshima had strong head wind and moderate sea, below Rock Island passed a German ship which signalled Q F.S.H

The Japanese steamer *Sendai Maru*, Captain T. Sakai, reports:—Left Kobe the 29th November at 10.10 a.m; had light south-easterly breeze and fine, cloudy weather. Arrived at Shiotsu at 1.45 p.m. and left at 4 7 p.m; had light easterly breeze and rainy weather; after passing round Oshima, light to moderate north-easterly breeze and overcast, rainy weather. Arrived at Yokohama the 30th November at 9 p m.

The German steamer *Nürnberg*, Captain Hugo Walter, reports:—Left Hongkong the 25th November; had fresh E.N E. to N.N E. winds, partly rough sea, and fine weather throughout the voyage; under the coast of Japan northerly winds, smooth sea, and partly cloudy. Arrived at Yokohama the 1st December at 10.6 a.m.

The Japanese steamer *Saikio Maru*, Captain G. W. Conner, reports:—Left Shanghai the 25th November at 11 15 a.m. and arrived at Nagasaki the 27th at 5 a.m.; after a fine passage with light northerly winds and overcast sky. Left Nagasaki the same day at 5 p.m. and arrived at Shimonoseki the 28th at 6 a.m. Left again the same day at 11 a m. and arrived at Kobe the 29th at 8 a.m.; after experiencing light variable winds from E. to N E. on coast and through Inland Sea with fine, clear weather. Left Kobe the 30th at noon and arrived at company's buoy the 1st December at 4 p.m; experienced moderate to fresh winds from north to west to Rock Island; thence to port light winds from E.N E. with fine, clear weather throughout the passage and reports having on board the Captain of the German ship *Schliemann* bound for Yokohama 135 days from New York with 70,000 cases Kerosene Oil and which grounded on S.W. side of Vries Island this morning.

LATEST COMMERCIAL

IMPORTS.

Unfortunately the promise of a slight revival noted in our last has, as yet, not reached fulfilment. Yarns still hang fire and do not appear to tempt purchasers to any extent. Cotton Piece Goods are very quiet, the week's business having been exceptionally small. In Fancies, only a few pieces of Silk-faced Satins and Turkey Reds have changed hands, while Woollens remain unnoticed. Holders are firm and prices consequently show no change.

COTTON PIECE GOODS

	PER PIECE.

METALS

The light demand that has been seen of late in this market has continued during the past week. The principal enquiries have been for various kinds of Iron, but other lines are dull. Prices, however, have a somewhat firmer tendency.

	PER PICUL.
Flat Bars, ¾ Inch	$3 80 to 4 00
Flat Bars, ½ Inch	4 00 to 4 10
Round and square up to ¾ Inch	3 20 to 3.35
Iron Plates, assorted	3 25 to 3 35
Sheet Iron	4 45 to 4 60
Galvanized Iron sheets	8 85 to 9 10
Wire Nails, assorted	5 40 to 5 75
Tin Plates, per box	6 20 to 6 40
Pig Iron, No 1	1 45 to 1 50

KEROSENE

Business in this market has been very brisk, and had the available stock been larger quite a good trade might have been done. Holders, however, are very short of supplies and consequently transactions are limited. Prices have ruled high, but demand continues good and some contracts have been made "to arrive." American Oil is especially firm, while about 150,000 gallons of Russian bulk oil have found buyers at 1.65 per 10 gallons.

Chester	$1.75 to 1 77½
Comet	1.72½ to 1 75
Devoe	—
Russian Anchor	1 70 to 1 72½
Russian Moon	1 67½ to 1 70

SUGAR

There has been rather more doing in Browns, owing to holders having conceded still further to buyers ideas. Native dealers, however, do not appear at all anxious to operate, having over 40,000 piculs on their hands not yet delivered to consumers. Whites continue to sell in small lots at unchanged prices.

	PER PICUL.
Brown Takao	$4.40 to 4 50
Brown Manila	5.00 to 5.10
Brown Datong	3.95 to 4.00
Brown Canton	4.10 to 4 30
White Java and Penang	7.00 to 7.10
White Refined	7 55 to 9 20

EXPORTS.

RAW SILK.

Our last issue was of the 24th ultimo, since which date settlements on this market amount to 1,185 piculs, divided thus: *Hanks* 8 piculs; *Filatures*, 927 piculs; *Rereels*, 205 piculs; *Kakeda*, 45 piculs; In addition to these figures, direct shipments have been 193 bales, making the total business of the week 1,400 piculs.

During the first part of the week the market was very dull, with slow, dragging business, but for the last two or three days we have had an active market with large sales. Buying has not been general, but confined principally to one big operator who has taken altogether 1,500 piculs full-sized Filatures for the New York trade. Prices all round are somewhat lower than last week, but the decline is now checked again and should other buyers enter the market we might even see a slight rise, although with the heavy stocks on hand we do not think that holders would be too exacting, but would undoubtedly be current at quotations to encourage further business. In European sorts the market is still quiet with small sales, but any moment may cause a turn in that direction also and we may then see a general good demand

Arrivals come in to a fair extent and the quality of present receipts shows some falling off as cold weather comes on

Exchange closes at a slight reduction on last week's rates, in sympathy with lower silver in London

From our Export Tables at foot it will be seen that the decrease in export to New York is now no less than 13,400 bales, but the recent purchases will tend to reduce this amount.

There have been two shipping opportunities since we last wrote, the steamer *Oceanic*, 24th ultimo, taking 679 bales for the New York trade; the English mail *Verona*, 26th ultimo, had 322 bales for France, and the total export to date is 18,465 piculs, against 29,353 piculs last year and 23,333 piculs at the same date in 1891.

Hanks.—Only one small parcel has changed hands, the price paid being $580 for some ordinary *Shinshu Hanks*. Stock in this department remains light and is of very little interest to shippers.

Filatures.—Nearly all the business of the week has been in this class, 500 piculs being settled yesterday. The prices paid include the following, *Tenrusha*, $750; *Toeushinsha* and *Choshinsha* $730, with ordinary *Suwa* silks like *Inashosha*, *Hiranosha*, *Kairosha*, *Choyosha* and *Gojosha* at $700. Good *Koshu* have been freely taken at $690. These prices seem very cheap, and it is difficult to see how values can further recede.

Re reels.—About 200 piculs have found buyers; good *Joshu*, like *Tortoise* chop, at $690; *Koriyama*, No. 2, $650; No. 3, $620; common *Joshu* and *Bushu*, $590.

Kakeda.—A small business herein; *Daruma*, $690; *Horsehead I.*, $640. This class of silk seems very cheap at present quotations.

In other sorts, no business.

QUOTATIONS.—(NEW SILK.)

WASTE SILK

A moderate daily business transpired in this branch, settlements being 900 piculs, divided thus: *Cocoons*, 140 piculs; *Noshi*, 400 piculs; *Kibiso*, 360 piculs. No direct shipments this week.

Prices have receded a little for some kinds, but generally speaking are fairly well maintained, especially for good qualities. Stock is heavy, but, as usual, contains very much fibre of low grade and poor quality.

There have been two shipping opportunities since we last wrote, the English mail steamer *Verona* taking 51 bales Waste Silk for Europe and the Canal steamer *Ocampo*, 28th ult, having 30 bales *Pierced Cocoons* for the New York trade These departures make the present export figures 8,959 piculs, against 15,098 piculs last year and 12,610 piculs at the same date in 1891.

Pierced Cocoons.—A further quantity of *Bivoltini* have been taken at prices of ranging from $35 to $75 per picul, according to quality.

Noshi.—A fair amount of business has been done, good *Filature* realizing $140; *Oshu*, $132½; *Tegara*, $120; *Kawagoye*, $90, with *Joshu* at from $84 to $64, according to quality.

Kibiso.—Small purchases of *Filature* at prices ranging from $90 to $100, while in *Hira* sorts *Zaguri*, $55; *Oshu* $42, *Mino*, $40; *Joshu*, $33 In order sorts, nothing done.

QUOTATIONS.—(NEW WASTE).

Established a Quarter of a Century

A DELIGHTFUL MOUNTAIN RESORT.

THE most delightful Mountain Resort in the Hakone District is the KAIKATEI, at KOWAKI-DANI, which is admitted by the Medical Faculty of Tokyo and Yokohama to be the Sunniest, Breeziest, and most healthful spot accessible to Foreigners in the Hakone District, standing alone and delightfully situated upon the mountain side, free from every suspicion of bad drainage and malaria, with a cool and constant breeze in the hot summer weather, and a view not to be equalled in the neighbourhood for variety and extent.

The BATHS are filled with a constant and never failing supply from the HOT MINERAL SPRINGS just above the Hotel, the medicinal virtues of which are too well-known to need recapitulation. It is sufficient to say that whereas Visitors find many of the hot springs enervating, those at Kowaki-dani are distinctly invigorating.

One of the features of the Kaikatei is the detached Suites of Apartments, where perfect quiet and privacy can be secured. This arrangement for invalids and convalescents from the Tropics is a great desideratum, as being entirely removed from the Dining Room, Billiard Room, Bar, and Baths, while all are connected by covered passages.

To a Liberal Table are added an excellent *Cuisine* and good attendance, supplemented by a large variety of Wines, Spirits, and Malt Liquors of the very best kinds.

For the amusement of Guests, a fine English Billiard Table, by Burroughs and Watts, has been added to the Establishment, as well as Archery, Quoits, and other Games, and Ponies for riding over the hills and a Yacht for sailing on Hakone Lake can be hired.

Visitors to Kowaki-dani who bring a rod with them will be shown the haunts of the speckled Trout, a nice stream of several miles in length being within easy walking distance of the Hotel; Hakone Lake is also well stocked with a variety of fish, including salmon, and the Fishing is FREE; while Entomologists will find rare and valuable specimens in the surrounding hills, and the Flora of the district is extremely interesting to the Botanist.

Apartments may be secured by Letter or Telegram, and Special arrangements made for the conveyance of Visitors and Baggage from the Tramway Terminus at Yumoto, by addressing

Y. HOSHINO,

KAIKATEI, KOWAKI-DANI,
HAKONE.

THE GREATEST WONDERS OF MODERN TIME.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

MR. J. T COOPER, in his account of his extraordinary travels in China, published in 1891, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors throughout the World. May 1st, 1890.

STEAM LAUNCHES & YACHTS

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others The chief advantages are:—

1. Wonderful Economy of Fuel
2. First-class Workmanship.
3. Moderate Prices
4. Greatest obtainable power for weight and acesp accupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 40 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c, &c. We supply sets of Machinery separately. We are also sole makers of the

KINGDON PATENT LIGHT PORTABLE ENGINE

Stock sizes, 1½ to 6 H.P. Burns less fuel, and gives *three times the power*, weight for weight, of any other engine. Awarded First Prize by Royal Agricultural Society England, 1890, in competition open to all makers.

YOKOHAMA: SATURDAY, DEC. 9TH, 1893.

BIRTH.

On the 7th inst., at No. 144, Bluff, Mrs. M. ENGERT of a Son.

SUMMARY OF NEWS.

MR. HOSHI TORU has resigned from the *Jiyu-to*

RINDERPEST is devasting the island of Goto, in Nagasaki prefecture.

M. ALPHONSE GASCO has been appointed Translator in the Italian Legation.

THE German steel ship *Schielmann*, laden with kerosene, has gone to pieces on Oshima.

MESSRS. DRAKIN BROTHERS & Co. have agreed to reduce their capital from time to time.

THE *Nippon* was suspended by the authorities on the 3rd instant for the usual offence.

THE *Yoshino Kan* arrived at Gibraltar on the 30th ult. She is expected to leave for Malta as soon as she completes her coaling.

THE Nippon Yusen Kaisha declare a dividend of 8 per cent. for the past year, carrying forward 3,441 451 *yen* to the next account.

THE Government issued an exequatur on the 1st inst. officially acknowledging Mr. N. W McIvor as U.S. Consul-General at Yokohama.

THE charred remains of the two little Chinese girls who lost their lives in the recent fire in China Town, Yokohama, have been recovered.

JUDGMENT has been given against Mr. Apcar in the case brought against him by the New O B C., (in liquidation) in the Yokohama Chiho Saibansho.

SEVERAL important questions have been submitted to the Government by members of the Lower House during the week. The petitions presented to both Houses since the opening of the Diet are now to be numbered by hundreds.

A STRONGLY worded instruction has been issued to the Tokyo Police in reference to the protection to be afforded to foreigners when passing through the streets of Tokyo.

THE officers of the *Admiral Kornuloff* entertained Count Saigo, Minister of the Navy, and other Japanese Naval officers at the Grand Hotel on the evening of the 4th inst.

THE Government has sanctioned the establishment of Exchanges at Wakatsu (rice), Omi (oil), Tsu (rice), Onomichi (rice), Yokkaichi (rice), Sendai (rice), and Osaka (oil).

THE marriage arranged between a daughter of Count Matsukata and Mr Kawakami, of the Yokohama Specie Bank, took place at the residence of the Count at Mita, Tokyo, on the 5th inst.

THIRTEEN Japanese residents at Fusan, Korea, consisting of women of questionable character and those who took them to that port, were deported by the Japanese Consul-General on the 24th ult.

THE Hoshi affair has again attracted a great deal of attention in the Lower House, the latest step being Mr. Hoshi's suspension from the House for a week, the question of apologising for his language towards the House being dropped.

THE receipts of the Government railroads during the ten days ended the 30th ult. were:—Shimbashi Kobe line and branches: 335,399 passengers, receipts *yen* 104,630; 29,915 tons freight, receipts *yen* 41,254; Naoyetsu-Takasaki line: 30,305 passengers, receipts *yen* 9,823; 4,837 tons freight, receipts *yen* 8,538.

A CURIOUS will case came before the U.S. Consulate-General Court on Monday, a memorandum, written in pencil, undated and not witnessed, being put in as the last will and testament of the deceased. Pending communications with the deceased's relatives, the hearing of the case has been adjurned.

A JAPANESE contractor sued Mr. John Smedley for $170, balance of contract account of the British Court. The money was paid to Mr. Smedley in 1892 by the principal in the affair, but he retained possession of it because the principal owed him money. The Judge found for plaintiff, holding that defendant had no right to detain the money.

THE petition asking for the confiscation of the sealing schooner *Maud S.*, in the British Court, for an alleged contravention of the Behring Sea Seal Fishery Act, has been dismissed, as also the counter-claim in the case, the Judge finding that the vessel was not engaged in hunting at the time of seizure, while the plaintiff was justified in detaining the vessel until the Court could adjudicate in the case. A similar result has attended the case of the *Arctic*.

THE census of Japan according to the returns of the Home Office at the end of last year was as follows:—The whole population was 41,089,940, in 7,817,570 families, of whom 20,752,366 were males and 20,337,574 females. Compared with the end of the previous year, the above shows an increase of 11,201 families, 188,950 males and 182,313 females. The above total may be arranged as follows in accordance with the rank to which they belong;—Peers, 3,253 persons, in 600 families, *shizoku*, 2,010,135 persons, in 430,135 families, and *heimin*, 39,071,781 persons in 7,841,550 families.

MR. GLADSTONE has stated that the British Government was not informed that Russia was acquiring a naval rendezvous in the Mediterranean, and there was no reason to suppose that negotiations are proceeding in the matter; but if Turkey allowed the war-ships of any nation to make the passage of the Dardanelles, Great Britain would of course claim the same privilege; there has been a severe run upon the banks in Italy, notably on the Banca Générale, consequent upon the difficulties of the Credits Mobiliare; a new French Ministry has been formed, with Perier as Minister of Foreign Affairs; the political tendency of this Cabinet is decidedly moderate; a new Italian Ministry has been formed under the Presidency of Signor Zanardelli; the Employers Liability Bill has passed its third reading in the British House of Commons, and its first and second in the Lords; an earthquake which occured in Khorassan destroyed fifty thousand cattle, while twelve persons perished; Miss Mighell's appeal in the suit instituted by her against the Sultan of Johore, has been dismissed; the protocol between England and France in regard to the Siamese Buffer State has been signed, and the Commissioners for the delimitation of the frontiers will start soon for the scene of their labours. *The Times* says that the Buffer State will be under the control of the Chinese Government.

MORE enquiry in the Import trade has induced a hardening of prices, but the amount of actual business in not entirely satisfactory. Yarns continue dull generally, though a demand for certain counts, of which the supply happens to be small, has induced buyers to pay more money to satisfy their particular needs. Transactions in Piece-goods have been small, but settlements were at full rates, and prices are very firm. The Woollen trade may be similarly described. A small "spot" business in Iron has been the principal feature in the Metal market, and some contracts have been made at better figures. Stocks are getting low, and Pig Iron is scarce. The active demand for Kerosene has continued, and the ship reported last week as ashore on Vries Island with 70,000 cases of American Oil, has broken up, and the cargo has drifted away, only a small portion being recovered. With a rising market, this casualty promoted a smart advance, though the arrival of another large cargo caused a slight check upon prices. American Oil is, however, still in good demand, and Russian has also increased in value, notwithstanding that a cargo of over 100,000 cases has also arrived. The Sugar trade is brisk at full rates, and arrivals come freely, Formosa, Manila, and Canton grades being taken at a slight advance, and White sorts find buyers at full rates. A considerable movement of Silk has been effected, and buying both for America and Europe was fairly active in the early part of the week, though business is quieter at the close. Prices have advanced for some kinds, and continue firm, and the sales have this week been greater than the arrivals. The Waste Silk trade has been limited so far as exporters are concerned, but a good many large parcels have been taken off this market for home manufacturers and been returned to the interior. The stock here will probably be further reduced for home consumption, as holders are very firm and the offers made to fill foreign orders are not entertained. The Tea trade has lapsed into dullness, the demand of a week ago having rather suddenly ceased. There is now almost an entire absence of Choice eaf, and no alteration in the value of the grades on offer. Exchange during the week remained fairly steady at late rates, but rules a point higher at the close.

THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.

The Hoshi question continues to occupy much of the space in the vernacular press. Mr. Hoshi's enemies being determined on his destruction, care not what method they pursue, if only their object be attained. The latest device they have conceived is to strain beyond all reason the sense of a provision in the Law of the Houses, in order to pass a motion to the effect that, the House having already declared want of confidence in the President, the latter's functions must henceforth be discharged by the Vice-President. The Progressionists seem to be the principal advocates of this extraordinary step. They are trying to induce the National Unionists to fall into line with them, but the latter decline to endorse such an unjustifiable course of action, though ready at any moment to support a motion for Mr. Hoshi's expulsion from the House altogether. Besides the annihilation of Mr Hoshi's commanding influence in the political world, his enemies aim at the disruption of the Radical Party. In this they have partially succeeded, for about seventeen of the Radicals have detached themselves from their Party and formed a new association under the name of the *Dōshi* Club. They consist mostly of men who have always disapproved the attack made by Mr. Hoshi's followers upon the Progressionists. The *Dōshi* Club is, therefore, expected to be willing to cōoperate with the Progressionists and the *Dōmei* Club. The three factions combined are nearly equal in numerical strength to the Radical Party, and with occasional assistance from the National Unionists, the triple alliance may be able to control the situation in the present session of the Diet. But thus far no such alliance has been organized, the factions concerned seem to be awaiting some further development of events.

* * *

The *Dōshi* Club has been welcomed with open arms by the Progressionists. Its members are praisedly the *Kaishin-to* organs as men of virtue and culture, always ready to take a manly course of action. The *Mainichi Shimbun* compares the *Dōshi* Club to "the young and rising Italy," while the Radical Party is likened to "the old and decaying Austria." Certain members of the new Club are especially mentioned. Mr. Kobayashi Kusuwo, M.P. from Okayama, the leader in the abortive scheme against Korea some ten years ago, is spoken of as a worthy representative of liberal views in the Provinces of the San-yo-do and San-in-do; Mr. Haseba Junko, M.P. from Kagoshima, as a leader of opinion in Kyushu; and Mr. Kikuchi Kuro, M.P. from Aomori, as a conspicuous figure in the North East.

* * *

Among other important events of the week, we may mention the speeches delivered by the Minister President and the Minister of Finance in the Diet, and the passing of an Address to the Throne on the subject of official discipline. Engrossed by the Hoshi question, the metropolitan papers have not had leisure to discuss these topics. They have been dismissed with only a few cursory comments, already reproduced in these columns.

* * *

The Budget is now in the hands of the Committee. It is believed that the collision between the Government and the Opposition will take place principally over the Budget. The majority of the Committee belong to the Radical Party, there being among them scarcely any member of either the Progressionists or the *Domei* Club. It may, consequently, be expected that the report of the Committee will be critically examined by these two sections of the Opposition, and may even be rejected by them. The plan of reductions adopted by the Committee is so sweeping and even unconstitutional, that the changes which will be recommended will never be approved by the Government, whatever may be their reception in the House. But it is reported that even this plan is thought too moderate by the *Kaishin-to* and the *Domei* Club. This question is not yet discussed by any of the Party organs, but the extreme course pursued by the Budget Committee is severely commented on by independent papers like the *Kokkai* and the *Nichi Nichi Shimbun*.

* * *

The *Kokkai* strongly condemns the Budget Committee for trespassing upon he prerogatives of the Emperor. Our contemporary does not think that the reforms introduced by the Government are satisfactory, and the Budget Committee is perfectly at liberty to suggest whatever reductions they deem necessary. But in doing so they should take care not to exceed the proper limits of the power bestowed upon i.. It is not allowed to the Diet to interfere with the Official Organizations and the Regulations relating to official salaries, such matters being entirely under the direct control of the Emperor. The Diet has, however, attempted to meddle with these things in the past four sessions, each time bringing about a violent collision with the Ministry. It is now time—we are quoting from the *Kokkai*—for the Lower House to see its folly and direct its energies into more legitimate and beneficial routes. The Premier's declaration in his recent speech that the Government had done its utmost in effecting reforms in the administration, clearly shows his determination to reject any demand for further reductions in the sphere of Ordinary Expenditure. So the only result of insisting on such reductions as those now under consideration of the Budget Committee will be, in the *Kokkai's* opinion, to lead either to the non-existence of the Budget or to the dissolution of the Diet. In that not improbable event, which side is to be held blameable, the Government or the Opposition? The latter of course. The *Kokkai*, therefore, advises the Opposition to give up its hackneid policy of attacking the Ministry on the Budget, and direct its attention to such questions as official discipline, the enforcement of the existing treaties, the *Chishima* case, and so forth. To stick to the Budget will give the Cabinet a good pretext for sending back the Representatives to their constituencies, under extremely disadvantageous circumstances

* * *

The *Nichi Nichi Shimbun* goes into more minutiæ in criticising the plan of reductions adopted by the Budget Committee. In regard to office expenses, the Committee proposes to reduce them according to the plan adopted at the time of the last session. The Committee does not take into consideration the rise of prices and the fluctuations of foreign exchange since then. The Committee also proposes the reduction of official salaries; but the *Nichi Nichi* maintains that, compared with the salaries now received in certain kinds of private capacity, the salaries of officials are very much lower. In considering the question of official salaries it must be remembered that officials are not at liberty to engage in any private business, and consequently their salaries are their source of income, while men engaged in private capacities have various means of adding to their proper income. The Committee is also reminded of the fact that the members of the Diet receive a pay of 800 *yen* for three months, during which period of time most of them do nothing but talk and chatter. The Committee has refrained from meddling with the Official Organizations, but it proposes to make alterations in the Regulations relating to official salaries. As to the contributions which the officials of all classes are now making for the construction of war vessels, the Budget Committee refuses to regard them in the light of reductions. But the *Nichi Nichi* remarks that they are to all intents and purposes reductions, for though contributions in name, they are forced upon officials by Imperial Rescript. As to administrative reforms, our contemporary maintains that, in its opinion, the Cabinet has erred on the side of reductions, and that consequently in matters of expense nothing more could be desired.

* * *

The question of the enforcement of the existing treaties now engages a considerable amount of journalistic attention. This is a very favourite subject, and with the exception of the Radical organs, the papers belonging to all other parties are in favour of a rigid enforcement of the treaties. The National Unionist, the Progressionist, and the *Domei* Club's organs are at one with Mr. Kawashima Jun and others who have put questions to the Cabinet on this subject. It is not necessary to reproduce the comments of these papers, for their arguments have been already noticed in these columns more than once. Among others, the *Nippon* complains against the alleged severity of the police and other executive officials upon the papers advocating the necessity of rigidly enforcing the existing treaties. Our contemporary fears that undue official interference will only serve to increase the ardour of the advocates of the principle in question and may even lead to some extravagance on the part of youthful persons.

* * *

The *Nichi Nichi Shimbun* declares that the views of the advocates of the enforcement of the existing treaties are anything but clear. The way in which they write and speak on the subject indicates that they forget the simple fact that the existing treaties are accompanied by various notes and protocols which form an essential part of the system now regulating the relations between the State and the foreign residents. It must also be remembered—the *Nichi Nichi* goes on to say—that foreigners enjoy various privileges by lapse of time apart from the express provisions of the treaty. There are no doubt various imperfections in the present system, and our contemporary is one of those who would wish it were otherwise. But things must be taken as they are, and proper procedure must be followed to alter them. In short, the advocates of so called enforcement of the existing treaties show a lamentable lack of insight and knowledge about diplomatic questions. Concerning the ownership of land by foreigners, they make a loud noise, and demand some remedy. But the Japanese law does not recognize the possession of real property by foreigners, and when a Japanese applies for registration of a piece of land in his name the law court has no power to refuse the application, even if the money be supplied by a foreigner, for it has no means to be sure that the land in question is the property of such foreigner. Japanese who lend their names to foreigners may be blamed on moral grounds, but nobody is warranted in proceeding legally against them, for they are legal owners and there is nothing to controvert this fact.

EDITORIAL NOTES.

PARTICULARS OF THE FUKUSHIMA FRAUD.

DETAILS are now published of the fraud by which the Fukushima Branch of the 1st National Bank was robbed on the 28th ultimo of a sum of 27,000 *yen* by a daring swindler, who chose the premises of the Local Court as his place of operations. We quote from the *Shogyo Shimpo*. At about 10 a.m. on the 28th ultimo, a man dressed like a servant of the Law Court, came to the office of the Fukushima Branch Bank, and handed to the hall porter a letter addressed to the office. On the back of the letter the name of the sender was written, Yamagata Jun, Public Prosecutor of the Fukushima Local Court. The contents of the document were:—"A forgery having been detected in two kinds of convertible notes of 10 *yen* and 5 *yen* denominations, and the persons implicated being now under examination, the officers of the Bank are required to appear at once in Court, bringing with them all the convertible notes of the above denominations now in the possession of the Bank." Quite persuaded of the genuineness of this summons, two clerks of the Bank made a parcel of 50,000 *yen* worth of convertible notes, of 10 *yen* and 5 *yen* denominations, and putting them in a *jinrikisha*, proceeded to the Local Court, accompanied by the supposed messenger. When they arrived there a man, apparently a judge, came out, opened the bundle of money, asked the amount of the notes, and said that there was no occasion to produce the 10 *yen* notes, but that as

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

the 5 *yen* were needed for the purposes of the examination then in progress, they would be kept in trust at the Court. He then wrote a receipt to the effect that 27,000 *yen* worth of 5 *yen* convertible notes had been handed to the Fukushima Local Court in trust, affixed a counterfeit official stamp to the document, and went into the inner room carrying the bundle of notes with him. The two clerks were about to return home, having no further business at the Court, when a member of the local bar, a friend of theirs, made his appearance. Asked the business that had brought them there, they told him the particulars of what had occurred. Great was their astonishment to hear that there was no Public Procurator named Yamagata Jun, and that the whole business must be a swindle. They at once applied to the Court to learn whether a summons in the above sense had been addressed to the Bank, and the answer made it clear that they had been swindled to the tune of 27,000 *yen*. Information was at once given to the Police Office and the Local Court, but though the utmost vigilance is said to have been exercised, no trace of the bold robbers has yet been obtained.

MR. HOSHI TORU AND THE "JIYU-TO"

MR. HOSHI TORU has withdrawn his name from the roll of the *Jiyu-to*. There can be no mistake about the import of this step, unexpected as it will doubtless prove to have been by the public in general. Mr. Hoshi retires from the Party in which he has hitherto held such a distinguished place simply because to remain would entail a weakening of its numerical strength. Twenty-four members of the Party signified their intention of resigning from it if Mr. Hoshi persisted in occupying the Presidential seat in the House of Representatives. That would have reduced the strength of the *Jiyu-to* in the Lower House to sixty-three members. The sixty-three were understood to be staunch to Mr. Hoshi, and he might, had he so chosen, have remained the leader of a very powerful coterie in the Diet. But with the sentiment natural to a man who values the cause for which he fights higher than his own personal aggrandisement, he shrinks from producing any split in the *Jiyu-to* ranks, and consequently retires from them. The sacrifice must cost him much, though we doubt whether its practical results will be so considerable as they seem at first sight. It is true that Mr. Hoshi will be excluded from any open share in the Party's Counsels. His influence, however, is too commanding to permit his real exclusion He will be consulted as much as ever, and his counsels will make themselves felt. It is also true that he cannot figure in the House as a party leader. But if he sought to play a prominent *rôle* in the House, he certainly would not lack followers. We imagine, however, that he will condemn himself to comparative oblivion for some time to come, that, though attending to his parliamentary duties, his voice will not be heard again throughout the session. That seems the wisest and most becoming programme under the circumstances.

* * *

It is alleged that among the recalcitrant members who had signified their intention of withdrawing from the *Jiyu to* unless Mr. Hoshi resigned the Presidency, there are twelve who declare that under any circumstances they will not remain in the Party. But probably they will be persuaded to reconsider their determination.

COLLISION BETWEEN A BRITISH STEAMER AND THE JAPANESE WAR VESSEL "TSUKUSHI" AT SHANGHAI.

PARTICULARS of the recent collision between the British steamer *Gulf of Taranto* and the Japanese war-vessel *Tsukushi*, at the mouth of the Shanghai river are given by the *Kokkai*, which claims to take them from the official report sent by the Captain of the *Tsukushi* to the Admiralty. The *Tsukushi* having undergone some repairs at the Dockyard of Lloyd and Company, in Shanghai, proceeded on the 9th ultimo, for a trial trip, towards the mouth of the river. At about 10 a.m. the following day, a violent north-westerly wind began to blow, and the vessel was obliged to lay at anchor. While thus lying, she was collided against by the *Gulf of Taranto*, and received slight injury in various places. Captain Hudson, of the British steamer, who was stopping on shore at the time, immediately came to the war-vessel, as soon as the intelligence of the accident reached him, and offered an apology for what his ship had done. The wind having subsided during the forenoon of the 11th, the *Tsukushi* left the place of anchorage and returned to Shanghai. Negotiations were at once opened with the Shanghai agent of the Company to which the British steamer belongs, and proper indemnity was demanded. No demurrer was raised on the steamer's side, and the repairing of the *Tsukushi*, which was expected to occupy about two days, was commenced on the afternoon of the 15th ultimo. The cost of the repairs is estimated at 150 *taels*. The vessel is owned by a Glasgow company, and is registered at 2,128 tons. She had a cargo of ammunition from America, and was bound for Yokohama.

CANINE SAGACITY

THE *Yomiuri Shimbun* has a story of a remarkable dog, formerly belonging to M. Boissonade, but now in the possession of a French gentleman residing in Tsukiji. This animal, it would appear, was severely punished by its new master some time ago for biting a strange man who came to the house on business. It has since given up biting strangers, and yet contrives to discharge its duties as a watch dog with fidelity and success. The other evening a man came to the house on a suspicious errand, and the dog was down on him at once. But he did not bite him. He simply followed him up and down the yard growling and showing his teeth, and making all manner of hostile demonstrations till the poor man finding escape impossible, took refuge behind some empty casks in a shed, where the dog quietly besieged him. Some hours after, man and dog were discovered by the master of the house, who thinking he had caught a thief was about to summon the police, when he found that it was no thief, but only a harmless lover who had come on an errand of courtship to the fair lady of his fancy.

RAPID REPRODUCTION.

A STRIKING illustration of the rapidity with which attractive works of fiction appearing in England are reproduced in Canada and the United States is furnished by Mr. F. H. Balfour's work, "Dr. Mirabel's Theory." The book appeared in London in September, and at the end of October a cheap edition of it was for sale at the book-stalls in Montreal. That seems about as rapid as anying of the kind could be.

ARREST OF THE CHIEF OF THE SAGA POLICE.

THE arrest of Mr. Yamamoto, Chief of the Saga Police, has created a considerable sensation in the locality. Mr. Yamamoto occupied a similar post in Fukuoka before his recent transfer to Saga, and he was still living in a hotel at the time of his arrest, his family having remained in Fukuoka. On the evening of the 22nd ultimo, a judge and a public procurator of the Saga Local Court, with the chief of the Fukuoka Police Office, and more than a dozen constables, entered the hotel where Mr. Yamamoto was lodging, and showing him a warrant, immediately carried him away under custody to the Fukuoka Local Court. The same day, the house where his family were living was searched by several constables of the Fukuoka Police, and many documents are said to have been impounded. With regard to the cause of the sudden arrest of such an important official, nothing appears to be definitely known as yet. What is stated in the *Nichi Nichi Shimbun* as the most probable explanation is this:—When Mr. Yamamoto occupied the post of Chief of Police in Fukuoka, there occurred in the park of that city the assassination of Mr. Yamamoto Yoshisuke, an auditor of the 17th National Bank of Fukuoka and member of the permanent committee of the Hakata Chamber of Commerce. In the discharge of his duty, the Chief of Police took great pains to detect the murderer, but to no purpose. Finally he is said to have borrowed a sum of 1,600 *yen*, for the purpose of organizing a more thorough search. To borrow money in such a manner is considered objectionable on the part of a Chief of Police, the Authorities regarding it in the light of obtaining money under false pretences. Hence the arrest and concomitant measures.

THE TSUKIJI AFFAIR.

A STATEMENT was recently published in the vernacular press to the effect that a Secretary of the German Legation, while riding in a *jinrikisha* in the Tsukiji district of Tokyo, had been stopped by two inebriated students, who pulled him from the vehicle. On inquiry we learn that the story has been considerably exaggerated. The facts are these:—A student-interpreter of the German Legation was passing in his *jinrikisha* over Asahi Bridge in Kobikicho, on the night of the 27-28th of November, when his vehicle was stopped by three evidently drunken students, one of whom shouted "*gwaikoku-jin nara tomare*" (if it is a foreigner, stop!). Immediately afterwards the drawer of the *jinrikisha* was brought to the ground by a kick or trip, in the *Jujitsu* style, probably from the student who had uttered the shout, and while on the ground he received several blows. His assailant was about to transfer his attention to the occupant of the vehicle when the other two youths stopped him and apologized for his behaviour, explaining that he was under the influence of liquor. Meanwhile, a policeman had appeared, who took down the names of all concerned and arrested the three students. Two of them, on the following day, were fined 1,50 *yen* each, in accordance with Arts. 425-9 of the Criminal Code. Doubtless this affair was the proximate cause of the issue of a special instruction to the police of the capital on the 28th ultimo, published in the *Official Gazette* of the 1st instant.

A LOCAL WILL-CASE.

APPLICATION was made on Monday, in the U.S. Consulate-General Court, by Mr. T. M. Laffin for probate of the estate of the late Captain John McGuiness, of which he was sole executor. Mr. Seidmore, who appeared for Mr. Laffin, said that letters of administration had been granted on the 14th July, a thorough search of the deceased's papers was made and at the last moment a memorandum was found, written in lead-pencil, which was to the following effect:—"All I am worth to go to my natural daughter Nelly on the Island of Saipan, Marianas Islands N. Pacific, J. McGuiness." Communication had been opened with a brother of the deceased living in New York, asking whether he should contest this posthumous memorandum. A letter was also sent to the Marianas Islands and the little girl, who was only four years old, discovered. She was living under the care of Mr. Felix Torres at Guam. Mr. Mitchell, of Messrs. Samuel Samuel & Co., had been appointed by the latter gentleman representative for the child here. The estate had all been realised and converted into cash, and placed on deposit in the Hongkong and Shanghai Bank. Mr. Laffin wished to clear up the affair and accordingly applied to the Court so that he might render proper account to the proper persons. As no reply had yet been received from the deceased's brother, the further hearing of the case was adjourned till the 5th March, 1894.

POLITICAL TOPICS.

THERE is a rumour that Count Goto, Minister of Agriculture and Commerce, will resign and that his place will be taken by Count Itagaki. The *Nichi Nichi Shimbun* emphatically denies the truth of this report, and ascribes it to machinations of the opponents of the Radical Party. This and several other equally absurd stories now circulated about the Radicals are evidently a device for breaking up that Party so that out of the wreck may be re-built a party favourable to co-operation with the Progressionists and the *Domei* Club. These two together now number about seventy in the House, and if they can gain over to their side thirty of forty of the Radicals, they will be in a fair position to begin their attack upon the Cabinet. But such

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

a result can hardly be expected under present circumstances. For excepting the fourteen seceders from the Radical Party, the others who subsequently intimated their desire to separate themselves, will probably reconsider their position, now that Mr. Hoshi has left the Party. It is stated that Mr. Kono Hironaka is doing his utmost to preserve the *Jiyu-to* from disintegration.

* * *

The fourteen deserters from the Radical camp have formed themselves into a separate political body under the name of *Dosshi* (men of same aims) Club. They will probably work in concert with the Progressionists and the *Domei* Club.

* * *

There is a rumour of an understanding between the Progressionists and the National Unionists. This report is denied by the Progressionist papers. Whatever may be the attitude of the Progressionists, the National Unionists do not seem to be repugnant to such a step. On Friday last, a certain Radical member, speaking on the subject of the Address to the Throne on the Hoshi affair, had an opportunity to call the National Unionists by the name of *Ri-to* (Official Party), when Mr. Wada Hikojiro, a prominent member of the latter Party, cried from his seat that he and his comrades were no longer partisans of the Government. This circumstance may seem to be of little significance, but the manner in which Mr. Wada denied the allegation shows how impatient he and his friends are to clear themselves of the unpopular situation hitherto occupied by them. Evidently they glory in allying themselves on some questions with those directly opposed to the Government. The *Kokkai*, of which some members of the staff are believed to belong to the National Union, recommends an alliance between the *Kokumin Kyokai*, the *Kaishin-to*, and the *Domei* Club. Another significant fact is that the *Hochi Shimbun* urges the importance of a similar alliance. The Progressionist paper does not designate the particular parties which should be included in the alliance, an exercise of discretion which seems to show that the *Kaishin-to* would not be averse to the inclusion of the *Kokumin Kyokai*. For our own part, we are strongly inclined to doubt the possibility of such a combination.

THE AMATEUR THEATRICALS IN TOKYO.

We are requested to state that the Amateur Theatricals which recently took place in Tokyo, realized a sum of 1,230 *yen* net, which has been equally divided between the Industrial School at Sekiguchi and the Orphanage at Handa. This result is most satisfactory, and we may be permitted to express our hearty congratulations to the ladies and gentlemen who undertook the arduous task of organizing the entertainment, and to those whose kind and most attractive services were given at the eleventh hour to make good the unfortunate default of the Yokohama amateurs. As for the general public, doubtless we should be carrying out the wishes of the charitable promoters of the affair did we constitute ourselves the medium of conveying hearty thanks for the generous support it received, but truly the acting and the music were so exceptionally excellent that it becomes a little farcical to give credit to any one for enjoying such a treat.

MESSRS. DEAKIN BROTHERS AND CO., LIMITED

An extraordinary general meeting of shareholders in Messrs. Deakin Brothers and Co., Limited, was held in Kiel's Building, Yokohama, on Wednesday afternoon. Called for four o'clock it wanted a few seconds to the half hour ere sufficient shareholders were present to form the required quorum. They were Mr. J. Rickett (Chairman), Mr. A. B. Walford, Mr. C. W. Arnould, Mr. T. H. Box, Mr. C. K. M. Martin, and Mr. C. H. Fearon (Secretary). The Chairman announced the object of the meeting, which was to confirm the special resolution passed at the extraordinary meeting of the Company held on the 16th of November. The special resolution ran: "That the Company may from time to time reduce its capital." Mr. C. W. Arnould proposed that the special resolution be confirmed; Mr. A. B. Walford seconded the motion, and it was unanimously carried. This concluded the business of the meeting.

REGULAR MEETING OF THE NIPPON MAIL STEAMSHIP COMPANY.

The regular meeting of the Nippon Mail Steamship Company was held at the Kosei-kan, Kobikicho, at 10.30 a.m. on the 1st instant, Mr. Morioka, President of the Company, in the chair. About 400 shareholders were present, the unusually large attendance being caused by the importance of this meeting, as it was known that the re-modelling the Company's system on a new basis, in accordance with the New Commercial Codes, would be discussed. The Secretary of the Company read the following Profit and Loss account of the Company for the year ending the 30th of September:—

8TH REPORT OF THE PROFIT AND LOSS ACCOUNT

Income.	Yen.
Freight	3,362,471 499
Fares	626,838 826
Charges for ships loaned	110,104 865
Lighterage	135 312
Miscellaneous income	148,111 957
Subsidies on Special Navigation	18,200 000
Subsidy from the Government	880,100 000
Total	5,145,862 459
Outlay.	
Office Expenditure	359 601,696
Business Expenditure	1,002,645 551
Ship Expenditure	1,630,531 852
Balance of Interest to be paid	7,297 661
Miscellaneous	3,003 873
Total	3,003,080.633
Balance, profit	2,142,781.826
Rewards to officers	100,000.000
Allowance for wear and tear of ships	357.798 861
Allowance for Insurance	357,545 347
Allowance for important repairs	210,352 983
Toward supplementing deficient Insurance Reserves of the 7th (Previous) period	100,451.046
Toward supplementing deficient Reserves for important Repairs	60,270 628
Interests on the Company's Debts	128,021.510
To Reserve Fund	120,000.000
Dividend (8 per cent per annum)	704,000.000
Carried forward to the next account	3,441.451
Total	5,145,862,459

The above report, submitted by the Company's officers, was unanimously approved by the meeting. In comparing this year's report with those of previous years, it will be found that the Company's profits during the last six months are immensely in excess of those of previous years. Owing to a large increase in passengers and freights, and to the great reductions recently made in staff and working expenses, the profits of the last half year were 461,211 492 *yen* in excess of those of the previous period. After a short interval, the proposed amendments in the by-laws of the Company were explained to the meeting by the Secretary. When the Company was organized in 1885, there was a Government guarantee of 8 per cent. interest on the shares, the Government in return claiming the right of superintending the business, appointing the principal officers, and auditing the accounts of the Company, for the guaranteed period of 15 years from the inception of the Company. Such being the case, the shareholders had at present nothing to do but simply to receive information on the result of the yearly business. The duration of the subsidy having, however, been reduced to 8 years, instead of 15, and its annual amount to *yen* 880,000 irrespective of the yield of the Company, instead of a guaranteed profit of 8 per cent., it had long been deemed advisable to re-model the organization of the Company on a self-governing basis. In the absence of legislation or special sanction from the Government, however, it had not hitherto been possible to put this into effect, and so the old system had been suffered to stand. But as the provisional Commercial Codes had been put into force, it was now possible to amend the constitution of the company, the mode of appointing its officers, the superintendence of its business, the auditing of its accounts; to set forth clearly the rights and obligations which the shareholders of the company have in accordance with the general usage of stock companies and in obedience to the provisions of the Commercial Codes. After this statement, the proposed amended by-laws (the main points of which have already been mentioned in our columns), were read, and after a short discussion, and the rejection of one or two proposed amendments, accepted almost unanimously. The draft application for the Government sanction to the by-laws was then read and approved, and the meeting adjourned for tiffin. When the shareholders reassembled after luncheon, Mr. Morioka informed them that he had during the interval obtained the formal sanction of the Minister of State for Communications, and that the meeting was now in a position to proceed to the election of officers in accordance with the new by-laws. The officers to be elected were, eleven Directors and two Auditors, the salaries of the President and Vice-President (these officers to be elected by the Directors from their own number) and of the Directors to remain as heretofore; Directors undertaking other functions as well as their directorship, and Auditors, to receive an annual salary of 800 *yen*. Mr. Iwaya then proposed that the following gentlemen be elected Messrs. Morioka, Yoshikawa, Uchida, Asada, Kondo, Kato, Shibusawa, Nakakamigawa, Shioda, Isobe and Sonoda, as Directors; and Messrs. Abe and Yamamoto as Auditors. This proposal had been anticipated by everybody and was carried *nem con.* The following appointments have been made by the Directors. President; Mr. Morioka Masazumi. Vice-President; Mr Yoshikawa Taijuro. Directors, Messrs. Uchida Koji, Asada Seibun, Kondo Rempei, Kato Seigi. The remaining gentlemen have other duties as well as their directorship. The meeting closed about 1.30 p.m.

THE APOLOGY DICTATED TO MR. HOSHI TORU.

The terms of the apology which the Disciplinary Committee of the House of Representatives recommended that Mr. Hoshi Toru should be required to pronounce in open session, were as follow:—

> The words uttered by me in this House on the 29th day of the eleventh month of the 26th year of *Meiji*, when the vote of want of confidence in the President was about to be discussed, namely, "I consider these proceedings improper, and whatever decision may be arrived at, I do not think that I am under any responsibility to observe it," were wrong and unbecoming my office, and I beg to ask pardon for my fault.

Mr. Hoshi would doubtless have preferred expulsion to the indignity of offering an apology in such terms—terms that might be dictated to a school-boy standing with his face to the wall in disgrace. A week's suspension is a comparatively trifling penalty.

THE JUBILEE ADDRESS AT SHANGHAI

The Jubilee Address at Shanghai was delivered by Mr Muirhead, a Nonconformist Minister, who has been a resident of the settlement since 1847. Shanghai certainly did itself honour when it selected Mr. Muirhead for this purpose, and he appears to have acquitted himself in a manner worthy of the occasion, for the *North China Daily News* writes thus of this speech:—To those who were privileged to hear it, as well as to those who will read it, the magnificent address made by Mr. Muirhead was one of the great features of the Jubilee that will dwell longest in memory. It was a happy thought inviting Mr. Muirhead to be the orator of the day, and most happily did he carry out the duty imposed on him. He gave with an eloquence which kept his large audience hanging on his spirited words, in a voice which age cannot wither and which custom has strengthened and not staled, a review of Shanghai as it was—which no one was so fitted as he, our oldest resident, to give (he came here in 1847)—and as it is, and pointed out what we have still to do to justify our claim to be a leaven in the vast mass of China. It was a grand speech, grandly spoken. There are not many places which offer a

better site for such a function than this Settlement with its Bund and broad lawns sloping down to the river; and when the men-of-war fired the salute at noon, and the sailors and Volunteers their *feu de joie*, the spectacle, with myriads of flags and coloured lanterns to give more colour to the scene, and thousands of blue-coated Chinese massed in the roadways, was one which few who were present will ever forget. We may try and fancy to ourselves what Shanghai will be like fifty years hence, and imagine how 1943 will be observed; but it will be many years before we shall have a spectacle here to surpass the picture on the lawn on Friday, when the honoured white-haired orator was recalling to us what we have done and what we have still to do.

THE PRESS ON THE PREMIER'S SPEECH.

ONLY a few papers have commented upon the Premier's Speech of Saturday last, and even their remarks are of a cursory and fragmentary nature. The *Kokumin Shimbun* (friendly to the Progressionists) regrets that it is unable to discover the true nature of the Government's policy either from the past year's administration or from the Acting Minister President's speech last session, to which Count Ito referred the House on Saturday. If the experience of the past year teaches anything, it is, in the *Kokumin's* opinion, the fact that the Government has no fixed policy. As to administrative reforms, that is stated to be a separate question, concerning which our contemporary reserves its opinion.

* * *

The *Mainichi Shimbun* (Progressionist) expresses its disappointment at "the tasteless and matter of fact speech" of the Minister President. Alluding to the singular silence of the House on that occasion, our contemporary tries to conceal the true cause by remarking that "the members did not put any questions to the Premier, because there was nothing worth noticing in his speech."

* * *

The *Yomiuri Shimbun* (friendly to the Progressionists) states that the Government's policy remaining the same as last year, there will be no change in the Opposition's attitude towards it. With regard to administrative reforms, the *Yomiuri* admits that some improvements have been made in the Official Organization, but refuses to acknowledge any reform in the spirit of the Administration. Even in respect of reduction of expenses, the *Yomiuri* states that what the Ministry has accomplished falls far short of the Opposition's demands.

* * *

The *Jiyu Shimbun* (Radical) does not write editorially. But in a short note, it observes that a collision between the Cabinet and the Diet is unavoidable, as the former rests content with reforms which the latter consider insufficient. The Radical organ assures us that on this subject its Party will be far stronger than "parties which habitually sacrifice national interest on the altar of private ambition."

THE BUDGET AND THE HOUSE OF REPRESENTATIVES.

THE House of Representatives in past sessions has invariably adopted the report of the Budget Committee in dealing with financial questions. To know the basis adopted by the Committee in preparing its report is, therefore, to know the decision which the House will take. The Committee consists, by law, of 45 members, and, as we stated in a previous issue, its constitution this session is 17 *Kokumin Kyokai* (National Union) and 28 *Jiyu-to* (Radical members). It is the custom of the Committee to commence proceedings by appointing a sub-committee, called the *Hoshin-kin*, or "policy committee," that is to say, a committee to determine the general policy which shall be pursued in drawing up the report. Some delay has been caused this session owing to a blunder of the sub-committee: it prepared its programme of policy on the basis of estimates from which the reductions of expenditure resulting from the recent administrative reforms had not been subtracted. The consequence was that when the Budget Committee assembled to hear the sub-committee's recommendations, the error was at once detected, and directions were given for the preparation of a new programme of policy. This has now been compiled, and has received the approval of the Committee, thus becoming the basis upon which the report to the House will be drawn up. The programme indicates that the Opposition's resolve to fight with the Government remains unaltered, and that the Budget, despite the large reductions already effected in the ordinary expenditure, is again to become a weapon for attacking the Cabinet. The programme runs as follows:—

1.—Reduction of Official Salaries.

(*a*) The salaries of High Class Officials and of *Hannin* Officials shall be reduced in approximate accordance with the accompanying table.

(*b*) The present official establishment, as fixed by the recent administrative reforms, being the maximum establishment, due reductions of numbers shall be made, the nature of the functions to be discharged by each office being taken as a basis of calculation.

(*c*) The pay of Officers of the Army and Navy of staff rank shall be subjected to due reductions according to the standard employed in the case of Civil Officials.

2.—The Building Expenses demanded for each Department shall be duly reduced after full investigation.

3.—The same rule shall be applied to Travelling Expenses.

4.—Miscellaneous Expenditures shall be reduced according to the figures adopted in the Committee's Report last session.

5.—Office Expenses shall be reduced according to the figures adopted in the Committee's Report last session.

6.—With regard to the Secret Service Fund, the appropriation on account of the Cabinet shall be altogether disallowed, and the appropriations for other Departments shall be calculated on the basis of last session's Committee Report.

7.—No appropriations on account of New Works shall be allowed except in cases of absolute necessity.

8.—The contribution of one-tenth made by officials from their salaries shall not be included in the official salaries shown in the Budget.

TABLE OF REDUCTIONS OF SALARIES.

THE TREATIES.

THE following Questions have been submitted to the Government in the House of Representatives:—

QUESTIONS ON THE ENFORCEMENT OF THE EXISTING TREATIES.

It is a generally accepted truth that the primary object of an international treaty is to give assurance of amity, and to facilitate trade and intercourse, between the contracting parties, thereby at the same time contributing to maintain peace and tranquillity in each of the countries concerned. The principal aims of a Government's foreign policy should, be, on the one hand, to secure the confidence of the people at home and, on the other, to win the trust of foreign nations, so that the country's prestige abroad may be properly maintained. In short, there must be some definite and original purpose in a country's foreign policy. History may differ as well as forms of civilization when we pass from the East to the West, but there has never been in ancient or modern times an instance of a country, except the very weakest, which has tried to maintain peace by sacrificing its original rights and individuality for the sake of other nations.

A treaty of amity between one nation and another derives its force from well established principles of international law, and in its finding strength it may be compared with the constitution of the countries concerned, while the various other conventions accompanying the treaty, such, for instance, as the conventions relating to Jurisdiction and Tariff, may be likened to the ordinary laws of the land. These treaties and conventions, therefore, must be carefully observed by the contracting parties for the sake of their mutual benefit. Turning now to our own country, can it be said that our foreign policy has been so shaped and the treaties so enforced as to maintain the country's prestige and promote its interests? Unfortunately the subject of the encroachment of foreign countries upon the sphere of the original rights of the country is now a topic of common talk among all classes of the nation, and facts suggesting unfavourable treatment are frequently brought to light. This is the reason why, in accordance with Art. 48 of the Law of the Houses, we put the following Questions to the Government:—

I.—Is the Government prepared to declare, with responsibility, that the existing treaties are in full force both in name and in reality? It is well acknowledged that the existing treaties are imperfect and at variance with the generally accepted principles governing the intercourse of nations. But so long as they are unrevised, we have to abide by them. Do the existing treaties, however, possess the same binding force as common legal provisions, and if so, is their binding force actually and fully recognised in practice. Have not the sovereign powers of the country been impaired even within the limits of the existing treaties? For example, the jurisdiction which foreign consuls are allowed to exercise in consequence of the extraterritorial clause, ought to be confined to the adjudication of law suits between the Japanese and foreigners. But in point of fact, foreign consuls exercise a part of the administrative power in the foreign settlements, with the result that our local authorities are unable to enforce their orders there. Under the circumstances, the foreign settlements present the appearance of being nothing more than colonies of foreign nations. In the foreign settlements of Kobe and Yokohama, a special system of police is maintained, while at the former place even a system of self government has been granted. In the face of these facts, is the Government prepared to declare, with responsibility, that the existing treaties are in full force both in name and in reality?

II.—Is the Government prepared to declare that, in respect of the enforcement of the existing treaties, it has properly discharged it duties of direction and supervision? It is an open secret that foreigners forsees lands and houses outside the Settlements. Punishmen is never meted out either to these foreigners or to those who violate the express stipulations of the treaties with respect to leasing land or renting houses, partnership in business, journeying in the interior, and the limits of free travel? Can the Government still declare that, in respect of the enforcement of the existing treaties, it has properly discharged its duties of direction and supervision?

III.—Why does not the Government take upon itself the responsibility of strictly enforcing the existing treaties?

What has thus far been stated discloses serious violations of the existing treaties and encroachments upon the sovereignty of the Empire. Why does not the Government deal strictly with these offences and rigidly enforce the existing treaties? The foreign Powers concerned are also responsible for observing the stipulations of the treaties. Why then does not our Government take upon itself the responsibility of strictly enforcing the existing treaties?

The above questions are preferred in accordance with Art. 48 of the Law of the Houses.

[Introducers]	KAWASHIMA JUN, and three others.
[Supporters]	OHIGASHI GITETSU, and twenty-nine others.

Dated 4th December, 1893.

THE SINGAPORE FIRE.

THE damage done by the fire at Singapore on the 15th ult. is estimated, says the *Daily Press*, at close on half-a-million dollars. The buildings destroyed were situated along Bonham Street (just off Raffles Square) and on Boat Quay, and most of the block was gutted. The firms occupying the godowns were Katz Bros., and the Singapore Ice Company; Valtriny and Co.; J. C. David; and Gregory Moses, whose godown turns out of Bonham Street, on Boat Quay, connecting with the godown of Hooglandt and Co. Messrs. Katz Bros. have been the most fortunate, for their damage is comparatively slight compared to that of other firms. The fire took the whole block with the exception of a small corner, by Bonham Street and the Quay. The buildings, which were the property of Mr. Tan Jiak Kim, were not insured, while, in every other case, with the exception of that of Mr. David, the insurances are pretty extensive. Mr. Tan Jiak Kim intends to proceed with the rebuilding of the property at once. The Straits Fire Insurance Company estimate their net loss to be somewhere about $13,000. All the other insurance was in home offices.

ANOTHER FAR EASTERN CABLE.

ALL negotiations in connection with the duplication of the cable between Hongkong and Singapore have been concluded, says the *China Mail*. The new cable will go from Hongkong *direct* to Labuan, thence to Singapore costing, roughly, £300,000, and is being laid by the Eastern Extension Telegraph Company, with the object of affording additional security of communication without practically increasing the Telegraph Company's revenue. The cable-ship *Recorder* belonging to the same Company, left Singapore the other day to repair the line between Hongkong and Haiphong. When this work is completed, she will come in to Hongkong to renew a portion of the cable to Macao and then proceed to take soundings between Hongkong, Labuan, and Singapore preparatory to the laying of the duplicate cable which is expected to be completed and opened for traffic early next summer.

THE HOSHI AFFAIR.

THE Hoshi affair has ended in the suspension of Mr. Hoshi for one week. The recommendation of the Disciplinary Committee was that he should be required to apologise in open session for his contumacious language, it being well understood that such a penalty would have borne very hard on a man of Mr. Hoshi's character. Indeed, when the Committee's decision was made known to him, he is said to have declared that expulsion from the House would have been preferable. He was saved the indignity of an open apology, however, for when the committee had made its report, a member moved an amendment that the suggested penalty should be changed to a week's suspension. Mr. Hoshi doubtless welcomed the change. But assuredly he will now resign his position of President. Indeed, his resolve to do so was formed some days ago, it is said.

THE PRESS ON THE ADDRESS ABOUT OFFICIAL DISCIPLINE.

THE Address to the Throne on the subject of official discipline, which was passed by a large majority in the Lower House on Monday last, has been warmly approved by the party organs. These papers, especially those belonging to the Progressionist Party, insist on regarding the Address in the light of a vote of want of confidence in the Cabinet as a whole. But it does not appear that they wish for the resignation of the Ministry, since they confine themselves to urging upon Count Ito the necessity of advising the Emperor to remove Count Goto from his Ministerial post. The *Mainichi Shimbun* reminds the Cabinet of the disastrous consequences of the ill-advised support which the Radicals have persisted in giving to Mr. Hoshi, and tells it that similar results will follow if it endeavours to shield Count Goto from public attack. Count Ito is warned against the folly committed by Count Itagaki. The *Hochi Shimbun* lays much stress upon the fact that the motion for the Address was introduced by National Unionists. That circumstance alone, it says, ought to convince the Cabinet of the altered state of affairs in the political world. The *Kokumin Shimbun* regrets that the Address passed almost unopposed, for had there been some powerful opponents to its passage, its supporters would have had better opportunities to give full expression to their ideas on the subject of official discipline. As it is, the easy passage of the motion failed to arouse public attention and interest as it ought to have done. However, our contemporary

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

consoles itself by reflecting that the one-sided character of the affair affords incontrovertible evidence that the alleged misconduct of the Minister of Agriculture and Commerce is unanimously condemned by the public voice.

* * *

The *Nichi Nichi Shimbun* strongly criticises the Lower House's rashness in approaching the Throne on this subject without first endeavouring to attain its object by direct communication with His Majesty's Ministers. If the Ministers failed to give satisfaction, then and only then would the House have been justified in adopting the extraordinary course of appealing to the Sovereign. Moreover, the Address mentions no facts to support the serious charges it prefers against one of His Majesty's Ministers, so that the Emperor is left entirely without anything to guide his judgment. The document is also denounced as extremely ambiguous. It may be read as an accusation of only one particular Minister, or it may be taken as a condemnation of the Ministry in a body. On the other hand, the *Nichi Nichi* regrets that no Ministers of State attended the House on the occasion to oppose the passage of the Address by disproving the serious charges contained in the document, for the Cabinet's silence may be erroneously construed into a tacit acknowledgement of the justice of the course taken by the Lower House. The *Nichi Nichi*, however, thinks that the charges brought against the Minister of Agriculture and Commerce are not entirely without foundation. It is also constrained to state that, in its opinion, the Cabinet is not altogether free from the charge of negligence in respect of official discipline. Thus the whole tenor of our contemporary's article is to advise the Cabinet to take some decisive step with reference to the alleged irregularities in the Department of Agriculture and Commerce.

* * *

The *Jiji Shimpo* condemns the Lower House for having concerned itself with a matter which does not lie strictly within the proper sphere of its action. For the subject dealt with in the Address being a moral question, the House had better have left it alone. Not that our contemporary is indifferent to moral questions; on the contrary, it sincerely deplores the complete decadence of the high tone of morality obtaining under the feudal régime. No one regrets the circumstance more deeply than the *Jiji*. But it asks the House of Representatives whether it really thinks itself so pure and virtuous as to be qualified to sit in judgment on the moral failings of others. There are doubtless many virtuous men in the House, but can the majority claim exemption from charges of moral laches similar to those preferred against the Minister of Agriculture and Commerce? Our contemporary earnestly wishes that the members of the Diet would better regulate their own conduct before presuming to blame other people

SOUVENIR OF THE "ROBERT L. BELKNAP."

THE Sultan of Lingga has been presented with a handsome silver trophy by the President of the United States, says the *Daily Press*, for kindness shown to the crew of the American vessel *Robert L. Belknap* when they were wrecked on the Natunas Islands in 1893. The inscription borne by the trophy is:—From the President of the United States to Abdall Rachman Maadlam Siab, Sultan of Lingga, Rhio and Dependencies, in recognition of his humane services to the crew of the American ship *Robert L. Belknap*, wrecked in January, 1893.

MR. TAKANASHI TETSUSHIRO.

THE motion which Mr. Takanashi Tetsushiro asked leave to introduce on the plea of urgency namely, that ingress to the House of Representatives should be forbidden to Count Goto and Mr. Saito Shuichiro, Minister and Vice-Minister respectively of Agriculture and Commerce, was so obviously unconstitutional that we marvel at the Vice-President's complacency in permitting Mr. Takanashi to ascend the rostrum for such a purpose. The Law of the Houses emphatically states that Ministers of State and Government Delegates are competent to enter the Houses at any moment, and address the members. To deny ingress to the Minister of Agriculture and Commerce by a vote of the House would have been a direct violation of the law. No ingenuity could climb round that plain fact, and if ever a presiding officer's authority should have been exercised to interdict a breach of order, the occasion was that of Mr. Takanashi's motion But the present Vice-President of the House of Representatives has not yet distinguished himself for firmness or ability to preserve discipline.

* * *

Mr. Takanashi Tetsushiro is a remarkable figure in the House. In appearance he is distinguished from all the other members by an extraordinary head of hair; beautiful hair it must be admitted, but hanging in such masses to his shoulders and framing such a round, gentle-looking face that one is perpetually beset by the delusion that a woman sits among the representatives. He is perhaps the most finished orater in the House. Mr. Inouye Kakugoro excels him in power and pathos, and Mr. Shimada Saburo in command of erudite diction. But for graces of gesture, charm of elocution, and neatness of style, Mr. Takanashi stands prêem nent. We have heard him descend to the grossest vu garity; or, to speak more accurately, we have heard him employ anguage such as might have been expected from an English navy. But nature in Japan is often nature unadorned. Besides, despite an occasional lapse, Mr. Takanashi in anything rather than vulgar. For the rést, he is a barrister and consequently competent to interpret the plain significance of a law. At no moment can he have been in any doubt as to the hopeless illegality of his proposal last Monday. But he wanted an opportunity of abusing Count Goto and Mr. Saito from the rostrum of the House, and the incompetence of the Vice-Presiden, seconded by the House's willingness to listen to any attack on a Cabinet Minister, gave him the occasion he desired. Parliaments that command public respect are not composed of such *farceurs*.

MR. HOSHI TORU.

MR. HOSHI is entitled to the sympathy of every sober-minded person on account of the bitter and unceasing persecution of which he still remains the object. Mr. Fukuzawa Yukichi, the venerable editor of the *Jiji Shimpo*, doubtless expressed the sentiments of the educated classes outside party circles, when, if we may believe a story that has appeared in print, he asked Mr. Inouye Kakugoro to convey his advice to the President of the House of Representatives never to yield to the unreasonable pressure brought to bear upon him by his political enemies. It had been understood that Mr. Hoshi would resign after the passage of the Address to the Throne, the motive assigned to him being a desire to avert the threatened disruption of his party. But when it became evident that even such a sacrifice would fail of attaining the desired end, he reconsidered his intention to resign. Subsequently, seeing his party was in danger of a further split, he adopted the manly course of himself withdrawing from its ranks, so that, without compromising his own honour, he might save the *Jiyu-to* from the threatened calamity, conduct perfectly in unison with the spirit of chivalry that has characterized his career, private and public. Being now perfectly free to act entirely according to his own inclinations, it is understood that he will resume the Presidential chair on the expiration of the period of one week during which he has been suspended as a disciplinary measure for having defied the House from his seat. Meanwhile his enemies are indefatigable in planning schemes to prevent him from carrying out his intention. Their object in handing him over to the Disciplinary Committee was to contrive his expulsion from the House altogether, and they hoped that the anticipated disintegration of the Radical Party would give them the two-thirds majority required for such an extreme measure. Disappointed in that hope, however, they had to fall back upon a motion to exclude him from the House for a week, their object, according to good authority, being thus to gain time for considering what further method of procedure should be taken. They have never abandoned their hope of expelling him, and zealous endeavours are being still made to obtain the necessary majority of two-thirds. There being, however, little chance of success in that direction, the crafty politicians of the Progressionist Party and the *Domei* Club have now under contemplation the introduction of a motion the absurdity of which exceeds the whole record of Parliamentary blunders in Japan. The motion, as published by the *Mainichi Shimbun*, is as follows:—"Our House having resolved that it places no confidence in its President, the function of his post shall be discharged by the Vice-President." In support of this extraordinary motion, the Progressionist organ refers to Art. 13 of the Law of the Houses, which provides that "in each House, in the event of the disability of the President, he shall be represented in his functions by the Vice-President." The orginal Japanese word for "disability" is *koshō* which, over and above the meaning in which it is evidently used in the text, signifies also "obstacle" or "objection." By straining the import of this word, the *Mainichi* maintains that the fact of the Lower House having passed a motion declaring want of confidence in the President, constitutes a most serious obstacle to his discharge of the duties of his post. It is scarcely necessary to point out the obvious injustice of such a rendering of the provision in question. The cases of disability contemplated in the article are sickness, criminal prosecutions, or any other circumstance which, either from personal or public reasons, prevent the President from attending the House. A vote of want of confidence passed by the House itself, has no binding power upon him and can never theoretically prevent him from discharging the duties of his post. There is thus nothing to justify the course contemplated by the Progressionists. The National Unionists are reported to be averse to such an unwarrantable measure, and as the Radicals will likewise oppose it, the House will at the worst be evenly divided, should the motion be introduced for discussion.

UNITED MEETING FOR THE AMENDMENT OF THE PRESS REGULATIONS.

A UNITED meeting of journalists from the Capital and the provinces, for the amendment of the Press Regulations, was held at the Kinkikan, Kanda, on the afternoon of the 3rd instant. Mr. Shigeno, organizer of the meeting, first addressed the crowded audience, some two thousand in all, on the object of the meeting. He was followed by Mr. Kirihara Sutezo, of the *Kaishin Shimbun*, who spoke on the subject of the Disturbance of Public Tranquility and the Suspension of Publication, and argued in strong terms that the Government is liable to confuse Disturbance of Public Peace with Disturbance to the Government. Mr. Kuwabara Keiichi, of the *Keisai Zasshi*, who was the next speaker, observed, on the topic of the suspension of newspapers and periodicals, that the suspension far from being efficacious of any good, is rather productive of the reverse, in that it evokes the attention of the public and so conduces more to the so-called disturbance of public tranquility. The right of suspending publication was the subject upon which Mr. Yamazaki Chizen, of the *Jiji Shimpo*, chose to speak. He based his argument on the Constitution of the Empire and dwelt on the impropriety of leaving so sacred a right to the control of imperfect executive officials. Mr. Ichijima Kenkichi, of the *Yomiuri Shimbun*, took up the topic of the Suspension of Publication and the strict enforcement of Official Discipline, remarking that a many paragraph which is regarded as an object for censure is really traceable to the decay of official discipline, and he therefore called upon the Government to preserve official discipline from relaxation rather than to attempt to suspend the publication of papers. Mr. Yamaji Yakichi, of the *Kokumin Shimbun*, argued that the bulwark of free speech and discussion should never be assailed with petty

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

rules or regulations. The next speaker, Mr. Kusakabe, of the *Meiji Shimbun*, directed his eloquence against the House of Peers, members of which he described in very strong terms as, "servile followers" of the Clan Government, "animals revelling in ease and luxury," &c. Mr. Mizoguchi Ichijiro, of the *Yiyu*, ascended the platform after Mr. Kusakabe had finished. His subject was "How to maintain a Sound Constitutional Government." His argument was that there is nothing so efficacious as public opinion for remedying the diseases to which the State is liable; that the newspaper is the best medium of reflecting this opinion; and that the result of suspending the publication of organs so important to the mechanism of society is simply the encourgement of a secret press. The last speaker of the day was Mr. Minoura Kasudo, of the *Hochi Shimbun*. He pointed out in the beginning of his speech, the great injustice done by the suspension of publication, considered merely as a legal punishment, for while even for offences of so grave a nature as subversion of the laws of the country, the penalty is only the imposition of a fine of about 300 yen, the suspension of publication on the ground of so-called disturbance of the public peace amounts in practice, to the infliction of a loss of from three to four thousand *yen*. The right of freedom of speech, publication, and meeting secured to the Japanese people by Art. XXIX. of the Imperial Constitution, is, said the speaker, only partially enjoyed owing to the continual encroachments made upon it by this law and that. The Press Regulations now in force might be regarded as an instance of laws precluding the people from satisfactorily enjoying the rights secured to them by the Constitution. The Regulations, said he, are clearly at variance with the spirit of the Constitution, and it is on the ground of their being unconstitutional that they should be done away with. To oppose the amendment of the Press Laws, he concluded, is to go contrary to the spirit of the Japanese Constitution, and to constitutional government in general.

BANKERS ENGAGING IN MERCANTILE TRANSACTIONS.

Mr. Kawada Koichiro, President of the Bank of Japan, has pointed out a custom prevailing amongst Osaka merchants of combining banking with business enterprises, a remark which, observes the *Kokkai*, should be extended to Tokyo also where this undesirable practice is far more prevalent than in Osaka. Mr. Shibusawa Eiichi, of the First National Bank, Mr. Yasuda Zenzaburo, of the 3rd, and Mr. Yamanaka Rinnosuke, of the Tokyo Branch of the 32nd National Banks, are cited by our contemporary as noteworthy instances of bankers and business men combined. Mr. Shibusawa appears to have been convinced of the evil attending this practice, for he seems to be endeavouring, as far as circumstances permit, to break off his connection with business enterprises. But for all this, his connection with business not directly related to banking is still extensive; and his interest in spinning, ship-building, paper-making, gas, and coal enterprises, is very well known to the business world. Mr. Yasuda is also well known to the same community as being connected with insurance business of various kinds. Now the funds which these gentlemen employ for such enterprises must, according to the general surmise, come from the banks under their control. If so, it follows that as bankers they are to be regarded as creditors, while as promoters of business enterprises they must be considered as debtors, a state of affairs which can only end unsatisfactorily. These gentlemen are trying to reconcile conflicting interests; for whilst the merchant is anxious to get his money at as low a rate of interest as possible, and with terms of re-payment as easy as they can be, the banker is naturally endeavouring to get the very opposite. It will therefore be very hard for Messrs. Shibuzawa and Yasuda to escape from the difficulties of their inconsistent position, and they are certainly liable to serious misrepresentation. The article concludes by insisting on the necessity of the bankers holding themselves aloof from business speculations. It also states that its criticisms may be applied to several banks in Yokohama.

ST. HILDA'S BAZAAR.

It has been decided to hold a Bazaar in aid of the St. Hilda's Dispensaries on Saturday, the 16th instant, in the School Room, No. 11, Sakaecho, Shiba, Tokyo. The ladies of Tokyo have spared no pains to make the Bazaar attractive, and we learn that the articles offered will include dolls, children's dresses, cushions, lace, water colour sketches, books, and many other objects desirable on their own account and suitable for Christmas presents. These bazaars are free from all the features that so often prove deterrent in like cases, for the prices of the articles are moderate and no undue pressure is brought to bear upon reluctant purchasers. Some of the things for sale have been obtained from Europe, and others are the work of the ladies of the Guild at their fortnightly meetings or in their own homes. Music is also promised, and from every point of view the affair deserves public patronage. The following ladies of the Guild are assisting at the Bazaar:—Mrs. Bickersteth, Mrs. Brinkley, Miss Ballard, Mrs. and Miss Black, Mrs. Duer, Mrs. Dewette, Miss F. Dening, Miss Glover, Miss Hayes, Mrs. James, Mrs. Kirkwood, Mrs. Mason, Miss Mair, Mrs. Nishigawa and the Misses Nishigawa Mrs. Pownall, Miss Ranken, Mrs. Sannomiya, Mrs. Seymour, Mrs. Schurr, and Mrs. Squire.

CHINA NOTES

A telegram received in Shanghai on the 29th ult. from Soochow by the native officials, announced the sudden death of Mr. Wang, the new prefect of Soochow, who was transferred only about six weeks ago to that post from Chinkiang where he was popular with both foreigners and natives.

* * *

A telegram from Peking announces that H.E. Kung Chao-yuan, Minister-elect to Great Britain, France, Italy, and Belgium will not start for the South until about the middle of January next, when His Excellency will go overland to his native town of Lüchowfu, province of Annui. As far as can be judged, writes the *N.-C. Daily News*, the new envoy will not be able to leave China for Europe very much before the end of April, 1894.

* * *

France is organising in Shanghai a political, geographical, and commercial mission to Chungking, under the leadership of Mr. Haas, French Consul at Hankow, who has just returned from leave. The *Daily News* understands that it is to start after the arrival from home of the next French mail, by which some additional members of the mission are expected. An interpreter from the French Consulate-General in Shanghai is to be one of the party.

A BILL RELATING TO THE TREATIES.

The Tokyo News Agency reports that a meeting has been held by the members of the *Seimuchosa-jo*—a small political coterie in the Lower House consisting of Messrs. Abei, Komachi, Arai, Sakata, Wakahara, and a few others—for the purpose of drafting a Representation to the Government on the subject of the strict enforcement of the Treaties. Accompanying the Representation is to be a project of law for dealing with foreigners who oppose the efforts of the authorities to carry out the letter of the Treaties. So, at least, we read the report of the News Agency, but the story of the project of law is perplexing. At any rate, it is stated that these measures are to be introduced to-day.

COMPETITION OF THE P. AND O. COMPANY WITH THE NIPPON YUSEN KAISHA

The P. & O. Company has at last, so the *Shogyo Shimpo* informs us, entered into competition with the Nippon Yusen Kaisha with regard to the freight of goods between Bombay and Yokohama. Our contemporary says that on the afternoon of the 1st instant, it received the following cablegram from its Bombay correspondent, dated the afternoon of the 30th ult. The P. & O. Company has decided to enter into competition with the Nippon Yusen Kaisha, and has therefore reduced freights on cotton to 8 rupees per ton, while for contract customers freights have been further reduced to 6 rupees. Commenting on this, the *Shogyo Shimpo* says that the great reduction in P. & O. freights may be considered as a first result of the new line to Bombay recently started by the Nippon Yusen Kaisha. As the reduction has for some time past been anticipated, it takes no one by surprise; but our contemporary points out that it must have a great effect in extending the commercial intercourse between Japan and India.

PRINCE KONOYE ON THE PEERS.

Prince Konoye delivered a very interesting lecture at the last meeting of the *Kokkagaku-Kai*, the subject which he chose being "The Peers." The Prince commenced by observing that the peers are commonly spoken of as a "bulwark of the Throne," but that most persons are ignorant of the meaning of the phrase. What constitutes a "bulwark of the Throne" was clearly pointed out by the Imperial Instructions issued in 1871 and 1884. It was there laid down that the peers should be strict in their conduct, should properly regulate their domestic affairs, and should, by taking due thought for the public interest, endeavour to become models of life to the common people. The Court had even condescended to enact measures such as might assist the peers to give practical effect to the idea involved in the principle of being bulwarks of the Throne. In the first place, the Prince went on, there were the Admonition Regulations for the Aristocracy, which provide suitable correctionary treatment in the event of any peer having committed an action unbecoming his position or calculated to bring discredit on his order. Another provision working in the same direction was that of hereditary property. But despite the care thus exercised by the Court on behalf of the peers, the Prince was of opinion that they were very far from satisfying the definition of being bulwarks of the Throne. In the first place, he declared them palpably deficient in spirit and courage. To this defect he attributed their haughty demeanour towards the common people, on the one hand, while, on the other, they cried very small in the presence of even petty Government officials. Until they learned to appreciate the honour attaching to the station in which they were born, and to count themselves a highly privileged class, they could never display the spirit appropriate to true nobles. The Prince had a great deal to say about the dignity of the peers as a class. Many nobles, plausibly pretexting a desire to become acquainted with the actual condition of the lower orders, did not hesitate to follow courses of action unbecoming to their position. They sacrificed their dignity to the ambition of being counted "clever men." The haughty bearing of old feudal days was not to the Prince's taste, but he nevertheless preferred even that to the vicious fashion of purchasing a reputation for smartness at the cost of the dignity attaching to a peer's rank. Nothing had contributed more to degenerate the tone of the aristocracy than the shallow ambition to be styled "clever." He then dwelt briefly on the course of procedure which the aristocracy should pursue, pointing out, by way of illustration, that to engage in some business such as might serve for a model to the people at large was the simplest and most effective plan. He spoke very slightingly of the political acumen or activity shown by them. When there was question of electing a candidate for the House of Peers, only a small fraction of the nobility took any interest in the matter, or gave themselves the trouble to cast their votes. Generally they gave their suffrages to whatever candidate happened to call first on them for the purpose of soliciting their support. Some on the other hand, appeared to subserve politics to philanthropy, for they cast their votes for the candidate whose pecuniary circumstances were least flourishing. Members of the House of Peers who owed their election to such strange methods of choice were naturally very far from reflecting credit on their order. They were

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

simply a superior class of hired labourers. They stood up and voted exactly as they might be directed by the wire-pullers, without understanding a word of the bill or measure under discussion. A House containing even a small proportion of such members, was liable to be manipulated by the Government, despised by the Representatives, and disregarded by the nation.

* * *

Prince Konoye omitted to show why a House of Peers containing a section of incapables such as he described, should be more liable to be manipulated for Government purposes than for the purposes of clever political leaders like himself. He has his own following in the House. Apparently it is not large enough to satisfy him.

THE MINISTER OF STATE FOR EDUCATION AND THE BUDGET COMMISSION.

A SCENE such as might be repeated with advantage on various occasions, took place yesterday at the session of the Budget Committee. It having been intimated by the Committee that they desired information with regard to the recently accomplished reforms in the Administrative organization, three Ministers of State, the Ministers of Finance, Justice, and Education, together with a number of Government delegates attended the Committee's meeting. After many queries had been addressed to the Ministers and Delegates and answered by them, Dr. Hasegawa addressed himself to the Minister of State for Education. Dr. Hasegawa is a well known man. During the whole time of his service in the Diet he has laboured assiduously, and with a certain measure of success, to bring discredit on the House of Representatives and to demonstrate practically what a burlesque can be made of parliamentary functions if they be treated with thorough irresponsibility and in a genuinely light-hearted manner. It was that gentlemen who pronounced all the old foreign employés of the Government to be worn out and antiquated, and urged the advisability of replacing them by new men, and it was he that last session called the Educational Department a *bake-mono-yashiki*, or haunt of uncanny beings. Yesterday his question to the Minister of State for Education was:—"The Educational Department is useless and mischievous. Why did not the Committee on Administrative Organization reform or abolish such a useless and mischievous institution?" Of course this question was merely vindictive impertinence. There cannot have been any idea of eliciting genuine information. Dr. Hasegawa simply desired to insult the Minister with impunity. Mr. Inouye, it is said, became very angry. "As to the Educational Department being useless," he replied, "that is a matter variously viewed by various persons. I cannot find fault with the expression. But the assertion that the Department is" mischievous" (*yugai aru*) it is a piece of rudeness. I beg that the President of the Committee will call for its withdrawal, or, if that be impossible, that the Committee as a whole will exercise its authority." This request of the Minister not being granted, he became still more indignant and addressed the Committee thus:—"The Government having shown all proper courtesy in attending here at the desire of the Committee, and answering its its questions, have a right to expect that the Committee will treat them with corresponding consideration. Yet I find that a section of the Government the Department of Education, is rudely spoken of as 'mischievous.' I decline to continue in attendance at a meeting where such discourtesy is shown." Thereupon the Minister withdrew. It is heartily to be wished that other Ministers would follow Mr. Inouye's example. Then perhaps, the members of the Lower House might learn that insolence and rudeness are both unbecoming and ineffectual.

MR. ABE. IWANE.

MR. ABEI IWANE is the oldest member in the House of Representatives. He appears also to be the most stubborn. It was he that introduced the vote of want of confidence in Mr. Hoshi Toru, and it is he that stands at the head of the anti-mixed residence coterie in the House. People say that he is now a very irate man. For although his assault upon Mr Hoshi—if even it can be called his assault who was only a figure-head—succeeded so far as to secure the House's assent to declare want of confidence in the President, the results of the affair appear to be absolutely *nil*. Mr. Hoshi remains President, and rumour attributes to him the fixed intention of resuming his seat at the expiration of the week during which he has been suspended. In view of this abortive ending to his campaign, Mr. Abei is exceedingly disquieted. The *Mainichi Shimbun* represents him as declaring that he should feel quite too much humiliated were he called upon to sit again under such a President, and that if Mr. Hoshi resumes the chair, he, Mr. Abei, will at once resign his seat. His comrades of the *Seimu Chosa-jo*, says the same authority, are exerting all their influence to calm him, and, in the event of his remaining obdurate, have conceived the idea of getting a majority in the House to restrain him. For that purpose, they are busily canvassing the members of the *Kokumin Kyokai*. We sincerely hope that they will not succeed. For the credit of the House of Representatives, the best thing that could happen would be the resignation of Mr. Abei and some of those who stood on his side in the recent fiasco.

TROUBLE AT BANGKOK.

SOME further trouble seems to be anticipated in connection with the Franco-Siamese affair, says the *Hongkong Daily Press* of the 28th ult. The *Swift*, which only arrived from Bangkok on Saturday, is under orders to return, and the *Severn* left last night. The *Pigmy* has also received orders for the same destination. Several other vessels are expected to follow and great activity prevails at the Dockyard in connection with their fitting out. Several Chinese gunboats are reported to be on their way to Bangkok. Nothing has transpired as to the nature of the trouble that is supposed to have arisen.

LOSS OF THE "SCHLIEMANN"

THE German steel ship *Schliemann*, Captain Sander, laden with 70,000 cases of kerosene from New York, consigned to Messrs. Isaacs and Bro., Yokohama, has become a total wreck. She had made a remarkably good passage for the time of year, 135 days out, when she struck the rocks on the West side of Vries Island. The *Saikio Maru*, Captain Conner, passed her later the same day, Friday, but being a mail-packet could not stop, further than to take off the Captain. She brought him up to Yokohama, and early next day a wrecking party, including Mr. W. H. Hardy and Mr. T. M. Laffin, went down the Bay to the scene of the wreck in the *Yokosuka Maru*. When they reached the vessel they found she was past assistance and was rapidly breaking up. The crew were all saved and brought up to Yokohama, when the ship was left to her fate. The beach around Vries Island is covered with cases of kerosene and other *débris* of the wreck.

MORE RECORDS BROKEN.

THE *Lucania* and *Campania* have each broken the record across the Atlantic, one making the eastern and the other the western passage:—

New York, November 3rd.

The Cunard steamship *Lucania* arrived off Fire Island at 7.37 and crossed the bar at 9.19 o'clock to-night, making the run in five days, eighteen hours and fifty four minutes. This beats all western records by twenty nine minutes. Adelina Patti and Signor Nicolini were among the passengers.

Queenstown, November 3rd.

The Cunard steamer *Campania* arrived this morning, making the passage in five days, twelve hours and seven minutes, beating the best previous eastward record, that of her sister ship, the *Lucania*, by one hour and twenty-three minutes.

DOUBLE MURDER

A DOUBLE murder occurred in Hongkong harbour on the night of the 23rd ult, the victims being a woman and a girl. It appears that two Chinamen hired a sampan for the purpose of boarding a steamer, but on the way threw the master, his wife, and daughter overboard. The women were drowned, but the man swam to a buoy and was picked up. A Chinaman named Chan Lo has been arrested in connection with the affair. The Hongkong papers opine that the two men were trying to smuggle opium and a quarrel arose between them and the boatman.

A SINGAPORE LIBEL.

AT the Singapore Assizes, Baron de Horn was found guilty of a libel on Mr. J. P. Joaquim and was sentenced to two months' imprisonment and a fine of $200. The verdict was given by a majority of six to one. The prisoner said he had been in gaol for one month and twenty days, and he wished to know if that were to be counted in the two months. His Lordship replied in the negative, saying he would not modify the sentence. Baron de Horn was then removed in the custody of the gaoler.

JAPAN AND PORTUGAL

THE *China Mail* of the 28th ult., says:—H.E. Governor Borja has returned by the Pacific Mail steamer *Gaelic* from Japan. We believe his mission has failed. Japan refuses to have anything to do with the restoration of extra-territoral jurisdiction to Portuguese authorities in Japan, and the Japanese Government declines to grant any further privileges than those conferred in the Mexican treaties. We understand the negotiations will be continued in Lisbon through the Japanese Minister in Europe.

ALARM OF FIRE

AN alarm of fire was raised about 11.30 a.m. on Wednesday, in consequence of thick volumes of smoke being seen issuing from the kitchen chimney at No. 34, Bluff, a Japanese girls' school, the Soshu Gakko. The smoke soon cleared away, however, and it was discovered that no cause for fear existed, the chimney having become choked through an accumulation of soot.

THE IMPERIAL PRINCE.

THE Imperial Prince whose birth was briefly announced in the *Official Gazette* of the 1st instant, is the son of Madame Sono Yoshiko, who bore the Emperor's last three children, namely, Prince Michi Hito (died in 1888), and the Princesses Tsune and Kane. Madame Sono is residing at the Aoyama Palace.

A BRITISH CABLE.

SIR THOMAS and Lady Milwraith are passing through Japan on their way to Ottawa. The Premier of Queensland intends to hold conference in Canada with the Government upon the necessity of laying a British cable from Great Britain to the Colonies, touching only at British territory.

DESTRUCTIVE FIRE IN TOTTORI PREFECTURE.

A TELEGRAM received by the Home Office, and published in the *Asahi Shimbun*, states that about one o'clock on the morning of the 1st inst., flames burst from a cottage at Tomari-mura, Kawamura District, Tottori Prefecture, and before they were got under control one hundred houses were destroyed. No loss of life is yet reported.

TOTAL LOSS OF A KEROSENE SHIP.

THE German ship *Schliemann*, reported on Saturday as having gone ashore on Vries Island, has not been got off, the *Yokosuka Maru* having returned last night with the crew of the ship, which is a total loss, having gone to pieces on Friday night.

MURDER OF A SULTAN.

TELEGRAPHIC advices received at Penang from Acheen state that the Rajah of Troemoen has been murdered. There are no details beyond the statement that several members of the Rajah's family and some people of Bakongan took part in the affair.

MR. HOSHI TORU

MR. HOSHI TORU has signified his intention of resuming the President's chair in the House today. The probability is that he takes it again only for the purpose of resigning it.

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

THE SESSION OF THE LOWER HOUSE ON FRIDAY.

THE session of the House of Representatives on the 1st inst. presented one of the most stormy scenes ever witnessed there. News having gone abroad that the majority intended to take the extreme step of presenting an Address to the Throne on the HOSHI question, the Strangers' Gallery was full to overflowing long before the clock struck one in the afternoon. After the election of a Chairman of Committee of the Whole House and of the members of the various Standing Committees, the expected motion introducing the Address was made by Mr. WADA HIKOJIRO, of the National Unionist Party. Mr. HOSHI then left his Presidential seat, which was taken by the Vice-President Mr. KUSUMOTO. It was now about 4 p.m. Plainly noticeable was the fact that several Radical members had been roused to a state of extraordinary excitement. Especially was this mood conspicuous in the case of Mr. TATEKAWA UMPEI, one of the most devoted followers of Mr. HOSHI. First to speak against the motion, he was, to do him justice, passionately eloquent, and would have enhanced his reputation as an orator had he refrained from indulging in bitter personal attacks upon the supporters of the Address. His excitement increased after he had resumed his seat. He continued to give vent to various abusive expressions directed against the successive speakers on the opposite side, and at the climax of his anger, he called out to Mr. UWOZUMI, a Progressionist, who sat a short distance behind him, and who was interrupting the speech of a Radical member, "You are a rustic; you do not understand these things." An altercation ensued, and Mr. TATEKAWA, springing from his seat, rushed upon Mr. UWOZUMI. Fortunately he was held back by a member who occupied an intermediate seat. During all this fracas, the Vice President, Mr. KUSUMOTO, did nothing to preserve order, and his inaction was severely commented upon by some members. Indeed, looking at the disgraceful scene, it was impossible to avoid the reflection that had Mr. HOSHI been in the chair, order would very quickly have been restored. Mr. NAKAMURA YAROKU, of the *Domei* Club, also allowed himself to be fanned into a white heat. A preceding speaker, Mr. SAITO KEIJI of the Radical party, having made some personal attacks upon him, he loudly vowed that he should bring his calumniator to justice. It goes without saying that Mr. SHIMIZU BUNJIRO was tumultuous. An occasion only is needed for that gentleman to effervesce. Amid all the tumult and excitement, it was strange to observe the composure and studious silence of the notorious Mr. TANAKA SHOZO. The *Kaishin-to* gladiator sought distinction by an astonishing attitude of calm. Mr. INOUYE KAKUGORO, eloquent and bold as ever, wound up the debate with one of his most witty and truculent speeches. He saw that the time was not suited for quiet argument, so he freely showered his shafts of irony upon the Radicals, especially upon Mr. TATEKAWA. But the Address passed. That was a foregone conclusion.

A DISORGANIZED OPPOSITION.

SATURDAY'S session of the House of Representatives illustrated in a manner not to be mistaken how greatly the Opposition is disorganized. The Government Bills being on the Order of the Day for the first time, speeches were delivered by the Minister President and the Minister of Finance. Before the Order of the Day was proceeded with, the Vice-President, who was in the chair, announced that an Imperial Message had been received in connection with the Address presented to the Throne on the HOSHI question. The purport of the Message was to direct that in view of the obscurity of the Address, which might be read either as a prayer to the EMPEROR to remove Mr. HOSHI from the Presidential chair, or as simply an expression of regret for the House's mistake in electing him to that post, a further deliberation should take place. The members thus found themselves in an awkward dilemma. Their wish had unmistakably been to have Mr. HOSHI removed, but to answer in that sense would have directly exposed them to the charge of unlawfully trespassing on the prerogatives of the EMPEROR. Therefore, adopting the Vice-President's suggestion, they had to be contented with answering that their Address was simply intended to convey regret for their own mistake. Then awakening at the eleventh hour to the absurdity of their position, Mr. HOSHI'S persecutors fell back on the only course that they could legitimately take, the course that they ought to have adopted at the outset, namely, to hand him over to the Disciplinary Committee. A motion in that sense was introduced after the Order of the Day had been finished, for to proceed with it sooner would have involved the necessity of seeking the Government's consent. Mr. HATOYAMA KAZUWO, of the Progressionist Party, was to have explained the motion, but as he was detained by some legal business outside the House, the function was discharged by Mr. OOKA IKUZO, a prominent member of the National Union. Mr. OOKA'S speech produced a singular effect on his audience. He bore unstinted testimony to the exemplary manner in which Mr. HOSHI had discharged the difficult duties of his office. Such indeed, was the warmth with which he spoke of Mr. HOSHI'S worth, that, despite some condemnatory remarks towards the close of his speech, the impression produced on his hearers was far from being unfavourable to the object of his attack. The sole ground on which he moved to place Mr HOSHI in the hands of the Disciplinary Committee was that the President, when leaving his chair on the 29th ultimo on the eve of the debate relating to the vote of want of confidence, had showed contempt towards the House by declaring that to whatever decision it might come on the matter, he should not hold himself responsible to obey. The majority being determined on Mr. HOSHI'S destruction, it mattered little what the ostensible reason might be for handing him over to the Committee, so long as that object was attained. Hence the motion was passed by a large majority. According to Art. 95 of the Law of the Houses, "expulsion shall be decided upon by a majority vote of more than two-thirds of the members present." It is doubtful whether Mr. HOSHI'S opponents are numerous enough to satisfy this provision. The vote of want of confidence was supported by 166 members in a house of 285. On that basis the majority would be short of the required number by 24. But Radicals to exactly that number, 24, are now reported to have deserted the Party, and some people are disposed to think that there is a prospect of the required two-third majority being obtained. It seems that the division will be close, and that the result is extremely uncertain.

Another illustration of the Opposition's disorganized state was furnished by the manner in which the speeches of the Minister President and the Minister of State for Finance were received by the House. About the speeches themselves there was nothing remarkable. Indeed, to speak frankly, Count ITO'S address was in a sense disappointing to those who had expected from him a brilliant and scholarly announcement of the Government's policy. He spoke clearly, calmly, and with his usual facility, and his easy delivery was rendered all the more remarkable by the fact that he made no use of notes. But his speech was simple, short, and matter-of-fact. In our opinion, he is a better debater than orator: his eloquence requires the stimulating influence of opposition. Whenever he is under that influence there is something really fine in his impassioned flow of language. Mr. WATANABE, the Minister of State for Finance, spoke neither better nor worse than usual. His voice is not strong, but it is clear and audible in all parts of the Hall. The point, however, to which attention may be particularly directed is the demeanour of the House towards the speakers. In preceding sessions, the House never listened tamely to such addresses: some Opposition members invariably took occasion to assert their importance by uttering critical and even abusive comments. But on the present occasion, no such interruption was attempted, even by the notorious Mr. SHIMIZU BUNJIRO or Mr. TANAKA SHOZO. Still more remarkable was the fact that

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

not a single member rose to put any question to either of the Ministerial speakers—a circumstance singularly at variance with the practice invariably followed in the past, and rendered all the more noteworthy by the fact that the Premier's speech dealt principally with Administrative Reforms, a subject on which the coming fight between the Government and the Opposition is expected to turn chiefly. Silence and disconcerted looks were alone observable in the House. The Opposition appeared to be hopelessly broken up and disorganized for the moment. Pending the final disposal of the HOSHI affair, the position was so uncertain, that none of the parties opposed to the Government ventured to commit themselves to a definite line of attack upon those in power. That an onslaught will be made on the Ministry with reference to the Reforms, admits of no doubt. But in the present state of affairs, there is no possibility of a concerted movement between the different parties of the Opposition, and evidently they are at a loss how to open fire against the foe. They will recover their *aplomb*, however. When men are bent on fighting, circumstances seldom baulk their desire.

THE POLICE AND FOREIGNERS.

THE Instruction issued by the Chief of Police in Tokyo on the 28th ultimo ought to produce useful results. Police constables usually give themselves little concern about the language that folks address to each other in the street. A policeman's active duties are supposed to begin when he detects evidence of a disposition or an actual attempt to break the peace. Language calculated to provoke personal violence may generally be used in his presence with impunity, and we do not imagine that it would occur to an English constable to check the freedom of speech of a mob of London urchins if he heard them airing their Arab eloquence at the expense of a Chinese or Persian way-farer. But the Chief of Police in Tokyo thinks that exceptional precautions are advisable at present, and most of us will be disposed to agree with him. Several instances are on record of rude behaviour on the part of Japanese youths towards foreigners during the past two years, and we regret to say that such things have become commoner of late. The case of the Venerable Archdeacon SHAW does not, perhaps, deserve to be classed in the same category with the rudeness of students, for the Archdeacon's assailant was drunk, and drunken men do not reason; and the same comment applies to the story subsequently ventilated that a Secretary of the German Legation had been insulted in Tsukiji by two roughs. But there is this to be said even about such affairs, namely, that though little stock need be taken of the acts of drunken folk in general, we cannot afford to treat them with complete indifference in Japan. The Japanese inebriate being seldom quarrelsome, if we find his ordinarily jovial mood changed into one of truculence at the sight of a foreigner, we may fairly conclude that his every-day sentiments towards the stranger are not friendly. Leaving drunken men out of the account, however, there has been sufficient to render the streets of Tokyo less pleasant than they used to be. In former years one could walk anywhere and everywhere with almost absolute certainty of neither encountering an insulting glance nor hearing an ugly word. But the same assurance does not exist now-a-days. The strong desire on the part of grown-up folks to remove the disabilities under which the country labours, and to assert themselves *vis-à-vis* foreigners, becomes in the case of unreasoning youths a mere sentiment of aversion, and may therefore be translated at any moment into acts of rudeness. General illustrations have been furnished of late by the youths of one of the chief educational institutions in Tokyo, and the principal of the college, a man of wide experience and established sagacity, laments that among the boys now coming from rural districts he observes indications that the anti-mixed-residence compaign of Mr. OI KENTARO and his mischievous disciples has exercised an evil influence on the rising generation. No one supposes, it would indeed be extravagant to suppose, that there is the smallest danger of a recrudescence of the old *jo-i* (barbarian-expelling) spirit of pre-Restoration days. That kind of thing is dead beyond all resurrection. But its memory lives in the breasts of foreigners, and they are not slow to put an unfavourable interpretation on any morbidly self-assertive or hostile ebullitions indulged in by Japanese youths. We have often admitted our full sense of the provocation under which Japan has laboured for many years, from a Japanese point of view. Our own countrymen, under similar conditions, would probably evince even more marked resistance and resentment than the Japanese have shown. But Japan's experience must have taught her that little allowance will be made for her on that score, and that the best, indeed the only, way of attaining her goal is to remain imperturbably patient. She is on her trial. It may hurt her self-respect to be told so, but the fact is not to be gainsaid. The evil consequences of any loss of temper in which she indulges will fall entirely on her own head. Such of her youths as behave with rudeness or roughness towards foreigners are not their country's vindicators, but its enemies. It is because her statesmen recognise this that instructions of an exceptional character have been given to the Tokyo police.—

> Of late it appears that there have occasionally been instances of rude and offensive language being used towards foreigners, and of their being made the objects of other disorderly conduct. The police of the capital are therefore instructed to employ redoubled vigilance and to discharge to the full their duty of affording protection.

This means that it becomes henceforth the business of a policeman to take effective notice not only of acts of rudeness or violence towards foreigners, but also of any insulting language that may be addressed to them. If the police discharge their new duty with any degree of zeal, and if foreigners are careful to report any unpleasantness to which they may be subjected, very wholesome results should ensue. We are unwilling to treat the matter seriously or to discuss it at any length, being persuaded that it does not merit grave notice, and that there is no real cause for uneasiness on the part of foreigners. But many will derive re-assurance from an kowledge of the instructions issued to the police, and for the sake of such persons we give prominence to the event.

THE HOUSE OF REPRESENTATIVES.

THE fifth session of the Diet, though still only a week old, has caused much uneasiness to friends of representative institutions in Japan. No one could be greatly surprised if in the early days of Japanese Parliamentary Government the progress of useful legislation was hindered by political effervescence. Something of the kind seemed inevitable. For the opening of the Diet meant that all the enemies of the *Meiji* statesmen, the men who for years had been carrying on a virtually barren campaign, their weapons blunted and their hands tied by official omnipotence and intolerance, suddenly found themselves provided with a platform for the unrestricted ventilation of their long curbed passion. Of course they became slightly intoxicated by such a large draught of freedom administered all at once, but, on the whole, their actions were by no means extravagant, and the impression generally produced was that they showed more sobriety than could reasonably have been expected. In this fifth session, however, when we might fairly look for the growth of calmer counsels and of a larger sense of parliamentary responsibility, the members have behaved in a manner indicating lamentable lack of moral ballast. Their assault upon their distinguished President, Mr. HOSHI TORU, though an obvious outcome of political spleen, might have been condoned, had they adduced any evidence sufficient to establish their own credit for sincerity. But the witnesses put forward by them at the bar of the House, the witnesses cited to warrant a measure of unprecedented character and to justify their own retractation of a step taken only twelve months previously with all deliberation and solemnity, these witnesses were not more tangible than public opinion and the press. The Japanese press, with a few notable exceptions, is at present in the

hands of men who certainly have not inspired the public with any faith in their fairness or moderation; men who pervert the gravest national questions into party weapons; men whose opinions on any matter may be predicted with certainty so soon as their political complexion is known; men not generous enough to be accurate, without sufficient experience to be discerning, and so wanting in self-respect that they treat the reputations of others as mere toys to be played with. Happily there are, as we have said, several signal exceptions, but on the whole any diligent reader of the vernacular newspapers must endorse our verdict. Nor can we wonder that it should be so, for, in the first place, the Japanese press has not yet been entirely freed from restraints that deter competent pens, and in the second, the rewards of journalistic merit and the credit attaching to it are so small that really able men seek distinction and emolument in other directions. It was this press, however, that the proposers of a vote of want of confidence in the President of the House of Representatives put forward as their warrant. Such levity, bad enough under any circumstances, became little less than scandalous in view of the fact that the newspaper which led the hue and cry against Mr. HOSHI TORU had been criminally prosecuted for libel, that its editor, proprietor, and printer were lying under sentence of imprisonment for uttering the very slanders which the House of Representatives was seriously invited to take as the basis of its vote, and that an appeal lodged by the condemned men was still *sub judice*. It seems scarcely credible that a majority in a parliament supposed to consist of grave legislators careful of their country's interests and their House's fair fame, should have been so blinded by political passion as to arraign and condemn their President on such charges. There was hardly a simulation of seriousness, for the first witness cited, namely, public opinion, was but an echo of the discredited press summoned to support it. Thenceforth every step of the farce was in harmony with its unhappy exordium. The proposers of the vote must have foreseen that no man possessing ordinary courage and self-respect would tamely submit to be condemned on the strength of intangible accusations preferred by disgraced witnesses. But when asked what provision they had made against the contingency of Mr. HOSHI'S refusal to abide by their palpably prejudiced verdict, they had the foolish fatuity to confess that they depended on the intervention of his friends to induce him silently to accept disgrace and undefended to acquiesce in injustice. Of course Mr. HOSHI rebelled. No act could have proved him more unworthy of the high position he held than lightly to surrender it at the dictation of a congeries of political intriguers. His friends, too, did not consent to play the faithful part of helping to compass his downfall. On the contrary, they acted as friends usually do. The misguided majority might even then have rescued themselves from their false position: they might have handed over Mr. HOSHI to the Disciplinary Committee. There would have been a semblance of grace about such a course, for it could have been interpreted to mean that they had desired in the first place to afford the President an opportunity of resigning without the humiliation of a formal trial. But, unprepared to furnish any evidence that would bear the test of formal inquiry, and destined to choose the wrong route from first to last, they decided to address the Throne. There was no ambiguity whatever about their purpose in resorting to this extreme measure. They were the men who, twelve months previously, had recommended Mr. HOSHI to the EMPEROR for nomination to the post of President. It was now their desire to undo their work, and since Mr. HOSHI declined to resign at their dictation, they asked the SOVEREIGN to rescind the nomination. But the vagueness and unsubstantiality of their charges against him tainted their whole proceedings. So ambiguous was the phraseology of their appeal to the Throne that the EMPEROR was obliged to ask for an explanation of the document. Then, if ever, only one course seemed possible. Having committed themselves to the gravest step within their competence, having invoked the aid of the SOVEREIGN himself, they should have had no alternative but to abide by their acts, and to declare frankly that they sought the assistance of the Throne to rid them of a President who, having been nominated on their recommendation, now declined to resign at their suggestion solemnly formulated in the shape of a vote of want of confidence. Yet instead of taking this simple and straightforward step, they bowed their heads, and, with incredible weakness, returned answer to the SOVEREIGN that they had merely intended to apologise for their own want of discernment in recommending Mr. HOSHI for the post of President. That is to say, in much excitement and flurry they had prepared, debated, passed with acclaim and entrusted to their Vice-President for reverential submission to the Throne, a document announcing that they found themselves afflicted with a bad President, but that the fault being their own, nothing remained but to make confession and express contrition in this solemn manner. It is doubtful whether any assembly of reasoning men ever stultified themselves more signally. Their Address to the Throne never could have been presented for any purpose but one, yet when required to state that purpose plainly, they shrank from the sound of their own voices, and declared that their object had been, not to procure Mr. HOSHI'S removal, but to do penance for their own infatuation in choosing him. After that a cloak of friendly oblivion could not be thrown too quickly over the whole fiasco. But the rancour and political resentment that had prompted the persecution could not be satisfied without a sop of some kind. It was found in the chance of punishing a few ill-considered words uttered by the President when his enemies were marshalling their forces to pull him down. He had said that, counting their proceedings unlawful, he should not hold himself responsible to obey any decision they might arrive at. It was a bold utterance, recalling the demeanour of the great Athenian philosopher in the presence of his unjust judges. It was even a contumacious utterance according to the strict letter of the law, though a hardly-pressed man may well be excused if he fails to distinguish at a supreme moment between the respect theoretically due to an impartial, sober-minded tribunal, and the contempt properly attaching to the verdicts of prejudice and passion. However, Mr. HOSHI had placed a weapon in the hands of his enemies, and they hastened to seize it. He was handed over to the Disciplinary Committee, and the latter decided that he must offer an apology to the House in full conclave. That was, perhaps, inevitable. But the Committee went a great deal further: they actually dictated the terms of the apology. Nothing was to be left to the judgment or discretion of the man whom they had thought worthy, only twelve months previously, to elevate to the highest post in their House, and who as they themselves acknowledged, had discharged its difficult duties with the utmost ability and impartiality. Not a sentiment of generosity, not a symptom of grace, relieved the blackness of the wretched affair. The President of the House was to be required to stand up and read an apology dictated by the men who had hounded him into a semblance of rebellion. They themselves had uttered against him, in their places, gross accusations which they had no evidence to support and which they incontinently shrank from any attempt to substantiate. But at the first word of indignant revolt on his part, he was seized and condemned to suffer the cruellest humiliation that could be put on him. Happily at this point the consciences of the Independent members awoke. They proposed that the projected apology should be changed for a week's suspension, and the House consented to the substitution. In truth it was a sorry affair throughout. Men sitting down deliberately to play at parliament could scarcely have simulated sportiveness and irresponsibility more successfully. We have entire confidence in the future of constitutional institutions in Japan, and we hold that, all things considered, the Diet has hitherto acquitted itself in a creditable manner. But we do most heartily wish that the public faith should not be shaken by such displays of prejudice, pettiness, rancour, and vacillation as that just witnessed.

THE AZABU AFFAIR.

CONSIDERABLE prominence having been given in these columns to the incident which occurred at Azabu on the 15th of November, we have inquired accurately in the sequel of the affair, and are now able to place the facts before our readers. The incident itself is doubtless more or less familiar to the public, but we question whether the details have yet been stated with entire accuracy. What happened was this:—At dusk on the 15th of November, as the Venerable Archdeacon SHAW was standing with Mrs. SHAW and some other ladies at the corner of a road leading to his residence, two drunken youths passed, one of whom pushed the other with considerable force in the direction of the ladies. The Archdeacon intervened and put up his hands to protect Mr. SHAW, whereupon both the youths approached him in a threatening manner, and he was obliged to thrust one of them back. Another youth, apparently a companion but sober, came up at the moment, and the Archdeacon persuaded the three to accompany him to a neighbouring police box where he lodged a complaint, at the same time giving his name and address. Three policemen were present, but they treated the complaint with indifference, nor made any attempt to protect the Archdeacon, though the two inebriated lads presently began to pull him about in the face of a crowd that had assembled, and though the Archdeacon repeatedly invoked their interference. It was this singular perfunctoriness on the part of the police that attracted most attention, contrasting as it did with their usual vigilance and courtesy, and suggesting the unpleasant impression that in the face of the increasing rudeness to which foreigners are subjected in the streets of Tokyo, they can not confidently count on efficient police protection. It is, of course, needless to say that the Statesmen now in power in Japan, in common with all respectable Japanese, would never for an instant countenance any revival of old-time anti-foreign sentiment, or condone any exhibitions of rudeness towards foreigners. On the other hand, the conduct of the Azabu police in the above case implied a distinct want of zeal, to use no stronger term. The matter, we understand, was duly brought to the notice of the proper authorities, and after investigation, the perfunctory constables were severely reprimanded, and the First Divisional Chief of the Metropolitan Police Bureau was instructed to proceed to the house of the Venerable Archdeacon SHAW to offer an apology. It is evident that the salutary effects of these measures would have been much more marked had it been possible to give full publicity to them, for, after all, what the foreign public, in common with the Japanese Government, desires is not merely that satisfaction should be given in a particular case of misconduct, but that any step taken in that sense should exercise a generally deterrent influence. The columns of the *Official Gazette* would have been a suitable medium of publicity, but the rules of the administration do not contemplate the use of the *Gazette* for publishing rewards or punishments of officials below *Hanin* rank. We believe that a sense of incompleteness resulting from this fact, supplemented doubtless by representations from the British Authorities and strengthened by another occurrence in Tsukiji, of which a German Student Interpreter was the victim, led the Minister of State for Home Affairs to adopt the emphatic and re-assuring measure on which we commented yesterday, namely, the issue of special instructions to the police of the metropolis for the better protection of foreigners. Thus the Azabu affair regrettable as it seemed as first, becomes a matter for congratulation since it has led to an official demonstration that cannot fail to produce wholesome results.

One other detail of the story calls for additional mention. After the perfunctory constables had been reprimanded and a police official of high rank sent to apologise to Archdeacon SHAW, the *Jiji Shimpo* gave an account of the main features of the affair. It was, on the whole, an eminently accurate account, and the writer did not shrink from stating fully the punishment that the police had received. But the Police Inspector at the Azabu Station, who appears to have expressed dissatisfaction from the outset at the steps taken by the Authorities, resented the publicity of the *Jiji Shimpo's* columns, and addressed to that journal a formal but general denial of its facts. The *Jiji* as bound by law, had to insert this denial, the result of course being that its readers discredited the original statement as to the constables having been reprimanded, and, further, that an official attitude quite contrary to the truth was suggested. This, of course, called for decided action. Inquiries were instituted, and it having been ascertained that the Azabu Inspector had acted entirely on his own authority, he was immediately dismissed from his post, and the *Jiji Shimpo* was officially authorized to expunge the contradiction addressed by him to its columns, which it did in its issue of the 5th instant.

THE EMPEROR AS PLAINTIFF IN A LAW SUIT.

THE two points raised by Dr. HATOYAMA in the Questions addressed by him, as a member of the House of Representatives, to the Government, have attracted much attention and excited lively interest among both foreigners and Japanese. Dr. HATOYAMA, in explaining the Questions, exhibited to the House a mass of documents amply sufficient to suggest the idea of careful research, and spoke with a degree of confidence that must have gone far to convince his hearers of the justice of his views. Yet we venture to think that he had not devoted to his subject the clear-sighted study generally characterizing his work. With his second point, namely, the propriety of a Japanese plaintiff following an appeal from a British Consular tribunal in Japan to the British Supreme Court in Shanghai, we shall not attempt to deal here. But a few words may advantageously be written about the first question, namely, the use of the Emperor of JAPAN'S name as plaintiff in a suit brought before a Consular tribunal.

It must not be forgotten, at the outset, that the action was brought in a British Court. Therefore, the procedure adopted had to be governed by the rules governing the procedure of British Courts. Now British Courts recognise, in actions for tort, only the owner of the property to which the damage is done. So also in actions on contracts, the person in whom the right is vested must be the plaintiff. This rule is perfectly plain, and no one would be likely to take exception to it where a private person only is concerned. But when the property in question belongs to a foreign State, a distinction, difficult to follow, appears to be made by some persons. For their information—and among them Dr. HATOYAMA seems to be included—we may quote from the Judgment delivered by Lord CAIRNS in "the United States *v.* Wagner." "The SOVEREIGN," his lordship said, "in a monarchical form of government, may, as between himself and his subjects, be a trustee for the latter, more or less limited, over the property which he seeks by action to recover. But in the Courts of foreign States, as in diplomatic intercourse with the Government of a foreign State, it is the SOVEREIGN and not the State or the subjects of the State that is recognised. In him individually, and not in a representative capacity, is the public property assumed by all other States, and by the Courts of all States, to be vested. In a Republic, on the other hand, the sovereign power, and with it the public property, is held to remain and to reside in the State itself, and not in any officer of the State. The right to the public property of the State must draw with it the right to sue for that property." This is a perfectly unequivocal exposition of the principle controlling the procedure of British Courts. In such Courts it is the SOVEREIGN of the foreign State that is alone recognised as the proper plaintiff in actions for tort where damage to State property is in question. We know of no English precedent where, in the case of a foreign monarchical State suing, the action has been brought otherwise than in the name of the SOVEREIGN. On the other hand, there are on record numerous cases in which the SOVEREIGN of a foreign State has been plaintiff. Among monarchs who have ap-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

peared in that character, we may mention the King of the TWO SICILIES, the King of the BELGIANS, the King of SPAIN, the Emperor of BRAZIL, the Emperor of AUSTRIA, the Duke of BRUNSWICK, and the Emperor of JAPAN. In brief, English law recognises only the SOVEREIGN in a monarchy as the owner of the public property of the State, and although Dr. HATOYAMA propounds the doctrine that the dignity of monarch is compromised by suing in a British Court in his own name, no such idea seems to have deterred any European monarch. Much stress has been laid on the fact that Japanese law indicates a different procedure. It is true that in the Japanese Code of Civil Procedure there is an article providing that a Department of State may represent the Government in actions at law where the property of that particular Department is concerned. But English Courts are not supposed to know anything of Japanese law, and certainly would never pay any attention to it on a point of procedure. They require that the owner of the property shall sue. In whom is the property in a man-of-war vested? Clearly in the EMPEROR. The vessels of the Navy are called "His Imperial Majesty's ships," and according to the Constitution, he is the head of the Executive.

It is further noticeable that Dr. HATOYAMA'S speech conveyed the impression that the EMPEROR'S name was directly mentioned in the pleadings. Such was not the case. Probably foreseeing and forestalling the popular objection that exists in Japan to the use of the SOEVREIGN'S name, the suit was brought in the name of the "Imperial Japanese Government," and all proceedings and pleadings were so headed. The distinction, of course, deserves notice only as a matter of sentiment, for the term "Imperial Japanese Government" was actually, and must have been admitted by Counsel to be synonymous with, and the equivalent of, "the SOVEREIGN:" otherwise the suit could not have been proceeded with, inasmuch as the plaintiff had to aver that he was the owner of the *Chishima Kan*, and the EMPEROR alone was the owner. But where so much sentiment centres round the direct employment of the SOVEREIGN'S name, it is right to observe that no direct use of the name was made in the proceedings. When, however, Counsel came to argue the case, he had to remember that in a British Court a Government has no right that is not the right of the SOVEREIGN, nor any privilege that is not his. If the Government through its Counsel had abstained from relying to the fullest possible extent on the SOVEREIGN'S rights and privileges, it would have been justly open to censure.

Dr. HATOYAMA further alleged that no precedent existed for the use of the SOVEREIGN'S name as plaintiff in a suit. That was an error. The Japanese Government did, on a previous occasion, sue in the British Consular Court in Japan in the name of the "Imperial Japanese Government," the term being synonymous with "Sovereign." It did so in an action against MITCHELL and COPE in 1877 for the recovery of land that had been gradually appropriated by the occupants of Lot 95, but which was not included in their title deeds. The Yokohama Court decided against the claim of the Government, an appeal was made to the Supreme Court in Shanghai, and the final decision was in the Government's favour. With this case on the record, Dr. HATOYAMA'S assertion that no precedent existed for the course pursued in the *Chishima-Ravenna* suit, was plainly erroneous. Besides, among the Sovereigns enumerated above as having sued in their own names in British Courts, it will be observed that we have included the Emperor of JAPAN. In point of fact the SOVEREIGN of this empire did bring suit in a British Court under the title of "the Mikado of JAPAN." The purpose of the action was to obtain possession of some KRUPP shells which, though purchased by the Japanese Government, had been seized for breach of patent in the suit of VAVASSOUR v. KRUPP. The Japanese Government on that occasion was advised by eminent Counsel in England that proceedings must be taken in the name of the SOVEREIGN, and in HIS MAJESTY'S name they were accordingly taken. It is strange that both these cases should have escaped Dr. HATOYAMA'S notice. They completely dispose of his allegation that no precedent existed for the SOVEREIGN'S appearance in the rôle of plaintiff.

Turning for a moment to the particular suit which formed the basis of Dr. HATOYAMA'S criticisms, it is to be observed that the Yokohama Consular Court refused the defendants' application for leave to file a counter-claim. The judgment was lengthy, and in it reference was made to the arguments subsequently relied on in the appeal case in Shanghai. The Sovereign of JAPAN was throughout referred to as the plaintiff, because every British Court and every British barrister knows that whether it were the Japanese Government or whether it were the Minister of Marine that appeared as plaintiff, each alike must have appeared merely in a representative capacity, the real plaintiff being the SOVEREIGN, whose property—"HIS IMPERIAL MAJESTY'S ship *Chishima Kan*"—had been damaged. In all the arguments the EMPEROR must have been referred to as the plaintiff, whatever form of phraseology were employed in the pleadings, and as it was only in the arguments that HIS MAJESTY'S name was actually employed, we really fail to appreciate Dr. HATOYAMA'S vehement insistence that a Department of the Government should have sued instead of the Government itself. At all events, Dr. HATOYAMA has still to explain why procedure which European Sovereigns do not hesitate to follow, and which has already been followed twice by the Sovereign of JAPAN, should now suddenly have become destructive of HIS MAJESTY'S dignity.

One word more. If Dr. HATOYAMA, if the Japanese public, were dissatisfied with the proceedings in this case, why did they not raise some objection last June. The judgment of the Lower Court then appeared in all the vernacular papers and provoked much discussion. But no one had a single word to say against the form of the proceedings. Five months later the appeal came on in Shanghai. The same arguments, though at greater length, were laid before the Court and the decision of the tribunal below was reversed. Then, and then for the first time, this discovery of an egregious insult to the SOVEREIGN was made. Can it be that criticism now declared powerful enough to upset the Government, was then silenced by the fact that the judgment was favourable to Japan? We are unable to regard Dr. HATOYAMA'S attack seriously. It appears to us that even an eminent jurist like him has not entirely escaped the contagion of political agitation which is now impelling so many able men to acts of hastiness and extravagance.

IMPERIAL DIET.

FRIDAY, DECEMBER 1ST.

HOUSE OF PEERS.

The House met at 10.30 a.m. the Order of the Day being—

1.—Applications from various members for leave.
2.—First Reading of a Government Bill for Amending Portions of the Treasury Notes Regulations
3.—Appointment of a Special Committee to report upon the same.
4.—First Reading of a Government Bill for Changing the Limits of certain Law Courts' Jurisdiction.
5.—Appointment of a Special Committee to report upon the same.
6.—First Reading of a Bill presented by Viscount Hayashi Tomojuki for Transferring to the Charge of the Treasury Prison Expenditures and Prison Building and Repairing Expenses.
7.—First Reading of a Project of Game Law introduced by Count Kyosu.

The first item was passed without dissent.

Mr. Watanabe, Minister of State for Finance explained that the object of the Bill for amending the Treasury Notes Regulations was to prevent unnecessary payment of interest which took place under the present system.

After a brief discussion as to the manner of selecting a Special Committee to report upon the Bill, the House decided that the Committee be nominated by the President.

Mr. Yoshikawa, Minister of State for Justice, explained that the object of the Bill for Changing the Limits of certain Law Courts' Jurisdiction was to facilitate the course of justice and to reduce expenditure.

A few questions were asked, and the House then entrusted to the President the duty of nominating a Special Committee to report upon the Bill.

Mr. Ozaki Saburo, in lieu of Viscount Hayashi, who was prevented from attending, introduced the Bill for Transferring Prison Expenditures to the charge of the Treasury. He said that the same Bill had been presented by the Government to the House of Representatives in the first and second sessions, but had been rejected. In the third session, it had been presented in the Peers, and passed by such a large majority that the House might almost be said to have been unanimous. The advantages of the proposed measure and the arguments for and against it, had been exhaustively stated in their House last session, and he hesitated to weary them by repetition. But, in compliance

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

with the duty devolving on the introducer of a Bill, and in deference to the presence of some new members, he should crave the House's indulgence for a few minutes. He then explained at length the reasons for the Bill, going over the ground traversed by speakers in previous sessions, and claiming that under the present system of defraying prison expenses out of local taxes, the organization and arrangements of prisons must remain so defective that an increase of crime was inevitable. In conclusion, he asked the House to entrust the Bill to a Special Committee, for although such a step might seem superfluous in the case of a measure about the expediency of which they were practically agreed, the importance of the Bill suggested that no form of procedure should be abbreviated with regard to it. In answer to questions, he said that the total prison expenditures defrayed by the various localities last year had aggregated 3¾ million *yen* approximately, and that a million *yen* had been realized by the sale of articles made by the prisoners. Further, the building expenses had been about three hundred thousand *yen*. Hence, the burden imposed on the Treasury would be 2¾ million *yen*, approximately. The Budget for the next fiscal year showed a surplus of 5¾ millions on the Revenue side, and there would consequently be no difficulty in finding funds for the proposed change.

After a brief discussion as to the manner of electing a Special Committee, the House finally decided that the Committee should be chosen by the Sections.

Count Kyosu, introducing the Project for a Game Law, reminded the House that the Project sent up by the Representatives last session had been rejected on account of imperfections, and that it consequently devolved on the Peers to devise a satisfactory measure.

Various questions were asked, and the Bill was finally entrusted to a Special Committee chosen by the Sections.

The House rose at 2.20 p.m.

HOUSE OF REPRESENTATIVES

The House met at 1 p.m. the Order of the Day being,

1.—Election of a Chairman of Committee of the Whole House.
2.—Election of the Standing Committees.

The President announced the receipt of a Bill from Mr. Nakamura Yaroku for amending the Industries Regulations, and of an Address to the Throne, from Mr. Wada Hikojiro, on the subject of the President's tenure of office. He added that the Address was in process of printing and would be distributed among the members so soon as it was in type.

The House then proceeded to ballot for a Chairman of Committee of the Whole. Two ballots had to be taken before a plurality of votes were cast for any member, the results of the ballots being:—

1ST BALLOT.

	Votes.
Mr. Kataoka Kenkichi (*Jiyu-to*)	100
Mr. Sato Shozo (*Kokumin Kyokai*)	75
Mr. Kawashima Jun (*Domei* Club)	62
Mr. Abei Iwane	27
Mr. Suzuki Shigeto	4

2ND BALLOT.

Mr. Kataoka Kenkichi	127
Mr. Sato Shozo	119

32 members did not vote.

Mr. Kataoka Kenkichi was therefore declared duly elected Chairman of Committee of the Whole.

The election of the Standing Committees was then proceeded with, the Sections retiring to their rooms for the purpose; the results being that for the Budget Committee of 45 members, there were elected 17 *Kokumin Kyokai* and 28 Radical members; for the Disciplinary Committee, 7 *Kokumin Kyokai*, 4 Radical, 3 *Kaishin-to*, 1 *Domei* Club, 1 *Seimu Chosa*, 1 *Kiushu-ha*, and 1 *Inouye-Kaku* member; and for the Petitions Committee, 11 *Kokumin*, 21 Radical, 1 *Domei*, 2 *Seimu*, and 1 Osaka member.

At the conclusion of the above business, Mr. Wada Hikojiro said that the Order of the Day was now finished, but he desired to move that the House continue in session so that he might introduce an urgency motion.

The President said that such was his intention. Moreover, the Standing Orders required that a Bill should be two days at least in the hands of the members before being brought up for discussion. Urgency measures were, however, exempted from the rule, and he considered that Mr. Wada's measure was one of urgency. Therefore, without any reference to the House, he should continue the sitting, and take the Address to the Throne as an urgency measure.—(Applause.) The text of the Address was as follows:—

ADDRESS TO THE THRONE WITH REFERENCE TO WANT OF CONFIDENCE IN PRESIDENT HOSHI.

The Vice President of the House of Representatives, Kusumoto Masataka, with profound respect submits the resolution of the House that it cannot repose confidence in the President, Hoshi Toru. The members of the House, in accordance with the Third Article of the Law of the Houses, humbly presented Hoshi Toru's name to the Throne, and gratefully received the Imperial nomination of him. But Your Majesty's servants acted without knowledge, and are now profoundly pained to submit that they erroneously solicited the Imperial consideration on that occasion.

Signed { Wada Hikojiro (*Kokumin Kyokai*) / Nakano Buyei (*Kaishin-to*) / Muramatsu Kambichiro (*Seimu Chosa-jo*) / Kawashima Jun (*Domei* Club.)

The President said that as he was personally concerned in this matter, he should cede the chair to the Vice President, during the discussion.

Mr. Wada, introducing the Address, briefly stated that, however much he desired to avoid troubling the Throne, no other course seemed possible under the circumstances. The House by a large majority, had passed a vote of want of confidence in Mr. Hoshi Toru, but the latter had declined to take the step suggested by such a vote. According to law, the President of the House was nominated by the Sovereign from among three members selected and suggested by the House for that purpose. Nothing remained now but to petition that the Imperial nomination be rescinded.

Mr. Watanabe Koki greatly regretted the crisis that had been precipitated. He thought that, although circumstances might ultimately compel them to resort to the extremely grave step of troubling His Majesty, they ought not to do so at once, but should pause for further reflection. He was opposed to the passing of the Address that day.

Mr. Tatekawa Umpei considered that the House was allowing itself to be carried away by the passion of the moment. The one charge brought against the President was that he had met merchants at restaurants. Was that a subject sufficiently grave to lay before the Throne? He should like to know, too, why the members of the House were at liberty to do things which constituted grounds of impeachment when the President did them. He then gave the dates and other particulars of eleven instances when the leading members of the *Kaishin-to* and other prominent men in the House, whom he named, had met the promoters and officers of Rice and Stock Exchanges in tea-houses, and he asked the House to say why such proceedings were blameless on the part of members and blameworthy on the part of the President. This was not an occasion to approach the Throne. The House had means of its own for punishing members that deserved punishment, and it should exhaust those means before troubling the Sovereign to interfere.

Mr. Nakano Buyei traversed the last speaker's arguments and claimed that to leave an immoral President in the chair would be showing far more disrespect to the Sovereign who had nominated the President at the House's request, than to address His Majesty on the subject. He averred that the whole fault and responsibility lay with Mr. Hoshi Toru. (At this stage the House fell into a state of great confusion, and Mr. Tatekawa Umpei so nearly came to blows with Mr. Uwozumi Itsuji that the members in their vicinity had to hold them apart.)

Mr. Saito Keiji opposed the Address chiefly on the grounds that no proofs were forthcoming of the misconduct attributed to Mr. Hoshi, and that the whole accusation rested on mere hypothesis. He further pointed out that the upshot of their present procedure would be to establish the principle that a combination of parties in the House might at any moment set up or pull down a President to suit their political convenience. The proper course was to hand Mr. Hoshi over to the Disciplinary Committee if he was thought to have acted in such a way as to forfeit their confidence. Besides, what sort of men were Messrs. Wada Hikojiro and Nakano Buyei to introduce an Address to the Throne? The former, while in the pay of the Mitsu-Bishi Company, had divulged its private affairs, and the latter had purchased a piece of land in Shizuoka Prefecture for eight hundred *yen* and sold it for twenty thousand.

Mr. Nakamura Yaroku said that Mr. Hoshi had seemed in every respect worthy of the high position of President at the time of his election to the post, and that he doubtless had been worthy. There had been no want of judgment on the part of the House. But men change occasionally with the times. Mr Hoshi had fallen from virtue. The fall was not to be expected, but having occurred, its results must be faced. As to the contention that the President held office for a term of four years and could not be displaced during that term, the fact was that the President obtained office originally because of the trust reposed in him by the House, and so soon as he forfeited that trust his term of office should be at once brought to an end. He defended himself against Mr. Saito Keiji's accusation and declared that if his conduct had been in any way reprehensible, he would never stand in that House again.

Mr. Misaki Kamenosuke opposed the Bill. The Opposition had taken a day to consider their course, but they had evidently failed to consider it sufficiently. The fact was that having blundered at first, they were seeking some means of escape from the dilemma into which they had plunged themselves. The House possessed under the Constitution power to deal with such matters. It had a Disciplinary Committe especially for the purpose. Instead of referring the question to that Committe, it did not hesitate to trouble the Emperor. Whatever might be expected of the *Kaishin-to* and the *Domei* Club, it was impossible to reconcile such conduct with the previous attitude of the *Kokumin Kyokai*. In the second session of the Diet, when an Address to the Throne on the subject of official interference in elections was introduced, the leading members of the *Kokumin Kyokai*, the very men who supported this present Address, had strenuously opposed that one on the ground that the Emperor ought not to be lightly approached. They had adopted a similar attitude of dissent in the fourth session with reference to the Address to the Throne about the impeachment of Ministers. Yet they now stood forth as the advocates of an Address on a much smaller subject. The *Kokumin Kyokai* were merely making themselves horses for the *Kaishin-to* and the *Domei* Club to ride into office.

The closure was moved but not carried.

Mr. Tsunoda Shimpei supported the motion. He claimed that the whole responsibility of the situation rested with Mr. Hoshi, who showed his contempt for constitutional institutions by refusing to abide by the vote of the House of which he was a member.

Mr. Inouye Kakugoro opposed the motion. He showed that the introducers and supporters of it were the very men who had hitherto opposed Addresses to the Throne on the ground that such an extreme measure should not be resorted to except in extreme cases. He spoke at some length but adduced no new arguments.

The closure was put and carried. The House decided by 147 to 129 to vote by open ballot, the result being 152 "ayes" and 126 "noes."

The President at this stage resumed his seat, and informed the House that he did not consider they were proceeding constitutionally, but that out of reverence to the Sovereign who was about to be troubled by this Address, he should

resign the chair to the Vice-President for some days.

The House rose at 5.55 p m.

SATURDAY, DECEMBER 2ND.

HOUSE OF PEERS.

The House did not meet.

HOUSE OF REPRESENTATIVES.

The House met at 1.25 p.m., the Vice-President in the Chair.

The Vice-President asked and received the permission of the House to address its congratulations to the Emperor on the birth of an Imperial Prince.

The Order of the Day was :—

1.—First Reading of a Government Bill providing for Special Re-assessment of the Taxable Value of Land.
2.—Appointment of a Special Committee to report upon the same.
3.—First Reading of a Government Bill for abolishing the Export Duty on Cotton Yarns.
4.—Appointment of a Special Committee to report upon the same.
5.—First Reading of a Government Bill for creating an Emergency Reserve Fund.
6.—Appointment of a Special Committee to report upon the same
7.—First Reading of a Government Bill for amending Portions of the Tax Collecting Regulations.
8.—Appointment of a Special Committee to report upon the same.
9.—First Reading of a Government Bill relating to the Incomes of Persons convicted of Political Offences.
10.—Appointment of a Special Committee to report upon the same.
11.—First Reading of a Government Bill for affording Aid from the Treasury in respect of Long-service Increments in the Salaries of Primary School Teachers.
12.—Appointment of a Special Committee to report upon the same.
13.—First Reading of a Government Bill for affording Aid from the Treasury in respect of the Cost of Technical Education
14.—Appointment of a Special Committee to report upon the same.

The Vice-President announced that he had duly conveyed to the Throne the Address passed by the House the preceding day, and having received a summons on the following morning to attend at the Imperial Household Department, he had lost not a moment in presenting himself there. The following document had been handed to him, which he proceeded to read aloud :—

With regard to the meaning of the Address presented to Us by Our House of Representatives, does the House pray Us to change its President, or is the meaning simply that the House desires to express regret for having fallen into error through lack of knowledge? The House had better deliberate again.

The Vice-President said that with the permission of the House he desired to address to the Throne a reply without delay, and that he thought the reply ought to be in the sense that the House simply asked pardon for its error of ignorance.—(Applause.)

Mr. Kudo Kodan raised an objection, but the House was indisposed to hear him, and the Vice-President at first ruled that as the sense of the House was evidently in favour of entrusting to him the preparation of the reply, the objection of Mr. Kudo was out of order. Mr. Kudo persisted, however, and was ultimately allowed to ascend the rostrum.

Mr. Kudo expressed strong disapproval of the hasty manner in which the House was proceeding. The preliminaries of the Address, its preparation, its debate, and its passing had all been rushed through in a manner quite unbecoming such a grave step, and they had now been ordered by the Sovereign to deliberate once more. Yet they were about to entrust to the Vice-President the duty of preparing a reply without any deliberation and without even consulting the views of the introducers of the Address, though the vagueness of its language had actually called down upon them something very like a rebuke from the Throne.

The House, without further discussion, voted to entrust to the Vice-President the preparation of a reply.

The Secretary announced the receipt of various Bills and motions, among them a motion from Mr. Hatoyama Kazuo to hand over the President to the Disciplinary Committee.

At this point the Cabinet Ministers and the various Government Delegates took their seats on the dais, and the Minister President of State, Count Ito, proceeded to address the House as follows :—

GENTLEMEN,—I count it an honour that, the Government Bills being on the Order of the Day, I have this opportunity of meeting you here in my official capacity in the present fifth session of the Diet. In pursuance of the Imperial Rescript issued towards the close of the fourth session of the Diet, the Government set about effecting reforms in the Administration. The results of those reforms, as you are already doubtless well aware, have been made public in the amended Official Organizations, as well as in the Budget which has been submitted to you. It is, therefore, not necessary for me to make any detailed allusion here to the subject. After I had the honour to be called to office on the 8th of August last year, or, more exactly, after the work of reducing public expenses had been undertaken in concert with you and with your consent in the fourth session of the Diet, the Government was able, before the close of that session, to effect a retrenchment of 490,000 *yen*. Since then, as the result of administrative reforms, a further reduction of about 1,700,000 *yen* has been made in the salaries of officials, office expenses, and various other items. Adding to these sums 10 per cent of the salaries of the civil and military officers which, in consequence of the Imperial Rescript already alluded to, are to be contributed for the purposes of Naval increase during a period of six years, the aggregate reductions since last session are 3,500,000 *yen* approximately. From these and other sources, the gross surplus of revenue in the present Budget amounts to over 8,000,000 *yen*. But, on the other hand, a considerable increase has been made necessary in Expenditures, on account of the progress of the country and the development of the national resources, as well as in consequence of legal obligations and of the growth of administrative business. Among these latter causes, I may mention the effect of the regulations relating to pensions to officials, the development of business under the Department of Communications, the rise in the prices of commodities, and so forth. All these things have unavoidably necessitated an increase in expenditures. Nor have I yet enumerated the whole. A further increase has been rendered imperative on account of riparian works, extension of the routes of steam ship navigation, and the opening and settlement of Hokkaido. Allowing for these increases in Expenditures, the net surplus is reduced to about one half of the gross surplus. These things are on record in the Budget and submitted for your mature consideration and discussion. Administrative reforms in the Government have been accomplished within the limits allowed by the necessities of the State and to the utmost of our ability. As to the line of policy to be pursued by the Government, it is not necessary for me to dwell on that subject, for the Government's policy has not varied in the slightest degree from the programme which the Acting Minister President was instructed, during my illness last year, to lay before you. I therefore confine myself to declaring that in introducing Administrative Reforms, the Government has done everything in its power, within the limits indicated by the existing state of affairs.

The Minister of State for Finance then addressed the House :—

GENTLEMEN,—By Imperial order, I introduced into this House on the 29th of last month the Budget for the 27th fiscal year of *Meiji*, together with various other financial Bills. I deem it necessary, in the discharge of my official duties, to offer for your consideration some observations on the financial projects for the coming fiscal year, as well as on the general financial and economical situation at the present moment. As you must have seen from the Budget, copies of which have been already distributed among you, the Revenue for the year under consideration is estimated at 90,675,000 *yen*, and the Expenditure at 85,472,000 *yen*, showing a surplus of 5,203,000 *yen* on the revenue side. With regard to the disposal of this surplus you will find it indicated in Chapter 15 of the Explanation accompanying the Budget, that about 1,000,000 *yen* is to be employed by way of subsidy for extending the routes of steam ship navigation about 400,000 *yen* as educational aids, and about 3,750,000 *yen* for the re-assessment of the taxable value of land. Some of these measures have been already submitted to you in the form of either Supplementary Budgets or Projects of Law, while others are about to be introduced. I will not elaborate comparisons between the different items of Expenditure and Revenue in the present Budget and those of the preceding year; nor will I enter into explanations of the reasons as to the increase or decrease of particular items, for minute information on these topics is contained in the Explanation and other papers of reference attached to the Budget. Omitting all discussion of such details, I will confine myself to-day to a broad statement of general financial projects. The Ordinary Expenditure for the 27th fiscal year is estimated at 68 875,000 *yen*. Compared with the corresponding amount in the preceding year, you will find an increase of 1,994,000 *yen*. But taking into consideration reductions in public expenditure amounting to 1,694,000 *yen*, the net increase is 299,000 *yen*. The above mentioned reductions of 1,694 000 *yen* are, as the Minister President of State has already pointed out, principally the results of reforms effected in the Administration. As to the increase of Expenditure, it has been caused chiefly by appreciation of gold, rise in the prices of provision, for men and horses in the Army, increase of business in the Department of Communications, and other unavoidable circumstances. The Extraordinary Expenditure is estimated at 16,597,000 *yen*, there being an increase of 5,265.000 *yen* over the corresponding figures in the Budget for the preceding year. Against this apparent increase, however, there has to be set a decrease of 1,941,000 *yen*, and consequently the net increase is 3,324,000 *yen*. With regard to measures newly projected for the fiscal year under consideration, they are twenty-nine in all, as mentioned in Chapter 4 of the Explanation accompanying the Budget. These measures require an aggregate expenditure of 4,829,000 *yen*. In order to promote the prosperity of the country and the welfare of the people, it is necessary, as you all know well, to secure harmonious and healthy working of the different elements of national vitality in matters of war, economy, education, communication, and transportation; and this desideratum has not been lost sight of in elaborating the financial schemes for the coming fiscal year. In matters of war, for instance, projects have been elaborated for the construction of forts at Naruto, in Tsushima, at Kure, and Sasebo; for the erection of a steel foundry; for stationing *gendarmes* at Yokosuka and Sasebo; and for conducting experiments with Shimose powder. To secure economic development, schemes have been devised for a special re-assessment of the taxable value of rice fields and dry-farms, for the improvement of river courses, for the construction of ships to be used in experiments with regard to marine products; for investigations relating to the breeding of horses; and, to mention a measure introduced as a separate Bill, for the abolition of export duties on cotton yarns. In the field of education, provisions have been made for a special increase of salaries to teachers in primary schools who have served for a certain number of consecutive years, for subsidies to industrial schools, and for the establishment of a technical school at Osaka. In the domain of communications and transportation, plans have been prepared for laying cables connecting the mainland with Okinawa and Oki and for another cable across the Saganoseki, for the laying of buoys at Nyudoga saki and Tsunega-saki, for the extension of the telephone service, and for granting subsidies in encouragement of the extension of foreign routes of steamship navigation—for the last mentioned project a Supplementary Budget is to be laid before you. Such, briefly, are the measures which your consent has already been asked or, in some cases, is about to be asked, and such, in outline, are the projects for the fiscal year under consideration. Let me now offer a few observations on the general condition of finance during recent years,—a subject which I had an opportunity to study in connection with the compilation of the Budget for the coming year. As to Revenue, Chapter 2 of the Explanation accompanying the Budget contains a comparative table covering a space of nine years. According to this table, it will be noticed that, in the Ordinary Department, the Revenue has steadily increased during the years under review. This is a matter for hearty national congratulation, as it indicates a corresponding increase of the Empire's wealth. Turning to Expenditure, it is to be observed, as stated in Chapter 3 of the Explanation accompanying the Budget, that a steady increase has taken place during the same term of years in expenditure, necessitated by the healthy progress of national civilization, such for instance, as expenditures connected with communications, military equipment, and education. In the other hand, there is a tendency to a gradual decrease and improvement in the case of purely bureaucratic expenses,—a result on which the country has to be congratulated. Coming, now to consider the connections between the Revenue and Expenditure, it is to be noticed that for several years past part of the Extraordinary Expenditure has been defrayed out of the Ordinary Revenue. Take, for example, the Budget for the 27th fiscal year. You will observe that the Extraordinary Expenditure amounts to 16,597,000 *yen*, while the Extraordinary Revenue aggregates only 7,436 000 *yen*, there being a difference of 9 120,000 *yen*. To the extent of this latter sum, namely, the excess of the Extraordinary Expendi-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

ture over the Extraordinary Revenue, drafts had to be made on the Ordinary Revenue. This circumstance proves that the Empire's finances stand on a solid and sound basis. As to other financial Bills and Special Budgets, mentioned in Chapter 5 of the Explanation accompanying the Budgets, such, for instance, as the Bill for the Creation of an Extraordinary Reserve Fund and the Bill for amending the Tax Collecting Regulations, I wish to refer you to the explanatory documents accompanying them, in which the necessities of the respective measures are fully set out. These are the general features of the financial schemes projected for the 27th fiscal year. I desire now to consider briefly the general financial and economic situation at the present moment. The consolidation of national debts bearing interest at the rate of six per cent. and upwards per annum, as planned by the National Debts Redemption Bonds Regulations, promulgated by Imperial Ordinance No. 66 of 1886, has been completed, with the exceptions of loans regulated by special contract. The result of these operations is that the burdens imposed on the Treasury, in respect of the payment of interest on the National Debts, have been lightened by 2,720,000 *yen*. As to Public Bonds bearing 5 per cent. interest, you know their position in the market is extremely favourable, selling as they do, at a premium. With regard to foreign trade, its progress in recent years has been extremely satisfactory. In 1892, exports and imports aggregated over 162 million *yen*. Comparing these figures with those for 1887, we notice an increase of 68 per cent. in the space of five years; while carrying the comparison further back to 1882, there has taken place an increase of 242 per cent. in the ten years. If we extend the comparison still further back to 1872, the increase in the twenty years has been 376 per cent. This increase in our foreign trade has been accompanied by a corresponding increase in the Customs duties. Taking the same years for comparison, we find that the increase has been 35 per cent. in five years, 87 per cent. in ten years, and 318 per cent. in twenty years. In the present year, the value of the foreign trade during the ten months from January to October inclusive reached 140,900,000 *yen*. Comparing this amount with the sum for the corresponding months last year, we notice an increase of about 10,300,000 *yen*. As the result of fluctuations in foreign exchanges, it is stated that there are still lying in Yokohama as many as 30,000 bales of silk, representing about 20,000,000 *yen* in value. It may, therefore, be inferred that, had it not been for the fluctuations in foreign exchange, the foreign trade of the country this year would have been in a still more satisfactory condition. But American factories having already commenced to feel a deficiency of raw material, I am confident that before long an improvement will take place in the outward movement of products. In truth, the economic development of our country in recent years has been phenomenal, and in the raw silk trade we have already overtaken our neighbour China, who has a territory ten times larger and a population ten times more numerous than ours. Besides, the development of trade in cotton yarns, the increase of the export of manufactured silk and cotton goods, the opening of a steamship service between India and this country—these and many other circumstances all proving a wonderful growth of Japan's foreign trade, are well worthy of attention. To keep up and still more promote this remarkable commercial development is, in my opinion, a political necessity. But reflecting upon the present condition of the machinery of credit in this country, we must confess that there are still many defects in the methods of circulating capital. In recognition of this fact, the Government is endeavouring to secure harmony in the circulation of capital in town and country, by instructing the Bank of Japan to gradually establish branches at important local centres throughout the country. The absence of special machinery of credit for commerce and industry is another defect in the system of our national economy, and investigations are now being carried on, with a view to the filling up of this *hiatus*. Before concluding, let me say a word on the subject of fluctuations in the relative value of gold and silver, a subject which, whether from financial or from economic points of view, cannot be lightly passed over. In 1877, or thereabouts, a silver *yen* was exchanged for 50 pence of English money; but at present not more than 28 or 29 pence are obtainable in exchange for the same piece of silver. To illustrate the results of these changes in the relative value of gold and silver, I call your attention to the Budget for the coming fiscal year where you will find an item of expenditure, put at £803,000, which must be paid in gold. At the rate of exchange ruling on the 1st of November last year, this amount of gold would have been equivalent to about 5,590,000 *yen* in silver; but according to the rate at the same date in the present year, it would have required 7,013,000 *yen* to complete the payment; that is to say, an increase of 1,423,000 *yen* in the short space of one year. In 1877, that is to say when the two metals were yet at par, 4,039,000 *yen* in silver would have sufficed for the payment of this amount in gold, in other words, 2,774,000 *yen* less than the sum required for the purpose on the 1st of November this year. So much by way of illustrating the effects of fluctuations in foreign exchange. This is a question of paramount importance in its bearings upon our economy and finance, and consequently, it is now under consideration by the Commission for Monetary Investigation created under Imperial Ordinance No. 113 of the present year. Such gentlemen, is a brief sketch of the financial schemes for the 27th fiscal year and of the general economic and financial situation at the present moment. I have dwelt on these topics hoping that my statements may be of some use to you by way of reference when you proceed to deliberate upon the Budget. Let me, in conclusion, express my earnest hope that, on mature consideration, you will give your consent to the Budget for the coming year as well as to the different financial Bills that have already been, or are about to be, submitted to you.

The Vice-President announced that the Order of the Day would now be taken; but on the motion of Mr. Suzuki Shigeto the House decided to take a short recess for the purpose of considering the draft reply to the Throne, printed copies of which had in the meanwhile been distributed among the members.

On the re-assembling of the House at 3 p.m. the Order of the Day was changed for the purpose of debating the reply to the Throne.

The draft reply was read as follows:—

Your Majesty's servants, the Vice-President of the House of Representatives, Kusumoto Masataka, reverentially submits that the object of the Address presented to Your Majesty by the House was to crave Your Majesty's pardon for the error committed by the House through want of knowledge, and that the House is deeply pained to find that its Address was framed in ambiguous language.

Mr. Tatekawa Umpei bitterly regretted the false position in which the House now found itself. In a moment of excitement it had presented to the Throne an Address the bases of which were so unstable that even the phraseology of the Address itself had partaken of this ambiguousness, and the Emperor had been compelled to ask them what they intended to say, recommending them at the same time to deliberate more fully. How were they to atone for the gross disrespect they had shown to the Throne? The House had disgraced itself. Its reproach would descend to all generations. Could it be supposed that a few words of regret such as they now proposed to submit to His Majesty would suffice to expiate the gross and irreverent blunder they had committed? (The speaker voice trembled with emotion at this point.) Foreseeing much of this, he and his fellow-thinkers had exhausted every means of inducing the House to pause before presenting the Address, but the mischief was done. How was it to be repaired?

In reply to a question from Mr. Fukuda Hisamatsu, Mr. Tatekawa declared that in his opinion the members could show their sense of the gravity of the situation only in one way, namely, by resigning their seats.

Without further discussion the House voted in favour of the reply as read.

The Order of the Day was then resumed.

The Government Bill for Special Reassessment of the Taxable Value of Land was read as follows:—

PROJECT OF LAW FOR THE SPECIAL RE-ASSESSMENT OF THE TAXABLE VALUE OF LAND UNDER CULTIVATION

Art. I.—In cases where the present valuation of land devoted to cultivation is considered unduly high, it shall be specially amended and reduced, the superior and inferior limits of the total reduction to be 150,000,000 and 140,000,000 *yen*.

Art. II.—The standards observed in amending the above unduly high valuation shall be as follow:—

(*a*) The assumed yield shall be reduced in proportion to the grade of the land and to the average yield in each district.

(*b*) The assumed price of rice per *koku* shall be lowered in the same ratio in the different localities, on the basis of the average market price during the five years from the 21st to the 25th year of *Meiji* inclusive.

(*c*) The assumed rate of interest shall be six per cent.

Art. III.—The general amount to be reduced from the existing valuation of land in each City, Town, and District shall be determined by the Minister of State for Finance, in accordance with the system of territorial division adopted at the time of the Land Tax Revision. The amount to be reduced from the existing valuation of particular farms, in each City, Town, or District, shall be fixed by decision of the Council of Landowners. Provided that, the organization and competence of such Council of Landowners shall be determined by Imperial Ordinance.

Art. IV.—The expenses incurred for purposes of reassessment in each City, Town, or District, shall be defrayed by the owners of the lands the taxable value of which has been reduced.

Art. V.—Lands whose valuation has been amended in accordance with this Law, shall be taxed on the basis of the amended valuation from the 28th year of *Meiji*. Provided that, in the case of Cities, Towns, and Districts, where the work of reassessment has not been completed by the aforementioned year, the land tax shall continue to be levied on the basis of the present valuation until the work of reassessment is completed.

Art. VI.—With regard to the enforcement of this Law, Law No. 105 of the 23rd year of *Meiji*, namely, the Law of Complaint, shall not be applicable.

Mr. Tajiri, Vice-Minister of State for Finance, said that the same Bill had already been introduced by the Government in the preceding session, but had not passed the two Houses. It was unnecessary to repeat the arguments that had been previously submitted, and he trusted that the Bill would speedily obtain the House's assent.

The Bill was entrusted to a Special Committee chosen by the Sections, the Committee being instructed to report at the same time on a Bill introduced with the same object by Mr. Higashiwo Heitaro.

Mr. Tajiri, introducing the Bill for abolishing the Export Duty on Cotton Yarns, said that the members were well aware of the development of the cotton spinning industry in recent times, and of the keen competition that Japanese yarns had to encounter in foreign markets. Every assistance ought to be given to the growth of the trade, and the Government considered that abolition of the export duty was an essential step.

The Bill was entrusted to a Special Committee nominated by the Vice-President.

BILL FOR ABOLISHING THE EXPORT DUTY ON COTTON YARNS

Cotton Yarns exported to foreign countries shall be exempt from the payment of Custom Duties on and after January 1st of the 27th year of *Meiji* (1894).

Mr. Tajiri, introducing the Bill for creating an Emergency Reserve Fund, explained that the resources at the disposal of the Treasury for relieving distress caused by natural calamities were, every year, found deficient, and that a measure such as that proposed had been proved necessary by practical experience.

The Bill was entrusted to a Special Committee nominated by the Vice-President.

BILL FOR CREATING AN EMERGENCY RESERVE FUND.

Art. I.—An Emergency Reserve Fund shall be set apart in the Treasury.

Art. II.—The Emergency Fund shall be employed in cases where, in consequence of unusual calamities, natural or otherwise, there is need of extraordinary outlays such as cannot be defrayed out of the ordinary revenue.

Art. III.—It shall be competent for the Government, with the consent of the Imperial Diet, to appropriate the surplus of the ordinary annual revenue to the purposes of the Emergency Reserve Fund.

Art. IV.—The custody of the Emergency Reserve Fund shall be entrusted to the Savings Bank Bureau of the Department of State for Finance. But the provisions of Law 125, issued in the 23rd of *Meiji*, shall not be applicable to it,

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

and no methods of increasing or employing the Fund shall be lawful other than those resorted to by the Savings Bank Section to which its custody is entrusted.

Art. V.—The accounts relating to the Emergency Reserve Fund shall be special, and shall be distinct from the accounts of ordinary revenue and expenditure.

This Law shall go into force on and after April 1st of the 27th year of *Meiji* (1894).

The same course was followed with regard to the Bill for amending Portions of the Tax Collecting Regulations.

Mr. Tajiri, introducing the Bill relating to incomes of Political Offenders, said that the question related to the case of persons who had been deprived of their incomes prior to 1876. Many petitions had been received from time to time on the subject, and there could be no doubt that the matter called urgently for charitable consideration. But, under the present system, the Treasury was powerless to do anything. He commended the Bill to the favourable consideration of the House.

The Bill was entrusted to a Special Committee nominated by the Vice-President.

The Minister of State for Education briefly introduced the Bill relating to State Aid for increasing the Salaries of Primary School Teachers after long service, and the Bill was treated like the preceding, as was also the Bill with regard to Expenses of Technical Education.

Mr. Ooka Ikuzo asked leave to introduce an urgency motion for handing over Mr. Hoshi Toru to the Disciplinary Committee in consequence of the language used by him to the House on the 29th ultimo. He made this motion with great regret, and under a sense that it could not possibly be avoided. Mr. Hoshi Toru's conduct as President of their House had been worthy of all praise. He had admirably preserved discipline and had shown himself not less impartial than firm. It must be fresh in their recollection how, on the occasion of a tumult in the House last session, he had ordered the removal not only of a *Kaishin-to* member, but also a member of his own Party. In short, with his manner of discharging the duties of President, they had not the slightest fault to find. But they expected in their President not merely observance and enforcement of the letter of the law, but also full obedience to moral obligations. The President, being required to check, and if necessary punish, every breach of decorum and every show of disrespect on the part of a member, must himself invariably set an example of decorous and respectful behaviour. Mr. Hoshi, however, on the 29th ultimo, when vacating his chair in favour of the Vice President on the eve of the House's discussion of a vote of want of confidence in himself, had declared that he considered the introduction of such a motion illegal, and that, whatever decision the House might arrive at with regard to it, he should not recognize any obligation to be bound by such decision. Language of that kind evidently showed contempt for the House, and was unbecoming in the mouth of the President. He therefore moved that Mr. Hoshi be handed over to the Disciplinary Committee.

The House agreed to permit the introduction of the motion as a matter of urgency.

The motion was read out as follows:—

In a speech delivered to this House on the 29th ultimo, Mr. Hoshi Toru used the words:—"I regard this question of want of confidence as improper. Consequently, whatever decision may be arrived at, I am under no responsibility to observe it." These words are punishable under the provisions of the 206th Article of the Standing Orders, and Mr. Hoshi ought therefore to be handed over to the Disciplinary Committee.

The Vice-President said that, in accordance with the provisions of Article 196 of the Law of the House, a decision should be taken without discussion.

The House voted for the motion.

Mr. Fukuda Hisamatsu said that the language used by Mr. Tatekawa Umpei when he said that he could neither praise nor censure the language of the House's proposed reply to the Throne, had been contumelious, and that if he used such language outside the House he would be guilty of a crime. Happily for him, he had spoken in a place where no responsibility attached to his language *vis-à-vis* the law. He thought that the words should be expunged from the Record.

Mr. Tatekawa indignantly denied the imputation, and declared himself ready to repeat his words anywhere and accept any and every responsibility attaching to them.

The Vice-President said that he failed to see anything disrespectful in the language employed by Mr. Tatekawa.

The House rose at 4 p.m.

MONDAY, DECEMBER 4TH.

HOUSE OF PEERS.

The House did not meet.

HOUSE OF REPRESENTATIVES

The House met at 1.15 p.m. the Order of the Day being:—

1.—First Reading of a Bill introduced by Mr. Kato Masanosuke for the Protection of the Hokkaido Aborigines.
2.—First Reading of a Bill introduced by Mr Nakano Buyei for abolishing the Import Duty on Raw Cotton.
3.—First Reading of a Bill introduced by Mr Hatano Denzaburo for amending the Land Tax Regulations.
4.—First Reading of a Bill introduced by Mr Tsunoda Shimpei for rescinding Law No. 30 issued in the 22nd year of *Meiji*.
5.—First Reading of a Bill introduced by Mr Tsunoda Shimpei for supplementing the City Organization system.

The Vice-President announced that the House's congratulatory message with reference to the birth of an Imperial Prince, and also the reply to the Imperial answer to the House's Address on the subject of Mr. Hoshi Toru, had been duly transmitted to the Palace. The receipt of various matters from members was further announced, as also were the names of the Special Committee chosen to report upon the Government Bills read on the 2nd instant.

Mr. Kashiwada Noribumi, referring to a Question addressed by him to the Government in connection with the speech delivered by the Minister of State for Finance on the 2nd inst., said that while the mere figures of the country's foreign trade certainly furnished matter for congratulation, the nation was dissatisfied by the Government's loose manner of enforcing the Treaties, and the consequent license enjoyed by foreigners, who purchased land outside the Settlements and otherwise exercised privileges not extended to them by the letter of the treaties. He asserted that the value of the lands thus unlawfully held by foreigners aggregated fifty million *yen*. It was true that the money remained in Japan, but the land was gone out of Japanese hands. The Government's defective enforcement of the Treaties must be held responsible.

Mr. Motoda Hajime asked permission to introduce, as an urgency motion, an Address to the Throne with reference to the Conduct of Officials.

The House granted permission, and the Address was read as follows:—

May it please Your August Majesty.—We, Your Majesty's humble subjects, the Vice-President of the House of Representatives and others, with all humility present the following Address to Your Majesty. Your Majesty has fostered among the subjects of Your Realm the virtues of loyalty, filial piety, honour and respect, so that the laws are justly administered and order is rigidly maintained throughout the length and breadth of the Empire. A reign so auspicious was never previously witnessed even in the age of the virtuous Rulers of Antiquity. It is the duty of Your Majesty's Advisers to assist Your Majesty's enlightened administration by preserving strict discipline and, at the same time, carefully regulating their own private conduct. For although, in consequence of Your Majesty's illustrious virtues, the people enjoy peace and tranquility, the state of affairs in the outer world forbids any tendency to idleness and negligence on their part. Your Majesty's Ministers ought, therefore, to be deeply solicitous by day and by night, at every time and at all times, not to forfeit the good will of the people and not to put a stain upon Your Majesty's glorious reign. But unhappily there is a Minister so unmindful of his duties as to attend meetings which he ought not to attend, to associate with persons whom he ought not to meet, to accept entertainments which he ought not to accept, and to authorize his subordinates to receive presents. Scandal and evil reports fill the air, damaging the dignity of the Government, and lowering the credit of the Ministers. Unless these evils be corrected now, we, Your Majesty's humble subjects, fear that a cloud may be cast upon the lustre of Your Majesty's Throne, and that even the alienation of the people's hearts may ensue. Proofs to establish the above facts are forthcoming. Our representations are free from all exaggeration. Derangement of official discipline may look a small affair, but in truth its bearings are most important. This very evil has ever proved one of the principal factors in the decline of nations. Your Majesty can hear where there is no sound, and see where there is no substance. Now that scandal is so great and misconduct so conspicuous, we, Your Majesty's humble subjects, respectfully pray that it may please Your Majesty to impose an effectual restraint upon Your Majesty's Ministers.

Mr. Motoda said that while fully sensible of the gravity of the step which he asked the House to take, he was persuaded that the occasion demanded nothing less. In December of the 18th year of *Meiji*, His Majesty had addressed to the officials of the Government a Message couched in most impressive terms, and in consequence of that Imperial measure Count Ito, who then held the post of Minister President of State, had caused to be issued a body of Regulations for the Conduct of Officials, containing very strict and excellent provisions. Unfortunately neither the present Cabinet Ministers nor the junior officials of the Government observed those Regulations. The Ministers were in the habit of accepting entertainments from all kinds of people, and the Minister of State for Agriculture and Commerce was especially notorious in this respect. He went to dinners given by persons with whom a Minister of State ought not to associate, and he frequented places where an official of his position ought never to be seen. The case of the Vice-Minister of the same Department, Mr. Saito Shuichiro, was well known to all. He too, had accepted dinners from questionable persons in questionable places, and had acknowledged the acceptance of a gold watch from a merchant with the permission of the Minister of the Department. Mr Saito, acknowledging his responsibility, had tendered his resignation, but the Minister of his Department and the Ministers of State had declined to accept it. The fact was that Count Ito's conduct of the Administration did not accord with the provisions of the Regulations issued by himself. The statesmen of old times, who had the interests of their country really at heart, distinguished themselves by the frugality of their lives and the circumspection of their intercourse, but no such virtues seemed to possess value in the eyes of the statesmen of to-day, though the reigning sovereign exercised his august power with unexampled sagacity and virtue, and set to his subjects an example such as the most illustrious of his predecessors had not surpassed.

Mr. Sakamoto Sokub moved that in view of the gravity of the step, the Address be entrusted to a Special Committee of five, in order that its phraseology be fully examined and if necessary, amended.

After a brief discussion, in the course of which Mr. Ooka Ikuzo claimed that the attempt to entrust the Address to a Committee, though ostensibly for the purpose of correcting its nominally faulty language, was really a device to shelve it, the House voted against the proposal, and agreed to the presentation of the Address.

Mr. Takanashi Tetsushiro asked permission to introduce an urgency motion to the effect that Count Goto, Minister of State for Agriculture and Commerce, and Mr Saito Shuichiro, Vice-Minister of State for Agriculture and Commerce, should not be allowed to enter the precincts of the House.

The Vice-President asked whether that would not be a violation of the law.

Mr Takanashi said that while the letter of the law undoubtedly reserved to the Sovereign the power of appointing and dismissing officials, and also provided that Ministers of State and Government Delegates were entitled to enter the House at any time and address it, it was equally certain that the Standing Orders imposed on the President the duty of preserving order in the House and punishing all infractions of discipline or propriety. The House having now passed an Address to the Throne virtually denouncing the conduct of the Minister and

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

Vice-Minister of Agriculture and Commerce, should not shrink from the logical sequence of its action, but should decide to exclude the offending officials from its precincts.

The House refused to grant urgency for the motion and proceeded to the Order of the Day.

Mr. Kato Masanosuke, introducing the Bill for the protection of the aborigines of Hokkaido, urged that it would be a national disgrace to Japan to allow the Ainu to fall into the condition of the autochthons of North America or Australia. The Ainu had a place in Japanese history, and were, moreover, a people possessing many natural virtues; a people whom education might elevate to a high rank. At present, however, they were a prey to the heartlessness and cruelty of the Japanese. They lived in a wretchedly squalid manner as compared with the Japanese, and they were subjected to all kinds of extortion and hardship. At Shiribeshi, where there had originally been a village containing some three thousand Ainu, scarcely as many hundreds were now to be found. Gradually and steadily the unfortunate people were being crushed out of existence. As an example of the carelessness shown towards them by officials, the case of the inhabitants of the Tokatsu-gawa district was notable. They had sold their fishing gounds for 300,000 *yen* and placed the money in the hands of officials, who had invested it originally in Nippon Yusen Kwaisha shares, but had subsequently transferred it to such rotten enterprises that the Ainu not only received no returns, but were even unable to recover the principal. The total number of Ainu in Hokkaido was now some 17,000, consisting of 8,400 men and 8,600 women. There were 3,100 children of school-going age, but only 500 attended school, or about 16 per cent., whereas the number of Japanese children attending school was 48 per cent. of the total of school-going age. In every way the Ainu were suffering, and though some folks might contend that they should be left to their own devices, on the principle of the survival of the fittest, he held that such a doctrine was inhuman in the present case; as inhuman as though one should refuse to stretch out a hand in aid of a man dying before one's eyes. In answer to a question he said that about 3,000 families in Hokkaido were engaged in agriculture and 1,000 in fishing. The cost of grants in aid to these folks, according to his proposal, would be an immediate outlay of about 120,000 *yen*, and a yearly outlay of 32,000 *yen* for the first five years, 20,000 *yen* for the next five, and 8,000 *yen* subsequently.

The Bill was entrusted to a Special Committee of 9 nominated by the Vice-President.

BILL FOR THE PROTECTION OF THE HOKKAIDO ABORIGINES.

Art. I.—The Chief of the Hokkaido Administration shall endeavour to induce the aborigines in his district to engage in agricultural pursuits.

Art. II.—In the case of aborigines desirous of engaging in agriculture, the Chief of the Hokkaido Administration shall grant to each family plots of unreclaimed land, as near as possible to its place of residence, measuring from six thousand *tsubo* to fifteen thousand.

Art. III.—To each family of aborigines engaged in reclaiming land, there shall be made a grant of 20 *yen* for the purpose of purchasing agricultural implements, and when the reclamation is concluded, a further grant of 2 *yen* per *tan*, to purchase seed, shall be made for the first year only.

Art. IV.—Lands reclaimed under the provisions of Articles II. and III. shall not be transferable during a period of thirty years. This provision shall not apply, however, to transfers to a man's heirs or children.

Art. V.—Lands remaining unreclaimed for a period of fifteen years from the time of their being handed over, shall be resumed possession of by the Hokkaido Administration.

Art. VI.—The Chief of the Hokkaido Administration shall take steps to induce aborigines who have children to send them to school.

Art. VII.—When aborigines send their children to pursue a course of study, the school fees shall be remitted, and a sum of one *yen* per half-year shall be given to each student to purchase books and school necessaries.

Art. VIII.—The Chief of the Hokkaido Administration shall endeavour to induce the aborigines to pay attention to matters of sanitation and hygiene.

Art. IX.—The Chief of the Hokkaido Administration shall instruct Headmen of Districts, whenever they find that any one of the aborigines is afflicted with serious illness, to engage the services of a doctor of the locality for the treatment of the sick person.

Mr. Nakano Buyei, introducing the Bill for abolishing the import duty on raw cotton, said that the subject had been fully discussed last session. He admitted that the measure might work some detriment to home growers of cotton, but contended that the effect must be very small seeing that the imported and the home-grown cottons differed in their nature and uses. Moreover, no reform was without some disadvantage. They must simply choose the side on which the balance of profit lay, and as to that there could be no doubt when they remembered that, owing to this heavy import duty on the raw material, not only were Japanese cotton manufactures unable to drive foreign goods out of the home markets, but all chance of their successful export abroad was defeated.

Mr. Sumi Risuke opposed the Bill on the ground that it would seriously impair the cotton-growing industry in Japan. The cotton-spinning industry was already prospering exceedingly without any aid of the kind proposed. Between 1886 and 1892, the cotton factories had paid dividends aggregating from 50 to 60 per cent. The cotton-growing industry, however, though next in importance to the cultivation of cereals was gradually and steadily declining. Thus they were asked in fact to still further debilitate the weak and strengthen the strong, to assist foreign cotton at the expense of domestic. He altogether deprecated such legislation.

The closure was put and lost.

BILL FOR THE ABOLITION OF IMPORT DUTY ON RAW COTTON.

From the 1st day of the sixth month of the 27th year of *Meiji* (1894), the import duty upon raw cotton imported from foreign countries shall be abolished.

Provided that if the assessment of a duty be required, public notice shall be given six months beforehand.

Mr. Kurihara Ryoichi strongly supported the Bill on the ground that Japan's future depended on her industries rather than on her agriculture. He also claimed that Japan's soil was not well suited to the cultivation of cotton, and that the land thus employed would give better results were some different crop raised on it.

Mr. Tajiri, Vice-Minister of Finance, said that, in the opinion of the Government, the abolition of export duties upon manufactured cotton would confer sufficient advantage on the factories for the present, and that the abolition of import duties on the raw material, did not appear essential.

Mr. Watanabe Yoshizo opposed the Bill. He said that the measure was quite unnecessary. The raw cotton imported was of a character comparatively little used in Japan, and moreover the home grown cotton was so much cheaper than the imported that the latter could not compete successfully. The quantity of cotton grown in the country was from 8 to 10 million *yen* worth, from which they might form a good idea of the flourishing state of the industry.

The closure was put and carried, and the Bill was entrusted to a Special Committee nominated by the Vice-President.

Mr. Hatano Denzaburo, introducing the Bill for amending the Land Tax Regulations, said that it had been debated and passed by the House in every preceding session, and that he did not see any occasion to parade all the old and well admitted arguments. With regard, however, to the source from which funds might be obtained for the purpose, he considered that no difficulty presented itself. The revenue, as they saw from the Budget, grew steadily every year, and the expenditure, though the Prime Minister alleged that it had been reduced as low as possible, doubtless admitted of further reduction. Besides, the settled accounts always showed a much larger surplus that the estimates. Hence he apprehended no trouble in attaining the 6,800,000 *yen* required for the purposes of the reduction. It was contended by some that to reduce the land tax would confer benefits on the large land-owners only. But the records showed that 39,000 farmers had been unable to pay their land tax, and that the total amount of their indebtedness was only 9,281 *yen*. Forty thousand farmers did not contribute ten thousand *yen* in the form of land tax, or, in other words, did not pay 25 *sen* each. Yet on account of that paltry sum their properties had been distrained. There could be no doubt of the relief brought to these folks by reducing the tax.

Mr. Ushiba Takuzo opposed the Bill. He declared that the agitation for a reduction of the land tax had originated ten years ago when the market price of rice was only 5 *yen* per *koku*, whereas now it was 8 *yen*. To pay their forty million *yen* of land tax the people had then required to raise 8 million *koku* of rice, whereas now 5 millions sufficed for the same purpose. In a word, the tax had been reduced by more than a third in ten years. Hence the original basis of the reform had disappeared. Further, whatever might have been said in the past about reducing the income of the State, they found themselves confronted to-day by such a fall in the gold value of their silver currency that their payments abroad had become very much heavier, and so had the cost of their armaments and their military equipment. The Minister if Finance had adduced a striking example of this in his speech. In fact, they could not possibly afford to diminish the revenue at present. If they compared the state income of Japan with the state income of European countries at present, taking into account the appreciation of gold, they would see that the revenue paid by the taxpayers of this empire had undergone a very large diminution in the past few years. Many of those to whom he was addressing these remarks, considered themselves bound by a promise given to their constituents in former years with regard to reduction of the land tax, but, as honest and prudent legislators, they ought to take note of the changes of the times and alter their own views accordingly. Unavoidable events had absolved them from all obligation to observe a promise made under such different circumstances.

Mr. Tajiri, Government Delegate, explained briefly that the Government could not possibly adopt its finance at present to such a change of income as the proposed measure would involve.

The House voted to entrust the Bill to a Committee of 9 elected by the sections.

BILL FOR AMENDING THE LAND TAX REGULATIONS.

The tax on land shall be of two kinds, namely, 2 per cent of the assessed value of wet and dry fields, and 2½ per cent. of the assessed value of building lands in districts and divisions or in cities, of mining land, of salt fields, of ponds and marshes, of forests, of pastures, of moors, and of miscellaneous lands.

Mr. Tsunoda Shimpei, introducing the Bill for abolishing the special system of local government for the three cities, said that the whole subject had been fully threshed out in previous sessions. He need not repeat hackneied arguments, but he trusted that the House would pass the Bill without any preliminaries.

Mr. Egi, Government Delegate, said that he was compelled once more to state the Government's inability to endorse the measure. He should be happy to answer any questions put to him on the subject.

The House declined to entrust the Bill to a Special Committee and passed it at once. The same course was pursued with the last Bill on the Order of the Day, which formed a necessary addendum to the Bill just passed.

The House rose at 5.30 p.m.

TUESDAY, DECEMBER 5TH.

HOUSE OF PEERS.

The House met at 10.30 a.m., the Order of the Day being:—

1.—Application for leave.
2.—First Reading of a Bill introduced by Mr. Ozaki Saburo for the Abolition of Export Duties.
3.—Report of the Special Committee on the Bill for transferring Prison Expenditures to the charge of the Treasury.

The President asked and obtained the House's

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

consent to convey congratulations to the Emperor in connection with the birth of an Imperial Prince.

Mr. Matsuoka Koki moved that the President be authorized to convey the proper expressions of congratulation or condolence on all occasions requiring such action, of his own motion, should the event occur while the House was not in session

The House approved the motion.

The President, for the purpose of proceeding to the Palace, left the chair, which was taken by the Vice-President, Marquis Saionji.

Mr. Ozaki Saburo, introducing the Bill for abolishing Export Duties, said that the two great questions of the day were Treaty Revision and the abolition of Export Duties. In solving the former Japan was not free to find a path for herself: foreign nations had to be consulted. Hence the problem presented some difficulty, though, for his own part he did not believe it to be at all insoluble. However, that was beside his subject. What he wanted the House to note was that the abolition of export duties lay entirely within Japan's sole competence, and might be done at any moment she pleased. Yet, for some strange reason, the step was not taken. It was exceedingly disappointing to observe the attitude of the House of Representatives towards this matter. The Representatives, ever since the opening of the Diet, had busied themselves with Bills for reducing the land tax or reassessing the taxable value of land, but had treated the question of export duties with comparative indifference. Yet it was impossible to over-rate the importance of this question's bearing on the development of Japan's resources. He presumed that those to whom he addressed himself were thoroughly familiar with the incontrovertible arguments in favour of the measure he proposed, but as introducer of the Bill he must ask leave to traverse the ground briefly. Some economists denied the utility of the measure on the ground that export duties came out of the foreign consumer's pocket, and that to abolish them would benefit him only. The fallacy of such a contention could be detected at once. In the case of Japanese products or manufactures which, being unique, did not come into competition with similar products and manufactures of foreign countries, the imposition of export duties made little matter, and undoubtedly such duties were paid by the foreign consumer, though in so far as they increased the price of an article they might narrow the circle of its purchasers and thus more or less injure its producer's or manufacturer's prospects. But where a Japanese article had to contend with a similar article produced abroad, there could be no question of the disability under which the former laboured if it were compelled to pay a tax from which its rival was exempt. Silk, for example, constituted one of Japan's principal staples of export But in the matter of silk Italy, China, and the East Indies were Japan's competitors, and from all those places silk could be exported without paying any duty. In Italy silk had been subjected until last year to an export duty of 5 *yen* per 100 catties; that is to say, a duty five times less than the Japanese exporter had to pay. Yet even that comparatively small impost had been removed by Italian legislators, who saw the unwisdom of handicapping their country's products in foreign markets. It was a matter of surprise that the Japanese agriculturist, required, as he was, to pay a heavy tax, could compete at all successfully with his foreign rivals, and there could be no doubt that were he relieved of the tax his trade would develop appreciably. Among marine products, again, Japan's *kombu*, which was such an important article of her exports, had to compete in Chinese markets with Russian *kombu* upon which no export duty was imposed. It was the same with copper. Japanese copper found itself handicapped in foreign markets by the duty-free copper of America, Spain, and other places. The policy of all civilized countries was to abolish export duties. Japan's indifference on the subject showed her inappreciation of economic problems. The course pursued by her with respect to her exports was equivalent to protecting foreign produce and manufactures at the expense of her own. Doubtless they were aware also of the additional inconvenience connected with an export duty in that it often necessitated the unpacking and re-packing of articles for purposes of examination, thereby not only entailing additional expense but also exposing the articles to damage. Further, so long as export duties were levied, the system of special ports of export could only be of very partial advantage, inasmuch as no articles could be shipped there except those that were duty free; all others had to be sent *vid* the customs ports. Japan was quite singular in her treatment of this problem. It was true that some states still levied export duties on special articles; as Italy on objects of art, and Russia on the bones of horses which were so much needed for purposes of manure. But in both of these cases the object was to check the export of articles which were wanted at home. Even Turkey was so far in advance of Japan economically that her export duties were five times smaller than those levied in their empire. It might be difficult to increase import duties, because there the treaties interfered. But to abolish export duties was the simplest thing in the world. Japan could do it with a stroke of her pen without consulting anyone. At present she lay under the imputation of adhering to the old-fashioned and obsolete notion that obtained in mediæval times, when it was held that every article sold by one country to another impoverished the former and enriched the latter. In these days of industrial progress any policy savouring of that idea was absurd. To develop a country's resources was the way to make it respected and powerful, and for the development of its resources markets were necessary. They should do everything in their power as legislators to facilitate the access of Japanese goods to foreign markets, and he trusted that the House would pass the Bill without delay.

In answer to questions, Mr. Ozaki explained that his arguments as to foreign markets were not effected in any way by the fact that Japan did not directly conduct her own export trade but entrusted its management to foreigners. Whatever might be the agency, the handicapping effects of export duties was the same. With regard to the consequences the measure might produce on the State's income, and the resulting difficulty of simultaneously transferring prison expenditures to the charge of the Treasury, as proposed in another Bill now before the House, he did not think that any embarrassment would be entailed.

Marquis Daigo was not opposed on principle to the abolition of export duties, but thought that as the export trade was in the hands of shrewd foreigners, who thought only of their own profit and paid no attention to the interests of Japan it would not do to abolish export duties altogether. Some discrimination should be exercised

Mr. Tajiri, in answer to questions, said that the Treasury would undoubtedly be embarrassed by the passing of this measure, since it would mean a reduction of revenue to the extent of over 2½ million *yen*. The Government were not opposed to the abolition of export duties. On the contrary, they strongly approved of it, and would follow the policy gradually as circumstances permitted. For example, they had already introduced in the Lower House a Bill for abolishing the export duty on cotton yarns. It was true that the Budget for the next fiscal year showed a surplus revenue of more than 5 million *yen*. But the money was all urgently needed for purposes of vital moment. Hence the Government, though approving of the theory of the measure, must oppose its immediate operation.

The Bill was finally entrusted to a Special Committee of nine.

Mr. Ozaki Saburo, Chairman of the Special Committee on the Bill for transferring Prison Expenditures to the charge of the Treasury, reported briefly that the Committee was unanimous in recommending the measure.

Mr. Tajiri, Government Delegate, referring solely to the financial aspect of the measure, said that as funds for the purpose were not forthcoming at present, the Government could not endorse the Bill

Mr. Hasegawa Sadao opposed the Bill in a speech of some length, repeating the arguments advanced in previous sessions. He quoted statistics to show that crime had decreased steadily during recent years, from which fact he inferred the incorrectness of saying that the present prison system tended to an increase of malefactors.

After some further discussion, the House agreed to carry the Bill to a Second Reading, and finally passed it through all its stages

The House rose at 2 10 p.m.

Bill for the Transfer of Prison Expenditures to the Imperial Treasury.

Art. I.—Among the expenditures which are now met by local taxes those for the building, maintenance, and repairing of prisons in cities and provincial prefectures shall be transferred to the Imperial Treasury from the 27th year of *Meiji*.

Art. II.—The lands, buildings, furniture, tools, implements, and other properties of Prisons in cities and provincial prefectures shall be transferred to the Treasury from the 27th year of *Meiji*.

Presented by Messrs. Hayashi Tomoyuki, Ozaki Saburo, and Yasuba Yasukazu. Supported by Messrs. Daiyo Chuzum and 64 others.

House of Representatives.

The House met at 1.18 p.m., the Order of the Day being:—

1.—Report of the Special Committee on the Government Bill for Special Re assessment of the Taxable Value of Land.
2.—Report of the Disciplinary Committee on the case of Mr. Hoshi Toru.
3.—First Reading of a Bill introduced by Mr. Tachibi Kiichi for amending the Local Government System.
4.—First Reading of a Bill introduced by Mr Fujino Masataka for rescinding Law No. 84, issued in the 23 year of *Meiji*.
5.—First Reading of a Bill introduced by Mr Kagami Kahei for rescinding the Peace Preservation Regulations.

The receipt of various documents having been amended,

Mr. Kawashima Jun, explaining a Question addressed by him to the Government, said that the defective character of the existing Treaties had perhaps been unavoidable considering the circumstances under which they were concluded —Japan's complete ignorance of foreign affairs and her domestic troubles. But defective as the Treaties were, the *Meiji* Government, that is to say the Sat-Cho statesmen, had never been able to revise them. Count Inouye had failed after many efforts, and the *Kaishin-to* Count had been equally unsuccessful. And not only had revision remained unaccomplished, but even the strict enforcement of the treaties seemed beyond the competence of the Government. The result was that many abuses existed. The system under which affairs at the treaty ports were administered by the Japanese was such that effective control could not possibly be exercised. Again, foreign ownership of land outside the Settlements had become an open secret. Yet the Authorities took no step to check it. He trusted that a full and explicit answer would be given to his questions without any attempt to burke the issue on the plea of diplomatic secrecy. Innumerable failures in the conduct of foreign affairs stood to the charge of the Government, as, for example, their neglect of Japan's interests in Hawaii, their helplessness to prevent Korea's breaches of treaty, their tame consent to carry a suit to the English Supreme Court in Shanghai. They had incurred grave responsibilities towards the nation and should be called on for a full explanation.

The Order of the Day was then taken.

Mr. Amakasu Fumiye, Chairman of the Special Committee on the Government Bill for special re-assessment of the taxable value of land, reported that the Committee was in favour of the Bill, and that its provisions had been found preferable to those of the private Bill presented with reference to the same subject.

Mr Muramatsu Kameichiro desired to know how the House, with any show of consistency, could entrust the execution of this important measure to a Government on which it had pronounced such sweeping censures as those embodied in the Address presented to the Throne the preceding day.—(Cries of "Useless.")

Mr. Kozuki Jokei opposed the Bill. He complimented the Government on their action in introducing it. When the Bill was introduced last

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

session it had laboured under the imputation of being a mere device to obtain the House's assent to the appropriations on account of the Navy. But this session it lay open to no such charge, being evidently a genuine measure. In so far as it evinced the Government's desire to subscribe to the wishes of the nation, it deserved applause. But he failed to see why the Government, if they were really desirous of consulting popular opinion, did not also introduce Bills for reducing the land tax and abolishing export duties. Be that as it might, however, he felt compelled to condemn the Bill because the country's urgent need of military equipment did not permit such a reduction of revenue. (The speaker elaborated this point considerably but added nothing to the arguments adduced in the preceding session.)

Mr. Muramatsu Kameichiro moved that the discussion of the Bill be deferred for a week, on the ground of the important matters which had occupied the attention of the House during the opening days of the session. Mr. Hoshi Toru had not yet resigned the Presidency, and the Government had taken no notice of the Address to the Throne impeaching the conduct of officials. He was entirely opposed to proceeding with the discussion of Government Bills until an understanding had been arrived at.

Mr. Higashio Heitaro pointed out that if Mr. Muramatsu's proposal were accepted, there would be nothing for it but to return all Government Bills, including the Budget, and close the House.

The House rejected the motion, and voted the closure.

The Second Reading of the Bill was then voted for and the various clauses having been discussed, were passed as submitted. The House then voted the Third Reading, and proceeded, at 3 p.m., to hold a session with closed doors for the purpose of considering the Disciplinary Committee's Report on the case of Mr Hoshi Toru. The Committee recommended that Mr. Hoshi be required to offer an apology to the House in open session, but on the motion of Mr. Muramatsu Kameichiro, the House decided that instead of an apology, he should be suspended for a week.

The doors were re-opened at 4.40 p.m., and the House proceeded to the First Reading of the Bill for amending the Local Government System but, after a brief discussion, the House was counted out at 5 p.m.

WEDNESDAY, DECEMBER 6TH.

HOUSE OF PEERS.

The House did not met, the Committees alone assembling.

HOUSE OF REPRESENTATIVES.

The House meet at 1.15 p.m., the Order of the Day being,

1.—First Reading of a Bill introduced by Mr. Fujino Masataka for amending Law No. 84 of the 23rd of *May*.
2.—First Reading of a Bill introduced by Mr. Kagami Kahei for rescinding the Peace Preservation Regulations.
3.—First Reading of a Bill introduced by Mr. Asaka Katsutaka for amending the Law of Regulations.
4. First Reading of a Bill introduced by Mr. Mori Toichiro for amending the Second-hand-goods Dealers Regulations.

The receipt of various documents having been announced,

Mr. Ugai Ikujiro explained the purport of certain Questions addressed by him to the Government with reference to official treatment of the Sodo Sect.

Mr. Hatoyama Kazuo, referring to his Questions on the subject of the *Chishima-Ravenna* case, said that in consequence of the collision between the *Chishima Kan* and the steamer *Ravenna*, a claim for 650,000 *yen* had been preferred by the Japanese Government, in the Yokohama British Consular Court, and a counter-claim for 250,000 *yen* had been advanced against the Japanese Government by the Peninsular and Oriental Company, the owners of the *Ravenna*. The question whether this counter-claim should be adjudicated by the British Consular Court had then arisen. It was a question about the legal aspects of which much might be said, but he had no occasion to trouble them on that score. What he wanted to draw attention to was the improper procedure of the Japanese Government in the matter. It appeared from the records that the Emperor of Japan had been put forward as the plaintiff in the case. He need scarcely tell them that never before in the history of this country had His Majesty's name been used in such a manner, but he might add that in foreign countries also the thing was wholly unprecedented. Whether His Majesty's name had been thus employed at the direct instance of the Government, or whether the immediately responsible person was the Government's legal representative, Mr M. Kirkwood, an Englishman more or less unacquainted, of course, with Japanese customs, he did not pretend to say, but as to the fact that the Sovereign's name did so appear, there could be no manner of doubt. They might assure themselves on the point by referring to the answer filed by the Japanese Government's legal representatative in denial of the Consular Court's competence to try the counter-claim. Two reasons were there alleged. The first was that the plaintiff being the Emperor of Japan, and the Sovereign being, by law, considered incapable of wrong-doing, no suit against him could be entertained by any Court. This theory had been endorsed by the eminent Japanese jurist, Mr. Hozumi Chincho. The second argument was that the collision having occurred in the Inland Sea, that is to say, on Japanese territory, any suits arising out of it must fall within Japanese jurisdiction, and must therefore be tried according to Japanese law. But Japanese law did not admit the liability of the Sovereign under any circumstances, and therefore no counter-claim against the plaintiff in this case should be entertained, since he was the Sovereign of Japan. Why had the Emperor's name been brought forward in an inferior tribunal like the British Consular Court in Japan? The Government must be held responsible for such a proceeding; responsible not to the Sovereign alone, but to the whole nation which claimed the honour of being His Majesty's subjects. Never before had such an indignity been put upon the Throne. The mistakes made by the Cabinet were numerous, but they all paled before this one. The whole Cabinet must answer for it. No documentary excuses or explanations would suffice. Some public and decisive measure of atonement must be resorted to. Further, the British Consular Court in Yokohama having decided that it had no competence to entertain the counter-claim, the Peninsular and Oriental Company had appealed to the British Supreme Court in Shanghai, and the Government had sent its legal representative thither to make answer to the appeal. The result was that the verdict of the Yokohama tribunal had been reversed, and a decision rendered that the Inland Sea was not Japanese territory. He should not discuss that question at present. The point to which he addressed himself was that the Government had consented to submit to the jurisdiction of the British Supreme Court in Shanghai. According to the treaties between Japan and Western countries, a Japanese suing a foreigner had to bring his suit in the Court of the defendant's nationality, namely, in the Consular Court. Thus the Consular Courts became by international agreement the only tribunals where cases in which Japanese were plaintiffs and foreigners defendants could be tried. Such tribunals were by right open to the Japanese. They were compelled to have recourse to them in search of justice, and no other tribunals whatsoever were recognised by treaty. On what grounds then did the Japanese Government as plaintiff recognise the jurisdiction of the British Supreme Court in Shanghai, a British subject being the defendant? The treaty simply provided that Consular Courts in Japan should discharge a part of the functions devolving originally on Japanese Courts, and the place for discharging such functions could not possibly be in China. A British Order in Council declared that for the purpose of the jurisdiction acquired by the Sovereign of Great Britain, Japan and China should be regarded as conquered or ceded territory. He should not dispute at that moment the propriety of calling Japan a dependency of Great Britain, but he asked the House to consider whether the Japanese Government acted rightly in admitting a jurisdictional claim based on such a contention, and whether it was justified in appearing in a Court in China to answer a claim connected with a case that had occurred in Japan. Nothing in the treaties could be adduced to warrant such a course, or to confer upon a tribunal in China jurisdiction belonging originally to Japanese tribunals, and exercisable only for the purpose of Japanese plaintiffs in respect of cases arising in Japan. He called upon the Government to answer his Questions definitely and distinctly, and to acknowledge their error if error had been committed. Whatever might be the reputation of the statesmen now in power, it could not support such mistakes, nor should posterity be left to suppose that the men of the time had tamely and blindly acquiesced in blundering subversive of the country's rights and fatal to its prestige.

The Chairman of the Petitions Committee reported that 225 petitions had been received and handed to the Vice-President to be printed and distributed among the members.

Mr. Fujino Masataka, introducing the Bill for amending Law No. 84, said that what he proposed was to change the penalties prescribed by the Law for violations of Administrative regulations. The Law's penalties were a fine of not more than 200 *yen*, or imprisonment for not more than one year. This he would amend so as to read "a fine not exceeding 50 *yen* or arrest." His contention was that the power vested by the Law in administrative officials was unconstitutional, and in excess of any limits that could be justified under representative institutions. The Bill had been before the House in the preceding session, and he need not repeat the arguments then employed, but he might remind the House that the major limit of arrest being fixed by law at 10 days no occasion existed for defining it in Law No. 84.

Mr. Suyematsu Kencho, Government Delegate, opposed the Bill on the ground that the penalties proposed were quite inadequate to secure the enforcement of administrative regulations.

After some discussion, the Bill was carried to a Second Reading and the House proceeded to consider the Bill for abolishing the Peace Preservation Regulations.

The discussion was very brief, and the Bill was passed at once to its Second Reading, the Third Reading being dispensed with

The Bill for amending the Registration Law, differing only in very slight details from that introduced in the previous session, was explained by its introducer.

Mr. Kioura, Government Delegate, repeated at length the Government's objections to the Bill, as set forth last session.

The Bill was entrusted to a Special Committee of 9 nominated by the President.

Mr. Mori Toichiro, explaining the Bill for amending the Law relating to Dealers in Second-hand Goods, claimed that the provisions of the Law imposed needless obstructions in the path of the business it was intended to regulate, and did not serve any correspondingly useful purpose.

The Government Delegate said that the Government approved of many of the proposed amendments, but had others to propose which could be considered if the Bill were submitted to a Special Committee.

The Bill was entrusted to a Special Committee of 9 nominated by the President, and the House rose at 4.25 p.m.

THURSDAY, DECEMBER 7TH.

HOUSE OF PEERS.

The House met at 10.30 a.m., the Order of the Day being :—

1.—First Reading of a Government Bill relating to the Period of Probation of Assistant Judges and Public Procurators.
2.—Appointment of a Special Committee to report upon the above.
3.—Report of the Special Committee on the Bill for amending portions of the Treasury Notes Regulations.

The Minister of State for Justice introducing the first Bill on the Order of the Day, explained that according to the provisions of the Law of Organization of the Law Courts, the period of

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

probation for Judicial officers was three years, but inasmuch as at present the number of such officials required annually for the purpose of filling vacancies was 70, it became necessary to create discretionary power to shorten the period to 1½ years. The change was to be operative only for five years from the date of the new Law's going into operation. It would be, in fact, a temporary measure.

The Bill was entrusted to a Special Committee nominated by the President.

Marquis Asano, on behalf of the Special Committee, reported in favour of the Bill for amending portions of the Treasury Notes Regulations.

After a few questions, the House voted to carry the Bill to a Second Reading, and to proceed with the Reading at once.

Mr. Hasegawa Sadao proposed an amendment, changing the period for redeeming the Treasury Notes in question from 1 year to 9 months.

The House rejected the amendment and passed the Bill, carrying it at once through the Third Reading:—

BILL FOR AMENDING THE TREASURY NOTES REGULATIONS

Article IV. in the Treasury Notes Regulations, issued in the 17th year of *Meiji* (1884) as Notification No. 24, shall be amended as follows:—

Art. 4.—The Treasury notes shall be divided into six kinds, viz., notes for 100 *yen*, 500 *yen*, 1,000 *yen*, 5,000 *yen*, 10,000 *yen*, and 100,000 *yen*, payable within 12 months.

The House rose at 11 a.m.

HOUSE OF REPRESENTATIVES.

The House met at 1.20 p.m., the Order of the Day being:—

1.—First Reading of the Government Bill for amending Imperial Ordinance No. 141 of the 22nd year of *Meiji*.
2.—Appointment of a Special Committee to report upon the above.
3.—First Reading of a Government Bill for amending Law No. 9 of the 23rd year of *Meiji*.
4.—Appointment of a Special Committee to report upon the above.
5.—First Reading of a Government Bill relating to increase of the Floating Capital of the Tokyo Military Arsenal.
6.—Appointment of a Special Committee to report upon the above.
7.—First Reading of a Bill introduced by Mr. Matsushima Rinsaku for amending the Local Government System.
8.—First Reading of a Bill introduced by Mr. Yamada Toji for amending the Law of Election of the House of Representatives.

Mr. Kato, Government Delegate, introducing the first Bill on the Order, explained that the proposed amendment was designed entirely to abbreviate official forms in the case of payments of taxes made by farmers into banks.

The Bill was entrusted to a Special Committee nominated by the President.

Mr. Kato, Government Delegate, explained that the purpose of the second Bill on the Order was to facilitate the payment and collection of taxes on Marine Products in Hokkaido.

The Bill was entrusted to the same Committee as the former.

Mr. Tajiri, Government Delegate, explaining the third Bill, said that it was merely for the purpose of transferring to the Arsenal of the Army Department war material valued at 115,323 *yen*, hitherto in the possession of the former Naval Powder Factory at Meguro.

The Bill was entrusted to a Special Committee nominated by the President.

Mr Matsushima Riusaku, introducing his Bill for the amendment of the Local Government System, said that it was identical with the Bill presented by him last session, which had been examined and favorably reported on by a Special Committee, but had not been carried to a Second Reading owing to want of time. The purpose of the Bill, briefly speaking, was to increase local autonomy and diminish the interference of the Central Government.

The Bill was entrusted to a Special Committee nominated by the President.

The Bill for amending the Law of Election in the sense of extending the franchise, was then introduced briefly, and handed to a Special Committee.

The House rose at 1.40 p.m.

CORRESPONDENCE.

[Our readers must distinctly understand that we are in no sense responsible for the sentiments or opinions of our correspondents, for the accuracy of their assertions, or for the deductions they may choose to draw therefrom.]

OF STUDENTS

To the Editor of the "Japan Mail" Journal.

SIR,—Though I be but one that globe trotteth and therefore of the residents in these parts accounted fit only to pore over a box of curios—which be vulgar toys—yet would I set down in mine room a few saws about the scholars of this land. Certainly I never saw a sadder and sorrier sight in all my travel. And first I will speak of their manners, which is quick done; for they have scarce more than a hedgepig; in the second place of their betering; which were like to prove a labour of Hercules and a purging of Augean stables. Now an English schoolboy is mischievous, but in a waggishness, as a crow; but a Japanese insolent and puffed up with windy vaunts, and hath ever somewhat of a parrot's nature, for he saith but "bummei Kaikwa," or "baka," (which is one of their communia maledicta), and straight thinketh himself in the van of civilization, a Solomon for wisdom; or he doth but cry "Go ad stone," and compareth himself to the G.O.M., whereby unwitting he likeneth himself to a fool led by the nose by knaves. Now our school-boy cons not his task, but gets discipline at school (which I count the more to purpose) howbeit he sometimes cheeketh his grave tutors; but a Japanese student at one time muggeth overmuch, dismissing the usher if he teach not shrewdly enow; at another he taketh free holiday in mid-term, on a pretence that he is overwearied by the athletics, or that study in the summer heat causeth fluxions of blood to the head (which is smal danger where the skull is not cumbered with brains); as they of the Kenguijuku last summer, who struck work on the 15th of July despite the ushers' remonstrances; so that beat leadeth beat leader, as Livy tells of the scholars that whipped their pedagogue back to town. Certainly this sort of respecting boyish humours is *pueris reverentia* inverted, like a sock turned wrong side out. Among the old folk there is much courtesy; among the students scanty, and that but skin-deep; certainly they be no well-tuned cymbals howsoever they ack not brass; for at home they call their parents "uncivilized,"—a bumptious speech of one of them; abroad you shall see that if one hap to stand in their path they yield not place, but make forward over the obstruction or then high clogs, "striding mighty," as Achilles among the Shades, or again pushing by in a manner of "walking swoon," like Mrs. Gamp; not seeming to see the foreigner, or seeing but to blaspheme. And many other ill habits they have, as smoking, which the Germans do wisely forbid in their schools till a boy be confirmed in church, by which time he is come to years of discretion and hath sense to avoid Havanas and the stronger sorts of weeds. But I will leave the subject so, though I have but scratched the soil; for there is scarce one that hath not experience of students' ways and rudeness; and short suggestion oft profiteth better than much trumpeting.

I will now speak of the cure of the evil. In the first place I allow well that every usher, and not the headmaster only, have power to chastise with cane or birch, or for that matter with a bamboo, so it be knotty. Concerning spanking, I commend it not; for it oftimes hurteth more him that giveth than him that taketh. Likewise let the rod be laid on in the softer parts; so shall the sting be the sharper and the music the fuller. But look well that the lad be not padded; for I remember at school a runagate had a birching, whereof the sound made every scholar to quail; but the boy himself smiled sweetly; for though he could never get his Tully into his head he had made shift to get it into his breeks for the nonce. In the second point, when froward boys combine against the masters in a conspiracy of many, as is most the case, it were good that the law courts took cognizance thereof and set the whole crew to a month's treadmill; which measure if harsh were wholesome, and of ready application to a crowd, where the birch can but maugle one or two, as a swarm of bees overheated with vain buzzing in the dog-days must ever be treated widely with tobacco smoke, or the keeper is like to be stung to death, while by ying conclusions with each and every angly. Many have a fond opinion that moral suasion is the best mean; but, contrariwise, the brute of canes is more than the sting of words for the getting of discipline in a school; and without discipline teaching is naught, though one had the learning of Thales or Mr. Chamberlain.

Yours, &c., FRANCIS BACON.

LETTER FROM CHICAGO.

(From Our Own Correspondent.)

Chicago, November 4th.

Prof E. Warren Clark, formerly a teacher at Shizuoka, now of Rockford, Ill., is owner of the old locomotive "General" mentioned in my last letter.

The directors of the whisky trust have decided to give the Takamine ferment process a thorough trial in connection with the Manhattan Distillery at Peoria. Such a test was begun some months ago, and was interrupted by the long and serious illness of Mr. Takamine; but it will be at once resumed.

It is now hoped that the loss by the wreck of the *City of New York* will not be as large as at first was feared.

Col. J. H. Hoge, recently appointed U.S. Consul to Amoy, was suddenly recalled the very day he was to leave 'Frisco on the *Gaelic*, to answer some charges the nature of which was not stated.

A Chinese murderer in this city was brought to a confession of his crime to Judge Tuthill's court by the administration of the Chinese formula for an oath.

The Senate has passed, and the President has signed, the Act to amend the Geary Law. In consequence of this, Attorney-General Olney has ordered all Chinamen, nearly 100 in number, awaiting deportation, to be released.

At the recent conference of Methodist bishops, the assignment to Japan, Korea, and China fell to Bishop Ninde.

The Chicago Theological Seminary (Congregational) is rejoicing over its success in securing $80,000 excess of the sum of $500,000 which it has been trying to raise for endowment.

A vacancy in the U.S. Circuit Court has been made by the recent death of Judge Hugh L. Bond at Baltimore.

Hon. Edwin F. Uhl, of Grand Rapids, Mich., has been appointed to succeed Josiah Quincy as Assistant Secretary of State.

The Voorhees Repeal Bill passed the Senate on the 29th ult. by a vote of 43 to 32; on the 31st it passed the House of Representatives by a vote of 193 to 94, and on the same day was signed by the President. Here is the bill:—"That so much of the Act approved July 14, 1890, entitled an Act directing the purchase of silver bullion and issue of treasury notes thereon and for other purposes," and directs the Secretary of the Treasury to purchase from time to time silver bullion to the aggregate amount of 5,500,000 ounces, or so much thereof as may be offered in each month at the market price thereof, not exceeding $1 for 371 25 100 grains of pure silver, and to issue in payment for such purchases treasury notes of the United States, be and the same is hereby repealed. And it is hereby declared to be the policy of the United States to continue the use of both gold and silver as standard money, and to coin both gold and silver into money of equal intrinsic and exchangeable value, such equality to be secured through international agreement, or by such safeguards of legislation as will insure the maintenance of parity in value of coins of the two metals, and the equal power of every dollar at all times in the markets and in the payment of debts. And it is hereby further declared that the efforts of the government should be steadily directed to the establishment of such a safe system of bimetallism as will maintain at all times the equal power of every dollar coined or issued by the United States in the markets and in the payment of debts."

R. G. Dun and Co's. report, out to day, says: "The repeal of the Silver Purchase Act does good already. The business world in every part of the country reckons it helpful and the tone of the trade is more confident. It is hardly time as yet for the effects to be felt to any great extent in manufactures, but bankers are more liberal in accommodations and merchants more hopeful in purchases."

Yesterday afternoon the extra session of Congress came to an end. The senate failed to act on a number of appointments, of which the most important were those of Preston as Director of the Mint and Hornblower as Associate Justice of the U.S. Supreme Court. The report and message on Hawaiian matters was held back till the regular session four weeks hence.

The *Oregon*, the most powerful ship in the U.S. navy, was launched on the 26th ult. at 'Frisco.

It is reported that the Arctic explorer, Dr. Nansen, has lost his ship among the icebergs off Northern Siberia, but is himself safe. Nothing was said about the rest of the party. It is, however, believed by some that the story is false.

Daniel Coughlin, who hired the horse that carried Dr. Cronin to his death in the Carlson Cottage, is now on his second trial for murder before Judge Tuthill.

Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

You have doubtless heard already of the cowardly assassination of Mayor Harrison, within the sacred portals of his own home, on the 28th ult., by a man who owns some or all of the names, Patrick Eugene Joseph Prendergast. He was a newspaper carrier, whose hobby was track elevation, and who, though not well educated, deemed himself qualified to fill the position of corporation counsel. This office, he said, Mayor Harrison had promised him; and because the Mayor "broke his promise" and "betrayed his confidence," he deliberately committed the cold-blooded murder. It is a pity that in our Republic there is no protection against such a "homicidal crank."

The murder was committed on Mayors' Day. Our Mayor had been all day at the Fair where he had been actively assisting in the entertainment of the Mayors of the sister cities. In a speech delivered before the guests he extolled Chicago, and said: "I myself have taken a new lease of life; I intend to live for half a century yet; I shall live to see the day when even London shall be looking to its laurels." (The autopsy revealed a physical condition, which the physicians asserted, was good for twenty more years.) His "new lease of life" was to be strengthened and endeared by his approaching nuptials (set for the 16th inst.) with Miss Annie Howard, of Orleans. After this day of activity he returned to his home; and, after dinner, wearied out, he fell asleep. From this nap he was aroused by the entrance of Prendergast, and went out into the hall to see what his visitor wanted. The latter, repeating in vain his request for the office, fired three shots at the Mayor, who, after a slight but futile resistance, fell to the floor and died in twenty minutes. The murderer gave himself up to the police.

It is needless to say that this brutal deed excited a deep feeling of horror and execration, second, if at all, only to that aroused when Garfield was similarly assassinated by a "crank." Telegrams of condolence poured in to the bereaved from all over the country. The Japanese Commissioners sent the following message:—We express our heartfelt sympathy in your bereavement by the death of your father, Mayor Harrison. The House of Representatives, in which the deceased had served two terms with honour, passed fitting resolutions.

The body lay in state all day, Oct. 31, at the City Hall where it was viewed by thousands. The next day a large and imposing pageant moved, through miles of mourners, from the City Hall to the Church of Epiphany, where impressive funeral services were held. From there the sad procession moved on to Graceland the Cemetery, where the body was laid to rest.

The cowardly assassin has been formally indicted by the Grand Jury, and will be put on trial Monday (6th) before Judge Dunne.

Hon. Carter H. Harrison was born in Fayette County, Kentucky, in 1825. He was graduated from Yale College in 1845, and, after a long trip in Europe, finished a law course in 1855. The same year he came to Chicago, and became interested in real estate. In 1871 he was elected a County Commissioner; in 1872 he was an unsuccessful, in 1874 and 1876 a successful, candidate for Congress. In the House he gained a reputation for humour and spread-eagle oratory ("Carter's Eagle"). In 1879, 1881, 1883, 1885, and 1893 he was elected Mayor of Chicago; and he always insisted, with his characteristic system, that he was the "best mayor" Chicago ever had. In 1884 he was the unsuccessful Democratic candidate for Governor of Illinois. In 1887 he made a trip to Japan, China, and other Oriental countries, and returned by way of Europe; his observations on this journey he published in a book called "A Race with the Sun." For a few years he has been proprietor and Editor of the Chicago *Times*. His ambition was not satisfied, he was a candidate for U.S. Senator; and if successful in that, "might have" become a formidable candidate for the Presidency in 1896. He was a distant relative of ex-President Harrison.

As a mark of respect and sorrow the closing exercises of the World's Fair were omitted, and instead a meeting was held at which appropriate resolutions were passed. Unfortunate it was that the last days of the grand World's Columbian Exposition should have been saddened by such a horrible crime; and that the end which was to have been marked by joyous ceremonies should have been shrouded in gloom. *Sic transit gloria*.

The following are the official figures of the grand total of admissions during six months:—

PAID ADMISSIONS

Souvenir general admission tickets	3,255,167
Daily admission tickets	26,012,190
Railroad coupons	55,511
Children's tickets	2,25 ,938
Total	31,477,812

ADMISSION ON PASSES

Complimentary cards	243,185
Full term photo passes	1,931,7 5
Monthly photo passes	1,600 421
Special press passes	65,803
Workmen's passes	346,403
Trip passes	2,0 1
Bureau of music passes	58,300
Returned checks	1,725,930
Total	6,052,188
Paid admissions	31,477,8 2
Total	37,530,000

The Fair was practically "open" on the 31st when more than 50,000 paid to enter, and had excellent opportunities for sight-seeing. Even now the grounds are open just as they were before May 1st; but, as exhibitors, in their haste to get away, have thrown everything into confusion, it is scarcely worth while to enter.

Some of the concessionaires on the Midway at first tried to keep running longer; but when the authorities closed the Plaisance against visitors, they submitted to the inevitable. The Ferris Wheel is set revolving every day; and the company intended to sue the Exposition for damages in keeping away customers.

The clerical force at the Fair is being rapidly diminished, and officials will resign as soon as their labours are finished. Director-of Works Burnham has already stepped out. The buildings will be moved away or demolished as rapidly as possible. There is a strong effort to retain many of them for other locations; it is planned, for instance, to re-erect the Manufactures Building on the Lake Front to be used as a hall for large public gatherings. The cost of this project is estimated at about $550,000.

Mrs. Potter Palmer has been honoured with a banquet by the Board of Lady Managers, and by her husband's gift of $200,000 for a woman's memorial building.

Marshall Field, of this city, has given $1,000,000 to the Columbia Museum on condition that $500,000 more in subscriptions, and $2,000,000 more in Fair Stock, can be secured. George M. Pullman makes a subscription of $100,000; Mrs. George Sturges of $50 000; and Marshall Field and Co. give $100,000 in Fair Stock. Smaller subscriptions of money and stock are pouring in daily.

Large donations of material are also being secured. Japan gives, not only plaques of embroidery, vases and other superb specimens of art, but also the model of the Imperial Quarantine Station, and her exhibits in Forestry, Agriculture, and Leather and Shoe Buildings. The Forestry exhibits of Johore, Ceylon, Siam, and Korea are also donations. The other gifts from various sources are of many kinds are too numerous to mention.

The following is from the Chicago *Tribune*:—"The Japanese have had no day at the Fair, but they have had a pretty successful six months." Mr. Tadamasa Hayashi has, however, been unfortunate in losing three cloisonné enamel vases, which were probably stolen. Made by Namikawa, they were valued at $1,500.

A score of foreign commissioners, including Dr. C. Matsudaira, have filed a complaint against, not only the loose and inaccurate clerical work of the executive committee on awards, but also against the system itself.

The Japanese, however, ought to be pretty well satisfied with their success in gaining awards. Here are some more lists:—

Japanese Commission, for miniature garden; Miss Kamo Nakagawa, Shiga, white crepe silk; K. Azumi, Tokio, maps and magazines; M. Yara, Kumamoto, books on physical geography of Japan; M. Okura, Tokio, picture books; T. Wada, Tokio, fine arts magazine; N. Takayama, Tokio books on dentistry for the school in Tokio; K. Hirade, Hokkaido, maps, scenery and statistics of Hokkaido; M. Fuji, Kyoto, pictorial art books; J. Takana, Kyoto pictorial art books. Observatory Department of Home affairs, charts, diagrams, reports, etc.; Land surveying Office, Department of War, Japan, maps.

WOMAN'S BUILDING.

[In woman's work Mexico took by far the largest number of awards; Chun Quan Kee received three for embroideries, embroidered screens, and carved ivory fans; the Korean government one for silk embroidery; and Siam several for silk brocades, hand painted silk scarfs and other fabrics].

Japan—Kyoto Kyoto Itomono, crotchet work: Kobayashi Kanjiro, embroidered screen; Yushiro Ihei, tapestry (handwork); Mishibuura Ihei, Hirano Kingoro, Honowa Masunori, Saka a Bunsuke, Hirrerkawa Kamodani Yauchich, Tenkamoto Gisuke, fans; Nishimura Sozayemon, three awards for landscape screens, wall hangings, screens with transparent figures; Ichia Shahichi, three awards for screens decorated with flowers, screens decorated with animals, small landscape screen; Kawashima Jinbei, two awards for tapestry, room model for making tapestry; J. Ono, silk and linen lace; S. Tanaka, two awards for embroidered silk hangings, embroidered silk screen, applique work; J. Ono, silk and embroidery in dress line, silk and embroidery in room decorations; Mrs. N. Iwai, scenes of Arashiyama for panels; Miss S. Yasuda, Mrs. Iida, embroidery; Miss Y. Mimura, lace for bamboo leaves, Mrs T. Matsui, artificial flowers, I. Kumaga, embroidered picture. Tokio—K. Kimura, embroideries, brocade silk, Miss K. Maita, lace work; Miss R. Mochigase, lace work (cotton); S. Nichida, Y. Takawase, fans; Tomozo Watanabe, silk embroidery; K. taoka Gennosuke, artistic embroideries; Bureau of Industry and Commerce, three awards for fans for export, fans for home use, fans to be used in ceremonies; Mr. T. Noguchi, water color painting; Miss K. Aomi, flower seeds mounted on twelve folded frames. Miss Y. Ikuma, butterflies and peonies for panels; Miss T. Takahashi, Miss N. Tsuruta, embroidery; Y. Suzuki, buttons shell; Miss H. Nakabayashi, pouloveins and bird embroidered; Miss T. Kato, lace handkerchief; Mrs. C. Horiuchi, artificial flower; Osaka—Ikanosuke Nakamura, flowers, Kichiro Yamanaka, two awards for bronze lantern, incense burners; Kihei Kawakatsu, Yoichi Kubota fans; S. Kunwai, ornament tassels; K. Kawakatsu, fans; Miss T. Yoshimasa, Osaka, artificial flowers, S. Shieno, Yokohama, embroideries; R. Ota, Shiziioka, open fans; Komasa-Moto, Joshi-Jucanba, Ishikawa, silk embroidery, T. Sowaka, Okayama, fans; Hisuke Shibamai, Ishikawa-ken, silk embroidered round fan; I. Kawakishi, Kumamoto, bamboo ware; Mrs. N. Akashi, Ishikawa, Miss N. Orihara, Tokushime, embroidery mats mounted in frame for panels.

IN H.B.M.'s COURT FOR JAPAN.

(IN ADMIRALTY.)

Before R. A. MOWAT, Esq., Judge.—TUESDAY, December 5th, 1893.

JAMES TROUP, ESQ., H.B.M.'S CONSUL, PLAINTIFF, v. THE MASTER OF THE "ARCTIC," DEFENDANT.

The Court sat at 11 o'clock to-day to deliver judgment in this case. There were present Mr. H. C. Litchfield, Crown Prosecutor, who appeared for the nominal plaintiff; Mr. D. McNeill, for the master of the *Maud S.* defendant; Mr. James Troup, H.B.M.'s Consul, and Prince Lobanow de Rostow, H.I.R.M.'s Vice Consul.

His Honour said—The suit is one of forfeiture instituted by Her Majesty's Consul at this port against the British schooner *Maud S.* in respect of alleged breach of the provisions of "The Seal Fishery (North Pacific) Act, 1893," and of "The Seal Fishery (North Pacific) Order in Council, 1893"—under the combined provisions of which enactments the killing or hunting of seals within a zone of thirty miles round the Komandorski Islands (amongst other specified districts) is prohibited between the 4th July, 1893, and the 1st January, 1894. There is also a counter claim for damages by the defendant, the master and owner of the schooner.

At the close of the case, I had no doubt as to either of the matters in issue, but I thought it desirable under all the circumstances, and more especially as this was the first case brought under the Act and Order in Council, to put my judgment into writing.

The *Maud S.*, which left Yokohama in April last on a sealing cruise, was seized by His Imperial Russian Majesty's despatch-boat *Yakout* at 5 a.m. on the 29th August, at a distance of twenty-two miles from the southern point of Copper Island, one of the Komandorski group; and of the fifty-seven seal skins then found on board, two are described in the Russian protocol of seizure as being "perfectly fresh and still wet." It has thus, under the 6th sub-section of Section I. of the Act, become incumbent on the master to prove that his vessel was not, as a fact, at the time and place in question "used or employed in contravention of the Act." His own evidence and that of the crew have left no doubt whatever on my mind that the two seals were killed, one late in the forenoon, and the other early in the afternoon, of the day previous; and I have further come to the conclusion, on the evidence mainly of the master and his chief officer, that the seals were not killed within the prohibited zone. The evidence of both these witnesses—and I see no reason at all to disbelieve it—is that their vessel was at noon on that day in lat. 53° 24′ N., and that the E.N.E. course set at 12.30 brought her at 4 p.m. into lat. 53° 35′ N., that is to say, when the seals were caught she could not have been within fifty miles of the Island. Indeed, Counsel for the Crown practically abandoned this part of the case. He urged, however, that the ship, being undisputably within the prohibited zone when seized on the morning of the 29th must be considered to have been then in pursuit of seals. Now the master ascribes the fact of his being within the zone at all to an error in his chronometer, by which he was misled as to his true position, and denies hunting for seals while there. Nor is his evidence on these points an afterthought, for at the time of the seizure he appended to the protocol a memorandum as follows:—I Robert McKeil, do hereby declare that my vessel being inside of Thirty Mile Zone of Commander Islands is caused by my chronometer being in error, and in going from the southern waters to hunting grounds north of the island, I got inside of the limit when I thought I was at least fifteen miles to the eastward of my position, and the two first skins were taken yesterday when my vessel was forty miles to the southward of her present position, and I also declare that my boats have not left the vessel nor has there been a seal taken since I have been inside of the above-described zone, and on above grounds I protest against confiscation."

It appears that having been advised a few days before by a brother captain to try the sealing grounds to the north of the Islands, he had started on his way thither on the morning of the 28th, the day on which he caught the two seals. At 7 p.m.

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

on that day he made his position long 168° 5′ E. and lat. 53°. 42′. N., and he then set a N.E. by N. course. This course would have carried him clear of the zone had the longitude been correct, but owing to his chronometer placing him 15 miles farther to the E. than he really was, the course set brought him, in the early morning of the 20th, inside the zone instead of to the E of it. If that is an honest account of the matter, I doubt whether actually sealing under the circumstances, *i.e.* under a *bonâ fide* mistake as to his real position, could be properly considered as a contravention of the statute: it certainly would be a very harsh, if a sound, construction of the Act. But his evidence goes on to establish that immediately on land being reported, which was shortly after 4 o'clock—he altered his course to N.E., and a moment later, after consulting the chart, to E. by N, with the view of getting away from the land as quickly as possible, not, however, because he thought himself inside the zone, but because he was nearer the land than he cared to be. Half an hour after this, he says, and while still standing away from the island, he sighted the vessel that turned out to be the *Yakout*.

Now in all this, there is nothing in the slightest degree improbable, nor as will appear, is it in any way inconsistent with the statements in the Russian documents—on which alone inconsequence of the seizors not having thought fit to produce witnesses, the case for the Crown rests. If, then, I believe the master's account of the matter, he will have discharged the presumption which arises against the ship under the Act from the mere presence within the prohibited zone with sealskins on board, and there will then be an end of the case for the Crown. Against the master's version there is, besides the protocol already referred to, one other documents—the decision upon the master's protest of the Commission of Russian officers, but that does not really carry the case against the ship any further than the statements in the protocol do. The grounds upon which the "decision" is based are thus started: Considering that when the schooner *Maud S.* was sighted from the despatch-boat she was going in the direction from the southern point of Copper Island to the sea, on a day when the weather being perfectly clear it was possible in consequence of the distinct visibility of the shores, to take the bearings, and also that there was nothing to bear out the master's declaration (as, on inspection of the schooner, no official log book was to be found), and, finally that on said inspection some fresh seal skins were found and the traces of blood had not yet dried. Now, as to the first ground—viz., that at the *Maud S* when sighted was standing out to sea—that is obviously what an innocent master would do when he discovered that he had got too near the land No doubt a master who had knowingly gone inside the zone to hunt seals would equally have altered his course westwards if he saw a cruiser approaching, and the *Yakout* was fairly entitled, under the circumstances as observed by her, to assume that such was the case with the *Maud S* But the schooner's presence within the zone being susceptible of two explanations, one of them consistent with innocence, the question of guilt or innocence manifestly cannot be determined by that one circumstance alone. As to the error in the chronometer, it appears that chronometers of this class of vessels are frequently more or less incorrect. In the Parliamentary Paper "Russia, No. 3 (1893)," which was referred to for another purpose in the case, I find, in the Report of the Special [Russian] Commission appointed to enquire into the circumstances attending the seizure last year of several British sealers in the vicinity of Copper Island, that the chronometer of the *Marie*, one of the vessels in question, had, curiously enough, precisely the same amount of error as in this case.

The second ground of the "decision" is that as no official log-book was found, there was nothing to bear out the master's declaration. It would appear, from the evidence, that it was probably the absence of an official log-book which really led to the vessel being ordered to Yokohama, and if so, the loss of the log-book—for it seems to have been lost—was a most unfortunate circumstance for the master. But if it had been forthcoming, it would not have contained any entries bearing one way or the other upon the questions of the position or courses of the ship or the time when or place where the seals had been caught, for under English law such entries would not appear in an official log book at all. The absence, then, of the official log book was a circumstance from which no unfavourable inference as to the facts in issue in the case could properly be drawn, though, I may add, I can quite understand the suspicion which such a circumstance would not unnaturally create in the minds of the Russian officers. Then the last ground assigned is that "some" (really only two) "fresh sealskins were found and the traces of blood had not yet dried" No evidence has been given in opposition to that of the master as to the time during which seal skins would remain fresh, and I have no difficulty in believing that skins would remain wet, and traces of the blood upon them would not dry for the interval which elapsed—fifteen and eighteen hours at the most—between their having been taken from the animals and their being found in the damp hold (used as a salting-room) of the ship Moreover, as I have already observed, counsel for the Crown did not seriously dispute the time when the animals were caught.

Having thus gone into the question at some length—as under the circumstances I considered it advisable to do—it appears clear that there is no real conflict between the master's statement and the documentary evidence on the other side. As I am further quite satisfied of his truthfulness, and I will add, of his *bona fides* throughout, I pronounce in favour of the ship and dismiss the petition.

The petition being dismissed there arises the remaining question in the case, the defendant's counter claim for damages. In the pleadings he bases the counter-claim on unreasonable delay in instituting the proceedings and unreasonably long detention of the vessel, but in argument his case was presented on a broader basis, viz, that there was no reasonable ground for the detention at all.

I think there is no foundation for the counter claim. Although the vessel herself arrived in Yokohama on the 25th September, under the provisional certificate given to her by the Russian Commander to enable her to proceed thither, her papers with the Russian documents establishing the ground of seizure did not reach the plaintiff till the 4th October, and early in that month he instructed Counsel to take the necessary steps to bring her before the Court for adjudication. The petition, it is true, was not served till the 4th November, but it was open to the defendant in the meanwhile, under the second sub-section of Section II. of the Act, to procure the release of his ship by giving satisfactory security for her appearance in the event of any legal proceedings being taken; and any delay *after* the proceedings were instituted (which is all that is left to support the "unreasonably long detention of the vessel") could have been dealt with on the defendant's application under our Rule of Procedure 63.

As to the contention that there were no reasonable grounds for any detention of the vessel at all,—a contention which, in strictness, is not open to the defendant on his pleading as it stands—I am unable to accede to it. Plaintiff had the Order in Council from which he learnt both of the prohibition of sealing by British ships at certain places during a certain period, and of the arrangement between Her Majesty and the Emperor of Russia whereby Russian cruisers were authorized to seize British ships found sealing in contravention of the Order in Council; he had also the protocol of seizure by a Russian war-vessel, setting out facts from which he could reasonably suspect that an offence against the Order had been committeed, and though, it is true, he was not aware of the actual terms of the Act of Parliament under which the Order in Council was framed, he had official information of it, and he was entitled to assume that it would prescribe penalties for the offences specified in the Order; and he was therefore in my opinion fully justified in detaining the ship as he did.

In the result, then, both the Plaintiff's petition and the Defendant's counter-claim are dismissed. Each party will bear his own costs.

The Court then rose.

TUESDAY, December 5th, 1893.

This case was called at 10.30 to-day. Mr. H. C. Litchfield, Crown Prosecutor, appeared for plaintiff, Mr. D. McNeill representing defendant.

His Honour upon taking his seat upon the Bench asked the Crown Prosecutor if he was going to open the case at once.

Mr. Litchfield—With your permission, sir, I intend to call certain Russian officers as witnesses before I open the case.

Prince Lobanow de Rostow, H.I.R.M. Vice-Consul, was sworn in as interpreter and took a seat upon the Bench.

Lieut. Constantine Alexanderovitch Panferow, sworn, said—I am a Lieutenant in the Russian Navy and serving on board H.I.R.M.S. *Zabiaka*. On the 22nd July, O.S., 3rd August, N.S., I was on board my vessel. We were cruising in the neighbourhood of Copper Island. On the morning of the 3rd August I sighted the schooner *Arctic*. I was in charge of the party that boarded the vessel. This was about half-past 5 o'clock in the morning. The protocol of arrest, now handed to me, is the one prepared by me as the result of my visit. It is signed by me, amongst others. I did not inspect the armament or equipment of the vesse but looked for sealskins. The latitude and longitude of the *Arctic* was the same as that of the *Zabiaka*. That was lat. 54° 15′ N, long. 167° 33′ E. This reckoning would make the *Arctic* between 26 and 28 miles from Copper Island. The *Zabiaka* took bearings at 9 p.m. the previous evening. The weather was clear and the land very distinctly seen when the bearings were taken so the position is true. From the time these bearings were taken till the time when the *Arctic* was seen, Copper Island was kept in sight. I cannot remember whether the *Zabiaka* was kept steaming the whole of the night, but steam is always kept up; sometimes she is put under sail. The protocol of arrest is signed by the Captain of the *Zabiaka*.

An English translation of the protocol was then handed in. It read as follows:—

PROTOCOL OF INSPECTION of the British schooner *Arctic* made on board the 2nd Rank cruiser *Zabiaka*, 22nd July (3rd August), 1893, Pacific Ocean.

22nd July, (3 August) 1893. At 5.12 a.m. in 54° 15″ lat N. and 167° 31″ E. long. on the horizon towards S to O a sailing schooner was seen, in consequence of which the course was laid on her and the speed increased. Having neared the schooner at 5 55 a.m. to a distance of two cables and lowered the whole-boat, Lieut. Panferow, sub-Lieut. Tigerstedt and six armed men were sent on her to inspect the schooner. After inspecting her, Lieut. Panferow returned on board the cruiser in company of the master of the schooner, Pyne, with his log-book From the facts of the inspection of schooner, the questioning of the master, and the examination of the documents, the following appeared: The schooner's name is *Arctic*, 51 tons, the property of the master, Pyne, himself. The crew, according to the documents, is of 20 men and one passenger, Burnside; but at present were only 14 men to be found, the other six having gone out sealing the Saturday before in two boats and not yet returned on the schooner. The schooner's cargo consist, of fifty-five sealskins, all of which were killed outside the thirty-mile limit, and 3 tons of salt. The schooner left Yokohama April 2/14, for sealing in the Pacific Ocean, killed seals on her way along the coasts of Japan and called at Hakodate to leave there at the hospital five six sailors, and thirteen sealskins On July 16/28 met the British cruiser *Porpoise*, who informed the master of the prohibition to seal nearer than thirty miles to the Commander Islands under fear of having the schooner arrested and the ship's papers confiscated, which is entered in his papers. In the moment of his arrest the master thought himself outside the mentioned limits and was looking for his lost boats

The place where the schooner was arrested is lat. 54° 10′ N and long. 167′ 33″ E., 28 miles distant from the southern point of Copper Island

The log-book and all the documents were found to be in order

Considering that the schooner *Arctic* was at the moment she was met by the cruiser in the limits forbidden to industry, we, the undersigned, on the ground of Paragraph 9 of the instructions given by the Commander of the port of Vladivostock, dated June 7, 1893 No. 2486, to the cruiser for the protection of the Russian maritime industries in the Behring Sea, think it proper:

1.—To take the ship's documents of the schooner *Arctic* from the master, Pyne, and to forward such to the British Authorities.

2.—To deliver the master instead of the taken papers, a temporary certificate to let the schooner proceed to Yokohama, for the master to report himself there to the British Consul, and to present him this protocol and other documents

(Signed.) Lieut LAKUTIEN,
Lieut PANFEROW,
Lieut. KLUPFEL,
Lieut. BEZKROVNY
2nd Rank Captain ARNAUTOW.

I approve this protocol To avoid any objection of the master as to the exact place of the schooner's arrest, I think it my duty to state that the last definiton of the point of the cruiser entrusted to my command was done by bearings of the Northern Point of Copper Island yesterday July 2 at at 9 p.m., and that since we have been going under steam without stopping the engine until the officer was sent on board the schooner

The Captain of the cruiser of 2nd Rank *Zabiaka*
(Signed) Capt of 2nd Rank DOMOJIROFF

To the above statement of the cruiser's Captain the Commission finds its indispensible to add on the protest of the master, Pyne, that his last observation was made on Aug. 1st, N.S., and that he could not since have any astronomical observation in consequence of unfavourable weather.

Signed by the members of the Commission.

Cross-examined by Mr. McNeill—On the night before the seizure a slight rain fell; the weather got very bad after two o'clock in the morning. It had been bad the whole of the night after nine o'clock; but the rain did not come on steadily until two o'clock. The weather was cloudy at nine p.m. when we took the bearings. It was also misty, but we went in close to land in order to get our bearings and so saw it sufficiently distinctly. I remember that when we neared the *Arctic* the sea was rough and there was a wind blowing. The rain came on about two o'clock, but as I was not on deck all night I cannot say whether it rained all the night. When I returned with the master of the schooner it was raining, I think. My watch was from twelve till four o'clock. The previous watch was from four till eight in the morning. I was consequently at the disposal of the captain for the next four hours after I went off watch at four o'clock in the morning; that is the reason why I effected the seizure. I was not on deck when the bearings

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

were taken at 9 o'clock, but I came up immediately afterwards and so noticed the near proximity of the land. I can not say, of my own knowledge, what the ship did from the time of taking the bearings until the seizure was effected. The bearings of the *Zabiaka* were laid down by dead reckoning. After the seizure of the *Arctic*, the *Zabiaka* cruised about. I know from overhearing conversation that another schooner had been sighted that day, the 3rd August. I don't remember the gale which took place some few days before the seizure of the *Arctic*. I do not remember any boat being sent ashore to the Commander Islands from the *Zabiaka*, prior to the seizure. I do not know whether any other sealing vessels were cruising about at the time of the seizure, as I was engaged in the search and then in writing out the protocol. Before the seizure there were no other vessels in the immediate neighbourhood. I went on deck that morning about 5 50 o'clock. I was not on deck when the schooner was sighted. I did not know that the schooner was the *Arctic* before I boarded her. I had no previous knowledge of the *Arctic*. I do not remember any photograph of the *Arctic* being taken at Hakodate.

Mr. McNeill—Now, did you expect, when you boarded the schooner, to find her boats away out hunting? The master of the schooner informed me that he had lost two boats, and afterwards it appeared that these two boats were the two boats found on Copper Island.

That is a singular answer to make to my question. My question was, did you expect, when you went on board, to find the boats of the *Arctic* away hunting?—I did not form any opinion.

But the weather was quite unsuitable for hunting, was it not?—Yes, there was a very rough sea.

May I ask from whom the information came of the two boats being on Copper Island?—From the authorities there.

His Honour—Did he mean the boats were thrown up by stress of weather?—Yes, the people in the boats were thrown up on the Island in bad weather, and the boats destroyed.

Mr. McNeill—Was the *Zabiaka* in constant communication with the authorities on Copper Island?—Yes, we often went there.

Was the *Zabiaka* in communication with Copper Island on the 3rd August?—I do not remember.

Will you say positively that she was not?—I cannot say positively whether we were or not, we went there so frequently.

Is the place of seizure—26 to 28 miles from Copper Island—calculated on dead reckoning from the position of the *Zabiaka* at 9 o'clock the day previous to the seizure?—Yes. I have confidence in the officers' calculations, and the distances mentioned in the protocol are correct.

Did the master of the *Arctic* inform you that, according to his observations, he was outside the thirty mile limit?—I don't think he did.

Witness continuing—The master of the schooner was examined by the Commission of which I was a member. The master of the schooner told us that he thought he was outside the limit. We did not ask us to see his chronometer. I do not remember whether we marked the position of the seizure upon the schooner's chart. I think the chart was given back to the master of the schooner. I think we showed him on a chart the position in which we found him. I don't remember which chart we used then, whether the schooner's or ours. I don't remember what instructions are given to Russian officers in regard to the seizure of British vessels, unless I refer to the protocol. The instructions are, I now see, that if the schooner is found within the 30 mile limit, we must send her to the nearest British authorities.

Mr. McNeill—I hope you will take a note of that instruction your Honour.

Re-examined by the Crown Prosecutor—When I first saw the *Arctic* she was under sail.

Mr. McNeil objected to this being taken down as it did not rise upon the cross examination.

Mr. Litchfield—I do not press the point.

Witness continuing—The captain of the *Zabiaka* had an official document sent him regarding two boats on Copper Island, as to the date of their arrival, etc. The information must have come on the day of the seizure.

Upon resuming after tiffin,

Vladimir Lakhtine, Senior Navigating Officer of the *Zabiaka*, sworn, said—I remember the *Zabiaka* sighting the schooner *Arctic* on the 3rd of August last. I was below when she was first sighted, but it was reported to me and I went on deck and altered the course to due North. This was about 5 o'clock in the morning. When the *Arctic* was boarded by our armed party she was in lat. 54° 10′ N, long. 167° 31′ E. The last observation was made on the *Zabiaka* at 9 p.m. on the evening before, and the bearing was made from a dead reckoning which was made from the north point of the Island. The position was worked out by the log and the nine o'clock observation. At nine p.m. the day before, the Island bore 57° N E.; this is only an approximate estimate. The island was then distant, at its northern point, two miles. The dead reckoning observations made were very correct, and almost as correct as astronomical observations could have been, because there was no current to make an error possible.

Witness then worked out the *Artic's* position on a chart belonging to the *Maud S.*

His Honour—I have not had an opportunity of hearing Mr Litchfield's opening, but I should like to know what his case is?

Mr Litchfield—My case is that the *Arctic* was attempting to hunt within the limits. There is no evidence to prove that she was engaged in hunting seals, so we charge her with attempting to hunt within the limits, having been found within twenty-eight miles of the coast.

His Honour—Thank you.

Witness was then asked to mark a second position, lat. 53° 58′ N., long 167° 45′ E., and also lat. 53° 50′ N, and long. 168° 18′, E. The last position, he said was thirty eight miles from the southern point of Copper Island.

His Honour—The second position then, is where Capt. Pyne thought himself to be, and the last, the point where he lost his boats on the 29th July?

Mr. McNeil—Yes.

Cross examined by Mr McNeill—The first position is 30 miles from the southern point of the Island, but the chart is not correct.

Mr. McNeill—I should like you to measure again, and I suggest that it is more than 30 miles away. I have measured it myself and found it to be more?—Well, perhaps it is half a mile more. As navigating officer of the *Zabiaka* I am on deck, on and off, most of the time. She was under steam all the night prior to the seizure. She was steaming about 6 knots an hour. She was steaming the whole night, from nine o'clock till the time of seizure. Immediately after nine she was set on a course due S; about four o'clock the course was changed to S E. About an hour after that the *Arctic* was sighted and we then steered for her. The *Zabiaka* carries a mechanical Walter's log. Two days before the seizure we spoke an American schooner. We did not sight any other schooner before the *Arctic's* seizure. While we were inspecting the *Arctic* we sighted another schooner. We took her bearings, but as the weather was misty she soon disappeared. There was also a steam vessel to be seen at the time we boarded the *Arctic*. I do not know her name, but the master of a German schooner we met during the day said it might have been the *Alexander*. It was not the *Alexander* who told us about the *Arctic's* boats being on Copper Island.

Mr. Litchfield then opened the case for the Crown. He said—The petition in this case is framed on similar lines to those of the case of the *Maud S* so recently before your Honour in this Court, and the answer filed by defendant in this case is on practically the same lines as that of the answer filed in the *Maud S.* case—with this exception, that the only dispute in the present case is as to the exact position of the vessel on the morning of her seizure. I propose, with your Honour's permission, and subject to any objection which my learned friend may raise in the course of the proceedings, to pray in aid of my case, all of the Act of Parliament and the whole of the Order in Council, cited by myself in the previous case, without reading them. I think I shall save a good deal of the time of the Court if I refrain from quoting every or any particular clause referring to the case, as they were quite recently read before you.

His Honour—I don't think there has been time yet in which to forget them.

Mr. Litchfield—Therefore, with the permission now given, I will pass on directly to the matter in hand. My case is that the *Arctic* was engaged in sealing operations within the limits prescribed by the Act and Order in Council, either on the morning of her seizure, or very shortly before that time. That is to say, she was on the sealing grounds hunting or attempting to hunt for seals, that she was within the meaning of the Act fully equipped for hunting, and was there for one where she was for that purpose. The contention of her master is that he was found while innocently engaged looking after some boats, or two boats, which, according to the log of the *Arctic*, disappeared on the afternoon of the 29th July. But we have it in evidence, given by one of the Russian officers, that in regard to one of the boats found on Copper Island information reached his Commander that she was lost on the island on the night of the day prior to the seizure.

His Honour—Who said that?

Mr. Litchfield—It is given in the evidence of Lieut. Panferow.

His Honour—By my notes I find that he only says that official information had been received, he did not say any more than that.

Mr. McNeill—He certainly gave no date.

Mr. Litchfield—I asked the question in re examination, and I certainly thought he said that the boat was lost on the night before the seizure.

His Honour—I heard your question, but I did not take upon my notes the answer you now say he gave.

Mr. Litchfield—The position of the *Arctic* on the 29th July was—

His Honour—Don't you think that this point about the boats ought to be cleared up first? Perhaps the reporters can tell us what was said, their notes are usually fuller than those taken by the Bench.

The Representatives of the Press present all said that they had no recollection of witness having said the words attributed to him by the learned Counsel for the prosecution. Unfortunately, they had sent their notes from the Court to the printers to be set up.

Mr. McNeill said he was willing to take the reporters' notes in evidence, and Mr. Litchfield said he was willing to do the same. The notes were accordingly sent for and produced later in the sitting, when it was found that His Honour was correct in his surmise that no date of the finding or loss of the boat on Copper Island had been given.

Mr Litchfield—Well, the *Arctic* was 38 miles from Copper Island on the 29th of August. That is the last entry in the log, and that entry shows us but they were then actually out in boats engaged in hunting. They were keeping, I submit, from that time till the 3rd of August, upon the hunting ground. I shall also submit that they were hunting during that time whenever opportunity offered. I shall further submit that at the time the boats were lost they were engaged in hunting within the proscribed limits. Not the *Arctic* herself, but some boats belonging to the *Arctic* were engaged in hunting on the 29th July; even assuming that the position of the *Arctic*, as shown by her own log, which log we may for the moment suppose to be correct, was considered by her master to be correct, I shall prove this to be so. But I submit that the positions given in the log are incorrect, and that, therefore, both the vessel and her boats were hunting on the 29th July, or were attempting to hunt, take, or pursue seals within the limits specified. I propose to call before the Court the plaintiff, Mr. Troup, to prove the receipt of various documents, the protocol, etc. I shall also put in the log of the *Arctic*, and shall ask the master and owner to explain to the Court the entries in the log-book.

His Honour—For what purpose.

Mr. Litchfield—I shall submit that according to the mode of operations usually pursued by sealers the boats are sent out East, West, South, and North in search of seals, and also that if the schooner was engaged in seeking for her boats, that those boats had been lost while pursuing on the 29th of July an illicit industry, and also that the presence of the *Arctic* within the zone was not so innocent as my friend wishes us to believe, for I submit that she was very much nearer the land on the last date mentioned than the log book shows.

Mr. James Troup, H.B.M.'s Consul, sworn, said—I received several documents relating to the *Arctic* from Capt. Scott Rogers, of H.M.S. *Archer*, during the autumn of this year. These documents I now hand in. They are the articles of agreement, official log, certificate of registry, and a copy of agreement with the crew, certain Consular accounts, the ship's log book, a list of the documents signed by the Captain of the *Zabiaka*, partly in Russian, partly in English, the protocol of arrest, and a letter from the Captain of the *Zabiaka* to the Captain of H.M.S *Porpoise*, the last is dated 19th August, 1893. The *Arctic* returned to port from her sealing voyage, I think, on the 9th of October; she may have arrived in port before that date, but she was entered on the 9th.

Cross-examined—I have detained the *Arctic* since the date of her arrival.

What offence did you suppose she had committed?—Sealing within the prohibited zone.

How did you arrive at that conclusion?—From the protocol.

Will you look at the protocol and tell me what point in it enabled you to arrive at that conclusion?—I may say that I was basing my action on the action of the Russian Commander.

The fact of his sending you the protocol was sufficient to influence you, independently of its contents?—The contents of the protocol were sufficient to convince the Russian Commander that she had been committing an offence, and I considered it to be my duty to present the case to the Court. I took the protocol as a whole. It was not the presence of the 55 sealskins all shot outside the limits, which led me to think she had

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

been committing an offence. I considered there was a *prima facie* case against her. She was described as having fishing and hunting implements on board. I was also in possession of other documents to warrant my action, the Convention between the two Governments, etc.

Walter Edward Pyne, master of the *Arctic*, was then called, and sworn. He said—I am the owner of the British schooner *Arctic*, and was master of her when she was seized. I believe the book produced was the ship's log. I did not keep the book. It was kept by Mr. Burnside, a passenger on board, for his own amusement. The entries are all correct. But the book is only a journal of events which occurred on the voyage. I gave him the latitudes and longitudes sometimes. These entries are correct as far as my knowledge went whenever I had no observations. On the 29th July the *Arctic's* position was entered on the log-book. I agree with the entry in the log-book, because I gave the information. It was lat. 53° 58' N., long. 167° 8' E., this was our observation at noon. I do not remember what course I set, but I made many courses the same afternoon. The boats left the ship about half past one. There were five of them sent out. They went to the westward—that was their instructions. The schooner follows the lee-boat, and the boats follow the lee boat. The lee-boat is the boat furthest to leeward of the other boats. Mr. Burnside mentioned this in the log-book because on that day I explained the circumstances to him. Something had happened to one of the boats and I wanted the matter noted, so that I could place my ship properly before the Court, if the matter should come before it. There was another entry about this lee-boat in the log-book. The lee-boat on the 29th August was in charge of Gillan. I kept my eye on her, as far as I could, most of the time. She went to the westward, and the ship headed towards her. She was one of the first boats to get back. This was about 4.15 p.m. When I came on deck about 4.45 I saw the two lost boats sailing on the opposite tack to the other boats, presumably with the idea of recovering their position. Some of the boats were under sail and some were rowed. The two lost boats were under sail. I did not give them up as lost, but kept firing signal guns and burning blue lights and flares all night, as well as using fog-signals. On the 30th July we had very heavy weather, as hard a gale as I have seen on this coast. We were have to on the starboard tack; the wind was from the N.W. and I must have drifted to the S.W. This was for the safety of the ship. There were several schooners around on the 31st, and I sailed between them, speaking each one, asking them whether they had picked up either or both of my boats. This is entered in the log-book. I could gain no news of the boats, and on the following day I sailed very many courses. I had no one board who understood navigation, and I laid down my courses on the chart. I drew a good many lines, and had to rub them out in order to keep the chart clear. I was in the neighbourhood all the time. I was boarded on the 28th July by an officer of H.M.S. *Porpoise*. On that day my latitude was fixed by observation, but I did not get any longitude, and therefore it is not entered in the log. I received a caution from the office of the *Porpoise* that day. Land was not in sight that morning. I saw the land once, on the voyage, it was probably on the 25th of the month, the observation being obtained then from Behring Island. Two of the sailors in the missing boats are in Court now, they are the hunter and the boat-steerer.

Cross-examined by Mr. McNeill—The latitude and longitude entered on the 29th is quite correct. I have no reason to doubt the correctness of my chronometer, because a few days afterwards I compared it with the chronometer of another schooner, and the Greenwich time agreed to a second. Gillan, the head-hunter, gave instructions to the boats. He said he was going to the westward, and I concluded that he gave an order to that effect. The two boats observed going in an opposite direction were proceeding E.N.E., away from the land. It was fine but overcast that day. In a little while after the boats put off the weather changed to thick rainy and foggy. It might have been an hour afterwards when this change took place. Three boats out of the five returned. The boats were supposed to be provisioned for three or four days. If they had no provisions on board, it was their own fault. No land was in sight when the boats were lowered.

At this point the reporters' notes as to the first witnesses's evidence in regard to the lost boats' were read.

Mr. Litchfield—Then I have fallen into error. I thought the witness said otherwise. Of course I abandon the point on the evidence now read. This closes the case for the prosecution.

Mr. McNeil—Then if the last point is admitted it leaves very little for us to prove. My learned friend has admitted that on the day the boats were lost, the log showed that the *Arctic* was then 40 miles away from Copper Island. If he had proved that there had been an error in the log in this respect it would have invalidated the evidence given by any witnesses on the *Arctic's* behalf. But that allegation is now withdrawn, and it rests with me to deal with the evidence of the Russian witnesses and the protocol. Counsel appears to me to have surrendered whatever slight inference might have been drawn by the presence of the 55 sealskins on board, for the protocol admits that these were all shot outside the limits. It has also been admitted that the vessel was not engaged in hunting, indeed, that when she was searched her master told the officers that he was engaged in searching for two lost boats. The petition, as in the previous case of this kind, alleges a variety of offences—did kill, take, hunt for, or attempt to take seals, etc. In support of their case the other side have brought forward the oral evidence of two Russian officers. The oral evidence we find entirely destroys the allegations of killing or attempting to kill or take seals, so I may conclude that all these allegations are also abandoned.

Mr. Litchfield—I attempted to make it clear this morning that there was no question of killing at all, the case is one of attempting to hunt.

Mr. McNeill—Then there is but one other point for me to address the Court upon, and that is an important one. It is this, whether the prosecution have discharged the burden thrown upon them, to prove that the vessel was found within the limits prohibited under the provisions of subsection 6. She was seized in lat. 64° 10' N., long. 167°33'E., and the plaintiff's witness marked the position upon the chart which I was handed to him. He measured the distance between the place of alleged seizure and Copper Island, and he discovered it to be from 30 to 30½ miles. Now, in the chart of the *Arctic*, if the same positions were laid down, the distance would be found to be about the same, 30 miles and over; I have measured the positions of the chart myself, and I find that the place where the *Arctic* was seized was considerably outside the limit.

His Honour—But if her boats were engaged in hunting within the limits?

Mr. McNeill—Nothing has been put in to show that they were hunting. We have evidence certainly, to prove that they were out several days before the seizure. I could prove, if it were necessary, that so far from the poor fellows being engaged in hunting on the morning of the 3rd August, they were being taken care of by the villagers on the island, having been thrown up on the island in a thoroughly exhausted condition, their boat being smashed; and that they were engaged in recovering from the effects of the hardships undergone, having no strength left for anything else. There has, I submit, been nothing said as to the boats being engaged in hunting, but only evidenced that they left the vessel and some reached the shore where their boat was broken up. But to clearly prove to your Honour that the *Arctic* was not within the prohibited zone, I will refer you to two standard works on Navigation, and if your Honour will work out the easy mathematical rules set out in them—I am sorry I have been unable to do so—you will see that the ship at the time of her seizure was actually 32 miles from Copper Island. The books are Norrey's "Navigation" and Raeburn's "Navigation."

His Honour—But who is to make this easy mathematical calculation?

Mr. McNeill—I would point out that the rules are so simple and clear that your Honour by following them will have no difficulty in finding that the statement I have made is quite correct. Both the works give the latitude and longitude of the Southern point of Copper Island to be 54° 33' N., by 168° 11' E. The charts of the *Arctic* and *Maud S.*, now handed in are in agreement with these two authorities.

His Honour—The officer said the chart was incorrect.

Mr. McNeill—Yes, he said so, but these two authorities and both charts are in agreement, they all coincide as to the position of the Southern point of Copper Island. That being so, I must not be lost sight of that the Russian's position was worked out by dead reckoning, the weather being misty, and this would make the taking of correct observations very difficult. A great authority in the volumes I put in says "that in working out a ship's position by dead reckoning an error of 5 miles is not unreasonable? Another says that the amount of error allowable under dead reckoning is half a point. So I do not see why the dead reckoning of a vessel which has been cruising up and down in stormy weather and rough water should be accepted as absolutely correct. I contend that under the circumstances it was impossible to place the position of the ship with such a nicety as two miles within the prohibited zone, the zone being taken as a correct distance. On this point, I should like to have your Honour's opinion; but doubtless you are not prepared to say at once whether the *Arctic* was or was not within the radius of 30 miles. I repeat though now, that I doubt very much whether plaintiff has discharged his burden of proof, that the *Arctic* was seized within 30 miles of the island and within the prohibited water. If this has not been clearly stated by plaintiff and proved to the satisfaction of the Court, then the burden of proof cannot be shifted from us to our shoulders.

His Honour—I shall look very closely into this matter, of course, but at present I am unable to say anything about it.

Mr. McNeill—Still I shall contend that it lays with plaintiff and he must prove that the seizure took place in the place stated; at present, evidence is given that he was seized at the place marked on the chart. The *Arctic's* chart is a British Admiralty chart, and that is the chart that your Honour must refer to in deciding this case. The chart of the *Maud S.* is an American chart, and of a slightly more recent date. I might mention that Capt. Pyne also protested against the seizure upon the ground that he was outside the limit. It has been proved that his chronometer was in order, and that his position was worked out by dead reckoning from observations obtained two days before. I see no reason why his observation should not be as correct as the Russian officer's, or that his dead reckoning of two days should be set aside for the dead reckoning of the Russian officer's who had not taken observations in misty weather. He also had been cruising in the near vicinity, while they came from considerable distance.

His Honour—I must read the evidence through, and refer to the log book and the charts before I can say anything upon the point. I don't know how far a Judge's mathematical abilities are supposed to extend in the matter of the rules contained in the volumes on navigation which you have put in, Mr. McNeill. Supposing they went no further than the rule of three?

Mr. McNeill—I only put them in for your Honour's assistance in the matter.

The Court then adjourned till 2 o'clock tomorrow.

WEDNESDAY, December 6th, 1893.

Mr. H. C. Litchfield appeared for the nominal plaintiff, Mr. Duncan McNeill representing the defendant.

When this case was called on at two o'clock today, after adjournment from the previous afternoon,

Mr. McNeill inquired whether an answer had not been received from the Navigating Lieutenant of H.M.S. *Mercury* in regard to a question sent him by His Honour, and if so, whether this answer did not say that the position marked upon the chart, as being the place where the *Arctic* was seized was within 28 miles of the nearest point of the Commander Islands, and not the southern point of the Islands as mentioned in the protocol.

His Honour—Is one point nearer than the other?

Mr. McNeill—There is one point from which the distance might be measured which is nearer than the Southern point mentioned in the protocol. The protocol charges us with being within 28 miles of the southern point of Copper Island, and my contention is that from the position marked on the chart to the southern point of Copper Island, there is a distance of over thirty miles. On the chart sent us from the *Mercury*, the position at which the *Arctic* was said to be found, is 30 miles and more from the southern point of the Commander Islands.

His Honour—The senior navigating officer of the *Zabiaka* when marking the position upon the chart put in yesterday, said the place, according to that chart, was thirty miles from the nearest point, but he added that the chart was incorrect.

Mr. McNeill—My objection is that they (the Russians) were not correct in their measurements, and therefore that the charts, as marked by them, place us outside the thirty mile limit.

His Honour—Then you will proceed to call witnesses now.

Mr. McNeill—I have not yet finished my opening. I have a few more words to say upon other points. When we adjourned yesterday, I thought your Honour was going to satisfy yourself upon the correctness of the statement I made in the objection which I raised just at that point. Perhaps your Honour has not yet satisfied yourself upon the correctness of the statement?

His Honour—I have not satisfied myself yet.

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

As I told you just now, I sent a messenger off to the Senior Navigating Officer of the *Mercury* asking him for the measurements. Lieut. Morrissey sent in reply the communication whose contents you are now aware of. I thought that this would be a far more satisfactory course of procedure, and would bring out the expert evidence required.

Mr. McNeill—Then your Honour did not measure the distance between the positions laid down upon the chart?

His Honour—I have not measured it

Mr. McNeill—But would it not have been fairer to defendant if the chart had been measured by your Honour, instead of your taking as correct the unofficial statement sent from the Navigating Lieutenant of the *Mercury*, which says that the place laid down is 28 miles from the nearest point of the island.

His Honour—I think it would be better for you to call witnesses to prove that your statement in regard to the position is correct, if you do not wish to accept the statement of Lieut. Morrissey.

Mr. McNeill—I think it would be better if your Honour would measure the distance upon the chart.

His Honour—I do not think it would be sufficiently satisfactory for me to take the compasses in my hand and measure off the distance, and upon the result thus obtained to say right away that she was 28 miles or 30 miles from the nearest point. I thought that it would be more satisfaction to get expert evidence.

Mr. McNeill—I think that it is something of a hardship for defendant that the unofficial evidence of the gentleman on the *Mercury* should be taken as correct without any measurements being taken to prove it.

His Honour—I am not prepared to say that it is, one way or another yet. It may perhaps be better to adjourn the hearing of the case so that you may be able to call Lieut. Morrissey, if you wish, to give evidence upon the point.

Mr. McNeill—I think it rather hard that your Honour does not check the statement, it would simplify matters.

His Honour—I do not quite think that that would be so.

Mr. McNeill—After consultation with my client, I think it would be better to adjourn, as your Honour suggests, in order that evidence may be obtained upon the point.

His Honour—It is a most important point, and I think that it would be better to call evidence upon it.

Mr. McNeill—Then we will do so. I now apply for an adjournment of the case.

His Honour—The point is most important, and it would end the case if you were to prove that the seizure was made outside the thirty-mile limit.

Mr. McNeil—Then your Honour does not take into account at present that the wording of the protocol runs that the vessel was seized within 28 miles of the southern point of the island, and not the nearest point?

His Honour—The plaintiff has got, in the first instance, to prove that you were there, and if he proves that point, then it lays upon you to prove that you were not sealing within the zone, until then you have nothing to do.

Mr. McNeill—If your Honour finds that we were within 30 miles of the nearest point of land, and not necessarily within that distance of the southern point, then my objection would fall to the ground and we should derive no benefit from adjourning.

His Honour—The Court now stands adjourned until 10.30 on Friday morning.

The Court then rose.

Friday, December 8th, 1893.

The case was called at 10.30 a.m. to day, having been adjourned from Wednesday afternoon. Mr. H. C. Litchfield appeared for the prosecution, Mr. Duncan McNeill representing defendant.

Mr. McNeill said he had to express regret for having interrupted the case by asking for an adjournment on Wednesday afternoon. Immediately upon the adjournment of the hearing that day it was discovered that it was unnecessary to call Lieut. Morrissey, as a witness in the case, to prove the correctness of the statement he had made regarding the position of the *Arctic*, as laid down upon the chart. It was therefore a pity that an adjournment had been taken. Resuming his opening address, Counsel said that the case had been brought as far as the allegation contained in the protocol that the ship was within 28 miles of the Southern point of Copper Island at the time of her seizure. The evidence of the Russian witnesses related to the southern point of the Island only; the southern point and not the nearest point was expressed as the point meant. If this was so, he contended that it closed the case so far as the southern point of Copper Island was concerned, for one of the witnesses had said that the place where the *Arctic* was seized, according to the chart he was using, was outside the 30 mile limit, the place being more than 30 miles away from Copper Island. I put in two charts and two authorities to prove that the latitude and longitude of the position asserted to be the place where the Russians seized the *Arctic* was more than 30 miles from the south point of Copper Island. I therefore contend that plaintiff has not established his case, and cannot claim the advantage given by sub section 6 of the Act, and so throw the burden of proof upon our shoulders. When the Court last adjourned, this was the position of affairs, but somewhat unfortunately a question was addressed to Lieut. Morressey which covered a wider ground than did the evidence which plaintiff had led. The answer which that gentleman returned did not mention the south point of the island, but said that the place marked on the chart as being the place of the *Arctic's* seizure was within 28 miles of the nearest point of the island. Of course this statement of Lieut. Morrissey's is not evidence, it does not amount to more than an informal information, but it is certainly in contradiction of the evidence which had previously been laid before the Court. Of course his statement could be taken on oath, but I think that your Honour can hardly hold that it would be fair for the plaintiff to re open his case now, and so let in the evidence on this point,—that is that the place of seizure was not within 28 miles of the south point, but within that distance of the nearest point of the Island. I put it forward for the consideration of the Court, that there is considerable doubt as to the exact place of seizure, and also that it is evident that considerable difficulty must be experienced in attempting to fix the exact place of seizure by the Russian measurements. I must also draw your attention to the fact that the last observation of the Russians was made close to land, then why did not the *Zabiaka* go in close to land after she had affected the seizure and ascertain whether her bearing were correct? I contend that at the time when the last observations were made by her the weather was such that it would be impossible to say how far off the land lay, and any nautical man could easily prove to the satisfaction of the Court that under the conditions then prevailing it would be impossible to say definitely how far off the land was. I also cited to your Honour an important work on navigation which showed how impossible it is for a ship to keep on her course in heavy weather, and how liable to error the dead reckoning is.

His Honour—Well, to pursue that argument further, why should it not be possible for the ship to be brought in much nearer the land?

Mr. McNeill—Yes, it might be possible that the dead reckoning would be in error on that side, but I submit that from Capt Pyne's evidence it is clear that his reckoning took him further from the land than did the Russians.

His Honour—But his was also dead reckoning.

Mr. McNeill—Yes, it was dead reckoning and I contend that it will accordingly be a matter of considerable difficulty to arrive at the conclusion that the Russian dead reckoning was certainly correct

His Honour—I should not have to go so far as that.

Mr. McNeill—Well, it will be very difficult for the Court to even say that it is reasonably correct. Considering that the reckoning, was made up in this way, I contend that the Russians should have gone into the land to check their calculation. They did not do so. I asked a question purposely to ascertain what they did, and I received a reply that they cruised up and down after the seizure. Another point to be taken into consideration is the uncertainty of the charts.

His Honour—I certainly think I ought to say something about the charts here. The difficulty arose, I think, through your putting in such a small chart.

Mr McNeill—I was asked to lend a chart by Mr. Litchfield and I put in the *Maud S.* chart because it looked the largest and lay nearest to my hand.

His Honour—Unfortunately, the *Maud S.* chart was on a very small scale, and the Russian witness, when asked to mark the position upon it, was not able to given definite measurements

Mr. McNeill—I venture to doubt that. He certainly said that his first measurement was not correct, for he amended his answer by saying that the distance was 30 miles or might be 30½ miles away from the south point of the island.

His Honour—I think that if he had used his own chart it would have given more satisfaction

Mr McNeill—At any rate he measured the position from the south point of the island and found that the place was over thirty miles away.

His Honour—It is, I think, unfortunate that he did not find the chart to be correct.

Mr. McNeill—In regard to the correctness of the charts, your Honour, I have here an old Russian chart, which I do not intend to put in, which puts the place of seizure over 38 miles away. As a matter of fact, none of the charts are correct in regard to the position of these islands. Yet your Honour must be reasonably satisfied as to the correctness of the position given. In the *Maud S.* case, the vessel was 10 miles within the zone, here the *Arctic* is alleged to be within two miles of the limit If your Honour is satisfied that the *Arctic* was not within the limits, then the plaintiff will not have discharged the burden of proof thrown on him, nor established his case according to the wording of the sub-section 6 of the Act. That is all I wish to say upon the point.

Mr. Litchfield—It is admitted now that the position of the place of seizure was, as stated by the Russian authorities, actually within the zone. Therefore, whether the measurement is taken from the south point or any other point of the island, matters not, for the place lies within the prohibited distance. I contend, therefore, that she was there for an unlawful purpose, a purpose unlawful within the meaning of the Act, but it lies upon the commander of the vessel to prove that he was not there for that purpose. In regard to the question of the dead reckoning measurement, upon which a lot has been said, your Honour must remember that this Russian vessel was told off for the express purpose of ascertaining correctly first, the actual distance to which the zone extends, and secondly to watch against any trespassers trespassing within that zone. Therefore, the business, the actual business, of the officers of the vessel was to determine their actual position from time to time. The protocol of arrest gives the observations which they made the evening before, while the evidence of the defendant went to prove that his last observation was taken two days previously. It is clear to my mind which reckoning can be taken as the most likely to be correct. Then again, the engines, of the *Zabiaka* were going at a certain rate of speed the whole night, from the time of the last observation, so that it was impossible to make a mistake in the morning's reckoning—the time was too short. She was engaged in cruising up and down just inside the limits so the officers could never be mistaken as to the distances which they had traversed.

His Honour—The petition alleges in the fifth paragraph, that the *Arctic* was in a certain place at a certain distance from Copper Island on a certain date. The petition alleges that this place was within the 30 miles limit placed round the island, and it is stated there as a matter of fact. There is a conflict with the protocol only in so far that the petition does not mention the southern point of Copper Island while the protocol does. In the protocol we have the allegations as to the latitude and longitude of the place and its distance from the southern point of Copper Island, while in the petition the place is stated to be within 28 miles of Copper Island, without any mention of the south point or any other point. That, in itself, would be quite sufficient to throw the burden of proof upon the defendant's shoulders, to show that when seized he was not engaged in any action contravening the Act. The mere fact that the protocol says that the place was within 28 miles of the southern point of Copper Island, and that in reality the place is more than 28 miles from that point, but within 28 miles of another point of the island, does not seem to me to dispose of the question. The evidence of the Russian officer who was called in support of the plaintiff's case gave the same latitude and longitude as the petition set out. He said that he believed the place was between 26 and 28 miles off the land, but it was not his business to check the other officer's observations. The Navigating Officer did not say how far distant the place was from the south point of Copper Island, he merely said it was within 28 miles of the nearest point. When he laid down the position on the chart he said the place was not within 28 miles of Copper Island, but he added that the chart was not correct. As the matter became so important, it became evident that the Court was under the necessity of getting a correct chart. I was asked to measure the *Arctic* chart, but I thought if a it would be much better if an officer on board H.M.'s ship, one who was thoroughly acquainted and used to laying down positions to minutes, should furnish us with the exact information. Mr. Troup consequently requested Lieut. Morrissey to do so. He kindly complied. He says in his letter that the place of seizure was within 28 miles of the nearest point of the island. If that is so, then he proves the allegation contained in the fifth paragraph of the petition. It is perfectly true that his statement is not evidence, but I offered to defendant's counsel the opportunity of calling this officer. Counsel suggested that I should have measured the distance

on the chart; well, suppose that I had, and then said that I was right in my measurement and he was wrong in his, unless he was called in Court to prove the correctness of his measurement, no good could have come of it. If we had agreed in our measurements, then the matter would have dropped. If we had disagreed and he had not been called as a witness, I could not very well have thrown the point over and let it go by without deciding it. The question before me now is, as to whether the vessel's position was within the prohibited zone? Now what evidence have we upon that. I have been asked not to accept the Russian evidence upon the point Why? 'Because it was based or dead reckoning. Then what am I to take. The measurements and calculations of the master of the *Arctic* were also based on dead reckoning. Therefore, there is no more necessity to take his than there is to take the evidence of those who were on the *Zabiaka*. But, I think, here is something to urge in favour of taking the *Zabiaka's* reckoning. The last observation of the *Zabiaka* was taken at 9 o'clock the previous evening. The *Arctic's* was taken on August 1st. Looked at from that point of view, there is far less reason for the *Arctic's* to be correct than for the *Zabiaka*. There is dead reckoning on either side, but why should not the error take the ship nearer the land than away from it? Of course it requires a man with a considerable amount of knowledge regarding the currents, tides, etc., in those seas, to say which way the error would work. There is, I think, considerable force in Mr. Litchfield's observation as to the ship being very near the limits for some time. The *Porpoise* seems to have boarded him some time previously, having doubts as to his knowledge of his position perhaps, and having overhauled him, told him that he was all right just then, but warned him not to go inside the zone. I think the allegation in the petition as to the place of seizure is fully borne out. The burden of proof therefore lies upon defendant to prove to my satisfaction that he was not, as a matter of fact, engaged in doing anything that could be deemed a contravention of the Act at the time of his seizure.

Mr. McNeill—And now I have a few words to say in regard to the boats. The charge of actually killing, or taking seals has been abandoned, but the charge pursued now is one of attempting to hunt. It was adduced in evidence, upon cross-examination, that the *Arctic* was taken in consequence of instructions being given to the Russian officers to take all British ships that might be inside the limit. It was also admitted that the weather on the day of seizure was too bad to permit of hunting. It was further admitting that when she was seized the vessel was engaged in searching for her boats. I venture to think, if it is not, indeed, a high probability, that they knew that she was so engaged at the time. The protocol admits that the Captain of the *Arctic* thought himself outside the limit. In accordance with an observation which fell from your Honour in the course of the recent case, I think that it is impossible to convict the master upon evidence of this kind of a contravention of the Act. There is no case of attempting to hunt to prove against the vessel, other than that her boats were away. And now, referring to the boat on Copper Island—there really was only one thrown up, the other not having yet been heard of, and the Russian witness made a mistake in saying there were two—I will prove that it was thrown up on Copper Island before the date of the seizure. Captain Pyne will come forward and prove that the Russian officers in Hakodate took a photograph of the *Arctic*, and I think there is reasonable grounds for believing that this photograph was in the possession of the *Zabiaka* before the seizure. We know that constant communication was held with the authorities on Copper Island. We know that one witness, although he endeavoured to correct his answer afterwards, said that his Captain told him that the vessel he was going to seize was probably the vessel to which the boat belonged that was cast upon Copper Island.

His Honour—I think it very improbable that the Captain of the *Zabiaka* would have been on deck at that early hour to give that information to the officer.

Mr. McNeill—He might have had the information conveyed to the officer.

His Honour—Then you wish me to suppose that the *Zabiaka* carried a copy of the *Arctic's* photograph about, and when a schooner was sighted the officers went down below, fetched up the photograph and compared it with the *Arctic*. You forget that it was very early morning at the time of the seizure and the weather bad. I think that in regard to his being told that the schooner was the one to which the boat belonged, you have made a slight mistake. From my notes it appears the witness was not told about the boat being on Copper Island till later in the day. If he did give you the answer like that, then the mistake must have been unintentional.

Mr. McNeill—I submit, with all due respect, that, as a matter of fact, the officer was informed that the schooner was the one to which the boat belonged that was found on Copper Island, and therefore, he and others came to the conclusion that the ship was an easy prey and could all the more easily be sent down to Yokohama.

His Honour—If she was within 28 miles of the land they were entitled to seize her.

Mr. McNeill—Yes, but if there was no evidence against her, when they got on board then she could not have been detained here.

His Honour pointed out that Counsel was now transferring the blame from the Russian officers to the Consul in Yokohama.

Mr. McNeill thought that all were in fault.

His Honour—Well, what do you deduce from all this?

Mr. McNeill—I think it will make the case one of greater hardship. They were aware her boats were away, so they thought that it would be all the easier to establish their case against her.

His Honour—The master has not yet proved that he was not sealing.

Mr. McNeill—I shall recall him to categorically deny that he was engaged in attempting to seal that day. But now, in regard to these boats. If it is true that the Captain of the *Zabiaka* was in constant communication with the authorities on Copper Island, and had received official information of the casting up of the boat, then some persons connected with the prosecution must have known that the boat arrived, and the men in her did really reach the island before the date of the schooner's seizure, and that on that very day they were engaged in recovering from the hardships they had undergone. If the Captain of the *Zabiaka* had been informed of the boat's arrival, then that official information must also have included the date of arrival and also what the men were doing. I think it extremely hard that the Captain was not called to prove the date of the boat's arrival, now that the case is against the boats. He could have proved that they were not engaged in sealing on the 3rd August.

His Honour—Do you take it then that they must have been engaged in sealing on that date, if plaintiff is to prove his case?

Mr. McNeill—The petition says that they were then and there, there or about—that can only mean the date mentioned in the petition.

His Honour—Do you rest your case on the 3rd August only, Mr. Litchfield?

Mr. Litchfield—I don't think I can be tied down to the 3rd only, your Honour. The statement in the petition runs on or about the 3rd August.

His Honour—Yes, but it goes on to say that then and there, etc. Does that mean that it throws the onus on defendant to prove that he was not engaged in killing seals on or about that time?

Mr. Litchfield—No, not killing, but engaged in hunting. I don't think you can tie me down to a day or so. The question is that the vessel was engaged in sealing on or about the date of seizure.

His Honour—Then what time shall you put it?

Mr. Litchfield—Time is as elastic as a man's conscience. It is a matter for judicial decision; or I cannot be allowed to have the whole of the limits lying within the calendar, I know.

His Honour—I hold that you can not go beyond the 3rd August.

Mr. McNeill thought that the petition bound him down to the 3rd August only, it would be a great hardship to have the date put backward and have to answer for every action of the voyage from its commencement.

His Honour—It might have been placed at the 4th June.

Mr. McNeill—The date on which the Act was put in force I think the allegation affects the date of seizure only. Plainly, according to the wording of the Section, the vessel must prove that she was not being used on the date of the seizure for any unlawful purpose. I think it would lead to a most unreasonable conclusion if the date is put back to the beginning of the Act. It would be a great hardship to have to prove that we were not contravening the Act from the day the Act was put into force.

His Honour—The Act is not so clear as it might be; they never are.

Mr. McNeill—I have already said that according to the prosecution a boat was thrown up on Copper Island. I shall lead evidence to prove that she was thrown up between the dates of July 29th and August 3rd, and that during these dates no sealing was attempted. Indeed, one boat has never been heard of to this day. The only member of the cast-up-boat now in Yokohama, will state what he did between the 29th July and 3rd August. It has been suggested that on the 29th July the *Artic* sent out her boats East, West, North and South, she being then eight miles outside the zone. Captain Pyne has proved, however, that his ship went to the westward, following the boats. Two, however, went in an opposite direction, and these were the two that were lost. The allegation that the boats were engaged in hunting within the zone is thus disposed of. The weather on the 3rd August was such that no hunting could be attempted. We had this in evidence from one of the plaintiff's witnesses. If the weather was bad at the place of seizure, it must have been equally bad at Copper Island, and therefore equally unsuited for hunting. But besides this the men had been five days absent from their ship and were hardly in a position to attempt any hunting. Not only were no seals killed on the 29th, but none were killed from that date to the time of seizure. The allegations of the petition therefore falls to the ground.

Captain Pyne, recalled, said—My reckoning as to my position on the 3rd of August differed very much from that of the Russian officers. My reckoning, to the best of my knowledge, was correct, and according to it I placed my ship outside the 30 mile zone. My last observation was taken two days before the seizure. I calculated my position on the 3rd Aug by dead reckoning from that observation. My position on the 1st August was lat. 53°35′ N., long. 168°42′ E.; this was at noon. I calculated my position on the 3rd from this observation. I made it lat. 53°15′, N. and long. 167°46′ N. I had run about 5 miles at noon from the place of my seizure. I run in a S.W. course. The weather was too thick when I returned from the *Zubiaka* to make an observation. I waited till noon in order to get an observation, but even then the weather was bad. I got back to my ship about ten o'clock. I went on board the *Zabiaka* about 6 o'clock in the morning, and the chart was marked; I brought the chart back and waited till the weather cleared to verify the position. On the 29th I was in lat. 53°58′ N., long. 168°8′ E. I was head-reaching when I was seized, searching for my lost boats. I had not been attempting to hunt or take seals on that day. I had not attempted to hunt seals within 30 miles of Copper Island at any time. The weather was thick, and eventually very foggy on the 3rd August. The sea was also rough. My boats were lowered on the 29th July; there were other sealers near me. The nearest one was as close as a mile or a couple of miles. She lay to the S.E., a little further away from the land than I was. I have never heard anything of Cox's boat; that is one of the missing boats. So far as I know, nothing has been heard of it. I made signals all night on the 29th July in order to get the boats in. I reached Yokohama on the 7th October. I had an interview with the British Consul at once. He told me to take nothing out of my ship. I had intended to go on another sealing voyage this winter. I intended to start as soon as possible after the 1st of this month. Other ships have started for the sealing grounds. I have not fitted out the *Arctic* because I did not know to whom she belonged, as she was being detained by the Consul. I have not engaged any crew for the same reason.

Cross examined—The ship I sighted on the morning of the 3rd August was an Hawaiian vessel. To the best of my knowledge my chronometer was correct. I arrived at my position on the morning of the 3rd August by calculating the courses marked on the chart. I have not kept any memoranda of my reckoning. I made a memorandum on board the cruiser on the 3rd. I kept this piece of paper myself. I have lost it, unfortunately. On that paper were the figures of the Russian observations, I don't remember having a paper on which my own calculations were worked out. I have kept the chronometer workings in a book, but the courses and distances are worked out on the chart. I remained on the sealing grounds after the 3rd of August. I continued to look for my boats and seals too after my seizure. I killed one outside the limits.

To His Honour—I put into the Little Kurile Straits to obtain wood and water on way my down. I did not make haste down.

His Honour—If you had made a little haste you could have had your case through earlier and got away again before the 1st of December.

Mr. McNeill—Could the case have been heard before the arrival of the Act?

His Honour—I did not ask him about the Act.

Re-examined by Mr. McNeill—I did not keep the memoranda of my courses. I only kept the chronometer calculations.

To the Court—I could have got down here in three weeks, perhaps, if I had come down straight.

The Court then rose for tiffin.

Frank Pesso, hunter on the *Arctic*, sworn, said—I was not on board the *Arctic* when she was seized; I was on Copper Island at the time. I was

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

afterwards told that the *Arctic* was seized on the 3rd of August. I was thrown up on Copper Island on the 31st July. I left the vessel on the 29th July; the next day there was a gale, and the following day it moderated. The boat was capsized as we neared the land, but I scrambled on shore. The boat was broken up, and everything was thrown out of her. After leaving the ship on the 29th I looked for seals till the evening, but saw none. I had no chance of looking for seals after that evening. When I was thrown up on the beach on the 31st., I looked round for habitations, but saw none. On the 1st of August I came to a few huts and wooden houses. This was about midday. I had passed the night on the beach on which I had been capsized. I had no food for forty-eight hours, the boat-steerer forgetting to put the provision-box into the boat. I ate grass the first day, until I reached the Russian village. I was very exhausted, my right arm was broken when the boat capsized. The Russian doctor set the bone on Behring Island. I stayed on Copper Island for four days, and then the Russian Company's steamer took me off to Behring Island. I started in the same direction as the other boats on the 29th July, but afterwards turned round. Another boat also turned with me. I turned to the South East. I tried to speak to Cox's boat on that occasion, but failed. The mist then became so thick that I could not see three hundred yards ahead. I saw a schooner near us, and Cox's boat went to leeward of it, but whether he got to it I do not know. I went in the same direction as this schooner, but lost sight of it. On the 3rd of August I was lying disabled on the island, and could not lift my arm, or move my shoulder.

Cross-examined—I was not steering the boat that was lost. We had a compass in the stern of the boat. The wind was south-west. It continued in the same direction all the afternoon. It was very light, but steady. I did not see Copper Island that afternoon. I can't say whether the wind was favourable or not for taking us to Copper Island. We drifted to Copper Island; we struck sails; the sea was very heavy. The boat was fitted with mast and sails, but we could not use them in the gale of wind. I lost sight of Cox's boat after about a couple of hours. I was pulling at the time we lost sight of one another. I was going in the direction in which I thought my schooner lay, trying to get back to her. I don't remember the course we were steering. I had left the schooner about four hours before I turned to go back.

This closed the case for the defence.

Mr. McNeill—I have now submitted a categorical denial of all the allegations in the petition. Captain Pyne has stated that he did not hunt after the 29th July, and my other witness has said that after the 29th July he was totally disabled. There is nothing left for me therefore to answer. One point, however, I wish to draw your Honour's attention to, and that is in regard to defendant's ignorance at the time of his seizure of the position in which he was in; for it is on this point alone that defendant can be held to have committed an offence. Counsel then cited Sir Fitz-James Stephen upon *bona fide* ignorance which can be held to excuse in certain cases. Continuing, he said sealing on the high seas was a perfectly innocent act, and it is only within a small zone that hunting is prohibited, and there the Act rendered it unlawful. He contended that this was a *bonâ fide* case of ignorance and therefore the legislature cannot have intended the Act to be applied in its most stringent form. With reference to the counter-claim for damages, Counsel said that after the strong opinions which had fallen from his Honour in delivering judgment in the *Maud S.* case, he should have considered it his duty to abandon the claim if the cases had been parallel. But plaintiff in cross examination has said that the sole reason for detaining the *Arctic* was that he had received the protocol. Now, in order to obtain the protection given under section 104 of the Merchant Shipping Act, plaintiff must prove that he had reasonable belief of a state of facts existing which warranted him in forming an opinion that an offence had been committed under the Act. But plaintiff had no reasonable grounds for such belief, because the allegations in the protocol did not exist. Counsel then quoted *Burn v. Noel* in support of his contention. In conclusion, he urged that plaintiff had not shown any reasonable grounds for detaining the vessel and therefore he asked that the petition be dismissed, and damages be awarded the defendant.

His Honour pointed out that in his judgment in the previous case, it was stated that damages had been asked for on account of delay and the unreasonable time which had elapsed in instituting proceedings; and nothing more.

Mr. McNeill contended that as the seizure in the first instance was a wrongful act, the vessel could not be detained. No person was entitled to detain another person's property, except under this section of the Merchant Shipping Act, and therefore he thought it was only reasonable that damages should be awarded, because the detention had been unreasonable, arising as it did from a wrongful act in the very beginning.

Mr Litchfield said that as the case had been very thoroughly discussed he need not take up the time of the Court with a long address. But he should like to call attention to the line of defence which had been set up. First of all, the defendant said, at least that was the only inference he could draw from another schooner's frequent turning up, that he was seized by the Russians in preference to that other schooner. That they treated him as an habitual poacher, in fact, and when they saw him on the ocean said to one another, there is the *Arctic*, look out and seize him at the first opportunity. They had, in fact a prejudice to take him, because he was the *Arctic*. But it turns out that this other schooner was flying the Hawaiian flag. There is no evidence before the Court that there is any agreement between the Governments of Russia and Hawaii to prohibit any part of the sealing grounds, and therefore there was no necessity to seize the other schooner at all, whether she was in the prohibited zone or not. I think I should bring before the Court at this time, that in arriving at a decision in this matter the Criminal Law of England, although it is not binding on the Court, might be consulted for a definition of the offence charged. Counsel then elaborated an argument based on the Game Laws, in which trespass after game was held to mean an attempt to pursue game when ready equipped and only waiting for an opportunity to kill it. That, he held, was the condition of the *Arctic*. She was in a position to hunt for seals. That her boats were out hunting for seals on the 29th July was admitted, while Capt. Pyne had also admitted that after the 3rd August he was engaged in hunting. Counsel suggested that if not actually killing or attempting to kill seals on August 3rd, the vessel was in a position to attempt to hunt for them, and therefore should be held to have been caught before she could carry out her intentions. That he was interrupted before he could do any hunting, was no palliation of the offence. In arriving at a decision the Court should also take into consideration the demeanour of defendant while giving his evidence? Had it been satisfactory or not. He contended that it was not satisfactory, that every attempt had been made to conceal and shift on to other shoulders information which the Court required. In this, there was a marked contrast with the demeanour of the master of the *Maud S.* He had given a perfectly plain and open statement from beginning to end. The question of the *Arctic's* chart, too, was that in order? He should submit that it was not. He tells you that he steered so many courses that he had to rub the lines off the chart to save confusion. He took good care that the Court should not have an opportunity of judging of the correctness of his measurements. The schooner's courses were not produced. They are all in a book he said, but you won't understand them; no one could understand them but himself. But from his calculations, the evidence given by the Russians, and the entries in his log-book this much could be gathered, that right up till the time of his seizure he had been gradually creeping up to the prohibited zone. He had been hunting seals all this time, and not once does he turn round, when he found himself near the zone, to renew the safe pelagic hunting in the open sea. The intention to attempt to commit an unlawful Act, as held by Sir Fitz-James Stephen, must be gathered from the evidence before the Court, and sufficient evidence had been produced in this case to prove that there was such an intention on the part of the *Arctic*.

His Honour—Was it not impossible to hunt on the day she was seized?

Mr. Litchfield—Even then I shall suppose that it was it only the accident of possibility.

His Honour—Then why should he go there at all?

Mr. Litchfield—He was trespassing in pursuit.

His Honour—But trespassing is not sufficient. In a trespass defendant has no right, and is not entitled to be there. Here he can go in.

Mr. Litchfield—He is not allowed to go in for seals.

His Honour—But could he not go in with his boat for water?

Mr. Litchfield—The question of international hospitality is not mentioned in the Act.

His Honour—But could he not go in to find his boats?

Mr. Litchfield—Then he should have gone to the *Porpoise* and obtained permission.

His Honour—That is where the difference comes in between these cases and trespass. Here we can explain why he was there.

Mr. Litchfield—Suppose he had gone in to pick up a boat which had been hunting within the zone? They may not have been hunting that morning, but they were prepared to do so. They had no business, knowing that a prohibited zone had been declared, to put themselves in a position where trespassing could be alleged to take place. That is the intention of the Act. I submit that they were attempting to engage in hunting when they were caught within the proscribed zone. And now, as to the counter-claim. There has been very little evidence given to support it. Even supposing that defendant has been prejudiced, it cannot be by the action of plaintiff; if he is prejudiced at all, it is by the action of the *Zabiaka*. Plaintiff gave instructions for the prosecution of the case upon receipt of the protocol and papers of the *Arctic*. These showed that at the time of seizure he was represented by the Russians to be within the proscribed limits of the zone, and it became, *prima facie*, a case to lay before this Court for adjudication. In *Burns v. Noel* it is laid down that a *bona fide* belief that an unlawful act had been committed is all that is necessary to warrant action being taken under the Act; if that were not so, no officer could take upon himself the responsibility of taking any step, if the responsibility went beyond that point. Whether defendant was prejudiced or not by the action, his counter claim must fall to the ground on the grounds, first, that there was reasonable cause for the detention, and secondly that as a matter of fact there has been no unreasonable delay.

His Honour—I shall state my decision now, so as not to put the parties to the expense of coming here again to hear my written judgment. I have already dealt with the position of the ship, that was disposed of this morning. Nothing has taken place since to modify my opinion, rather evidence been given that has confirmed it. After the evidence of the defendant,—because that was the alternative course to choose as to the position of the ship, other than the evidence given by the Russian officers which had been based on an observation taken 48 hours before the seizure,—it is only necessary to state that the *Arctic's* position, as given by the *Zabiaka*, and alleged in the petition, was the correct one. It is not necessary now to go further into the question. Once the point is established as to whether the *Arctic* was found within the zone, the burden of proof was laid on defendant, and it became his duty to satisfy the Court that his vessel was not being used or employed in contravention of the Act. The evidence upon that point is fairly direct and appears, on the whole, trustworthy and not inconsistent with the evidence given on the other side. Mr. Litchfield denied me to hold that she was, by her mere presence there, attempting to hunt. I think that under the circumstances that it was impossible for hunting to take place, for the weather was such that it made it impossible to hunt, and I see no reason to suppose that he was hunting. I believe that he was not hunting, and I consequently dismiss the petition. I think defendant satisfied me, on the whole, that he was not engaged in any contravention of the Act. As to the counter-claim, I must hold, as I did in the case of the *Maud S.* I think it was open to defendant to have gone to the Consul at any time after his arrival and offered him an explanation. I do not know what the Consul would have said in the matter; still it lay in defendant's power to offer the Consul an explanation. If he does nothing, then there is no grounds for the counter-claim, for the Consul is bound to act as he did. I also dismiss the counter-claim, and make the same rule as in the last case, that each party shall bear his own costs.

The Court then rose.

Books, to the value of £4, have been granted by the S.P.C.K. to Mr. Masaji Kakuzen, who is about to be ordained for missionary work in Japan by the Bishop of Toronto. The application was recommended by the Bishop in Japan. Mr. Kakuzen, who is a native of Japan, has been studying, at his own charges, for Holy Orders in Canada, with a view to returning to his own country to work as a missionary.

An important appeal case, arising out of the refusal of Sir J. Goldsmid, M.P., to present a certain petition to the House of Commons, was decided in the Queen's Bench Division yesterday. It was laid down by Mr. Justice Wills that, though there was a right to petition Parliament, it by no means followed that an action would lie against any particular member because he declined to present a petition. Justice Grantham agreed that there was no duty upon an individual member of Parliament to present to the House any petition that might be sent to him.—*L. & C. Express.*

THE YOKOHAMA SAILING CLUB.

The racing for this year is now concluded, and with it the seventh and in some respects the most successful season of the Club's existence. During the season twenty six matches have been sailed, viz., thirteen by each Division, of which we now give a full analysis :—

A Division.

Date.	Courses.	Miles.	Wind.	Character of Race.	Winners.
May 20	Home	8½	Light variable airs.	Class	Not Finished.

In the above tables all the distances are expressed in nautical miles, and the elapsed times are computed from the actual times taken to sail each race without any correction for time allowance.

The Record Prizes in the various classes were won by the following boats :

39 Raters.....*Maid Marion* .....19 points.
32 Raters.....*Mary* .....16 points.
26 Raters.....*Molly Bawn* ..... 22 points.
17 Raters.....*Daisy* ..... 9 points.

The average speed of the record prize winners is a trifle better than last year, and has varied little during the last three seasons, which for the sake of comparison we give below :—

	Miles Sailed.	Speed.
1891.		
39 Raters .....*Aborigine*	17	3.28
32 Raters .....*Daimyo*	163	3.73
26 Raters .....*Molly Bawn* ...	143½	3 48
17 Raters ..... *Fessie*	36½	3.32
1892.		
39 Raters .....*Aborigine*	8½	2.17
32 Raters .....*Daimyo*.....	135½	3.71
26 Raters .....*Molly Bawn* ...	155½	3.45
17 Raters .....*Fessie*	58½	2.91
1893		
39 Raters .....*Maid Marion.*	133½	3.54
32 Raters .....*Mary*	116½	3.79
26 Raters .....*Molly Bawn* ...	161½	3 48
17 Raters .....*Daisy*	42	2.91

Although the racing during the past season has, with a few exceptions, been of a rather tame description, it has not been through any lack of enthusiasm on the part of the members of the club, but simply through lack of the breezes necessary to give good racing. The summer breezes which usually blow from the south during the afternoon, and provide a steady breeze for sailing, have, during the past season, been conspicuous by their absence. The prevailing winds during this summer have been easterly, and if anything even lighter than were experienced last year. The average speed of the yachts has been about the same, but that is accounted for by the fact that by reason of the general direction of the wind there has not been so much windward sailing.

The direction and force of the wind may be classified as follows :—

A Division—12 Races Easterly winds, 1 South, 2 Fresh, 3 Moderate, 8 Light.
B Division—7 Races Easterly winds, 6 South, 4 Fresh, 3 Moderate, 6 Light.

There have been 26 races sailed, in which 29 boats have taken part, as against 24 races last year in which 24 boats sailed.

In both divisions the number of entries has been considerably larger than in 1892, and, what is perhaps more to the point, a fair proportion of the starters in each race completed the course. To illustrates this we compare the two years together, as follows :—

	No. of races.	No. of boats.	Average No. of starters.	Completed the course.
1892...A Division,	12	11	5 7	5 0
1892..B Division...	12	13	5.7	4 4
1893 ..A Division...	13	16	9 5	7 4
1893..B D vision...	13	13	7 6	5 8

Plenty of prizes were provided, and in about half the races the boats were handicapped in various ways, so that all might have a chance of carrying off a trophy at some time or other, with the result that 43 prizes were divided amongst 10 boats of the A Division, and 32 amongst 8 boats of the B Division. Several of these prizes were of considerable value, and were specially presented to the Club by members and friends who are interested in yachting as being one of the most healthful and interesting recreations to be obtained in Yokohama. To those who are really interested in this sport, it is a never-ending source of amusement and employment with which to fill up their leisure moments. A real yachtsman is never satisfied until he has designed and built a yacht of his own, and even the man who invests in an old boat, as he will say, just to take an evening sail now and then, soon finds that he must exercise his ingenuity to improve her, and that to go on board his boat with the sails ready hoisted for him and take a turn round the harbour, is only a very small part of the amusement to be derived from owning a yacht.

In the A Division there have been two new boats this year :—*Sea Gull* a 26 rater cat-boat, imported from the United States, and *Madcap*, a 23½ rating cutter built here. Neither of these boats has been successful, both apparently suffering from the same defect, insufficient stability.

The *Mary Jane*, now called plain *Mary*, has again been altered by her enterprising owner, and has at last come out as a full-blown yacht with the modern style of bow and counter, and her close contests with *Daimyo* have given the principal interest to the A Division races during the past summer. She appears to be more than a match for *Daimyo* in light breezes, and can appa-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

rently sail a very close match with her heavier opponent in a fresh wind. Although it has not yet been proved to everybody's satisfaction which is the faster boat, *Mary* has certainly had the best of it so far, and although she has not sailed so many races as *Daimyo*, she has secured the record prize for the season, and also a goodly string of others—mostly first prizes.

Molly Bawn is the only boat that has sailed in every race, and, although not always sailed by the same skipper, shows a very even record of speed throughout the season, and has become the winner of nine prizes. In her own class she has had all her own way, even *Princess Maud* being fairly beaten by her all through.

In the B Division there has been some excellent racing, the small craft having been more fortunate than the other Division in the matter of winds, nine out of the thirteen races having sailed at a speed averaging from three to five and a quarter knots.

Two new boats were built for this class during the early part of the summer, *Daisy* a fin-keel boat, and *Hoshiboshi* a centre boarder. Both of these boats have been previously described, and now that they have competed in several races in all kinds of weather, all that remains to be said of them is that although they are by no means perfect, they have proved themselves faster than any of the other boats, and have broken all previous speed records. *Daisy* is at her best in a light breeze, while *Hoshiboshi* does best with plenty of wind. The latter when reaching with a good strong breeze and smooth water, can show a clean pair of heels to most of the boats in Yokohama, large or small, although she is only an exaggerated form of canoe with a very small sailspread and no ballast. *Hoshiboshi's* record of speed is 5·3 knots, made round the 4½ mile inside course, half of which was close-hauled sailing and included a short tack to fetch a mark. This compares very favourably with the highest speed made by an A Division boat round the 1½ mile home course. *Maid Marion* sailed round that course with a leading wind all the way at the rate of 5.6 knots. These are the two highest records of speed made this season, and if allowance is made for difference in rating, the result is considerably in favour of the little boat.

In addition to the 26 regular races, there was a consolation race at the end of the season which produced an exciting contest between *Isabel* and *Box of Curios*. The race was sailed in a fresh breeze, and *Isabel*, although crippled by the breaking of her masthead during the second round, came in an easy winner of the prize.

Several of the 17 Raters also entered in the 21 Rating class for one of the A Division races, and although they only received their ordinary time allowance from the large boats, acquitted themselves very well dispite the disparity in size.

On the whole the best sport has been with the small boats, several of them sailing very evenly together at all times. Unfortunately they have not yet settled upon a good course, and the practice of sailing races partly outside the breakwater has proved deterrent to the sailers of the little boats, although special prizes have usually been offered for them. This is a matter that requires attention, as to build a full 17 rater capable of winning prizes has already become rather more expensive than suits the pockets of many who would like to own a small boat and take part in the racing.

We already hear rumours of new boats, both large and small, to be built for next season. We sincerely hope that they will be built and afloat in good time ready to once more infuse new life into the noble sport for which the Bay of Yedo is so suitable.

Seven years ago, when the Yokohama Sailing Club first came into existence, there were scarcely any real sailing boats in the place, and perhaps, although it is rather a mercenary way of putting it, there is not a much simpler way of gauging the Club's success than stating the cost of the present fleet of yachts and sailing boats, which may be roughly estimated at $20,000. This valuable property has mainly come into existence under the fostering care of the Yokohama Sailing Club, and considering the small number of foreigners in Yokohama, says volumes for the manner in which the Club has been conducted.

Up to the present time not a single Japanese has joined the Club. Considering that Japan is a maritime country whose people evince every desire to become great upon the seas, this is a curious fact and much to be regretted.

THE LAST OF THE INTERCEPTED LETTERS.

TO THE EDITOR OF THE "MUMEI SHIMBUN."

London, 14th day of 9th month,
26th year of Meiji.

HONOURABLE SIR,—You and your numerous readers will deeply regret to learn that this will be the last of the extremely interesting letters I have written to you for the last few weeks, and which I trust you have given the prominent place in your various issues which they deserve. I am coming home. Why this is I will explain hereafter. But those who will gather to welcome me home will, I trust, realise that I have performed as perilous a journey as Major-General Fukushima, and will treat me accordingly, for I have held aloft the lambent flame of Japanese truth amid the dark places of the earth and illuminated with its glorious beam the obscurity in which these primitive islanders live.

* * * *

Like another great personage, you will be interested to know that I have forgotten nothing and have learnt nothing. What indeed have these people to teach me! I came here having fully made up my mind regarding the natives, and by carefully avoiding people who might upset my preconceived notions, I have passed unscathed through positions in which other men have been forced to sadly modify their views. I have found the doctrine of superiority to be an excellent means of preventing one set of principles from being overcome by others, as he who holds it firmly does not stoop to learn of his inferiors. There are, I am sorry to say, men of my own nationality in this town who believe that something good can come out of the West, though it is to the credit of the natives that they themselves mostly think otherwise. The latter indeed universally acknowledge that their religion comes from the East, and that what civilisation they have has broadened slowly down to them as the sun rising in the East gradually illumines the farthest provinces of the West. It follows, therefore, that the fountain-head of knowledge is with us, and that these people exist mainly on the crumbs that fall from our overflowing table. They claim to have invented things, certainly, and to have made discoveries by watching tea kettles boil and such-like absurdities, but if we only go back far enough in our own history it will be found that all these things were originally invented by ourselves and then forgotten for some very good reason.

* * * *

During the time I have spent in this country I can look back with pride on the fact that in my literary work I have never allowed to the natives the possession of virtue, honesty, truth, or wisdom. It is something to have lived among a people and yet to hold firmly such notions as these, and to brook no contradiction from anyone, whether they profess to know much or little upon the subject. I have brought everything to the test of my nationality. I have examined native politics and found them English rather than Japanese. I have studied so-called native "art" with a like result. I have glanced at the native judicial system and found it English; I have read native literature and native poetry to the same saddening effect. English, English, English. I have sought here and sought there for some traces somewhere of something of native manufacture which I could pronounce good—which I could say was Japanese or at least a very good imitation. I have found nothing. All was English, all was evil.

* * * *

These things I have set forth at length in my journal. I have shown that England is the worst country in the world to live in; I have condemned its manners and customs, its people, its conformation, and even its scenery, in the most unqualified terms. Though at times sorely tempted, I have sternly refused to be satisfied with anything, and I have set forth my dissatisfaction with all the grace of which the Japanese language is capable and in a journal read by Japanese only. Sometimes I have felt tempted to expose the natives in their own vernacular, and I did once write a letter to *The Times* which produced considerable sensation of a sort. The natives said it ought to have appeared in *Punch*, where it would have the advantage of illustration. I only understood what was meant after I bought a copy of the latter journal, which I found to be engaged in exposing the follies of the natives. It is the only native journal I have cared to study, and I sympathise with its struggles, for it has an uphill task before it.

* * * *

And now to tell you why I have decided to return home. A native who understands Japanese came to me the other day and said he had been reading my journal. I naturally expressed my satisfaction that one at least was on the way to better things. "Yes," he said, "you have a very low opinion of us." I remarked that such a conclusion on his part showed great powers of penetration—for a native. "You think this is a wretched country to live in?" "Yes." "The best of the natives are a bad lot?" "Yes." "The government is abominable?" "Yes." "The people are unpolished, of low intelligence, and debased morality." "You have expressed exactly what I feel," said I. "Well, why do you remain in a country you dislike; why don't you go home?" I disdained to reply, but I have thought over it, and for once I must confess native reasoning to be irresistible. I am now on my way home.—*Kobe Chronicle.*

THE LIBEL ACTION AGAINST MR UCHIYAMA ROSSETSU

BEFORE THE OSAKA COURT OF APPEAL.

Osaka, December 2nd.

The appeal of Mr. Uchiyama Rossetsu against a sentence of fine and imprisonment for a libel on Mr. Asahina contained in the published report of the arbitration in the Antimony Mines case, came on for hearing before the Osaka Court of Appeal at 10 a.m. to-day. Mr. Uchiyama was present with his counsel Mr. Ogura.

The Judge read the evidence given by the witnesses at the Kobe Local Court and asked the appellant if he objected to any part of it. The appellant declared there were many mistakes in the statements. The Public Procurator asked Mr. Uchiyama Rossetsu whether the argument in the arbitration case, out of which this action arose, as printed in the *Hyogo News*, was the same as the argument he had forwarded to Mr. Enslie. The appellant said he did not know, as the argument he forwarded had been recopied, but he believed it was the same. The Judge then asked the appellant whether he desired to make any statement or claim, and Mr. Rossetsu replied that he wished to again call two witnesses to be examined, one English and now living at Yokohama, and the other German and resident at Kobe. He objected that the evidence of these two witnesses was not given on oath at the Kobe Local Court, while the interpretation was an unsatisfactory one. The Judges retired to consider the point, and on the Court resuming, after an absence of about ten minutes, said they had decided to ask for the attendance of the witness of German nationality now in Kobe, and would re-hear his evidence.

The proceedings then terminated.—*Kobe Chronicle.*

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, December 2.

There has been a severe run upon the banks in Italy, notably on the Banca Générale, consequent upon the difficulties of the Credits Mobiliare.

London, December 3.

A new French Ministry has been formed as follows:—

M. Perier, Premier and Minister of Foreign Affairs.
M. Burdeau, Minister of Finance.
M. Spuller, Minister of Education.
M. Mercier, Minister of War.

The political tendency of the new Cabinet is decidedly moderate.

A New Italian Ministry has been formed under the Presidency of Signor Zanardelli, the Minister of Foreign Affairs being General Baratieri.

London, December 4.

The Protocol between England and France, in regard to the Siamese Buffer State, has been signed, and the Commissioners for the delimitation of the frontiers will start soon for the scene of their labours.

The Times says that the Buffer State will be under the control of the Chinese Government.

London, December 6.

The Italian Ministry inspires neither political

or financial confidence, and Signor Zanardelli is expected to resign forthwith, King Humbert deeming the Cabinet incompetent to deal with the present situation, which is daily becoming graver.

[Specially Telegraphed to the "Japan Daily Mail."] (From the "North China Daily News").

London, November 27.

In the House of Commons, Mr. Gladstone, replying to a question by General Chesney, said that when the Naval Estimates were presented to the House, he found that further shipbuilding was intended to be entered upon at an early date, and that everything had been done to avoid delay. In the course of his remarks, Mr. Gladstone reaffirmed the necessity of maintaining the supremacy of the British Navy.

The third reading of the Employers Liability Bill has passed the House of Commons.

The appointment of Colonel the Right Hon. Sir Joseph West Ridgway, K.C.S.I., K.C.B., to be Governor of the Isle of Man, has been officially announced.

November 28.

The first reading of the Employers Liability Bill has passed the House of Lords.

London, November 28.

A box containing an infernal machine was sent from Orleans to General von Caprivi, Imperial German Chancellor. The General's aide-de-camp unpacked the box and recognising the nature of the contents promptly rendered the machine harmless.

November 29.

The Times publishes a telegram which states that twelve thousand persons perished through an earthquake which occurred in Khorassan, a province of Persia, and that fifty thousand cattle were also destroyed.

November 30.

Signer Zanardelli has undertaken the formation of a new Italian Cabinet

The Ministerial deadlock in Paris continues, and President Carnot has again consulted MM Perier, Develle, and Dupuy with the object of arranging for the formation of a new Ministry.

The new tariff in the United States gradually abolishes the Sugar Bounty, wool being added to the free list, and the duty on castor oil is reduced thirty-five cents per gallon.

The first six clauses of the Parish Councils Bill have passed the Committee of the House of Commons.

December 2.

The second reading of the Employers Liability Bill has passed the House of Lords.

The appeal which had been lodged by Miss Mighell against the decision of the lower court, in the action which she brought against the Sultan of Johore for breach of promise of marriage, has been dismissed.

M. Spuller, having failed to form a new Cabinet, President Carnot has induced M. Casimir Perier to undertake the task.

London, December 2.

The Reichstag has passed, by a majority of third-six votes, a resolution of the clericals to permit the return of the Jesuits to Germany.

It is officially announced that Lieut.-General Fremantle has been appointed Governor of Malta.

[From the "Hongkong Daily Press"]

Paris, November 13.

Spain proposes that the European nations should agree on measures for the suppression of anarchy.

Paris, November 14.

The opening of the Parliamentary Session took place without any noteworthy incident.

The President in his address referred in warm terms to the Franco-Russian fêtes.

Paris, November 15.

M. Georgewitch, formerly Servian Minister, was the victim of an Anarchist attempt at murder. The attack took place in a restaurant. The victim's condition is serious. The perpetrator was arrested.

General Dodds has occupied without resistance the residence of King Behanzin.

The natives of the district are submitting

Paris, November 16.

The Embassy which Behanzin sent to Paris has not been received by the Government.

A dynamite bomb was exploded about midnight at Marseilles at the residence of the Commandant of the Fifteenth Corps d'Armée, who was absent at the time. The building was damaged, but no personal injuries resulted. Great excitement prevails.

Paris, November 17.

Several Anarchists have been arrested at Marseilles.

Paris, November 18.

M. Dupuy is preparing severe measures against the Anarchists.

M. Casimir-Perrier has been elected President of the Chamber of Deputies by 333 votes out of a total of 418.

Several meetings of Deputies have taken place for the purpose of forming party organisations.

Behanzin's Ambassadors have left.

Paris, November 26

A section of the Italian press is becoming markedly hostile to the Triple Alliance.

Paris, November 28.

A great storm has taken place in the English Channel and 200 lives have been lost, chiefly British.

CHESS.

(All communications to be addressed to the Chess Editor.

The Tokyo Chess Club meets at the Hotel Métropole on Fridays from 1 to 11 p.m.

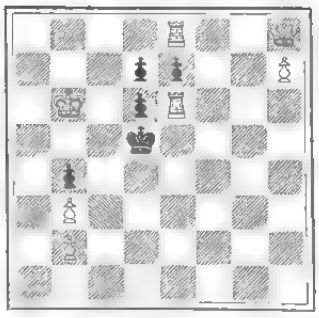
Solution of Problem No. 98.

White.	Black.
1—B — Q 5	1—K × B
2—R × P (K 6)	2—K × R
3—Kt — Q B 7, mate.	

Correct solutions received from O.B., W.H.S., J.D., Omega, J.W.E., and Digamma.

Problem No. 100.
By James Rayner.

Black.



White.

White to play and mate in three moves.

Yokohama Chess Club.

The following are the rules of the Contests now going on in the above Club :—

Handicap Tournament.

Each player will contest two games with every other competitor taking the move alternately. Wins counting 1. Draws ½.

All games to be finished by 28th February, 1894. Two prizes, presented.

There are eleven entries, divided into five classes :—

Class I.—Baltt.
Class II.—Fardel, Griffin, Pollak, Schiff, Squier, Tennant.
Class III.—Mendelson.
Class IV.—Fox.
Class V.—Barrie, C. Griffin.

The odds are P and move, P and two moves, Knight, Rook : in a progressive scale throughout the classes.

Y.C.C. Championship, 1894.

Play commences December 4th, 1893, and closes 31st March, 1894. No Handicap. No entrance fee. Staunton rules (especially "touch and move"). Twelve entries.

To be played in rounds (not less than one round per month). Three won games to decide a heat. Draws count *nil*.

First Round (December, 1893).

Heat 1.—Fox *versus* Schiff.
Heat 2.—Fardel *versus* Batavus.
Heat 3.—Davieson *versus* Balk.
Heat 4.—Pollak *versus* Squier.
Heat 5.—Pownall *versus* Griffin.
Heat 6.—Mendelson *versus* Tennant.

Chess players, with a turn for the history of their strategic amusement, will be interested to learn that all the hypotheses as to the origin of the game have suddenly been "mated" by a recent extraordinary discovery in Egypt. It was generally assumed until now that the ancient Indians had invented chess; that it was introduced from India to Persia in the sixth century; and that by Arabs, and in consequence of the Crusades, it spread from East to West. But here comes news of the latest excavations on the pyramid field of Sakkara, which have brought to light a wall-painting, on which a high official is represented as playing chess with a partner at the time of the government of King Teta, who belonged to the sixth dynasty. Professor Lepsius formerly assigned the reign of that monarch to about the year 2700 B.C. Professor Brugch, correcting this chronology, puts its back to still greater antiquity, namely, to the year 3300 B.C. So that chess would have been known in the once mysterious land of Mizraim something like 5,200 years ago!—*London and China Express.*

Played at New York on August 24th, in a match between Mr. A. B Hodges, the American expert, and Herr Albin from Vienna. We take the score and notes from the *Baltimore News.*

Ruy Lopez.

White. Hodges.	Black. Albin.
1—P to K 4	1—P to K 4
2—Kt to K B 3	2—Kt to Q B 3
3—B to Kt 5	3—P to Q R 3
4—B to R 4	4—Kt to B 3
5—P to Q 3	5—P to Q Kt 4
6—B to Kt 3	6—B to B 4
7—Kt to B 3	

7 P to B 3 is more usual; the text move, however, obviated P to Q 4.

	7—P to R 3
.... To stop the combination of B to K Kt 5 with Kt to Q 5. Black may also Castle here, answering the former move with B to K 2	
8—Castles	8—P to Q 3
9—B to K 3	9—B to K Kt 5
10—B takes B	10—P takes B
11—Kt to K 2	11—B takes Kt
12—P takes B	12—Q to Q 2
13—K to R sq	13—Q to R 6
14—Kt to Kt 3	14—R to Q sq.
... . A most important and harrassing move.	
15—P to B 3	

Both to prevent the entry of the Kt at Q 5 and the immediate loss of a piece by P to B 5.

	15—P to B 5
16—B to B 2	16—P to K R 4
17—K R to Kt sq.	17—P to R 5
18—Kt to B 5	18—P to Kt 3
19—Kt to K 3	19—K Kt to R 4
.. .. The *New York Sun* gives the following variation here: P takes P, 20 B takes P, R takes B 21 Q takes R, Q takes B P ch. 22 R to Kt 2, P to R 6, and should win.	
20—Kt to Q 5	20—Kt to K 2
21—Kt takes P ch.	21—K to B sq.
22—P to Q 4	22—Kt to B 5
23—P to Q 5	23—R to Q 3
24—R to Kt 4	24—Kt to R 4
. .. . Not only preventing R takes Kt, which would break up the attack, but on his own part menacing P to K B 4 in certain cases, and having also Kt to K 6 ch. in hand.	
25—P to R 4	25—P to Kt 5
26—P takes P	

This lets in the other Knight at Q 5, but the move is excusable, having several points in its favour.

	26—Kt to Q B 3
27—R to R 3	27—Kt to Q 5
28—R to B 3	28—Kt to Kt 6 ch.
.. .. A beautiful finish.	
29—P takes Kt	29—P takes P
30—Q to Kt sq.	30—Kt to K 7
31—R takes Kt P	31—Kt takes R ch.

White Resigns.

REPORTS.

The Japanese steamer *Wakanoura Maru*, Captain R. Tipple, reports:—Left Otaru the 28th November at noon; had fine weather with moderate S.W. and W. winds to Hakodate, arriving the 29th at 6 15 a.m. Left the 30th at 8 a.m.; had light S.W. winds and fine weather to Oginohama, arriving the 1st December at 5.45 a.m. Left the same day at 2.42 p.m.; had light to moderate N.W. to W. winds and fine weather; passed Inuboye at 5.15 a.m. Arrived at Yokohama the 2nd December at 5 30 p.m.; south of Inuboye experienced heavy S.W. swell.

The Japanese steamer *Takasago Maru*, Captain Nirei, reports:—Left Kobe the 1st December at noon; had fine, clear weather and moderate northwesterly breeze; passed Oshima at 10 p.m.; on the 2nd fine weather and moderate to strong westerly gale with heavy sea; made Rock Island at 2 p.m. Arrived at Yokohama at 8 40 p.m.

The Japanese steamer *Sorachi Maru*, Captain Renny, reports:—Left Hachinohe the 1st December at 3 a.m.; had light S.W. winds and fine weather. Arrived at Kuji the same day at 7.15 a.m. and left Kuji the 2nd at 0 30 p.m.; experienced moderate to strong westerly winds with fine weather; passed Noshima Light the 4th at 4.50 a.m. Arrived at Yokohama the same day at 10 a.m.

The Japanese steamer *Miike Maru*, Captain W. Thompson, reports:—Left Hakodate the 3rd December at 6.40 a.m; passed Kinkasan the 4th at 3.32 a.m.; passed Inuboye the same day at 5.40 p.m. Arrived at Yokohama the 5th December at 6.40 a.m.; from Hakodate to Inuboye experienced strong N.W. winds and clear weather; thence to port moderate northerly winds and clear weather.

The Japanese steamer *Nagato Maru*, Captain Pender, reports:—Left Kobe the 4th December at noon; had moderate to fresh westerly winds and fine, clear weather throughout the passage; met steamers *Saisho Maru* and *Akashi Maru* off Sagami. Arrived at Yokohama the 5th December at 4.10 p.m. From Rock Island to Sagami passed a large quantity of kerosene tins and cases.

The Japanese steamer *Sagami Maru*, Captain Crichton, reports: Left Otaru the 30th November at 2 p.m.; had light winds and fine weather to Okushiri; thence to port light to gentle N.E. and N.W. winds with cloudy, overcast weather and passing showers of rain and sleet. Arrived at Hakodate the 1st December at 12.45 p.m. and left again the 4th at 6 a.m.; had gentle to moderate north-westerly winds and clear weather to Yamada Head; thence to port light variable breezes and clear weather. Arrived at Oginohama the 5th at 6.45 a.m. and left again the same day at noon; had light to gentle S.W. winds and clear weather to Inuboye; thence to port gentle to moderate and fresh W. to S.W. breezes and clear weather. Arrived at Yokohama the 6th December at 6 30 p.m.

The Japanese steamer *Sendai Maru*, Captain Sakai, reports:—Left Kobe the 5th December at 10 10 a.m.; had light westerly breeze and clear weather. Arrived at Shiotsu at 1.10 p.m. and left again at 3.45 p.m.; had gentle north-north-easterly breeze and fine, clear weather throughout the passage; at 12 54 p.m. on the 6th after passed Rock Island Lighthouse gentle to fresh westerly breeze and clear weather with following sea. Arrived at Yokohama the 6th December at 7 35 p.m.

The Japanese steamer *Yokohama Maru*, Captain Swan, reports:—Left Woosung the 2nd December at 9 a.m.; had light northerly to north-east winds and fine, clear weather up to arrival at Nagasaki the 3rd at 11 p.m. Left Nagasaki the 4th at 5 p.m.; had light variable winds and continued fine, clear weather, arriving at Shimonoseki the 5th at 6.40 a.m. Left Shimonoseki the same day at noon (in company with *Genkai Maru*); had light variable winds through Inland Sea with remarkably fine weather, arriving at Kobe the 6th at 8 45 a.m. Left Kobe the 7th at noon; had moderate to fresh northerly and north-west winds and clear weather; passing Oshima at 8.25 p.m. with fresh to moderating N.W. winds and clear weather up to Rock Island the 8th at 10.30 a.m.; thence to arrival at Yokohama at 4.30 p.m., moderate to light variable winds and fine, clear weather; passed *Miike* and *Sendai Maru* off Vries Island, steering southward, also a quantity of kerosene cases floating around same locality.

The Japanese steamer *Omi Maru*, Captain J. W. Ekstrand, reports:—Left Otaru the 3rd December at 2 p.m.; had strong N.W. winds with snow squalls and high sea. Arrived at Hakodate the 4th at 9 a.m. and left the 6th; had strong westerly winds and misty rain. Arrived at Oginohama the 7th at 6.30 a.m. and left the same day at 4 p.m.; had strong W.N.W. winds and clear weather sundown gentle winds, fine and clear weather; winds variable, north and west. Arrived at Yokohama the 8th December at 5.40 p.m.

LATEST COMMERCIAL.

IMPORTS

The Import Trade has experienced another unsatisfactory week in Cottons and Woollens, but there has been rather more enquiry in some lines which has given prices a hardening tendency. Yarns, both Single and Double, have been very dull, but owing to a slight demand and small stocks 16/24's are a little dearer. Cotton Piece Goods have continued very quiet—a few small purchases in Grey Shirtings comprising the week's business. Prices, however, are decidedly firm. Woollens remain quiescent without enquiry.

COTTON PIECE GOODS

	PER PIECE.	
Grey Shirtings—8¼lb, 38¼ yds. 39 inches	$2 15	to 2 70
Grey Shirtings—9lb, 38¼ yds. 45 inches	2 35	to 3 12½

METALS

There has been but a small "spot" business done in Iron during the week, but some forward contracts have been entered into at slightly higher rates. Stocks generally are low, while supplies of Pig Iron are exhausted.

	PER PICUL.	
Flat Bars, ¾ inch	$3 80	to 4 00
Flat Bars, 1 inch	4 00	to 4 10
Round and square up to 2 inch	3.20	to 3 35
Iron Plates assorted	3 35	to 3.45
Sheet Iron	4 55	to 4 70
Galvanized Iron sheets	8 85	to 9 10
Wire Nails, assorted	5 40	to 5.75
Tin Plates, per box	6 20	to 6 40
Pig Iron, No 3	1 45	to 1 50

KEROSENE.

Another week of active demand has been seen in this market, but again business has been curtailed by the shortness of supplies. Owing to the loss of the German ship *Schliemann*, with about 69,000 cases of Comet, prices for American Oil rose sharply until the arrival of the steamer *Glamorganshire* with 66,000 cases, which checked the advance. Holders of Russian Oil, notwithstanding an arrival of 105,000 cases ex steamer *Helen Rickmers*, have hardened in sympathy.

Chester	$1 85	to 1 87½
Comet	1 82½	to 1.85
Devoe	—	
Russian Anchor	1.80	to 1 85
Russian Moon	1.77½	to 1.80

SUGAR

Buyers have shown rather more inclination to operate in Browns, and a fair day-to-day business has been transacted throughout the week. In spite of arrivals keeping pace with sales, prices for Manila and Canton grades show a slight advance. Whites have enjoyed a well sustained demand and holders are firmly inclined.

	PER PICUL.	
Brown Takao	$4 40	to 4.50
Brown Manila	5.15	to 5.25
Brown Daitong	3.95	to 4 00
Brown Canton	4 10	to 4 45
White Java and Penang	7.00	to 7 10
White Refined	7 50	to 9 10

EXPORTS.

RAW SILK.

Our last issue was of the first instant, since which date settlements on this market amount to 2,719 piculs, divided thus: *Hanks*, 97 piculs; *Filatures*, 1,759 piculs; *Re-reels*, 652 piculs; *Kakeda*, 211 piculs. Direct shipments have been 163 bales, making the total export trade for the week 2,900 piculs.

The large buying for America mentioned in our last continued during the first half of the present week, and some business was also done for Europe. Holders have succeeded in advancing prices for some things and in several instances the advance has been paid. There is less doing at the close; prices are nominally firm at quotations, although dealers would be soon anxious to move were any signs of stagnation to appear.

Arrivals come in to some extent, but the stock figures show a smart reduction upon last week, and summer reelings of full sized Filatures and Rereels are by no means abundant.

Exchange is fairly steady at last week's quotations and has been practically without change all the week.

There have been two shipping opportunities since we last wrote, the American mail *City of Rio* 2nd inst. taking 976 bales for the New York trade, while the French mail steamer *Salazie*, 3rd instant, had 210 bales for Europe. These departures make the present export figures 19,677 piculs, against 29,687 piculs last year and 26,515 piculs at the same date in 1891.

Hanks.—The stock of medium *Shinshu* has been cleared out at $590 per picul, and the total stock of Hanks remaining on the market is down to 30 piculs. Arrivals, settlements, and shipments in this class this season have been of a very retail character.

Filatures.—As usual, the bulk of the trade has been in this class and prices have been advanced for full sizes. Among the latest sales are *Taiyosha*, $780; *Saishinsha*, $770 and equal grade at equal price. *Kaimeisha* was done a few days ago at $735, holders now asking $740. In fine sizes, best No. 1 is noted at $780, with other grades in proportion. These, without any actual rise in prices, are perhaps slightly firmer in sympathy with American kinds.

Re-reels.—Active market and good enquiry, prices having advanced $10 or $15 per picul. *Tengensha*, *Tortoise*, were done at $700; *Koriyama* (Girl) $685. Some advance is now required on these prices, the owners of *Five Girl* chop asking $710, with other well-known chops at equal rates.

Kakeda.—A fair amount of business has been done at quotations, which seem fairly reasonable and remain as last noted, there being no advance and no decline.

QUOTATIONS.—(NEW SILK.)

WASTE SILK.

Settlements in this branch amount to 400 piculs, divided thus: *Noshi*, 60 piculs, *Kibiso*, 340 piculs, No direct shipments this week.

Arrivals come in on a free scale and sales for export are very limited; but our stock has been lightened considerably by native spinners taking off several hundred piculs of low *Cocoons*, *Boseki-wata* and *Neri*, which goods have been returned into the interior for use in the native factories. Quotations generally are about the same as last week. Shippers say they have plenty of limits in hand, but cannot purchase at the prices which holders ask. In spite of the heavy stock, dealers maintain their position wonderfully well and we must wait yet further for developments.

There have been two shipping opportunities since we last wrote, the German mail steamer *Nuernberg* and the French mail steamer *Salazie* both taking a fair amount for European ports. These departures bring the present export figures up to 10,671 piculs, against 17,839 piculs last year and 13,947 piculs at the same date in 1891.

Pierced Cocoons.—There has been no export business in these during the week but, as noted above, the native spinners have taken off several hundred bales of the ultra-common.

Noshi.—A small business in *Joshu*, prices ranging from $65 to $85, according to quality. Nothing done in other provinces.

Kibiso.—Considerable business in these, *Filatures* especially being in demand; prices ranging from $110 to $90, according to quality and grade. In *Hira* sorts, *Zaguri* has been done at $50, with *Oshu* at $40 and *Joshu* at $32.

Nothing done in *Mawata* or *Sundries* for export.

QUOTATIONS.—(NEW WASTE).

Established a Quarter of a Century

A DELIGHTFUL MOUNTAIN RESORT.

THE most delightful Mountain Resort in the Hakone District is the KAIKATEI, at KOWAKI-DANI, which is admitted by the Medical Faculty of Tokyo and Yokohama to be the Sunniest, Breezi.est, and most healthful spot accessible to Foreigners in the Hakone District, standing alone and delightfully situated upon the mountain side, free from every suspicion of bad drainage and malaria, with a cool and constant breeze in the hot summer weather, and a view not to be equalled in the neighbourhood for variety and extent.

The BATHS are filled with a constant and never failing supply from the HOT MINERAL SPRINGS just above the Hotel, the medicinal virtues of which are too well known to need recapitulation. It is sufficient to say that whereas Visitors find many of the hot springs enervating, those at Kowaki-dani are distinctly invigorating.

One of the features of the Kaikatei is the detached Suites of Apartments, where perfect quiet and privacy can be secured. This arrangement for invalids and convalescents from the Tropics is a great desideratum, as being entirely removed from the Dining Room, Billiard Room, Bar, and Baths, while all are connected by covered passages.

To a Liberal Table are added an excellent *Cuisine* and good attendance, supplemented by a large variety of Wines, Spirits, and Malt Liquors of the very best kinds.

For the amusement of Guests, a fine English Billiard Table, by Burroughs and Watts, has been added to the Establishment, as well as Archery, Quoits, and other Games, and Ponies for riding over the hills and a Yacht for sailing on Hakone Lake can be hired.

Visitors to Kowaki-dani who bring a rod with them will be shown the haunts of the speckled Trout, a nice stream of several miles in length being within easy walking distance of the Hotel; Hakone Lake is also well stocked with a variety of fish, including salmon, and the Fishing is FREE; while Entomologists will find rare and valuable specimens in the surrounding hills, and the Flora of the district is extremely interesting to the Botanist.

Apartments may be secured by Letter or Telegram, and Special arrangements made for the conveyance of Visitors and Baggage from the Tramway Terminus at Yumoto, by addressing

Y. HOSHINO,

KAIKATEI, KOWAKI-DANI,
HAKONE.

THE GREATEST WONDERS OF MODERN TIME.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unimpeachable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

MR. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871 says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by Chemists and Medicine Vendors throughout the World. May 1st, 1890.

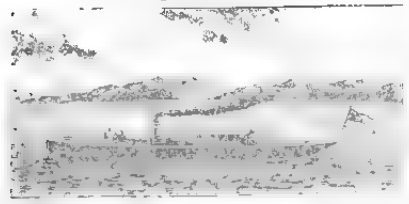
Contractors to the British Admiralty, Foreign Governments, Leading Steamship Companies, & Yacht Owners in all parts of the World.



STEAM LAUNCHES & YACHTS

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel
2. First class Workmanship
3. Moderate Prices
4. Greatest obtainable power for weight and acesp accupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 40 tons and upwards. We also build smal light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c, &c. We supply sets of Machinery separately. We are also sole makers of the

KINGDON PATENT LIGHT PORTABLE ENGINE

Stock sizes, 1½ to 6 H.P. Burns less fuel, and gives *three times the power*, weight for weight, of any other engine Awarded First Prize by Royal Agricultural Society England, 1890, in competition open to all makers.

Illustrated Catalogue in English, French, or Spanish Send for Copy to

SIMPSON, STRICKLAND & CO.

SANTAL-MIDY

The **pure** Essence of Santal obtained by Midy's process from the best Mysore wood.

SANTAL-MIDY entirely different from the santal oil of the Indian Bazars, is superior to Copaiba, Cubeb, or injections, and free from all bad smell or other inconveniences.

SANTAL-MIDY cures all derangements of the urinary organs in either sex **in 48 hours.**

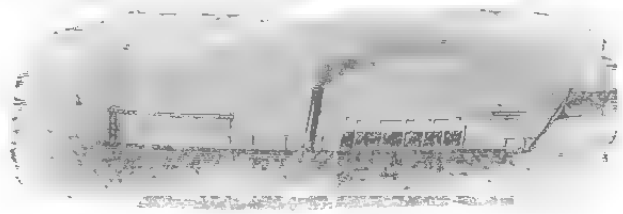
SANTAL-MIDY is contained in small round Capsules, each of which bears the name..... (MIDY) in black, letters, without which none are genuine.

SANTAL-MIDY **Beware of imitations,** all other Capsules or mixtures contain impurities, resins, oils &c. and are worse than useless.

SANTAL-MIDY is sold by all druggists and medicine dealers throughout the world.

PARIS, 8, RUE VIVIENNE 8

Wholesale Importers THE CHINA & JAPAN TRADING Co., Ld. Sold by all Retail Druggists.



YARROW'S

SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

MACHINERY CONSTRUCTED FOR BOATS BUILT ABROAD.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition

YOKOHAMA: SATURDAY, DEC. 16TH, 1893

SUMMARY OF NEWS.

SNOW fell in Tokyo about half-past five o'clock on Wednesday morning.

MR. TAJIRO ICHIJIRO has been elected President of the Yokohama Town Assembly.

SMALL-POX has broken out in Osaka. Dysentery, however, is nearly stamped out there.

A WHOLE block of houses near Isesakicho, Yokohama, was destroyed by fire on Monday evening.

TWO members of parliament have been assaulted this week by *soshi*, while proceeding through Tokyo.

A CONCERT will be given at Uyeno Park, Tokyo, on Sunday next by the pupils of the Academy of Music.

OVER sixty applications for the construction of private railways have been received by the Railway Council.

MARQUIS TOKUGAWA, an Envoy Extraordinary and Minister Plenipotentiary, has been released from his post at his own request.

THE marriage arranged between the Crown Prince of Korea and a daughter of Kim Shi shun took place on the 6th inst.

THERE is a prospect of a band being engaged to play at the skating pond during some evenings of the Yokohama Skating Club's season.

SEVERAL degrees of frost were registered in Yokohama on Thursday and Friday mornings, the coldest weather yet experienced this season.

ADMIRAL SKERRETT, U.S.N., arrived by the *China* on Saturday last, and at once assumed command of the U.S. Asiatic Squadron, hoisting his flag on the *Lancaster*. The new U.S. Flagship *Baltimore* is expected early next year.

IT is stated that over fifty *soshi* of the Radical Party arrived in the Capital from the interior on the 13th and 14th inst.

IT is expected that the notification forbidding the export of rice from Korea will soon be withdrawn, the Chinese Minister having urged its abrogation.

THE Government sanctioned on the 12th inst. the establishment of the Yokohama Exchange promoted by Mr. Iijima and other Japanese traders of the port.

THE members of the Japan Trade Society (*Nippon Boyeki Kyokai*) propose establishing a branch at Yokohama, and appointing Mr Otani Kahei director.

THE new Commander-in-Chief of the U.S. squadron on the Asiatic Station, paid a visit on the 12th inst. to the Captain of the *Itsukushima Kan*, now at Yokohama.

THE last fortnightly meeting of the Yokohama Literary Society was a great success, Prof. Burton delivering a Lecture on Modern Photography, accompanied by stereopticon views.

IT is announced that, on the 19th instant at 9.30 a.m., His Majesty the Emperor will leave the Palace and proceed to the Imperial Naval College for the purpose of witnessing the winter commencements.

A TELEGRAPHIC message from Nemuro dated the 13th inst., published in the *Asahi Shimbun*, states that during a heavy snow storm which visited there the other day, a fishing boat was wrecked, and thirteen lives were lost.

AN application by the Yokohama Amateur Rowing Club for the reclamation of ground about one hundred *tsubo* in extent, near the French Hatoba, was submitted to the consideration of the Yokohama Town Assembly on the 12th inst.

THE Judge of H.B.M.'s Court for Japan has dismissed the petition filed in the suit brought by the next-of-kin of the men drowned by the sinking of the *Chishima Kan*, against the P. & O. S. N. Company. An appeal will be lodged in Shanghai.

THE *No. 1 Taiko Maru*, of the Great Lake Steamship Company, Otsu, was wrecked off Yobuko, Matsu-ura District, Saga Prefecture, shortly after seven o'clock on the morning of the 9th inst. All the passengers and crew were saved.

AN incendiary fire took place at Yokomachi, Ishikari District, Hokkaido, on the morning of the 10th inst. The flames burst out at half past three o'clock, and continued during two hours, by which time 178 houses, one boat, and 2 telegraph posts were destroyed.

DURING the week a small exhibition of bromide enlargements of negatives taken by Mr Otis A. Poole by a hand camera, has been held in Main Street, for the purpose of raising a prize fund for the boys of the Victoria Public School.

THE *John Y. Robbins*, while leaving Hakodate this week for San Francisco, sulphur laden, got ashore on Mussel Point, opposite Hakodate Head. There are several miles of sand in the vicinity, and it was hoped that the ship was on a soft place and would be got off, but a telegram was received here yesterday announcing that the vessel has been abandoned, her cargo being under water. This would lead to the supposition that she had got upon a reef in the neighbourhood of the point.

THE American sealing schooner *Emma* has arrived at Nagasaki in distress from Saghalien, with her rudder broken. The vessel was seized by the Russians, and the captain and crew imprisoned at Vladivostock, where orders were received from St. Petersburg to try the case in a Civil Court under Russian law.

A JAPANESE merchant of Yokohama has bought the wreck of the German ship *Schliemann* for the sum of some twenty-thousand dollars. A great deal of the oil has yet to be recovered from the sea, but some hundreds of cases have been cast up on the beach at Vries Island, and also at Atami, Misaki, and other places on the coast.

MR HOSHI TORU, President of the Lower House of the Diet, has been expelled the House by a vote of the Representatives upon the report submitted by the Disciplinary Committee, to which body he had been handed over by reason of his refusing to acknowledge the House's vote of want of confidence in him and resigning his chair.

SIGNOR ZANARDELLI, who recently undertook to reconstruct the Italian Cabinet has resigned, and subsequently Signor Crispi had a long interview with King Humbert; the anarchists of London are creating trouble, they are forbidden Trafalgar Squar and have been charged by foot and mounted police; Professor Tyndall is dead, his wife having given him a dose of chloral in mistake for magnesia; Mr. Dupuy is the new president of the French Chamber of Deputies; the U.S. Tariff bill will add sixty million dollars to the already existing deficit, which amounts to twenty-eight millions; Mr. John Morley is suffering from influenza.

THE Import trade remains much as last reported. Yarns being slow of sale, "singles" especially, and the demand for "doubles" has not been large. Shirtings are more or less neglected, Fancies and Woollens being in much the same case, and holders all round are firm, declining offers at reduced prices. The Metal market remains unaltered, the small stocks being firmly held, and there is nothing to report but a few contracts on a limited scale. The activity recently noted in Kerosene has been fully maintained, and all the transactions that have been put through have commanded full rates. The stock has been increased by the arrival of two cargoes of American Oil, yet is anything but large notwithstanding. Russian Oil is also in good demand, and the stock is not great. There has been a fair trade in Sugar, Browns being unchanged in value and taken in fairly large parcels. Whites are also in good request at late rates. The Silk trade has not been extensive, settlements only amounting to 1,000 piculs, of which over 100 bales were direct shipments. For the small daily business that resulted in this total, prices were well maintained, and in certain kinds holders succeeded in obtaining an advance. The stock is well kept up, arrivals promptly replacing the parcels taken, and there are still over 15,000 piculs on this market. Only a small business has been done in Waste, and the stock increases, but holders will not give way, and the trade is consequently restricted. Tea has seen another dull week, and such demand as exists is checked by holders, who will make no concessions whatever. Exchange has receded slightly from the rates of a week ago, and closes with an element of uncertainty.

THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.

Political rumours fill the air. The announcement that Count Yamagata, who had been staying at Yoshino in Yamato, was instructed by His Majesty to return to the capital, led some people to suppose that changes in the *personnel* of the Cabinet were imminent. It is even rumoured that Count Ito intends handing over the Cabinet to the President of the Privy Council. Some papers go still farther and predict that the Ministry will resign in a body within ten days. Yet another rumour has found its way into print that the Cabinet is waiting for a favourable pretext to dissolve the Diet, and the paper which publishes this reports adds that, after dissolving the Diet, the Cabinet will quietly resign and ask Count Yamagata to form a new one. Again, it is rumoured that Count Ito and a few other Ministers alone will leave the Government, and that the next Minister President will be either Count Saigo or Count Kuroda. The diversity of rumours and the class of papers in which they are published, make it safe to conclude that, for the most part, they are fabrications of artful politicians now directing the policy of the disorganized Opposition. Having at last succeeded in overthrowing—in an unjust and disgraceful manner be it remembered—their bitterest enemy, Mr. Hoshi, whom they supposed, rightly or wrongly, to be an unsurmountable obstacle in an effective attack upon the Government, they now think that the time has arrived for them to close with the Ministry for a last and decisive struggle. And in order to put heart into their comrades, the leaders of the Opposition assiduously circulate rumours tending to indicate irresolution and weakness on the part of their adversaries. On what question will the fight take place? That is the topic now engaging attention in political circles. Some papers say that it will be over the Budget, while others maintain that the Progressionists and others seem resolved to concentrate their energies upon the question of official discipline and a few other subjects, such as the *Chishima* case and the strict enforcement of the Treaties. The latter view seems to us to be the more likely, for, while on the question of the Budget the Progressionists and other extreme sections of the Opposition will be unable to obtain the full cōoperation of the National Unionists, the latter will heartily assist them in pushing the other subjects specified above. Thus on these questions, the Opposition being sure of an overwhelming majority in its favour, is rightly resolved to concentrate its whole energies in a safe direction. It is even reported that the Progressionists are not averse to a formal alliance with the National Unionists, on condition of a secret understanding for the formation of a coalition Cabinet in the event of the resignation of the statesmen now in power Thus far, however, there is no indication to confirm this rumour. At all events, it seems likely that the Opposition, guided by the Progressionists and assisted by the National Unionists, will ere long put forth its whole strength to dislodge the Ito Cabinet from office. Possibly the parties of the Opposition, especially the *Kaishin-to*, would be better pleased with the dissolution of the Diet than with the resignation of the Cabinet, for their organs are openly advising the Government to appeal to the country. Meanwhile, the *Nichi Nichi Shimbun* and the *Jiji Shimpo* recommend the Government to be firm and resolute in its policy toward the Diet.

* * *

The *Nichi Nichi* observes that its prophecy that the present session would witness confused fighting has unfortunately been fulfilled. Starting with the inconsistent and absurd conduct of the Diet thus far, as well as to the unreasonable reductions which the Budget Committee is understood to propose, our contemporary thinks that it is now high time for the Government to adopt some decisive and radical measure to cure the country of its intolerable political malady. The predominance of a single party in the Diet might be productive of several evils, but it would be better than the co existence of numerous small parties incapable of effecting a combination sufficiently permanent and strong to secure consistency of policy. While the Opposition is indulging unchecked in extravagances of all sorts, the Ministers stand irresolute and hesitating. Such an attitude on the part of the Cabinet, says the *Nichi Nichi* may be of some use as a temporizing measure, but statesmen who have the preservation of the Constitution really at heart, and who are honestly devoted to the lasting good of the country, ought to be prepared to take some radical measure for clearing the Diet of its destructive elements

* * *

The *Jiji Shimpo* is surprised at the weakness of the Cabinet in its contests with the Opposition. What is the actual condition of the Opposition? It is disorganized and incapable of any strong cohesion. With such assailants before it, the Cabinet ought, in the *Jiji's* opinion, to have no difficulty in defending its citadel against attack. The Cabinet may even sally out and effectively disperse its faint-hearted besiegers. But in point of fact, not only is the Government unable to attempt any aggressive line of action, but it not infrequently suffers its enemies to close round the keep of its castle. Is this due to any inherent weakness on the part of the Government? Some people are inclined to think that all energy has gone out of the clan Government, and that it is almost as rotten and tottering as the Tokugawa Government was in the latter days of its existence. But this view is not shared by the *Jiji*. Individually speaking, the statesmen composing the present Cabinet show no signs of intellectual decline, nor have they anything to fear from competition with the young politicians of the Opposition. Not want of energy or lack of ability is responsible for the defeats suffered by the present Ministers of State in their encounters with their opponents. The cause of their apparent weakness must be sought, the *Jiji's* thinks, in want of concord among themselves. They need only to be united in order to secure their tenure of office against disturbance by the Opposition.

* * *

The Progressionist organs continue their attack upon the Government on the subject of official discipline. The *Mainichi Shimbun* tells Count Ito that his supposed fears about the results of turning Count Goto loose in the field of party politics are entirely unfounded. The present Minister of State for Agriculture and Commerce undoubtedly possesses some followers, but none of them, in the *Mainichi's* opinion, are loyally devoted to him. It is true that he was once able to collect about him a formidable following under the banner of the *Daido Danketsu*. But the manner in which he deserted his followers to join his avowed enemies, makes it absolutely impossible for him to repeat the device with success. Our contemporary advises Count Ito to be in no way troubled about the consequences of Count Goto's leaving office. Perhaps, says the *Mainichi*, age is responsible for the Premier's attention to such baseless apprehensions.

* * *

The Hoshi question has been the absorbing topic of discussion during the week under review. So much has been already written on the subject in these columns, that it is not necessary to dwell on it again here. The by-election to fill the vacancy caused by Mr. Hoshi's expulsion will take place early in January. The constituency is the first election district in the Prefecture of Tochigi. Mr. Hoshi will of course present himself as candidate. His probable rival will be Mr. Yokobori, who sat for the District in the first Diet but was defeated by Mr. Hoshi at the last general election. Mr. Yokobori will be supported by the Great Japan Union, of which he is a member, and the popularity which the cause advocated by that political body enjoys in country districts generally is believed to be a great advantage in his favour. Some papers even report that Mr. Oi Kentaro, the leader of the anti-Mixed Residence movement, will contest the place. Whoever may compete with Mr. Hoshi, it is certain that the latter's opponents will appeal to the prejudices of the local population on the subject of Mixed Residence. Being thus the first election in which that question will be brought to the front, the contest promises to be extremely interesting. Mr. Hoshi's personality is not one that excites either affection or regard. He has never been and probably never will be a favourite with any class of people. But the way in which he has been treated by the House of Representatives has temporarily roused a general sympathy with him, while the eminent capacity he displayed in the exercise of his authority as President of that House wrung admiration even from his enemies. There is, therefore, little question that he will be successful in the coming election.

* * *

With regard to Mr. Hoshi's expulsion from the House of Representatives, we will notice only a few journalistic comments. The *Yomiuri Shimbun*, enumerating his offences, remarks that "he sold his Party; he committed immoral acts; he caused anxiety to the Sovereign; he showed contempt for the unanimous voice of the House of Representatives; and he has violated the Regulations governing the House." For offences like these, expulsion was a mild punishment, so thinks the Progressionist organ. Another organ of the same party, the *Mainichi Shimbun*, endeavours to defend the arbitrary conduct of the infatuated majority in the Lower House against the just criticisms of the papers outside Party circles. But its ingenious arguments are vitiated by the assumption that the original vote of want of confidence, for disobedience of which Mr. Hoshi was expelled, was irreproachable in point of legality and warranted by facts. In fact, the *Mainichi*, like every other defender of the unwarrantable conduct of the Lower House, begs the question from the outset and tries to mask the disgraceful action of the House under the disguise of sacred motives of morality which were entirely alien to the heated minds of Mr Hoshi's persecutors.

* * *

The *Jiji Shimpo* may safely be taken as the mouthpiece of the sober, educated section of the public. That journal is not favourably impressed with Mr. Hoshi's character. "Had we been," it says, "an elector in his constituency, we might probably have hesitated to cast our vote for him." The *Jiji*, however, observes that his personality has nothing to do with the question of the propriety of the measure taken against him by the House of Representatives. Our contemporary sincerely regrets that the House so far allowed itself to be carried away by party spirit and passion for political revenge as to create a precedent in respect of meting disciplinary punishment to a member against whom no offence has been established. Mr. Hoshi's expulsion under these circumstances may even be considered in the same light as the case of the prisoners in the Soma affair, supposing that they were sentenced to death without considering the evidence brought against them. The *Jiji* extremely regrets this incident for the sake of the honour and reputation of the House of Representatives.

* * *

The Budget question does not as yet receive the attention it deserves, owing to the Hoshi affair, which has nearly engrossed the attention of metropolitan papers, as well as to the general expectation that a decisive collision may perhaps take place before the Estimates are brought up for discussion. The Budget Committeee is now proceeding upon a plan, to which the Premier has declared that the Cabinet can never agree. The Radicals who compose the majority of the Committee have taken it into their heads that the contributions which officials are obliged to make out of their salaries for the purposes of the increase of the Navy, are not reductions of salaries, and consequently insist on a further decrease in this section of the Budget. As to the contributions, their idea, judging from an article in the *Jiyu Shimbun*, seems to be that if the Diet vote a corresponding sum for Naval purposes out of the Ordinary Revenue, the Ministers should advise His Majesty to

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

revoke his orders for the compulsory contributions. The Progressionist papers seem to regard the reductions proposed by the Committee as too moderate. The National Unionists, on the other hand, will not countenance the attempted meddling with Official Organizations. So it is believed that the Lower House will be divided into three nearly equal sections on the subject of the Budget, and it is feared that neither the original Estimates prepared by the Government nor any of the amendments proposed by these antagonistic parties will obtain a majority in the House.

* * *

The same causes that make the newspapers indifferent to the Budget also combine to divert their attention from the speech which the Premier recently delivered at a meeting of the Budget Committee. The *Mainichi Shimbun* remarks that the Premier having declared his Opposition to the moderate reductions proposed by the Budget Committee, it would be useless for the Opposition to make the slightest departure from the policy of sweeping reductions followed since the first session of the Diet.

EDITORIAL NOTES.

THE ADDRESS TO THE THRONE ON OFFICIAL DISCIPLINE.

THE Central Intelligence Company, quoted by the *Mainichi Shimbun*, alleges that the various Ministers of State have held a meeting to consider the Address to the Throne on Official Discipline, and that they have resolved to submit a joint memorial to the Emperor on the subject. We do not know how much truth there may be in this story, but we entertain some doubts whether the Cabinet would consider such a vague and unsubstantiated Address worthy of such serious notice. It is impossible to reply satisfactorily to charges couched in language so general that they amount simply to an expression of irresponsible opinion. The framers of the Address seem to have appreciated that fact fully. It seems to us that there is but one form of reply:—"The Cabinet Ministers have acted in accordance with the canons that commend themselves to their judgment as well as to their appreciation of a Minister of State's dignity. They have nothing to say to an accusation of the nature formulated by the House of Representatives." When it becomes an accepted doctrine of modern civilization that to associate with merchants and manufacturers disqualifies a high official for his post, the outcry of the mediæval sticklers in the House of Representatives will begin to have some weight.

MR. KAWADA KOICHIRO ON ECONOMIC QUESTIONS.

THE *Kokumin Shimbun* sent a representative to interview Mr. Kawada, President of the Nippon Ginko, on the economic questions of the day. His opinions on the problems now attracting the attention of thinking men in Japan, namely, the future of the Nobles' Bank, and the inauguration of an iron foundry, possess considerable interest. He declares himself strongly opposed to the winding up of the Nobles' Bank after the expiration of its prescribed term. For he discerns no manner of safely and profitably employing the large capital now involved in the Bank's operations, unless the institution be preserved. It is, he thinks, because the wealth owned by numerous peers in varying amount has been collected to subserve one purpose that they have been enabled thus far to compete with others in an age of the keenest business rivalry. So soon, however, as they are required to stand individually, as they would be were the Bank closed, they would lose their competence. He is of opinion that whatever different views may be entertained on the subject, the Bank ought to be preserved, not alone for the sake of the peers as a whole, but also because of the fact that the money invested by nobles in the 15th Bank is the hereditary property of their families. He thinks it distinctly strange that the Bank should lately have decided to allow the unrestricted sale of its shares.

* * *

As to the establishment of an iron foundry, he would have the project under the control of men convinced of its importance, resolved to realize its objects, and ready to maintain the business, whether it prove profitable or unprofitable for at least five or six years. He holds that to aspire to follow the example of England in this matter and to regard the work of an iron foundry in Japan in the same light as it is regarded in England, would be a complete mistake. Iron differs much in quality according to the place of its extraction, and if iron differs in quality the uses to which it is applied must also differ. But Mr. Kawada doubts whether there are specialists in Japan competent to manage foundry work. Moreover, this country does not enjoy advantages such as are possessed by England in the close proximity of the districts where iron and coal are produced. All these considerations lead the President of the Bank of Japan to conclude that iron in Japan cannot be regarded with the same importance as that attached to the mineral in England. Finally, he thinks that the time is still premature in Japan for an enterprise of the kind. But whether in the Occident or in the Orient, those that seek to invest a great capital so as to secure a good profit, should in his opinion, devote themselves to mineral, enterprises in the following order, namely iron, coal copper, silver, and gold.

KOREAN NEWS.

ACCORDING to the latest correspondence from Sōul published in the vernacular press, political circles in the Korean capital do not seem to be free from a certain measure of excitement and intrigue at the present moment. Bin Eikan (Japanese pronunciation), who has been leading a retired life mourning for his deceased parent, is expected to resume his official career before long, and this circumstance is said to have set a large number of officials intriguing lest their positions be imperilled by the return to power of this influential Minister. In addition to the well known feud between Bin Eikan and Bin Eishun, the Korean Court is divided into several antagonistic coteries all striving for ascendency in the councils of State. The strife of these factions appears to have reached a dangerous point, if we may believe reports circulating about recent occurrences. On the night of the 21st ultimo, a plot to blow up the residence of Bin Eishun was discovered, and about the same time, Bin Eitatsu was assaulted on his way from a visit to his family burial ground. The Minister of Foreign Affairs, Nan Teitetsu, is said to have tendered his resignation, the reason assigned being that he feels himself unequal to cope with the pressure brought to bear by Russia to obtain the lease of a tract of Korean land for purposes of agricultural experiment. But why such an incident should drive His Excellency Nan to the verge of desperation, we do not perceive.

* * *

Considerable excitement is said to have been caused in Sōul by reports of a rising of about or hundred of the *Togaku-to* malcontents at Hō on. They attacked a certain local grandee's residence, but were defeated and their ringleaders are now in prison. The occurrence nevertheless seems to have given a violent shock to the Sōul authorities, for at the time when the correspondence from which we are quoting was mailed, soldiers were patrolling the streets of the capital. Several Korean constables, it is said, are stationed in front of the Japanese Legation, nominally to guard the inmates against the attack of malcontents, but really to keep a watch over Koreans who may visit Japanese officials. How much of all this is trustworthy, we do not pretend to discriminate, but we may note, at any rate, that if even a small fraction of the stories told by correspondents of the vernacular press were true, Korea would be perpetually seething with sedition and intrigue.

* * *

Loud complaints are made by Japanese merchants against interference on the part of Korean local authorities in the purchase of grain, not for exportal on but for disposal in the country. Meanwhile, Mr. Otori seems to be taking steps to induce the Korean Government to revoke the Ordinance for the prohibition of the export of rice. The price of that staple is said to have fallen considerably in Sōul, and this circumstance, together with a decrease of revenue from custom duties, is believed to have had a salutary influence on the Korean Government. The Chinese Resident is also stated to be working for the abolition of the objectionable Ordinance.

THE LATEST DEVICE.

IT really seems as though there might be some grain of truth in the singular story recently published about the device contemplated by the malcontents in the House of Representatives with regard to the Hoshi Toru affair. Having failed to move Mr. Hoshi from his seat either by a vote of want of confidence based upon the froth of party jealousy and passed by the strength of prejudice, or by an Address to the Throne that was proved to mean nothing at all, they are now said to have conceived the project of falling back, in their extremity, on the 13th Article of the Law of the Houses. That Article says:—"In each House, in the event of the disability of the President, he shall be represented in his functions by the Vice-President." "The disability" here referred to signifies, of course, sickness, bereavement or some other of the causes that occasionally admit of any other interpretation. But Mr. Hoshi's enemies seek to include among "disabilities" forfeiture of the House's confidence, and are contemplating a motion to oust Mr. Hoshi from the chair and replace him by the Vice-President on the strength of Article XIII. When this incredible scheme was announced a few days ago by the *Mainichi Shimbun*, we found it totally beyond belief. But it is now gravely advocated by the *Kokumin Shimbun*, a journal said to be edited in the interests of the *Kaishin-to*. The *Kokumin Shimbun* recommends a species of baiting process. It would commence by a vote of the House declaring Mr. Hoshi disabled. Then, if he declined to regard such a vote, it would hand him over to the Disciplinary Committee for contumely. The Committee would recommend a sentence of suspension for a fortnight. If, at the expiration of that time, Mr. Hoshi remained obdurate, the whole process could be repeated again, and thus, by a series of such manœuvres, he might be kept out of the Chair until the end of the session. This is a serious programme. No one will be disposed at first to regard it as anything beyond a sorry jest. But it is serious. If the House of Representatives adopts it, the public will laugh even more heartily than it has done already, and Japanese parliamentary institutions will be brought into permanent ridicule.

MARRIAGE AND DIVORCE IN TOKYO.

THE *Official Gazette* towards the end of last month, published a table showing the total number of marriages and divorces during the month of October in the 15 urban sections of Tokyo. The table shows that the total marriages were 591 and divorces 162. On examining the respective ages of the married couples, we find that 114 males from 20 to 30 years of age married females of from 15 to 20 years; 173 males of the same age married women from 20 to 30 years old, whilst 122 males from 30 to 40 years of age took as wives women from 20 to 30. These taken together made up the total of 409, or about two-thirds of the whole. It seems, therefore, from the statistical returns, that the marriageable age of the citizens of Tokyo is from 20 to 40 years in men and from 15 to 30 in women. One striking feature of these Tokyo marriage statistics is the fact that the divorce rate in men and women from 40 to 50 years old is greater than the marriage rate. For instance, against 12 couples who married at that age, there were 17 couples divorced during the same month.

FREE EMIGRATION TO HAWAII.

MR. WAKAMOTO, of Yamaguchi Ken is now waiting at Yokohama with his family and 17 associates to be taken to Hawaii by the *City of*

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

Peking, which leaves for Honolulu at the end of this month. Mr. Wakamoto has been resident in the Hawaiian Islands for over four years, engaged in commerce, but recently leased 50 acres of land from the ex-Queen, and is contemplating a further lease of 300 acres, with the object of starting a farm. Last October he came home for the purpose of enlisting the aid of some of his fellow-countrymen and the 17 persons now returning with him have engaged to help him in his enterprise. The lease of the lands to be taken up is for thirty years: during the first three years he is to pay nothing, from the fourth year he will have to pay a tax of one and a half *yen* per acre. The agreement has been made between Mr. Wakamoto and the manager of the ex-Queen's estates, and has been certified by a notary public, and sanctioned by the Minister of State. The Japanese Consul does not, however, seem to have been a party to the transaction. It is stated by the *Mainichi Shimbun* that there are more than 54,000 acres of unreclaimed land available for similar free grants in the neighbourhood of Hilo alone.

THE STEAMER "MIOWERA"

LATEST accounts show that steamer still remains on the reef at Honolulu, and from reports in the Hawaiian papers it appears that the best appliances for releasing a ship from the position the *Miowera* occupies are not available there. Trouble has also arisen in regard to the men who have been engaged on the work, and it appears that, not having been able to get the wages due to them, they have left the job, and the contractor has had to seek the protection of the police. The Naval Court of Inquiry to investigate the circumstances of the stranding of the *Miowera* has declared its finding. As yet the document is not prepared for publication. It is learned, however, that Captain Stott is declared clear of blame for the stranding of the steamship under his command. Accordingly, the Court has returned Captain Stott his certificate. The steamer *Arawa*, has been chartered to take the place of the *Miowera* and will leave Sydney, Nov. 18th, so that only one voyage between Vancouver and Australia, as a result of the mishap to *Miowera* will missed. She is a very fine vessel, and can carry 30,000 carcases or animals, in addition to other produce, in its freezing chambers. An immediate opportunity is thus offered for a large trade in meat and dairy produce from Australia, and in salmon and other products from Canada. Her dimensions are 439 ft. 6 in. length; 46 ft. 3 in. breadth, 28 ft. 9 in. depth; 3,267 tons net and 5,026 tons gross; of 800 nominal horse-power. She is a 4-masted steamer, with three decks and eight bulkheads, and provided with two smoke-stacks. The *Arawa* was built in 1884 by the Denny Bros. of Dumbarton for the Shaw Saville & Albion Co., is furnished with electric lights and the latest improvements, and carries three classes of passengers. She holds the record from New Zealand to Plymouth of 34 days around the Cape. Capt. Stuart, R.N.R., is in command. She will be due at Honolulu, November 30th.

PROJECT OF LAW FOR THE PUNISHMENT OF PERSONS IMPEDING THE OPERATION OF THE FOREIGN TREATIES

THE following is a translation of a Bill now awaiting discussion by the House of Representatives:—

Art. I.—Any Japanese subject who, by any device whatsoever, holds land in trust for an alien, shall be liable to major imprisonment for not less than one day and not more than one year, with a fine of not less than twenty *yen* and not more than two hundred *yen*.

Any Japanese subject who holds buildings in trust for an alien outside the limits of the foreign settlements shall be liable to the same punishment as mentioned in the foregoing clause.

Art. II.—Any Japanese subject who by whatever method possesses shares of a company in trust for an alien shall be liable to major imprisonment for not less than fifteen days and not more than six months, with a fine of not less than ten *yen* and not more than a hundred *yen*.

Art. III.—Lands, buildings, and shares possessed by any Japanese subject in the manner described in the two foregoing articles shall be confiscated.

Art. IV.—Any Japanese subject who, not on his own account, but that of an alien, engages in an industrial or agricultural enterprise of business outside the limits of the foreign settlements, shall be liable to a fine of not less than fifty *yen*.

Art. V.—Any Japanese subject who leases land or a building to an alien not possessing the privilege or permission to live outside the limits of the foreign settlements, shall be liable to the punishment specified in the preceding article.

Art. VI.—Any Japanese subject who wittingly sells land, buildings, or shares, or who in any way assists in the perpetration of offences mentioned in Arts I., IV., and V., shall be liable to the punishment provided for the respective offences mentioned therein, lessened by one degree.

Art. VII.—Any Japanese subject who lodges an alien not provided with a passport for travel in the interior, shall be liable either to confinement of no less than three days and not more than ten days, or to a fine of not less than one *yen* and not more than 1.95 *yen*.

Art. VIII. Any Japanese subject who may be in process of committing the offences mentioned in Arts I., II., IV., and V., at the date of the coming into operation of the present Law, shall be allowed a period of three months from that date, during which he may take steps to conform with the provisions of the present Law.

PROJECT OF LAW FOR THE REGULATION OF FOREIGN TREATIES.

THE following is a translation of an interesting project of law now awaiting debate by the House of Representatives:—

Arts. I.—Aliens shall not enjoy any civil privileges beyond those specially granted them by treaty or by law.

Art. II.—Any Japanese subject who sells or transfers in any other way to an alien the ownership or use of lands and houses, shares of companies, the lease of mines, patents, and so forth, shall be liable to major imprisonment for not less than four months and not more than four years, with a fine of not less than a hundred *yen* and not more than a thousand *yen*. The property thus sold or transferred shall be confiscated. Any Japanese subject who allows his name to be used by a foreigner or otherwise assists in the above mentioned sale or transfer, shall be liable to punishment less severe by one or two degrees than that inflicted on the principal in the transaction.

Art. III.—Any Japanese subject who suffers his name to be used by a foreigner for purposes of business outside the limits of the foreign settlements, shall be liable to major imprisonment for less than three months and not more than three years, with a fine of not less than a hundred *yen* and not more than a thousand *yen*.

SUPPLEMENTARY RULE.

Persons who have been guilty of any of the offences enumerated in the present Law previous to the date of its coming into operation, shall be held absolved of all liability to punishment if they make confession within six months after the above mentioned date.

THE LATE DHULEEP SINGH AS A SHOT.

THE late Dhuleep Singh was one of the originators of the heavy day's shooting so much in vogue nowadays. When settled down at Elveden Hall, near Thetford in Norfolk, many years ago, he was, says a writer in the *Pall Mall Gazette*, surrounded by everything that makes life easy and pleasant. Fond of sport, he had located himself in the best sporting district of England. He set to work to ingratiate himself with his county neighbours, and in this he admirably succeeded. He welcomed them at his own house and gave them princely entertainments, and in return was pleased to accept their hospitality. Elveden eventually became nothing more nor less than a game farm. Enormous bags of pheasants were killed there, and then this extraordinary man set himself the task of killing more partridges in one day than had ever been done before. In nine days' shooting in September, 1876, to his own gun he shot 2,530 partridges. In one day he killed 780, and to do this he is reported (and it is so officially recorded in "Badminton") to have fired just 1,000 shots. Thus, if he shot for eight hours that day, he would have had to fire over two shots per minute without allowing any interval for lunch. In that same year at Elveden, four guns killed from October 10 to 13, 829, 557, 662, 483 partridges in the four days. In the year 1885, 856 partridges were bagged by only three guns. The Badminton book also relates that in September, 1885, the same three guns shot in fifteen days no fewer than 6,509 partridges. The Maharajah also distinguished himself as a grouse shot, on one occasion bagging 440 grouse in one day in Scotland.

JAPAN AND PORTUGAL.

WE quoted in a recent issue, a paragraph from the *China Mail* to the effect that H.E. Governor Borja had returned from Japan *re infecta*, and that negotiations would now be continued in Lisbon through the Japanese Minister in Europe. The impression suggested to us by this statement was that the *China Mail* merely referred to the intentions ascribed to Portugal by Governor Borja, but it would appear that some of our readers have construed the paragraph to mean that negotiations commenced here were to be continued in Lisbon with Japan's consent, she having entrusted their conduct to her Representative at the Portuguese Court. We hasten to say, therefore, that such an inference is entirely erroneous. There are no negotiations in progress, so far as Japan is concerned, and therefore her Minister in Lisbon cannot have been entrusted with any duty of the kind.

THE MOST VENERABLE MEMBER IN THE LOWER HOUSE

MR. ABEI HANKON, according to the News Agency, continues to be painfully perturbed about the Hoshi Toru business. The oldest member in the House of Representatives has already acquired historical notoriety. His name will go down to posterity as the proposer of the most irresponsible and least defensible measure ever discussed by an assembly of legislators or passed by a giddy majority. Yet he is not content. He wants to be even more conspicuous. We learn that he adheres obstinately to his resolve to resign his seat if Mr. Hoshi Toru resumes his. Moreover, there are one or two other members prepared to follow Mr. Abei's lead. It is to be sincerely desired that no one will baulk their purpose. Let them go by all means, these men who have been chiefly concerned in bringing ridicule on the Japanese Diet. Shame should induce them to resign any how.

THE PEERS AND THE ADDRESS TO THE THRONE ON OFFICIAL DISCIPLINE.

A STRONG effort is being made by the Opposition in the House of Peers to follow the example of the Representatives, and present an Address to the Throne on the subject of official discipline. If the promoters of this measure succeed in their project, they will at least have the satisfaction of demonstrating that the Peers are prepared to take their cue from the Commons. That will be an achievement, especially when the purpose of the united action is to inform the Sovereign that really his faithful Peers and Representatives entertain a very poor opinion of His Majesty's competence to choose his Ministers or to appreciate their disgraceful behaviour when they are chosen.

THE ADDRESS TO THE THRONE ON OFFICIAL DISCIPLINE.

IT was rumoured that the Cabinet intended to present a joint memorial to the Sovereign by way of reply to the Address submitted by the Lower House on the subject of official discipline. But if intelligence published by the *Fiji Shimpo* be trustworthy, the Cabinet has not taken such a step. Indeed, our readers may remember that when news of the intention was first made public, we expressed doubts whether the Ministers of the Crown would find it consistent with their dignity to take conspicuous notice of an indictment so vague and sentimental as that formulated by the House of Representatives. The *Fiji's* information is to the effect that, so soon as the Address reached His Majesty, the Minister President made a communication to the Sovereign declaring that he was unable to discover any evedence of the disorderly behaviour attributed to officials, but that the fact of His Majesty's being troubled about the matter constituted cause of deep regret. Count Goto

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

also presented to the Emperor a written statement, averring that while he found nothing to repent of in his own conduct as a Minister of State, he could not but be painfully sensible of the misfortune that had made him individually a source of trouble to the Sovereign. The *Jiji* adds that when Count Goto carried this representation to the Emperor, he was accompanied by Count Kuroda, and that the two statesmen spoke to the Sovereign at considerable length about the charges preferred against Count Goto. What kind of notice, if any, the Emperor will take of the Address, no one has yet ventured to conjecture.

POLITICAL AMENITIES IN FUKUSHIMA PREFECTURE

THE partisans of the *Kokumin Kyokai* in Miharu-machi, Fukushima Prefecture, reports the News Agency, invited Mr. Oi Kentaro and his friends of the *Dai-Nippon Kyokai* to deliver political lectures on the 8th instant. The subject of the lectures is not stated in the Agency's account, but we may fairly assume that the speakers devoted themselves to anti-mixed-residence theme, together with disquisitions about the importance of enforcing the strict letter of the Treaties. The chief opponents of all that kind of blundering patriotism at present are the *Jiyu-to*. Their followers in Miharu-machi are said to have contemplated a violent inruption of the lecturing, but for some unexplained reason they abandoned that part of their programme and contented themselves with an irruption of two or three *soshi* into the inn of Mr. Oi when he had returned thither. It would be rather quaint if Mr. Oi Kentaro were to fall an easy victim to any violence at the hands of *soshi*, considering that he himself has always been recognised as a leader of those gentry and that he is usually accompanied by a strong following of them. On the other hand, there is a kind of retributive justice in the fact that he encounters such embarrassments, for certainly if any one deserves to suffer from *soshi* lawlessness it is the man who has been eminently instrumental—unless common report greatly belies him—in bringing these pestilent youths into vogue. Mr. Oi's *soshi*, however, were too much for the Miharu-machi intruders. Two of the latter were seized and handed over to the police, a result so unsatisfactory to the comrades of the impounded men that three or four hundred of them made a raid upon the police station, bombarded it with stones, smashed the windows, and gave the inmates a very hot ten minutes. In a very brief time the guardians of the law mustered in force. Seven of the would be rescuers were arrested and sent to share the incarceration of the youths whom they had thought to deliver from durance.

IMPORTED COTTON.

THE *Kokkai Shimbun* maintains that the opponents of the proposed free admission of foreign raw cotton have a great deal of justice in their contention that this measure will be highly injurious to the prosperity of the country. The advocates of foreign-grown cotton have always pleaded that the superior firmness of its fibre and its consequent greater adaptibility for making yarns, together with its relative cheapness, make it more desirable than any cotton of native growth. But recent experiments made in Settsu and Kawachi point to a different conclusion. American cotton has been grown there at a cost not exceeding three *yen* per ton, whilst the yield amounts to about twenty-two *yen* per ton. Indigenous cotton costs about 7 *yen* per ton for manuring and irrigation, so that in this point alone there is a very considerable gain to be got from the cultivation of foreign cotton. If the 80,000 *cho* of cotton plantations in Japan were planted with the American varieties, there would be a yield of about 15,000,000 *yen*, after deducting the costs of cultivation. Last year about 12,700,000 *yen* worth of cotton was imported, about 11,000,000 *yen* of which represented cotton already ginned. The existing plantations would therefore almost be sufficient for the present demand, and more land would doubtless be brought into cultivation so soon as the profitableness of cotton-growing was demonstrated. Should, however, the duty on foreign cotton be removed the native cotton-growers would be practically driven out of their own market, and a valuable native industry would receive its deathblow. If the Treasury is so rich that it can afford to remit any duties, would it not be better, argues the *Kokkai*, to devote a portion of its surplus to the encouragement of cotton growing at home?

THE BUDGET COMMITTEE.

THE various sections of the Budget Committee are said to have finished their labours and prepared to present their reports to the Chairman of the Committee without further delay. The Committee will therefore hold a general meeting to-morrow to consider the reports and prepare its own statement for the House. It is alleged that the programme submitted by the Committee to the House will be virtually the same as that submitted last year. The most marked difference between the Government's Budget and the Committee's recommendations will be in respect of official salaries. There the Committee would reduce in accordance with the table published in one of our recent issues. We do not imagine that there is the smallest prospect of the Government's agreeing to any such sweeping and extravagant reductions. Hence the old deadlock will arise, and how an exit is to be found for it this session we fail to perceive. Some impediment must be placed in the path of the House's headlong retrenchments. The ten per cent. already taken off official salaries for purposes of military equipment should be more than sufficient to satisfy the most radical reformer. If is, of course, more than probable that some few officials still receive higher salaries than the functions they discharge entitle them to. But, on the whole the pay of Japanese officials seems to be very moderate, and in not a few cases it is certainly too small either to procure efficient men or to prevent corruption. There could be no policy more hurtful to the best interests of the State or less economical than to cut down the emoluments of office until only the most mediocre persons will consent to receive them.

THE TROUBLE BETWEEN NO. 64, KOBE, AND THE JAPANESE FANCY WARE DEALERS UNION.

THE *Jiyu* informs us that as the foreign firm has intimated to the Fancy Ware Dealers Union that it is ready to consider any proposals the Union may make to it, the Union have resolved that the boycott which has been for some time in force against the firm shall be removed. The officers of the Union are now drawing up draft rules for the regulation of transactions between the firm and the Union. Our contemporary summarizes these rules as follows:—

1.—The foreign merchants are requested to show more consideration and straightforwardness in their dealings with Japanese merchants

2.—When goods sold by contract are received by foreign merchants, their inspection should be completed within five days from the day of delivery, and the goods should be paid for not later than the following day

3.—The price of samples shown should be paid under all circumstances.

4.—When goods are received by foreign firms, the seal of the firm should be affixed to the books of the Japanese merchants as a proof that the goods have been duly received.

We hear, says the same authority, that Mr. Mitchell, of Messrs. Samuel Samuel and Co., Yokohama, was expected to go down to Kobe on the 26th ult., to confer with Mr. Bardens of the Kobe branch of the firm on the question of the boycotting of the firm by the Japanese Fancy Ware Dealers. Previous to the departure of Mr. Mitchell for Kobe, Mr. Goto Katsuzu, who is to act as arbitrator, was to come up to Tokyo and call upon Mr. Mitchell in Yokohama for the purpose of submitting to him the proposals of the Japanese merchants. It is expected that the trouble will be settled ere long.

AGITATION AGAINST THE PROPOSED FREE ADMISSION OF IMPORTED RAW COTTON.

A MEETING of the opponents of this measure, which seems to have the support of the majority of both houses of the Diet, was held in the Hall of the Society of Agriculture, Akasaka, Tokyo, on the evening of the 2nd inst. The following members of the Diet were present:—Baron Katoi, Messrs. Tomita Ginnosuke, Tanaka Yoshio, Fujimura Shiro, and Nango Shigemitsu from the Upper House; and Messrs. Abei Iwane, Komuchi Tomotsune, Ishihara Hanyemon, Nagai Matsuyemon, Hashimoto Zenyemon, Watanabe Yoshizo, and Mizuochi Kan, from the Lower House. There were also present Messrs. Oshima, Inouye Jintaro, Hida Rōichi, Yokoi Jikei, and, from the Department of Agriculture and Commerce, Messrs. Oshikawa, Sawano, and Tamari. Mr. Oshima, of the *Niroku Shimbun*, told the meeting that the proposals shortly to be laid before the Diet made it advisable for all those who were opposed to the free admission of foreign cotton to bestir themselves. Hitherto they had always been conscious of one weak point in their contention. It had been a matter of doubt whether foreign cotton would thrive on Japanese soil. But he was glad to say that this doubt was now set at rest. It had been abundantly proved that the exotic varieties of cotton did well in this country. Mr. Oshikawa, and others then gave details of successful experiments in cotton growing which had recently been made in various parts of Japan, after which Mr. Oshima reminded the meeting that as this Bill would probably come before the House during its present session, though it might be postponed to the next, it would be advisable to form an association of persons interested in the subject, and to rouse public opinion against the measure. This suggestion meeting with unanimous approbation, Mr. Oshima and one other were appointed to draw up a scheme for the projected association, and were requested to summon another meeting so soon as their draft scheme should be ready for discussion. After a few words from Mr. Komuchi on the Import duties on cotton, the meeting was brought to a close.

MR. HOSHI TORU.

MR HOSHI TORU'S term of suspension expires to-day, and his intention, so far as we can ascertain, is to take his seat once more in the Presidential chair. His re-appearance there will be the signal for another urgency motion, but as to its purport we have no information, unless, indeed there be some truth in the extraordinary reports recently circulated to the effect that the President's persecutors contemplate an attempt to flagrantly and openly pervert the meaning of Art. XIII. of the Law of the Houses. We find it impossible to believe anything of that kind, though truly it is difficult to set any limit to the extravagance of which the majority in the House seem capable at present. As for Mr. Hoshi, rumour attributes to him the intention of addressing the House to-day, so soon as he resumes his seat, on the subject of the vote of want of confidence. If he does so, his speech will be of great public interest.

* * *

In our opinion the simplest course for Mr. Hoshi and his supporters to follow would be to go on with the business of the House irrespective of the malcontents, supposing that the latter decide to adjourn rather than sit under a President that they dislike. One-third of the total number of members in the House constitutes a quorum. In other words, so long as a hundred members are present, the work of legislation can go on. In the first division when the vote of want of confidence was passed, Mr. Hoshi had 119 supporters. Since then the majority against him appears to have being gradually diminishing. Why should not he and his 119 occupy the Chamber and go on debating and legislating just as though the 144 recalcitrants had no existence?

FIRES IN YOKOHAMA.

A VERY destructive fire broke out in the Japanese portion of Yokohama about half-past six o'clock on Monday evening. The conflagration started in an out-house attached to the residence of Mr. Tamura Toyokichi, at No. 37, Umegaye-cho, and fanned by a strong breeze quickly spread. In a few minutes most of the houses in the block were ablaze and the reflection cast upon the sky was intensely lurid. The

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

native fire brigades and police were quickly on the scene, and every endeavour was made to stay the progress of the flames. The block, however, was doomed to destruction, and attention had to be directed to the houses on the opposite sides of the street, upon whose roofs huge showers of sparks and fragments of burning wood were falling. By half past seven o'clock all danger was over, but 24 houses had been completely destroyed and eleven others very much damaged. Fortunately no loss of life occurred. The cause of the outbreak is yet unknown Another fire broke out at Hachiman-yato about ten o'clock, but the efforts of a large body of firemen prevented it from doing much damage, the fire being confined to the house in which it originated.

KEROSENE CARGOES.

THE following vessels were loading on Nov. 4, or to load, at New York:—British ship *Queen Victoria* (Hongkong or Japan) 65,000 cases; British bark *Semantha* (Hongkong, Japan, or Shanghai), 90,000 cases; British ship *Wray Castle* (Hongkong, Japan, or Shanghai) 70,000 cases; German ship *Henrietta* (Japan), 70,000 cases; British ship *Clan Robertson* (Hongkong or Japan) 60,000 cases; British ship *Glencora* (Hongkong or Japan) 90,000 cases; British ship *Ardrosa* (Hongkong or Japan), 80,000 cases; British ship *Matterhorn* (Hongkong or Japan) 70,000 cases; British bark *Silberhorn* (Hongkong or Japan) 75,000 cases; British ship *Bahama* (Hongkong or Japan) 95,000 cases; British ship *Siren* (Japan), 60,000 cases; British ship *Columba* (Hongkong or Japan), 70,000 cases; British ship *Benjamin Lee* (Hongkong or Japan) 70,000 cases; British ship *Glenclova* (Hongkong or Japan), 90,000 cases; British bark *Muskoka* (Hongkong, Japan, or Shanghai) 90,000 cases; British ship *Crofton Hall* (Hongkong or Japan) 80,000 cases.

THE MIHARU MACHI AFFAIR.

FULLER particulars now published indicate that the Miharu-machi affair was more serious than the first reports indicated The *soshi* who created the disturbance had obtained re-inforcements from the band of itinerant actors who find the histrionic stage more profitable than the political, but who nevertheless seem prepared to resume their old rôle on the latter whenever occasion offers. Having obtained a considerable amount of success in interrupting the speeches delivered by Mr. Oi Kentaro and his friends, the *soshi* conceived and carried out the idea of intimidating all the *jinrikisha* men of the little town, so that the political lecturers and their associates, unable to procure any vehicles, had to proceed on foot from the place of meeting to the *réunion* subsequently organized. We have already related how, after that, three or four more adventurous spirits forced their way into Mr. Oi's inn and and behaved so rudely that two of them were seized and handed over to the police. Thereafter followed the seizure of the police station by about 300 *soshi*. The constables, being in very small force, could not do more than defend the entrances to the station and await the arrival of re-inforcements from Fukushima, whither a telegram had been forwarded. Nightfall brought an increase of numbers to the beseigers, they being joined by idlers from the town who found something piquant in the idea of beleaguering a police office. The mob did not confine its attentions to the Police Station: the Tax Collectors' office and some private houses in the immediate vicinity were also considerably damaged. As the hours passed, the beseiging force dwindled considerably, but those that remained kept up a very spirited din and display of violence. Towards dawn, a small body of constables—nine in number—arrived from Fukushima, and being quickly followed by some judges and public procurators, they assumed the aggressive and arrested seven of the ringleaders, the rest dispersing incontinently.

AMERICA AND HAWAII.

SECRETARY GRESHAM'S Report to the President of the United States, seems to establish beyond question a fact previously suspected, namely, that the Hawaiian revolution by which Queen Lil.uokalani was dethroned, owed its temporary success chiefly, if not entirely, to the display of military force which Mr. Stevens, United States Representative in Honolulu, was persuaded by the revolutionists to authorize. The declaration addressed by the Queen to the Provisional Government would alone constitute a strong piece of evidence. Her Majesty wrote:

"I, Liliuokalani, by the grace of God and under the Constitution of the Hawaiian Kingdom, Queen, do hereby solemnly protest against any and all acts done against myself and the constitutional government of the Hawaiian Kingdom by certain persons claiming to have established a provisional government of and for this Kingdom, that I yielded to the superior force of the United States of America, whose Minister Plenipotentiary, his Excellency John L. Stevens, has caused United States troops to be landed at Honolulu and declared that he would support the provisional government. Now, to avoid any collision of armed forces and perhaps the loss of life I do, under this protest and impelled by said force, yield my authority until such time as the Government of the United States shall, upon the facts being presented to it, undo the actions of its representative and reinstate me and the authority which I claim as the constitutional sovereign of the Hawaiian Islands"

But even in the absence of any such testimony as this document affords, the verdict of Secretary Gresham is conclusive:—

The earnest appeals to the American Minister for military protection by the officers of the provisional government after it had been recognized show the utter absurdity of the claim that it was established by a successful revolution of the people of the islands The appeals were a confession by the men who made them of their weakness and timidity Courageous men, conscious of their strength and the justice of their cause, do not thus act

It is not now claimed a majority of the people having the right to vote under the constitution of 1887 ever favoured the existing authority or annexation to this or any other country. They earnestly desire that the government of their choice shall be restored and its independence respected

Mr. Blount states that while at Honolulu he did not meet a single annexationist who expressed willingness to submit the question to a vote of the people, nor did he talk with one on that subject who did not insist that if the islands were annexed suffrage should be so restricted as to give complete control to foreigners or whites, and representative annexationists have repeatedly made similar statements to the undersigned

The Government of Hawaii surrendered its authority under a threat of war, until such time only as the Government of the United States, upon the facts being presented to it, should reinstate the constitutional sovereign, and the provisional government was created to "exist until terms of union with the United States of America have been negotiated and agreed upon."

A careful consideration of the facts will, I think, convince you that the treaty which was withdrawn from the Senate for further consideration should not be resubmitted for its action thereon

Should not the great wrong done to a feeble but independent State by an abuse of the authority of the United States be undone by restoring the legitimate government? Anything short of that will not, I respectfully submit, satisfy the demands of justice Can the United States consistently insist that other nations shall respect the independence of Hawaii while not respecting it itself? Our Government was the first to recognize the independence of the islands, and it should be the last to acquire sovereignty over them by force and fraud.

There cannot be any doubt about the course that the United States Government will adopt in view of this Report. America has happily been able hitherto to shape her foreign policy in accordance with the dictates of right and justice. She is not likely to make any departure from her wholesome habit in Hawaii's case.

THE MIYE LOCAL ASSEMBLY.

THOUGH it is quite the fashion for Prefectural Assemblies to appeal against their Governors to the Home Office, the Miye Assembly seems to have especially distinguished itself in this way. It is alleged that the Governor of that Prefecture has been grossly neglectful of his duties in the way in which he managed the repairs undertaken by Government after the inundations of last summer. Contrary to the general custom, he informed the contractor as to the amount that the Government was willing to pay, gave him a contract for that amount, 16,000 *yen*, and allowed him to make a handsome profit of 8,000 *yen* out of the job. To these charges the Governor has replied, that he was not aware of the amount of profit made by the contractor, and that it was not a matter of prime importance. The important thing in a case of emergency like this, when the lives of over 6,000 people were in peril, was to have the work done speedily and satisfactory. The delay which would have been caused by advertising for tenders and securing the lowest offer, might have cost the country far more than the present contractor's profit. He was convinced that he had acted rightly and that he could not have done otherwise. We are informed that a good number of members withdrew from the Assembly Hall during the Governor's speech. It was therefore in a somewhat thin House that one of the discontented members moved a vote of censure on the Governor for having departed from the customary procedure in awarding the contract. The motion was carried by a slender majority of 26 to 24; and a petition embodying it has been duly forwarded to the Minister for Home Affairs. It remains yet to be seen what the Home Office will do in the matter.

THE PRESS AND TUESDAY'S SESSION OF THE LOWER HOUSE.

IT goes without saying that the extravgaant motion passed in Tuesday's session of the House of Representatives for handing over Mr. Hoshi to the Disciplinary Committee, is warmly approved by the party organs in the capital, with the exception of the *Jiyu Shimbun*. Unfortunately Mr. Hoshi's conduct on that occasion was not free, as we have already pointed out, from errors which, though by no means justifying or even excusing the extreme course adopted against him, give his enemies a good opportunity to indulge their passion for ridicule and malicious comment. This phase of the affair is, therefore, made the most of by the organs of the Progressionists, the National Unionists, and the *Domei* Club. The independent section of the metropolitan press is unanimous in its condemnation of the extravagant conduct of the Lower House.

* * *

The *Jiyu Shimbun* justly complains of such a flagrant perversion of the power of disciplinary punishment for purposes of political revenge. The resumption of the Presidential chair by Mr. Hoshi on the 12th instant, so far from being an indictable offence, was a duty which the President was bound to discharge. With reference to the vote of want of confidence on which his enemies required him to act, the Radical organ observes that the vote, as acknowledged by themselves, had no binding force upon him, and that his refusal to resign in obedience to the unlawful dictation of the House could never constitute a proper ground for placing him in the hands of the Disciplinary Committee. Our contemporary admits that Mr. Hoshi's ruling to allow a debate on Mr. Takata's motion, as well as his declaration that the motion had not been brought within the prescribed limits of three days, were erroneous. Had he persisted in these false positions to the last, there might have been some ground for the resolution moved by Mr. Ooka. But in point of fact, Mr. Hoshi did not persist in his errors, and the House would have acted more manfully and justly had it refrained from giving its easy assent to Mr. Ooka's proposal.

* * *

The *Nippon* expresses surprise at the ignorance and perversity of the House of Representatives. It severely condemns the House for having sacrificed the interests of the country on the altar of private political passion. With Mr. Hoshi personally, our contemporary expresses no sympathy. But it holds that the House can never be pardoned for disgracing itself by conduct such as it was guilty of on Tuesday last.

* * *

The *Nichi Nichi Shimbun* observes that the sentence of suspension which the House recently pronounced upon Mr. Hoshi, justifies the inference that it simultaneously acquiesced in his refusal to resign, for suspension and a demand for resignation are in their nature incompatible with each other. Therefore Mr. Hoshi only did what was proper and unavoidable when he resumed his chair on the expiration of the period of suspension. It would be, says the *Nichi Nichi* in conclusion, too disgraceful to the members of the Lower House to suppose, as some people are inclined to do, that their object in taking these extravagant measures against Mr. Hoshi was to provoke him into some act of rashness such as might furnish a fair pretext for resorting to the

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

last measure of punishment, namely, expulsion from the House.

* * *

The *Jiji Shimpo* is one of the staunchest friends of Mr. Hoshi. It remarks that the ultimate object of his persecutors is to weaken the position of the Cabinet. The Address to the Throne on the subject of official discipline is tantamount to a vote of want of confidence in the Ministry. The opponents of the Cabinet think that the practical force of their Address will be seriously affected by the manner in which the House of Representatives disposes of the Hoshi question. So soon as that question has been settled, they will directly turn upon the Government and endeavour to pull it down.

EXHIBITION OF BROMIDE PICTURES.

THE exhibition of bromide pictures now being held at No. 28, Main Street, is well worth a visit, not only on account of the object in view—the promotion of a prize fund for the boys of the Victoria Public School—but also for the high degree of artistic excellence which the majority attain. They are, for the most part, enlargments by Mr. Tamamura of small negatives obtained by Mr. Otis A. Poole with a hand camera. The yachting pictures are extremely good, and equally interesting are the views taken in different parts of the New Road, and which comprise a field of iris, rice-fields, and bits of the paths by the side of the Bluff. A very pretty picture is that of the stretch of water near Dzushi. Among the collection is also a very fine life-size reproduction of a photograph of Dr. Wheeler, in which the soft tones of the bromide process are seen to great advantage. The exhibition will remain open for several days, and we strongly advise a visit.

M.M. STEAMER AGROUND.

WRITING on November 21st., the *Singapore Free Press* says:—News was received in Singapore yesterday afternoon, after we had gone to press, that the M.M. steamer *Godavery*, plying between here and Batavia, had run aground at Pulau Sauw in the Rhio Straits. She was sighted about one o'clock by a small vessel, the *Emily*, which runs between here and Rhio, a little to the north of the port of Rhio and about 28 miles from Singapore, and the chief officer of the *Godavery* coming off in a long-boat boarded the *Emily* and was brought on to Singapore. It appears that the *Godavery* ran on to a sandbank during a heavy rain squall, when the engines were going slowly, but no damage seems to have been sustained by the vessel which is expected to float off during the day. Tugs have been sent off to her assistance, and M. Brasier de Thuy, the mail agent, went off this morning to see after the passengers and mails, who are expected to arrive per the tugboat *Bangkok* this afternoon

NAVAL NEWS.

THE U.S.S. *Monocacy* is going up to Hankow in a few days. The French gunboat *Comète* has left Shanghai for Hankow. The *Caroline* left Shanghai on the 7th inst., for target practice and a visit to Ningpo, and was to return within a week. The *Porpoise* left Chinkiang on the 8th inst. for Shanghai. The *Daphne* having reached Hankow, the *Redpole* was expected at Shanghai on the 9th. She will shortly leave that port for Hongkong

* * *

While H.M.S. *Caroline* was on her way out of the Shanghai river for target practice, on 7th inst., she collided with the *Tungsha* lightvessel and carried away the latter's bowsprit. The *Feiho* was sent out to the damaged vessel.

POLITICAL GOSSIP.

COUNT YAMAGATA'S expected return to the capital in obedience to an Imperial message, has given rise to various rumours. He was to have arrived in Tokyo ere this, but it is now stated that, owing to sickness, his return will be delayed a few days more. At present he is staying at Otsu. As to the anticipated consequences of his return to the capital, some people believe that he will be offered the portfolio of Agriculture and Commerce, which, they take it for granted, will be resigned sooner or later by Count Goto. Others opine that he will be requested to use his endeavours for inducing Count Goto to resign. According to these persons, it is believed that, when the newspapers began to make comments on the subject of official discipline, the Minister of Agriculture and Commerce asked the Premier whether it was necessary for him to resign. Count Ito, we are told, answered in the negative, and now finds himself in an awkward situation, because his former assurance precludes him from insisting on the resignation of the Minister of Agriculture and Commerce Hence, say they, the necessity of calling in the aid of the President of the Privy Council! The most absurd of the stories is that Count Yamagata's return will lead to the formation of a Military Cabinet composed in the following manner:—

Count Yamagata—Minister President of State, and Minister of State for Foreign Affairs;

Viscount Shinagawa—Minister of State for Home Affairs;

Mr. Yasuba Yasukazu—Minister of State for Agriculture and Commerce;

Viscount Kabayama—Minister of State for the Navy;

Viscount Takashima—Minister of State for War;

Mr. Nakai Hiromu—Minister of State for Education;

Count Matsukata Minister of State for Finance;

Viscount Tanaka (Kōken)—Minister of State for Communications;

Count Kuroda—President of the Privy Council.

A candidate for the portfolio of Communications is still wanting. This rumour is published in the *Jiyu Shimbun*. According to our information there is not the slightest foundation for such a story. The Radical organ may perhaps have had some party purpose to serve in giving publicity to it. Indeed we should not have reproduced the above list of an imaginary Cabinet, had it not been for the fact that the names mentioned show what sort of men are popular in Military circles. According to the *Nichi Nichi Shimbun*, an authority not to be ignored on any subject of this nature, Count Yamagata's expected return has no direct political connection. The simple explanation is that the Emperor has instructed him to be at his post at a busy political time like the present.

THE PROGRESSIONISTS.

THE Progressionists, about 140 in all, held a réunion on the 11th instant at the Kinkikan, Kanda, Tokyo. They adopted two resolutions; namely, that during the present session of the Diet a deputation should be sent to the Capital from every City and Prefecture with a view to the adoption of united and energetic action by the party; and that, during the New Year's recess of the Diet, lecturers should be despatched to provincial districts. When the assembly sat down to a social repast, Mr. Ozaki Yukio is said to have delivered a speech on the subject of the *Chishima* case. No detailed report of what he said has been published, but the *Mainichi Shimbun* would have us believe that he made a powerful appeal to the patriotism and loyalty of the audience, from which it is not difficult to infer that he did not fail to dwell on the question of the use of the Emperor's name both in the Consular Court at Yokohama and the Supreme Court at Shanghai. The Progressionists are determined to make the most of this subject in their desperate opposition to the Government. In response to the unanimous request of the assembly, Mr. Shimada is also said to have spoken on some important current topic which is not clearly mentioned. Speeches were made by several other members of the party. Twenty-two localities were represented at the meeting.

CIGARETTE MAKERS AND THE TOBACCO TAX REGULATIONS.

A RECENT amendment in the Tobacco Tax Regulations has, according to the *Jiji Shimpo*, caused great distress in the cigarette manufacturing industry, an industry which employs several thousands of persons of both sexes in the capital alone. By this amendment, which came into force on the 19th of October last, it was provided that no tobacco should be left in the charge of any mechanic engaged in the cigarette manufacture. As by far the greater part of the cigarette makers' work at home, and only visit their employers' offices for the purpose of delivering the manufactured cigarettes and getting fresh supplies of tobacco and paper, the result of this amendment was that over 10,000 women and girls in Tokyo were thrown out of work. The cigarette manufacturers, and notably Mr. Iwaya Matsuhei, have taken the matter up, and have secured the interest of the Governor of Tokyo on their behalf. It is needless to say that the Financial authorities had no intention of injuring so important an industry: the object of the amendment being simply to secure the revenue against loss arising from the illegal sale of untaxed tobacco. The Finance Department has therefore consented to postpone the operation of the obnoxious amendment till April next; so that the cigarette manufacturers have several months before them during which to agitate for better terms.

NAMIKAWA'S FUJISAN.

"THE TRIBUNE" has published a glowing enconium, written by Mr. Gustavus Goward, on Namikawa's enamel plaque, shown at the Chicago Exposition. Reading Mr. Goward's praises, we are vividly reminded of the conditions in which fancy waistcoats have their *raison d'être*. Our own secret opinion of the great plaque was that a more unlovely and less commendable object had never been produced at such an expenditure of labour and material. We have seen a representation of Fujiyama's peak in many coloured enamels on a dagger haft from the atelier of the old time artist Hirata. It was curious. On the same plane one would have been disposed to place many other grotesque misapplications of technical skill. But Hirata's enamelled Fujiyama had at least the merit of being frankly unreal. It did not aspire to be anything more than a quaint bit of enamelling. Mr. Namikawa's Fujisan, on the contrary, pretends to be a picture, in the sense that an oil or a water colour is a picture. It is hard, under any circumstances, to believe in the art that takes cloisonnéss enamels as a medium for re-producing sea-scapes, land-scapes, and other displays of nature. But when there is question of reproducing, in a hard, solid-coloured substance like enamel, not only mountain peaks that owe their tints to distance, but even the tender, inexpressively soft cloud effects that add so much to their charm, we can not think that the artist treads a true groove. Besides, the Chicago plaque was eminently unsuccessful. It fell far, very far, short of its maker's and designer's ideal. Had it come from any other atelier, there would have been little chance, we think, of its finding a place in the Japanese fine arts section. Why, however, *The Tribune* lithographed it, and why Mr. Commissioner Goward sings its praises journalistically, we are at a loss to comprehend.

PANORAMA OF MATSUSHIMA

PROFESSOR W. K. BURTON and Mr. Ogawa, to whom we are indebted for so many beautiful albums illustrating Japanese scenery and costumes, have issued another very pretty work in the form of a coloured panorama of the celebrated Matsushima Archipelago, one of the loveliest spots in Japan. The panorama is divided into five sheets folding into an album of convenient size, and clear directions are given as to the manner of bending the sheets so as to obtain a panoramic view of the exquisite seascape. It is an ingenious idea, most successfully carried out. The little album ought to become a favourite.

ASSAULT ON MR. SHIMADA.

THE *Mainichi Shimbun* gives details of an assault which was committed on Mr. Shimada Saburo, the distinguished *Kaishin-to* M.P., by some roughs, while that gentleman was leaving the Kinkikan Hall, Kanda, Tokyo, shortly after eight o'clock last night. A number of Progressionists had been holding a social entertainment at this place. Mr. Shimada, who received two or three cuts upon his face, was

Digitized by Google
Original from JN VERSITY OF ILLINOIS AT JRBANA CHAMPAIGN

immediately conveyed back to the Hall, and medical assistance was promptly procured. He was able to return home shortly afterwards. The wounds, happily, are not very deep.

PERTINACITY.

THE members of the Opposition in the Lower House are said to be growing very impatient about the success or rather the failure of their Address to the Throne on the subject of official discipline. More than a week has passed since the Address was presented, yet Count Goto and Mr. Saito remain in office and the Emperor remains silent. Under these circumstances the agitators are drafting questions to elicit the Government's views, and are further planning a motion to abstain from discussing the portion of the Budget that refers to the Department of Agriculture and Commerce. Evidently these gentlemen still labour under the impression that it rests with them to dictate to the Sovereign what officials shall continue in office and what officials shall be removed. If that were possible it is plain that the House of Representatives might pull down a Cabinet piecemeal with the greatest ease imaginable. Nothing would be necessary except to present an Address to the Throne accusing the Ministers, one at a time or even two or three together, of any offences that might suggest themselves to men coveting their places. The House has shown that it experiences no difficulty whatever in constructing offences out of any shreds of rumour that may be blown about by winds of political passion. The impugned Ministers would then have to resign incontinently and the principle of Party Cabinets would be established at once. The other device attributed to the Opposition might not be less effective and would have the added charm of still greater illegality. By simply declining to grant any money, whether in the shape of "already fixed expenditures," or of outlays controllable by the Diet for the uses of a Department presided over by an obnoxious Minister, the House might effectually control the Emperor's choice of advisers. But these are fancies. The Opposition may build castles in the air, but a resolute touch of the Government's hand will soon pull the pretty edifices into ruins.

THE HOUSE OF REPRESENTATIVES AND THE GOVERNMENT

So soon as the House of Representatives had voted for the expulsion of Mr. Hoshi Toru, it caused the following notice to be addressed to the Government:—

> This House, in accordance with the 93rd Article of the Law of the Houses, has decided on the expulsion of Hoshi Toru. Inasmuch as Hoshi Toru held the office of President, the Government is requested to report the fact to the Throne.

The House of Representatives is evidently a little uncertain of itself. Under ordinary circumstances there would, of course, be no manner of reason to report to the Government any of the acts of the House. But since Mr. Hoshi Toru held the Emperor's commission as President, the sentence of expulsion pronounced against him is tantamount to depriving him of his semi-official position without reference to the power that nominated him. The House appears to think that this difficulty can be negotiated by simply reporting the fact to the Government for the information of the Sovereign. In criticising these proceedings, we have always to remember that Japanese Constitutional legislators are like men groping in the dark. Conceive for a moment how hopelessly perplexed our own legislators would be were they suddenly deprived of the library of precedents in which a chapter can be found to suit every imaginable text. The Japanese have no such guides. They are required to make precedents for themselves, and it would be a little unreasonable to expect that the kind of men now sitting in the Lower House are thoroughly competent for such work. Mistakes they cannot hope to avoid, and they have made so many lately that perhaps a brief respite may now be looked for. This particular question of Mr. Hoshi's persecution has a dual aspect. While on the one hand the House has an indisputable right to expel the member, Hoshi Toru, it has no manner of right to pull down the President Hoshi Toru of its own authority. Yet the former act necessarily involves the latter. Probably we shall hear nothing more of the dilemma, but it is not the first of its kind that Japan's juvenile legislators will have to resolve.

DOMESTIC AND FINE ART PORCELAINS.

AN incidental illustration of the want of adaptability shown by the Japanese in suiting their art industries to the foreign markets, upon which they have now chiefly to rely, is furnished in the newspaper comments evoked by the Columbian Exhibition. Japanese Keramists sent to the great fair a number of specimens of unquestionable beauty and technical excellence. Their display evoked no little praise. Indeed so enthusiastic are the accounts published of Japan's exhibits by American journals that we scarcely recognise the origin of the much belauded porcelains. One journal writes, for example:—"There are to-day in Chicago three of the finest private collections of Japanese porcelains in the United States. They are not large collections, but contain so many valuable specimens that they have been a source of pleasure to connoisseurs even from the Orient. These collections of porcelains have been much enriched by additions to them from the beautiful exhibits that were exposed in Jackson Park. The one-colour pieces in powder blue, tea colour, green, lavender in globe-shaped vase and gallipots, that are to remain here, are surpass ugly beautiful." Assuredly had we been asked to name the varieties of Japanese modern ware most deserving of mention in connection with the Chicago Exposition, it would not have occurred to us to speak of monochromes. Happily the same thing conveys different ideas to different minds. Japan many congratulate herself on the impression she has produced. However, it is not this general verdict we desire to speak of, but the following criticism:—"The useful china of Japan is inferior to that of any other country both in design and glaze. The Japanese are such clever artists that they will return home with new thoughts of table china, and before many years there will be found in European and American markets a table China worthy to be called Japanese porcelain." It is evident that the author of this criticism, when he speaks of "useful China," means useful from a Western point of view, that is to say, means that dessert services, breakfast and dinner sets, and such things, suited for European or American households, are difficult to obtain in Japanese porcelain. In that sense his comment admits of no question. The Japanese have indeed managed to produce tea and coffee cups of beauty and good form, but, strange to say, they are lamentably backward in the matter of other table utensils such as are likely to please Western taste and serve Western purposes. At all their domestic exhibitions one looks in vain for any evidence of progress in that direction. Even a cream-ewer or a teapot for foreign use seems to be beyond their capacity as modellers. They produce the most execrable shapes, so that not uncommonly one sees a tea set the cups and saucers of which are in every respect desirable while the other vessels are detestable. Yet it ought to have dawned upon Japanese potters ere this that their great hope of large custom abroad depends upon producing wares suited for every-day use rather than upon catering for decorators or connoisseurs. The demand for art china must always be comparatively small, but the demand for porcelains that can be employed for every-day purposes is practically unlimited. What adds to the curiosity of the Japanese Keramists' want of perception in this matter, is that in former times they devoted themselves almost exclusively to manufacturing domestic porcelain and faience. That fact, indeed, is one of the chief difficulties standing in the way of a collector. For one piece that he finds designed to appeal purely to artistic or decorative instincts, a thousand are met with that can never be made to seem other than what they are, namely, plates, dishes, cups, bowls, bottles, and so forth, intended to serve the purposes of eating and drinking, not to stand in a show-case or furnish an over-mantel. The Japanese, in short, have always recognised in their own case that the main end of porcelain and pottery is to satisfy the wants of the household and the table, but they are singularly slow to give practical effect to the same theory when they have to cater for foreign demand.

CHEAP NEWSPAPERS IN THE STREETS OF TOKYO.

WONDER is often expressed, says the *Fiji*, at the low price for which papers can sometimes be bought in the streets of the metropolis. This may partly be accounted for by the excessive discount allowed by some of the dailies to their itinerant agents. But the remarkable point is that newspapers like the *Fiji*, which do not give so liberal a discount, are sold at a curiously low figure. Simultaneously with the appearance of the newspaper under cost price the *Fiji Shimpo* office has been receiving many complaints from its subscribers about the non-delivery or irregular delivery of the paper. Most of the complaints have come from the thickly populated districts of Kanda, Nihonbashi, and Kyobashi, where the paper is delivered at a very early hour whilst the inmates are still asleep. The *Fiji* has discovered that there is a set of thieves who follow the messengers at a respectful distance and fish the newspapers out of the letter-boxes. If the owners of houses would improve the construction of their letter-boxes, they would get their newspapers regularly, and the newspaper under cost price would disappear from the streets of the metropolis.

THE IMPERIAL FISHERY COMPANY.

AN extraordinary general meeting of the shareholders of the Teikoku Suisan Kaisha was held at the Koseikan, Kobiki-cho, on the afternoon of the 6th instant, Mr. Nakayama, a director of the Company, being in the chair. The Chairman regretted to inform the meeting of the resignation of Mr. Murata Tamotsu, President of the Company, also of Mr. Murayama Chotaro, one of the directors. He also stated that it was advisable for the present not to attempt to increase the capital of the Company to 750,000 *yen*, as decided upon at the last meeting; and he was glad to announce a grant from the Government of 3,600 *yen*, for the expenses of experimental sea-otter fishing off the northern coast of Awa. Certain amendments in the bye-laws of the Company were then introduced and approved of, after which the Chairman announced that a compromise had been effected whereby the original remuneration offered to Mr. Ito Kazutaka, the Company's technical officer, had been commuted for a sum of 4,000 *yen* in cash. Mr. Kano, auditor, reported that in consequence mainly of the heavy initial expenses of the Company, the capital had been decreased by about 60,000; and that in the event of Government registration the Company would do well to bear this in mind. Mr. Ito Kazutaka was then elected as a Director, on the motion of Mr. Kato. The same gentleman was subsequently appointed President of the Company by a unanimous vote of his brother directors. It is said that the Department of Agriculture and Commerce have made the following stipulations with the Company with regard to their grant:—

1. Experimental sea-otter fishing is to be undertaken under the direction of the Fisheries Institute.
2. The Government allowance shall not exceed 3,600 *yen*, and shall be paid by instalments as thought most convenient.
3. The results of the experimental fishing shall be communicated to the Fisheries Institute as soon as ascertained.
4. The books of the Company, so far as they concern the expenditure of the Government allowance, shall at all times be accessible to the officers of the Fisheries Institute.

NATIONAL BANKS AND REGISTRATION.

THE Registration Authorities of the Department of Justice have lately begun to urge National Banks to prefix the words "joint stock" in accordance with the provisions of the Commercial Codes, and also to undergo the process of registration in the proper Courts of law. To this the National Banks have replied that as they are

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

subject to special Regulations, there is no need for them to conform to the provisions of the Commercial Codes. As neither the Department nor the Banks would make any concession, the Minister of Finance attempted to mediate between thm with a view to effecting a compromise The Department of Justice, however, was resolved to make the Banks conform to the provisions of the Code. The well-meant endeavours of the Minister of Finance to settle the matter by compromise were consequently unsuccessful, and he had no alternative but to persuade the Banks to comply with the demand of the Shihosho. The Managers of the Banks subsequently held a special meeting on the evening of the 2nd inst. in the Clearing Hall, Sakamoto-cho, to discuss the proper steps to be taken, and as a result of their deliberations passed the following resolutions:—

(1)—We cannot conform to the provisions of the Commercial Code.

(2)—We are not absolutely opposed to registration in the Courts of law, but are decidedly against designating ourselves "joint stock companies."

(3.—We will watch the procedure of the Nippon Ginko, which is subject to special regulations, and will then determine what course to pursue with respect to the demand made by the Department of Justice.

On the 4th inst., the managers of the Bank of Japan held a long deliberation at which it was decided that though the designation "joint stock company" could not be adopted, the Bank would nevertheless comply with the demand of the Department of Justice in the matter of registration. The rest of the Banks have now followed the example of the Bank of Japan, and it is rumoured on good authority, says the *Shogyo Shimpo*, that all the National Banks will shortly apply for registration to the Courts under whose jurisdiction they come.

COUNT ITO AT A MEETING OF THE BUDGET COMMITTEE.

In reply to questions asked by Mr. Haseba Junko at a meeting of the Budget Committee of the Lower House, held on the 13th instant, the Minister President of State spoke as follows:—

The questions just raised by Mr. Haseba cover a wide range of subjects. But I understand that in the first place, with reference to the reforms effected in obedience to the Imperial Rescript issued towards the close of the last session of the Diet, he criticises them on the ground that they are concerned more with the form than with the spirit of the Administration. The second point raised by him relates to the defences of the country, and on this subject he seems to be glad that there is now more unity of purpose between the Army and the Navy. Thirdly, I take him to be dissatisfied with the qualifications of the present Minister of State for the Navy. Fourthly and lastly, he refers to the subject of official interference in elections. I will briefly answer each of the points in succession. After a sharp collision in the last session of the Diet, the Government and the Diet, in obedience to the Imperial Rescript already alluded to, were able to arrive at harmonious cöoperation. On the issue of that Rescript, the House of Representatives elected a Committee of nine members to ascertain the views of the Government with regard to the manner in which the latter intended to carry out the Imperial commands. All the members of the Committee are not present here at this moment, but Mr. Haseba was one of them, and so, too, was Mr Ishida, the Chairman of the present Budget Committee. These gentlemen and possibly some others now present, who may have been members of the Committee, will remember my positive declaration that, in carrying out reforms, I should direct my attention to the reduction of expenses, but that no reduction would be made in the salaries of officials You also know that since the issue of the memorable Rescript, official salaries have been practically reduced, and that the money thus economized is being appropriated for the construction of war-vessels. It is all very well to say that reforms must reach the spirit of the administration, or be fundamental, but it should be borne in mind that in political matters practical results ought to be the first and principal consideration. Reforms may be directed to the spirit of a system, but in the case of the Budget, unless they produce practical consequences upon the Expenditure they are of no use. It is my firm conviction that a constitutional Government must be before all things economical, avoiding all superfluous outlay and employing the public money for useful purposes. There are limits, however, and degrees in all things. I should like to know how far you propose to carry out the so called fundamental reforms. According to the comments of the press, fundamental reforms seem to consist in the demolition of clan Government. If that be the case, I decline to undertake such a task, neither am I allowed by my official duties to adopt such a measure. What is the position of the Ministers of State under the present *régime*? They are appointed and dismissed at the pleasure of the Sovereign, and it is not necessary for me to observe that their clan connections are no qualifications for their posts. If you mean to contend that no reforms effected by persons belonging to the most powerful of the former clans can be radical and fundamental, you ought not to have asked us to accomplish such reforms. For our own part, it had been our desire from the outset to effect administrative reforms, and as we perceived that there was some room for economy, allusion was made to that circumstance in the speech which I dictated just previous to the accident that befel me at the commencement of the last session of the Diet, and which the Acting Minister President of State was instructed to read in the House of Representatives The responsibility to carry out our original object was rendered still more imperative by the subsequent issue of the Imperial Rescript already referred to, and we have endeavoured to do all in our power. But I sincerely hope that you will bear this fact in your minds, that the conduct of administrative business requires a certain system of State machinery which is essentially the same in all countries. I am compelled to think that no statesman, however adroit he may be, can ever effect reforms in disregard of what is actually required for efficiency of the machinery of State: reforms carried out on such abnormal lines could never be permanent. Considering the official establishment with regard to the present condition of the country and the actual requirements of the administration, and also bearing in view the effect which the general progress of society and the development of private enterprises cannot fail to exercise upon the amount of business devolving upon the administration, we are firmly convinced that the present constitution of the administrative machinery is suited to the present state of things. On this point, perhaps, you may differ from us. Outsiders may naturally think such and such things ought to have been done in some other manner, but those in responsible positions are not allowed even for a moment to disregard their responsibility, and in discharging that responsibility, it is not permitted them to rely upon the advice of outsiders—they must form their judgment in consideration of the actual requirements of the time. It is in this way that we have carried out reforms in the administration. You may be dissatisfied with those reforms; that cannot be helped. We only wish it to be understood that the reforms have been undertaken with due consideration of the actual requirements of the Administration, and with due regard to the importance of giving them a fundamental character. With respect to the defence of the country, though refusing to express entire satisfaction with what has been done in this field, Mr. Haseba has been good enough to say that he is rejoiced to notice more unity of purpose between the Army and the Navy. He could not have said otherwise. I am paying particular attention to the question of national defence. Those disposed to hostile criticism say that the national loan of 17 million *yen* raised in 1886 has been used for no good purpose, and that nothing has come out of that amount of money. Such persons should remember that, had it not been for the loan, most of the powerful war-vessels now floating on the waters round our country would not have been built at all The sums spent for the establishment of Naval Depôts at Kure and Sasebo do not constitute even one-third of the above-mentioned amount. I need not here invite you to discuss the propriety of the manner in which the loan of 1886 has been spent; I will only ask you to remember that the greater part of the 17 million *yen* has been converted into powerful men of war. About the same time want of funds threatened to necessitate the closing of the arsenal at Osaka. Nothing could be more regrettable than that an arsenal with a staff of experienced specialists should be suffered to lie idle. Nevertheless, the Government's endeavours to avert such an undesirable result were not wholly successful, as the money available for the purpose did not suffice. Thereupon we considered it desirable to appeal to the patriotism of the people, a measure for which the Government was severely criticised at the time by the newspaper press. But the Government's motives in adopting this course will be clear if you peruse the Imperial Rescript issued on the occasion. The money contributed by patriotic Japanese amounted to more than two-and-a-half million *yen*, which, together with a sum contributed from the Imperial family, was spent for the construction of 212 pieces of ordnance. Thus I believe that I have made every possible effort to complete the defence of the country. As to the military policy of the Government, to which Mr. Haseba alluded, I am deterred from entering into minute particulars through fear of violating military secrets. But I may safely allude to the general aspects of the situation The insular position of our country exposes it on all sides to hostile attack. There would be almost insuperable difficulties in defending it against a combined attack by a large number of Powers. At present, therefore, the equipment of our Navy is governed by the contingency of possible operations against one or two particular Powers. A great change has been introduced in the method of organizing fleets. Formerly a fleet consisted of a large number of vessels, as many as fifty or sixty, but now attention is directed to concentration of strength and increased speed. In elaborating plans for the Navy, financial considerations should never be lost sight of. Another important point is the selection of arms in accordance with the particular purposes for which they are to be used. Investigations on this subject have already led to some practical results. As to the policy to be pursued in the defence of the country, the mode of defence must always be studied by the Military and Naval authorities, but it is not possible to adhere at all times to one and the same policy The policy pursued must necessarily differ according to the varying strength of the enemies that may have to be encountered. These matters are now under serious consideration in the General Staff Office, and must be left to the care of the special authorities concerned. At all events, you will agree with me in thinking that the defence of the coast and the increase of the Navy are questions of the most vital importance to the Empire. If you desire further information on these subjects, it will be freely supplied to you by the authorities concerned, in so far as is consistent with due military reticence. Mr. Haseba is discontented with the manner of settling the question of official interference in elections. Perhaps he takes Kagoshima as the basis of his complaints. As to the state of affairs in Kagoshima, I have heard much from other members of the Diet belonging to the locality, and I may tell you that the Government is about to deal with the matter in a proper manner. But at a time like the present when party strife is intense, it is impossible to give satisfaction to one party without offending others; all can never be satisfied simultaneously. The Government does not harbour either ill will or special good will towards any of the political parties, and as a result its position is isolated. You are doubtless aware that the Government does not rely upon the support of any Party. Our principal aim being to lay foundations for the permanent continuance of Constitutional Government, we are not biassed towards any of the Parties, but simply endeavour to conduct administrative affairs justly and impartially. There are rumours that the Government is moving hand in hand with the Radical Party; that the National Unionists are, therefore, indignant and so forth. But the Government does not think it possible in the present state of things to carry out the Constitution in cöoperation with any particular political Party. We therefore only strive to be fair and impartial towards all Parties alike. It is, let me repeat, our earnest wish that a sound basis may be laid for the everlasting existence of the Constitution. I am not, however, averse to criticisms of our conduct on your part, for they serve to stimulate perpetual improvement and progress. As to the Minister of State for the Navy, it is not perhaps necessary for me to reply to Mr. Haseba's question, for the appointment of all officials belongs to the exclusive prerogative of the Emperor. I may, however, state my conviction that the present Minister of State for the Navy is well fitted for the post, though on this point I apprehend my views may not be shared by Mr. Haseba. Little more than ten years having elapsed since the creation of our Navy. It is not free, doubtless, from imperfections, but I can assure you that it is far ahead of those of some other countries. I may also state that the reforms in the Navy have been carried out by the present Minister of State for that Department. In conclusion, I wish to say a word on the question of the Budget as a whole. I must tell you that, if you proceed, as you have done thus far, in pursuance of your present plan of reductions, the Government will have positively to refuse its approval to the reductions you propose. I will not here enter into any discussion of the questions about official salaries and the cost of some important undertakings, for these topics have been already dealt with when announcing the policy of the Government. The Government has no intention of disregarding its promise, but I wish you to

remember that, if you amend the Budget in accordance with your present scheme, the Government will never give its consent to your reductions

THE SIXTY-TWO "CHISHIMA" FAMILIES.

If Judge Mowat's decision, delivered on Wednesday, be sound law—a question which, of course, it would be premature to raise until the possibility of appeal no longer exists—the law of England is, in some respects, most unfortunate. Sidney Smith is credited with having said of the British Law Courts, "They sell the best of justice there, but sell it very dear." His comment is forcibly illustrated by the present case. Sixty-two families of men who lost their lives by the sinking of the *Chishima Kan* consider that they have a claim for compensation. Probably they are all families in poor circumstances; indeed, we may take that for granted. Hence, by combination, and by combination only, could they scrape together money sufficient to pay the cost of a civil suit instituted in a British Court. Moreover, there is one question and one question only at issue, namely, which of the two colliding ships was responsible for the accident. If ever there was a case where the ends of justice and expediency would seem to be best served by combining the actions of the 62 families and trying them all together, this surely is such a case. But Judge Mowat has decided that British law does not permit such procedure, and that the individual claimants must each bring an independent suit on his or her own account. There are 116 individuals, so that the result of the decision may be very easily stated. A hundred and sixteen separate trials will have to be brought before 116 separate juries, to try a hundred and sixteen times the question of the collision and the liability therefor. If that be British law, it is a very farcical and senseless law. Practically it deprives the plaintiffs altogether of access to a legal remedy, for even if they could scrape together money to bring separate suits, they certainly could not find means to answer the appeals which would assuredly be made were the Peninsular and Oriental Company beaten in the first instance. We can scarcely conceive a grosser hardship upon 62 families consisting of 116 members who have already lost their means of support in whole or in part. If such inexplicable obstacles bar the way to justice in our Courts, we can scarcely wonder that the Japanese often murmur against our legal system.

THE YOKOHAMA LITERARY SOCIETY.

A very entertaining evening was spent by the members of the Yokohama Literary Society and their friends at the usual fortnightly meeting on Friday. Prof. Burton, of the Imperial University of Tokyo, gave a lecture on the modern practice of photography, with demonstrations and lantern exhibition. The evening's programme commenced with Keler Bela's pretty "Lustspiel," nicely executed by Miss Young and Miss Moss. Mr. S. L. Goldman followed with "Mona," and then Prof. Burton was introduced. In an amusing introduction he explained that he had promised to give the lecture many months ago, while in a weak and absent-minded mood. Then he had forgotten the affair, and was only reminded of his promise when the other day a letter had reached him from their President preremptorily demanding the title of his subject. To confess the truth, he had no title and no subject, at any rate not anything which could by any means be called a literary lecture; all he intended to do was to crave their kind attention for a few spare minutes while he explained some of the methods of modern photography. The address would be neither literary nor scientific, and he beseeched all those who were in any way acquainted with photography to leave the room. He also warned his hearers that whatever success attended the experiments would be due to Messrs. Kajima, Tamamura, Nakajima, Ando, and Honda, who had most generously responded to his appeal for help, while if the thing were a failure he wished the audience to lay all the blame upon himself—after which modest introduction, Prof. Burton proceeded with his experiments, accompanying them all with a lucid explanation in the simplest terms. First of all a flash light photograph was taken of the audience. This was developed by Messrs. Kajima and Nakajima and later in the evening thrown upon the screen, one of the neatest and quickest pieces of photographic work ever done in this country. It was an excellent plate, and its producers well merited the hearty applause which they received. A negative was developed into a positive, and then printed upon a bromide enlargement; a negative was also developed before the whole assembly, and the processes and chemical actions of the various salts explained. After a recess, Miss Wheeler gave a beautiful nocturne of Chopin's, while Miss Rice and Mrs. Campbell gave a sweet rendering of "The Magic Lantern," a duet. A collection of slides from negatives taken by Mr. Kajima, was then exhibited. Many lovely views of the Matsushima archipelago were thrown upon the screen, together with other famous views, street-scenes and bits of ordinary every-day life, together with some amusing plates which the Professor called "abuses of the wide-angle lens." A hearty vote of thanks to the lecturer was carried by acclamation at the close

INTERNATIONAL MARRIAGES.

Here is an item that will interest some of our readers. We take it from a Chicago journal:—"The love affairs of the Midway continue to culminate at Marriage License Clerk Salmonson's window. This morning two handsome Japanese stepped up and in cultured English asked for permits to bind themselves for life to a couple of Egyptian damsels. The men gave their names as Ton Magi, aged 25 years, and Samud Watanabe, aged 27 years. The former will wed Juanita Chorba, a 19-year-old beauty. The other bride-elect is a winsome woman of 21 years, named Cora Ragab. Both men were well attired in nea. European costumes and spoke fluent English. They were intelligent and well educated. Magi, who was spokesman, said:—"We will all settle in Chicago and go into business. I cannot state what our plans are. We will be married this afternoon by a Methodist minister on the west side. How did we fall in love? Oh, we met at the Fair. Oh, just the same old story. Good day."

LOSS OF THE "CARL FREIDRICH."

The latest details of the loss of the German ship *Carl Friedrich* (Captain Frohlich), 1,980 tons, is to be following effect:—The vessel left New York on the 11th June last, with a cargo consisting of 74,246 cases of kerosene for Messrs. Reuter, Brockelmann & Co., all the which had been sold 'to arrive.' The *Carl Friedrich* passed Anjer on the 9th of October, and some anxiety was being felt for her safety. On December 2nd Messrs. Melchers & Co. of Hongkong received the following telegram from Singapore:—'*Carl Friedrich* total loss: send ship's letters here.' On the 4th inst the following telegram was received by Messrs. Reuter, Brockelmann:—'Crew abandoned *Carl Friedrich* Borneo Coast.'

THE AMERICA CUP CONTEST.

Lord Dunraven and Lord Lonsdale, says the *Madras Mail*, intend to build a yacht in concert specially designed to compete for next year's America Cup. This yacht will probably be conveyed across the Atlantic on one of the great liners. For it has been found that certain qualities which are indispensable to a craft that has to commence by making the ocean voyage to New York, as was the case with the *Valkyrie*, militate against its fitness as a competitor for the America Cup. We hope Englishmen will persevere till they bring back the Cup to England.

WOOSUNG BAR

It will be learnt with great satisfaction, says the *N.-C. Daily News*, that Mr. N. J. Hannen, H.M.'s Consul-General, whose services the Chamber of Commerce invoked in the matter, has succeeded in persuading the Taotai to pay his promised half of the estimated expense of getting Sir Charles Hartley to come and report on the Woosung Bar, and that the Taotai has already placed in Mr. Hannen's hands for this purpose the sum of three thousand taels, promising to pay a similar sum on the arrival here of the distinguished engineer.

ANOTHER KEROSENE SHIP LOST.

News has been received by wire at Shanghai of the total loss of the German ship *Carl Friedrich*, which left New York on the 12th of June with a cargo of kerosene oil for Hongkong. She was a vessel of 2,208 tons, says out Shanghai morning contemporary, formerly the *Red Cloud*, built at Quincy Pt., Mass., in 1877. Her cargo was insured in the London Assurance Corporation for $45,000 gold.

ROUGH WEATHER.

The *Tsukushi Maru* arrived at Shanghai on the afternoon of Dec. 9th, from Kuchinotsu. While going across, a huge sea came over the bows and washed five of the sailors, including the Japanese boatswain, against the fore winch. The boatswain was so badly injured that he died five hours after the accident, but the other men have been able to resume work. The body of the dead man was taken to Shanghai for burial.

DEPLORABLE STEAMSHIP FATALITY.

To-day's *Official Gazette* prints a telegram from Hiroshima which says that a steamer, belonging to Mr. Amagasaki Isaburo, of Osaka, struck a hidden rock in the Tada-no-umi, Toyota District, Hiroshima Prefecture, on the 10th inst. at 10.40 a.m., and sank almost immediately. More than ten passengers, out of seventy or eighty, were drowned.

TWO SENDO SUFFOCATED.

The *Yomiuri Shimbun* says that two Japanese *sendo* were suffocated by charcoal fumes during the night of the 8th inst. They had fallen asleep under a *futon*, in which a charcoal brazier was placed, while their boat was lying near the Sangoku Bridge, Yokohama.

CONCERT IN TOKYO.

A concert, for which a capital programme has been issued, will be given on Sunday next, 17th inst., by the pupils of the Academy of Music, at the Hall in Uyeno Park, Tokyo. The concert will commence at half past one, and the interesting programme of a dozen numbers includes five choral pieces.

COUNTESS TODA'S RECEPTION DAY.

We are requested to state, with reference to the list of reception days published in a recent issue, that although, as there stated, it is the intention of Countess Toda to receive every Friday, she will unfortunately be unable to do so during the current month, the death of an uncle having necessitated a period of mourning.

FIRES IN TOKYO.

About two o'clock on the morning of the 10th inst. a destructive fire broke out at Honminato-cho, Kyobashi, Tokyo, and seventy houses were destroyed, twenty-four others being partly damaged. Nearly twenty houses were burnt at Asakusa during the previous night.

THE U.S. ADMIRAL

Admiral Skerrett, who has taken over the command of the U.S. Asiatic Squadron, from Admiral Irwin, arrived with his family from Honolulu on the *China*. His flag was saluted as he boarded the *Lancaster* on Saturday afternoon.

SERIOUS SCALDING ACCIDENT.

On the afternoon of the 29th ult., by the bursting of a steam-pipe on board the *Kwong Hoi* at Canton three men were severely scalded. Two Chinese were taken to the Civil Hospital, Hongkong, but the second engineer, Mr. Spinks, was taken to his own home.

FIRE ON THE "STRATHDON."

The fire on board the British steamer *Strathdon*, from Yokohama via Batavia, for New York, has been extinguished. Her decks and sides from the foremast aft to the engine room are badly damaged, and the cargo in No. 2 hold is destroyed.

MR. HOSHI AND THE HOUSE OF REPRESENTATIVES.

TUESDAY'S session of the House of Representatives had been looked forward to with more than usual interest and impatience by the public since it was known that Mr. HOSHI intended to resume his seat, and also that his enemies would again bring in a motion of some kind to preclude him from the discharge of the Presidential functions. The general excitement was so great, that fully an hour before the usual opening of the daily session, the Strangers' galleries were already crowded with eager-looking visitors. As for the body of the House, by a little after one o'clock all the seats, with very few exceptions, were occupied by members, whose earnest looks, taken in conjunction with the ominous silence that pervaded the whole place, indicated general expectation of some exceptionally important event. At a few minutes past one o'clock the door behind the Presidential seat swung back, and Mr. HOSHI entered, calm and dignified as usual. Every eye was fixed upon him, and so admirable was his mien under the trying circumstances of his situation, that a low murmur of admiration rose from the whole audience friends and enemies alike. Mr. HOSHI did not make any speech, as had been expected by some persons. Taking the Chair, he simply announced to the House that on receiving news of the regrettable assault upon Mr. SHIMADA SABURO the preceding night, he had caused enquiries to be made, in the name of the House, about Mr. SHIMADA'S condition, and that he was happy to be able to report that the injury suffered was not serious. Needless to say that during these preliminaries the notorious Mr. TANAKA SHOZO was boiling with impatience. Ere long, he lost all control of himself, and as the President was making the above mentioned announcement something resembling howls began to be heard from the eminent Progressionist's seat. At first, nobody could extract sense from this clamour, but finally it appeared that Mr TANAKA, with much force of gesture and violence of articulation, was denouncing Mr. SHIMADA'S cowardly assailants in terms that referred their action to Mr. HOSHI'S instigation. This characteristic incident was treated with contempt by the President, and the Order of the Day was about to be proceeded with when Mr. TAKATA SANAYE, editor of the *Yomiuri Shimbun* and one of the most promising members of the Progressionist Party, rose and asked the House's permission to introduce an urgency motion for handing over Mr HOSHI to the Disciplinary Committee a second time. In order to discuss this motion, it was necessary to ask the Cabinet's consent to a change of the Order of the Day, inasmuch as the first Bills on the Order were Government measures. Only a minute or two were required for the purpose, the request being made by the telephone. The Government declined to grant permission for the proposed change, and the House had to proceed with the Order of the Day. But so soon as the three Government Bills had been disposed of—and they were rushed through with evident haste and impatience in less than one hour—Mr. TAKATA'S motion was again formally introduced. Thereafter ensued a tumultuous scene which lasted for an hour and a half. The substance of the motion was that Mr. HOSHI, by resuming the Presidential chair in defiance of the House's vote of want of confidence, had insulted the House and should be handed over to the Disciplinary Committee. In explanation of the motion, Mr. TAKATA observed that the one week's suspension, which expired the preceding day, had been meted out to Mr HOSHI on account of objectionable expressions he uttered from his seat on the 29th ultimo, and that his persistent defiance of the well expressed wish of the House for his resignation constituted another and separate ground for disciplinary measures. It had been known that the Progressionists contemplated the straining of Art. XIII. of the Law of the Houses so as to prevent Mr. HOSHI resuming his Presidential seat for the rest of the present session, but that the National Unionists, being firm in their refusal to support such an obvious violation of law, the plan had had to be abandoned. Thus, not until late on Monday night, had the Progressionists, the National Unionists, and the members of the *Domei* Club agreed upon the measure which the House has now asked to adopt. Great excitement evidently prevailed. Mr. TATEKAWA UMPEI and Mr INOUYE KAKUGORO put some pertinent and perplexing questions. They asked, among other things, why the motion had not been introduced when Mr. HOSHI occupied the Chair on the 29th and 30th ultimo. But Mr. TAKATA, strong in the feeling of numerical support, treated these queries with scant concern. It was generally anticipated that Mr. HOSHI would surrender the chair to the Vice-President, as he done on the previous occasion when a question about himself came up for discussion But, to the surprise of the House, he retained his seat and attempted by various devices to obstruct the passage of the motion. Sincerely sympathizing with him as we do, and admiring the remarkable *sang-froid* and presence of mind he displayed on this trying occasion, we are obliged to say that the methods he resorted to for the purpose of embarrassing his persecutors were not altogether dignified or politic. The second clause of Art. XCV., of the Law of the Houses provides that "when a case for disciplinary punishment occurs, the President shall, in the first place, instruct the Committee [Disciplinary] to enquire into the matter and shall pronounce sentence after having submitted the case to the consideration of the House." But Mr. HOSHI declared that, before instructing the Committee to enquire into the matter, the House ought to debate whether the action complained of really constituted a case for disciplinary punishment. In other words, he proposed that the House should perform the very functions which the Disciplinary Committee is constituted to discharge. The procedure in such cases is made still more clear by a provision in the Standing Orders of the House of Representatives, where it is laid down that, when a motion for disciplinary punishment is introduced in accordance with Art. XCVI., of the Law of the Houses, a decision whether the case be intrusted to the Committee or not should be taken without any debate. When, therefore, Mr. HOSHI announced the course he proposed to adopt, the House quickly fanned itself into a white heat of indignation, and vehement protests were raised on all sides. Mr. OOKA IKUZO, of the National Unionist Party, then introduced a separate motion that the President be handed over to the Disciplinary Committee for having attempted to violate the obvious provisions of the Law of the Houses, and the Standing Orders of the House of Representatives. The motion was received with loud cries of approval, but Mr. HOSHI pronounced it out of order on the ground that the act complained of related to interpretation of the Regulations governing the House, and that, so far as such interpretation was concerned, the House did not possess competence to exercise disciplinary authority over the President. The House apparently acquiesced in the justice of the President's ruling, for the motion introduced by Mr. OOKA was not immediately pressed. But vehement protests against Mr. HOSHI'S course with regard to Mr. TAKATA'S motion grow louder and more numerous. Here, Mr. HOSHI fell into another error. He declared his intention to reject Mr. TAKATA'S motion altogether, saying that it had not been introduced within three days after the commission of the act complained of. Evidently his mind must have been directed to something not under consideration, for the act complained of had taken place that very day. The excitement now because so intense, that Mr. INOUYE KAKUGORO advised the President to order some of the most tumultuous members to leave the Chamber. This counsel was not followed, and Mr. HOSHI finally abandoning his position, proceeded to take the House's sense as to the propriety of allowing debate before entrusting the matter to the Disciplinary Committee. Not a member, not even his warmest supporters, stood up in favour of such a plainly illegal course. He then put the question whether the matter be entrusted to the Committee; and a large majority

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

voted in the affirmative. Having been thus duly placed once more in the hands of the Disciplinary Committee, Mr. HOSHI surrendered the Chair to the Vice-President, and thereupon Mr. OOKA again introduced his motion to punish the President for having illegally attempted to prevent the passage Mr. TAKATA'S motion. The Vice-President took the sense of the House without debate, and it goes without saying that the motion passed by a large majority. Thus the Disciplinary Committee is to consider two separate indictments. That it will decide against Mr. HOSHI is a foregone conclusion, but there is uncertainty as to the kind of punishment it will recommend. The probability is that Mr. HOSHI will once more be suspended from attending the House for a period The apparent purpose of his enemies is to pursue the same course whenever he resumes the chair, thus altogether preventing him from discharging his duties during the rest of the session.

THE LAST ACT OF THE HOSHI TORU DRAMA.

THE House of Representatives yesterday crowned the edifice of injustice and prejudice to the building of which its time had recently been devoted with so much diligence. It expelled Mr. HOSHI TORU. A year ago it raised him with acclaim to the highest honour it could bestow. Yesterday it declared that he was not fit even to be a member: not fit to sit in legislative conclave with Messrs. TANAKA SHOZO and SHIMIZU BUNJIRO! It has long been understood that the fond hope of Mr. HOSHI'S enemies was to compass his expulsion from the House. They did everything in their power to push their fellow-members to that extraordinary excess. But it was not supposed that they could succeed. The law requires that expulsion must be voted for by more than two-thirds of the members present at the time of the introduction of the motion. Few persons imagined that such a majority could be persuaded to perpetrate such a wrong. But it is evidently impossible to forecast the acts of Japanese politicians in these times of passion. What took place yesterday in the House is not public. The debate was conducted with closed doors. But it is known that the Disciplinary Committee was by no means unanimous in recommending Mr HOSHI'S expulsion On the contrary, only nine voted for expulsion, six opposing it. But when the question came before the House, political sentiment over-rode everything. There was a debate, indeed. This at least may be said in palliation of the wretched affair, that some semblance of deliberation was preserved. Two hundred and seventy-seven members were present, and on an open ballot being taken, 185 cast their votes for expulsion and 92 against it. Arithmetically speaking, two-thirds of 277 is 184⅔. Hence the vote of 185 just, and just only, satisfied the terms of the law, "a majority vote of more than two-thirds." But we greatly doubt whether the spirit of the law was satisfied. No such thing as a fraction of a vote being possible, it is evident that anything less than 185 does not amount to two-thirds of 277, and anything less than 186 can not be called "more than two-thirds." However, such petty considerations need not concern us in view of the great fact that 185 members out of 277 were found to vote in such a sense. For it must be remembered always that the only offence charged against Mr. HOSHI at this final stage of his persecution, was his refusal to resign the Presidential chair. For that, and for that only, he was handed over to the Disciplinary Committee, and for that alone he was expelled. At no time previously had there been any question of conduct unfitting him for membership of the House. Even when the original indictment was preferred against him, the line openly taken by his assailants was that he should be invited to resign the Presidency. Had he done so, there can not be the smallest doubt that all proceedings against him would have ended then and there, and that he would be sitting safely in his place as a member to-day. But he declined to bow to a verdict based upon accusations so vague and supported by testimony so unsubstantial that the impartial section of the public could only laugh. For that refusal he has been expelled from the House. Not his conduct as member but his conduct as President, has brought this sweeping sentence upon him. Yet he is the EMPEROR'S nominee. The House, before passion carried it wholly beyond the control of reason, recognised fully that in the event of Mr. HOSHI'S refusing to bow to its judgment, no resource remained but to ask the EMPEROR to remove him. Now, however, it has proceeded against him as though the SOVEREIGN never had any share whatever in his appointment. Mr. HOSHI held his position as President under the EMPEROR'S commission. No power was competent to remove him except the SOVEREIGN. The House of Representatives, by expelling him because he refused to accept his *congé* at its hands, has distinctly violated the Imperial Prerogative, and has emphatically shown how very slender is its real sense of respect for the SOVEREIGN whom it professes to hold in such reverence. No legislative assembly of thinking men could have written up a worse record against themselves than the Japanese House of Representatives has now compiled. The difficulty of the situation is easily appreciated. Every one will admit that from the moment of passing a vote of want of confidence in Mr. HOSHI, the House could not consent to sit under him as President. But failing his consent to resign, only one proper course was possible, namely, appeal to the EMPEROR. To expel him for refusing at the House's bidding to surrender an office to which the SOVEREIGN had nominated him, was to perpetrate an act of injustice towards him and of disrespect towards the EMPEROR.

THE OUTSIDE OF THE CUP AND PLATTER.

COULD the present Japanese House of Representatives see itself as others see it, the impression conveyed would not be very flattering. A majority of the members devoted themselves for weeks, with persistence that closely resembled vindictive rancour, to the persecution of their President. They were determined to drive him from his seat, although they have not a single substantial charge to prefer against him. It is true that he associated with some of the leading merchants of his country, was not ashamed to be their guest, and even dined and wined them in return. European and American Ministers of the Crown see nothing derogatory in such proceedings, and would be laughed to scorn if they attempted to set themselves above the most important class in the nation. But that is neither here nor there: Japan has her own standards, or rather the very punctilious gentlemen now entrusted with the duty of legislating for her, are resolved to set up special standards. They are for the most part merchants and farmers themselves, these sticklers for parliamentary *hauteur*, and among merchants and farmers they do not by any means occupy such respected places as the men with whom they denounce their President for associating. But that, too, is neither here nor there. They are quite entitled to their own estimate of the magnificence of being members of the Diet. It is also true that their President did what every Japanese, almost without exception, does continually and thinks no shame in doing—frequented tea-houses and drank *saké*, in company with degraded merchants so lacking moral decency that they actually execute orders for the State. The members of the House also go to tea-houses, dispose pleasantly of their due allowance of mulled wine, and enjoy, without blushing, the ministrations of pretty dancing girls. But that is neither here nor there. What the members do their President must not do. He is a species of divinity bound to sit on a pedestal of proud isolation, abstaining from everything that smacks of common or garden life. Having, therefore, neglected to hold himself at an ideal height about the world in which he lives and moves, he must be pulled down, trampled upon, and disgraced in the most signal manner. All that is certainly very quaint and very novel. It savours agreeably of the stage, where actors often simulate dignity and converse in heroics with pretty skill and well assumed conviction. If the Japanese House of Repre-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

sentatives really set itself in sober earnest to live up to a divine standard, the public might smile but would have no right to sneer. But when the House of Representatives, while clamouring so vehemently about its dignity and resorting to such extreme measures with the object of showing how much it respects itself, at the same time allows its debates to be flagrantly disgraced, and takes not the smallest notice of conduct on the part of its members that would bring contempt on a meeting of school-boys, we begin to think that the whole thing is a farce, and that dignity and self-respect are not, after all, objects of such keen concern to the Lower House of the Japanese Diet. This criticism, though it does not by any means apply to one day's proceedings only, has special reference to the occurrences of last Tuesday. During and immediately preceding the debate—if a long wrangle may be designated by such a term—that took place on the subject of Mr. HOSHI TORU'S resumption of the Presidential chair, Mr. TANAKA SHOZO, the notorious *Kaishin-to* member, made use of four expressions, any one of which would have sufficed to evoke the severest censure in any other parliamentary assembly in the world. In the first place, he accused Mr. HOSHI TORU, almost in so many words, of having instigated the assault of which Mr. SHIMADA SABURO was the victim. In the second he called Mr. HOSHI a "horse," which is an offensive way of saying "fool." In the third, he shouted out that Mr. HOSHI was "the Government's dog, a beast." And in the fourth he addressed to the President an expression too filthy and obscene to be quoted here. Not one of these outrages evoked the slightest protest or comment from any member. Billingsgate and obscenity such as even publicans or navvies would shrink from resorting to at an out-door meeting, were quietly tolerated within the walls of the Japanese House of Representatives. Yet this is the House that so rigidly asserts its dignity as to pull down a President who dines at tea-houses, and to arraign Ministers of State who associate with merchants. Nothing could be more farcical.

COUNT ITO AND THE BUDGET COMMITTEE.

COUNT ITO'S speech before the Budget Committee, a translation of which we publish elsewhere, marks a somewhat new departure in the attitude of the Ministers of the CROWN towards the Lower House. It has hitherto been the Government's habit to treat the Diet somewhat *de haut en bas*: to answer its questions curtly, and to offer no detailed explanations of policy. Presumably that is the wisest and most dignified course, for, in the Lower House at all events, the object of the Questions addressed to the Government by the members, in the great majority of cases, is not to elicit information, but to create embarrassments. The propounders of the queries hope for no higher good fortune than to find in the Government's answers some material for attack. It is, in short, a process of baiting, inspired by anything rather than concern for the public interests, and we can not be surprised if the Government, finding itself set up, like QUILP'S figure-head, to be buffetted, sometimes treats its assailants with contemptuous brevity. But Count ITO has adopted a different attitude towards the Budget Committee. His Excellency doubtless feels that the Government must make every effort to avoid the responsibility of a fresh fight over the Budget. The House of Representatives may be resolved to pervert the Budget into a weapon for assailing the Government session after session, and in pursuance of that resolve may be entirely careless as to the justice and soundness of its financial criticisms. We do not affirm that such is the House's mood, though many people may find the conclusion inevitable. But we do think that the Government's duty is never practically to recognise such a mood and to treat the Lower House persistently as though its behaviour about the Budget were dictated by purely patriotic motives. That is evidently Count ITO'S idea. Maintaining a perfectly dignified tone, he has nevertheless set before the Budget Committee a thoroughly clear *exposé* of the Cabinet's policy, not even shrinking from the consideration of issues seldom openly broached. He does not in so many words tell the Committee what he might very well have told them, namely, that no practical measures of reform can ever satisfy men who confine themselves to vague talk about the "spirit of the Administration," and "fundamental measures," but who carefully abstain from defining what they mean by either the one or the other. He does tell them, however, that if their real aim is to set up Government by Party, they must not count on his cöoperation, for his purpose is to support the present Constitution not to radically alter its bases at this early stage of its existence. There is something very like sarcasm in his grave comment that if they object to see the State served by any members of the great clans, they should not have asked the latter to carry out administrative reforms. They may find the Government's reforms defective or insufficient from their point of view. But Count ITO declares his conviction that efficiency of the Administrative machine does not permit any larger reduction of staff or abolition of offices, and, at the same time, quietly reminds the House that responsibility for the consequences of these reforms rests, not with glib and nebulous critics, but with the Government which has made them, and which is required to administer in accordance with them. He enters, further, into an interesting explanation of the causes that dictated the Naval Loan and the call for patriotic contributions made about the same time, and he gives a brief but suggestive outline of the military policy of the Cabinet. He speech, from first to last, is statesmanlike, excellently constructed, and explicit without being in any sense petty. It concludes with an emphatic note of warning that the Government will stand firm now, as it has always done, against the extravagant reductions of official salaries proposed by the Budget Committee. Count ITO'S declaration on that point is not novel. It was made by him with equal emphasis to the Special Committee appointed by the House of Representatives last session for the purpose of conferring with the Government on the subject of administrative reforms. He repeats it to-day when the Budget Committee seems about to recur to its former unreasoning attitude. There is not yet any apparent hope that the present session of the Diet will end more peacefully than its predecessors.

DR. HATOYAMA'S QUESTIONS.

THE House of Representatives yesterday passed one of those strange resolutions that suggest an intention to insult the Government even at the cost of bringing ridicule on the House. It voted that, in view of the importance of the Questions addressed by Dr. HATOYAMA to the Government, the members of the Cabinet, from the Minister President of State downwards, should be invited to attend in the House and answer the Questions in person. Now the Government has already answered Dr. HATOYAMA'S Questions. The Questions of his at present awaiting reply are merely repetitions of the first. Their very repetition is at best an ungracious act. Moreover, they are in no sense important Questions. Dr. HATOYAMA wants to know why the Government permitted the EMPEROR'S name to be used by Counsel in the arguments adduced before a British legal tribunal. But Dr. HATOYAMA has not attempted to formulate any reasons against such a use of the SOVEREIGN'S name. He is well aware that no European monarch hesitates to sue in his own name before a foreign Court of Law, and he must be equally well aware that unless there be claimed for the Emperor of JAPAN some extraordinary sanctity such as never yet belonged to any earthly monarch, no valid objection can exist to the use of his name by Counsel in Court. Another fact also must be well known to Dr. HATOYAMA, namely, that the reference made to the EMPEROR both in the lower and upper Courts was for the purpose of asserting on HIS MAJESTY'S behalf prerogatives claimed for every crowned head in the West. The Japanese Government's leading counsel raised on Japan's account point after point that ought to have given the greatest satisfaction to patriotic Japanese.

Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

He brought to the aid of this empire's interest remarkable acumen and industry Yet because, in claiming that the EMPEROR ought to possess in a British Law Court within his own dominions prerogatives not inferior to those possessed by the Queen of ENGLAND in the same Courts, he spoke directly of the SOVEREIGN of this country, the Government whom he represented is to be arraigned by the Lower House of the Diet and found guilty of insulting the Throne. The thing sounds like a story from mythological annals; a legend of the days when Kings were regarded as veritable divinities. Why, in the name of all common-sense, why should not HIS MAJESTY have been referred to in Court? How could his dignity suffer by procedure that no Western monarch considers unbecoming? No wonder that Dr. HATOYAMA carefully refrains from attempting to explain the objections suggested by his Question. The only wonder is, and a great wonder we find it, that an eminent Japanese barrister, educated in Europe, should become the champion of such antique sentimentalism, and that a majority in the House of Representatives should blindly follow his lead. The Japanese Cabinet Ministers would indeed cut a noble figure solemnly appearing at the bar of the House and submitting to be cross-examined about a proposition that will not bear stating in the presence of men of common-sense. Dr. HATOYAMA'S second Question is not much more worthy of attention than his first. He is thoroughly well aware that ever since British Courts of Law were established in this Empire according to Treaty, Japanese plaintiffs have been obliged to follow their suits on appeal to Shanghai. Whether the thing is right or wrong, it has been the recognised and uncomplained-of practice for more than a quarter of a century. That the House of Representatives should suddenly flare up about it now, and summon the Government to answer with its official life for obeying such a time-honoured precedent, is a grave farce. If these and these only be the kind of crimes that the leaders of the Opposition find to charge against the Government, the latter may go on its way smiling, and the former should pray heaven to grant them a truer sense of proportion. Once before, too, the House perpetrated a similar piece of silliness. It invited the the whole Cabinet to attend for the purpose of being questioned. The reply of the Cabinet was that since the Ministers of State are entitled by the Constitution to enter either House of the Diet at any moment, and to address the members, the latter need not be at the pains to invite them. We should imagine that a similar response will be given now. And we should further imagine that the Government will quietly decline to reconsider its replies to the same Questions propounded a second time. Dr. HATOYAMA and his friends will then have achieved the feat of creating a very strained situation between the Cabinet and the Diet, which is probably the end they hope to accomplish. But in the eyes of outsiders they cut a very sorry figure, for their inability to discover any tangible cause of complaint against the Government argues as great a lack of ingenuity as their readiness to effervesce about bagatelles evinces an absence of moral ballast.

RAILWAYS AND RIVERS IN CHINA.

ONCE again people's hopes are revived that China may emerge from her deep rut of conservatism, and set earnestly about prov.ding herself with railways. These hopes recur periodically whenever anything happens that hurts the monster empire sufficiently to set her nerves vibrating. Every one has given up imagining that appeals to reason can ever become an active power in China's case. It is an accepted doctrine that by suffering only can her senses be quickened out of their present state of apathy Great results were supposed to be contingent on the continuation of her struggle with France eight years ago, and similar expectations were based on the terrible famines that decimated some of her provinces in recent years. So it is now. The temporary paralysis of transport facilities by the Peiho River embarrassed the capital to such an extent that the need of a railway ought to be felt, if it is ever to be felt. Peking is accessible from the sea by road or by river. Either route is terrible at the best of times from an Occidental point of view. As for the road, the eighty or ninety miles that stretch from Tientsin to Peking can probably claim incomparability of badness. A succession of deep ruts and deeper holes, in dry weather a Sahara of dust, in wet a morass of mud—probably no nation in the world except the Chinese would long endure the penalties of such a route. But the Chinese are generally content to take things as they find them. To repair the road would necessitate organization, combined effort, and heavy expenditure, whereas to bear the discomfort of travel by it and to build vehicles stout enough to surive the strains and shocks of negotiating its inequalities, these are questions that concern individuals only. Besides, for persons not capable of braving the hardships of such travel, there is the river route. On the river an enormous fleet of boats plies, furnishing employment, directly and indirectly, to some two million persons. There are passenger boats and cargo boats. The latter need not be described. The former are filthy craft having a species of roof resembling that of a house-boat. One can cook in them, after a fashion, and one can sleep in them, after a fashion. On their up-stream journey they are usually dragged along by means of a tow-rope to which one or two men are attached, the rate of progress being at most two miles an hour, and if, as is not infrequently the case, a strong head-wind blows, to advance becomes altogether impossible: the boat has then to be tied up and the unfortunate traveller may find himself planted for two, three or even four days among clouds of dust that render every function of life a misery. But of course such contingencies are not vital where the transport of merchandise alone is in question, and it results that the capital receives a large portion of ts supplies by the river, while, on the other hand, Tientsin with its seven or eight hundred thousand souls and its flourishing industries, obtains by the down-stream route great stores of camel's wool, hides, vegetables, and such things. During the summer of the present year, however, the river burst from its usual course at a place where centuries of gradual embanking and silting had raised its bed far above the level of the surrounding country, and the waters that had hitherto served as a highway between the two cities spread themselves destructively over hundreds of square miles of millet and barley fields. Measures were speedily organized to restore the stream to its usual course, but the task must have been immensely difficult. Whether it was undertaken intelligently, many persons doubt. But scepticism that goes hand in hand with irresponsibility is always easy, and, besides, whatever China does is invariably wrong in the eyes of the all wise foreign critic. Months passed, however, and the river remained useless as a carrying agent. News of the embankment's restoration would be received one day, only to be followed the next by intelligence that a fresh breach had occurred. Meanwhile Peking and Tientsin had to receive their supplies. Above all, the former city's winter store of rice and salt had to be procured, and since the water-way was impracticable, all the traffic was transferred to the road, which, already cut up by the long rains that had rendered the river ungovernable, soon fell into an exceptionally evil condition under the thousands of carts that rolled along it daily. Peking began to suffer. The price of rice rose by leaps and bounds, and multitudes of folks, reduced to starvation point by the devastation of the floods flocked citywards in search of shelter and sustenance. Such invasions of indigence are not allowed in the capital. A large force of troops was posted at the eastern and southern gates to keep back the tide of misery, and no perceptible increment of mendicancy took place within the city. But all the echoes of trouble could not be excluded from the precincts of the Palace, and it is said that the august lady who sways the sceptre behind the throne, began to put very suggestive questions as to the capabilities of railway transport and the cost of railway construction. Neither the EMPRESS DOWAGER nor the EMPEROR is altogether without

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

practical knowledge of railways. Within the grounds of the palace there is laid a DECAUVILLE line on which run carriages gorgeously fitted up for the recreation of the Imperial folks. Half a dozen years ago, in the days when syndicates were supposed to have at length found the knife that would open the Chinese oyster, this toy railroad and its handsome rolling stock were presented to the EMPRESS. No outsider knows precisely how far the little affair has since then been allowed to serve its purpose of familiarizing those in high places with the advantages of locomotion by steam. Perhaps after a few trips the carriages and engine were permanently laid aside, and perhaps the whole thing is now a piece of forgotten furniture. But at all events the SOVEREIGN and the EMPRESS DOWAGER, as well as Princes and great personages of the Government, have had actual experience of what in meant by railway travelling, and must understand that if the line from Tong-ku to Tientsin were carried on to Peking, the capital would be secure against embarrassments such as recently overtook it. Possibly the contrast between what is and what might be has now become sufficiently vivid to dispel the mist of conservatism. Another point is that whereas the inconvenience and cruelty of depriving of their means of livelihood the immense population engaged in the river transport service have always alarmed Chinese advocates of railway extension, the floods have now done this evil thing in the suddenest and most mischievous manner, creating a situation incomparably worse than anything that railways could create. It is not easy to understand, indeed, why such a chimera should have possessed any deterrent power, for by merely looking round them the Chinese can see how quickly and smoothly men adapt themselves to alterations of bread-earning conditions. Not many years ago an immense transport service on the Grand Canal gave employment to multitudes of people. But steamers came, and the goods hitherto sent by the inland route were all shipped coastwise. The Canal silted up to a mere ditch, and its quondam army of dependents turned without trouble or tumult to other pursuits. So it would be were the railway extended from Tientsin to Peking. Many think, as we have said, that the much needed moral motor has been supplied by the calamity of the floods and their consequences. They may be right, but the eternal spring of hope has well nigh ceased to flow in the arid regions of Chinese progress.

IMPERIAL DIET.

FRIDAY, DECEMBER 8TH.

HOUSE OF PEERS.

The House met at 10 30 a.m. the Order of the Day being:—

1.—First Reading of the Government Bill for Special Amendment of the Taxable Value of Land: sent up from the Lower House.
2.—Appointment of a Special Committee to report upon the same
3.—First Reading of a Bill for rescinding Law No. 12 of the 22nd year of *Meiji*; sent up from the Lower House.
4.—Appointment of a Special Committee to report upon the same.
5.—First Reading of a Bill for Supplementing the City Government System; sent up from the Lower House
6.—Appointment of a Special Committee to report upon the same.
7.—Report of the Special Committee on the Game Law Bill

The Minister of State for Finance introducing the Bill for amending the Taxable Value of Land, repeated briefly the arguments set forth in the Lower House.

A number of questions were asked as to whether the Government anticipated a repetition of such a measure, or whether it regarded the present Bill as permanently sufficient, and why the committee of investigation suggested last session by the House had not been appointed. The Minister replied that if the Bill passed, the Government saw no occasion for a committee; that the purpose of the Bill was not to curry popular favour but to remove serious inequalities now existing in the incidence of taxation, and that no definite statement could be made as to future prospects. Messrs. Yasuba and Ozaki Saburo repeated their question in various forms as to the intentions of the Government in the event of the Bill's failing to satisfy the people, and in the event of further inequalities in the incidence of taxation being subsequently discovered. The Minister, however, declined to say anything except that if a necessity for further re-assessment presented itself, the problem would be suitably dealt with at the time.

Viscount Ogasawara wished to asked a question that might provoke the mirth of the House, but which he considered advisable. It seemed to him a matter for great congratulation that the Government had so far respected public opinion as to introduce this Bill. But he could not forget that the same measure had been presented by the Government last session, and had been the victim of so much official coldness that people called it the Cabinet's step-child. He thought it would be well to have some assurance this time as to whether the Government really wished the Bill to pass or whether it was again to be allowed to die of neglect.

The Minister said that undoubtedly the Government wished it to pass.

The Bill was entrusted to a Special Committee of 15 appointed by the Sections, and the House refused to limit the period within which the Committee's report should be presented.

On coming to the Bill for rescinding Law 12 of 1889, namely, the Law providing a special system of local government for the three cities of Tokyo, Kyoto and Osaka, Mr. Engi, Government Delegate, set forth at some length the Government's objections to the Bill, as explained in previous sessions of the Diet.

Several questions were asked, and the House finally, by a vote of 74 to 72, decided to hand the Bill to a Special Committee of 9 nominated by the President.

The Bill for supplementing the City Government System was entrusted to the same Committee, without discussion.

Viscount Tani, Chairman of the Special Committee on the Game Law Bill, reported in favour of the Bill with some few alterations, and the House decided to carry it to a Second Reading, the Reading to be proceeded with the following day.

The House rose at 3.20 p.m.

HOUSE OF REPRESENTATIVES.

The House met at 1.15 p.m., the Order of the Day being:

1.—First Reading of a Press Law Bill; introduced by Mr. Hatano Denzaburo.
2.—First Reading of a Bill for establishing a Local Assembly in Hokkaido, introduced by Mr Kato Masanosuke.
3.—First Reading of a Bill for supplementing the Business Tax and Miscellaneous Tax Regulations; introduced by Mr Kato Masanosuke
4.—First Reading of a Bill for rescinding Imperial Ordinance No. 6 of the Sixth year of *Meiji*; introduced by Mr. Kato Masanosuke
5.—First Reading of a Bill for amending the Local Tax Regulations, issued in the 13th year of *Meiji*; introduced by Mr Kato Masanosuke.
6.—First Reading of a Bill for supplementing Imperial Ordinance No. 6, of the 21st year of *Meiji*; introduced by Mr. Hyakuman Umeji.

The President announced the receipt of the Government's Reply to the Questions presented by Dr. Hatoyama with refence to the *Chishima-Ravenna* law-suit. The Reply was:—

The name employed to represent the plaintiff in the suit for damages arising out of the collision between the *Chishima Kan* and the *Ravenna* was "the Imperial Japanese Government."

The defendants' appeal to the British Superior Court in Shanghai was answered by the plaintiff, such course being in accordance with precedent.

The receipt of the following was announced:

(1) A Bill relating to the Enforcement of the existing Treaties; introduced by Mr. Sasaki Tomofusa.

(2) A Representation to the Government on the subject of the strict Enforcement of the existing Treaties; presented by Mr. Abei Hankon.

(3) A Project of Law for dealing with Persons obstructing the Enforcement of the existing Treaties; presented by Mr. Abei Hankon.

Dr. Hatoyama expressed regret that the Government's Reply did not address itself to the real purport of his Questions. With regard to the first Question, he understood the Government to say that the Sovereign's name was not used in the pleadings, but they were in the name of the Imperial Government as plaintiff. He was well aware of that and made no query about the pleadings. His point had been that the Emperor's name was used by the barrister conducting the Japanese case, and that it was used for the purposes of his argument in opposing the right of the defendants to file a counter-claim. He had asked why it was so used, and the Government's reply was not a reply to his question. With regard to the second question, precedent was relied on as the Government's sole justification. But surely it was not contended that all precedents must be followed. A man was not warranted in continuing to do wrong because he had done wrong already. His Question was *why* had the Government appeared in the Shanghai Court, and he did not take it to be any answer that they were in the habit of appearing there. Admitting the habit, what he wanted to know was its propriety or otherwise. Doubtless the House was interested in the matter. Another opportunity would occur to re-open the subject.

Mr Hatano Denzaburo, introducing the Press Law Bill, said it was the same Bill as that passed by the House in every preceding session, but prevented from becoming law owing to want of time or the opposition of the Upper House. The existing press law conferred on the Administration power of an unconstitutional and arbitrary character; power which was exercised by those in authority, not according to the dictates of justice but in defence of their own reputation. The Bill expressed the earnest wish of the House and ought certainly to pass after so many resolute attempts to push it through the Diet.

Mr. Tsuzuki, Government Delegate, was obliged to repeat the Government's often repeated objection to this Bill. The Government knew the value of free speech, and desired earnestly to grant it. But complete freedom was not yet possible. He need not again traverse ground travelled over repeatedly in the past. It would suffice to say that the Government could not agree to the Bill as it stood.

The Bill was entrusted to a Special Committee of 9 nominated by the President.

Mr. Kato Masanosuke introducing the Bill for establishing a Local Assembly in Hokkaido, dwelt on the importance of the island from a strategical as well as a material point of view. Capable of supporting ten millions, some said 20 millions, of people, it had as yet only a few hundred thousands. With two and a half million acres of arable land, only a hundred and twenty-five thousand had been brought under cultivation. Since the Restoration seventy million *yen* had been spent on it, but there was nothing to show except a few roads and money-losing official enterprises. The only hope for the development of the place was to make the people autonomic, and let them have an Assembly to decide upon the best steps of progress.

Mr. Tsuzuki, Government Delegate, said that it was true that the Government had spent large sums on Hokkaido since the Restoration: not seventy millions, however, but fifty millions. And there was much to show for the money. Thus the population had been increased by half a million, and the exports had grown to twelve millions. But when they came to speak of establishing a Local Assembly, they had to remember, in the first place, that innumerable preparations must be made before taking such a step, and in the second, that the conditions existing in Hokkaido were altogether different from those in the rest of Japan. He entered at considerable length into an explanation of this point, and argued that until it had been found possible to bring Hokkaido into the pre-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

fectural system obtaining elsewhere throughout the empire, the establishment of a Local Assembly there was out of the question.

Mr. Kozaki Jokei opposed the Bill. He contended that in many parts of Japan Local Assemblies were still premature, and that anything of the kind could not be safely considered for a moment in Hokkaido. He held that, in view of the importance of the subject, the Minister of State for Home Affairs should have appeared in the House himself and opposed the Bill.

The Bill was entrusted to a Committee of 9 nominated by the President.

The same course was pursued with regard to the remaining Bills on the Order of the Day, no discussion taking place, and the House rose at 2.40 p.m.

SATURDAY, DECEMBER 9TH.

HOUSE OF PEERS.

The House met at 10.45 a.m., the Order of the Day being,

1.—Report of the Special Committee on the Bill for Changing the Limits of certain Jurisdictions.
2.—First Reading of a Bill for rescinding the Peace Preservation Regulations; sent up from the Lower House.
3.—Appointment of a Special Committee to report upon the same

Mr. Matsuoka Koki, on behalf of the Special Committee, reported in favour of the Bill for Changing the Limits of certain Jurisdictions, with a few amendments the principal of which was that cases arising in the Tsukui District shall be carried to the Yokohama Local Court instead of the Odawara District Court, it being considered that such an arrangement would be more convenient for local litigants.

The House voted for the Second Reading of the Bill and proceeded with it at once. The amendments proposed by the Committee were adopted and the Third Reading was passed.

BILL FOR AMENDING THE LIMITS OF THE JURISDICTION OF LAW COURTS.

Art. I.—In the table giving the positions of law courts and the extent of their jurisdiction, the Hachioji Court, now under the jurisdiction of the Yokohama Local Court, shall be transferred to that of the Tokyo Local Court, and shall have jurisdiction over the Districts of Minamitama, Nishitama, and Kitatama. The following 7 villages, Nitso, Asamizo, Oyama, Aibara, Ono, Mizo, and Tana in the county of Takaraza, Sagami, shall be included in the jurisdiction of the Yokohama Peace Court under the control of the Yokohama Local Court. The District of Tsukui, Sagami, shall be included in the jurisdiction of the Yokohama District Court under the control of the Yokohama Local Court.

Art. II.—In accordance with the provisions of Art. I., cases which, previous to the enactment of this law, were brought before the Yokohama Local Court or the Hachioji District Court, shall now come under the jurisdiction of the Tokyo Local Court, the Yokohama District Court, or the Odawara District Court, respectively. Appeals from sentences given by the Hachioji District Court shall, in accordance with the foregoing provisions, be referred to the Tokyo Local Court.

Art. III.—Appeals from sentences given by the Hachioji District Courts previous to the enforcement of the present law shall be referred to the Yokohama Local Court.

SUPPLEMENTARY PROVISION.

Art. IV.—This law shall come into force on and after the 4th of April of the 27th year of *Meiji* (1894).

Marquis Daigo said that he had always hitherto been an opponent of the Bill for abolishing the Peace Preservation Regulations, but he now desired that the Bill should pass. He did not pretend to think the Regulations altogether unnecessary, but he thought them less necessary than they had formerly been, and at any rate it seemed to him unadvisable that the House of Peers should reject, session after session, a measure sent up by the Representatives.

Mr. Ando Sokumei desired to have an explanation from the Government Delegate as to the Government's views about the Bill. He presumed that the Government itself had not been unreluctant to enact the Peace Preservation Regulations, but had been obliged to do so owing to the necessity of the time. He should be pleased to know if it was officially considered that the Regulations were still needed.

Mr. Suyematsu Kencho said that it was a mistake to suppose that the Government had enacted the Peace Preservation Regulations as a temporary measure to meet the exigencies of a season. Their usefulness had been expected to continue for a long time. Nevertheless, conditions change with the lapse of years, and he was not by any means prepared to deny that the time might come when the Regulations could be safely dispensed with. In the Government's opinion, however, that time had not yet come. A law existed against wearing swords in public, and its provisions were observed so far as they went. But it was notorious that certain persons carried arms of various kinds, and showed an unfortunate disposition to resort to deeds of violence. The scenes of disturbance and bloodshed that occurred at elections must be fresh in the minds of all. The Government, therefore, felt compelled to oppose the rescinding of the Regulations.

Mr. Ando persisted in seeking a reply as to the degree of progress that was considered a necessary preliminary to the repeal of the Regulations. They might have been required at the time of their enactment, but he could scarcely believe that there existed now any serious tendency to acts such as the Regulations were designed to punish or prevent. Did the Government think that such a tendency existed, and for what reason was it considered likely to become practically influential?

Mr. Suyematsu denied the possibility of postulating any definite future conditions such as might warrant the repeal of the Regulations. Neither was it advisable to enter into an open explanation of the contingencies that seemed, in the Government's eyes, to require their continued operation at present.

Mr. Ando said that his particular objection had reference to the Article of the Regulations that seemed to indicate danger to the Throne as the chief cause of their enactment. Did not the Government regard as very undesirable a law owing its origin to such a cause.

Mr. Suyematsu replied that the same question had been asked and answered in the last session. He referred the member to the records of the House.

The Bill was entrusted to a Special Committee nominated by the President.

The House rose at 11.35 a.m.

HOUSE OF REPRESENTATIVES.

The House met at 1.15 p.m., the Order of the Day being,

1.—Report of the Special Committee on the Bill for abolishing the Export Duty on Cotton Yarns.
2.—First Reading of a Bill for transferring Prison Expenditures to the charge of the Treasury; sent down from the House of Peers.
3.—Appointment of a Special Committee to report upon the same.
4.—Second Reading of the Bill for amending Law No. 84 of the 23rd year of *Meiji*.
5.—First Reading of a Bill, introduced by Mr. Sasaki Zenyemon, for supplementing the Special Export Ports.
6.—Representation, introduced by Major-General Aoyama Hogara, on the subject of an Iron Foundry.

The receipt of various Bills having been announced,

Mr. Kato Masanosuke spoke at some length with reference to a Question addressed by him to the Government on the subject of the repair of river banks. He dwelt upon the great losses suffered annually by the country in lives and property owing to the breaking of river banks, and on the heavy expense consequently incurred by the Treasury and the localities. The problem of river banks was one that demanded the most earnest consideration of the Government and the best skill of the country's experts. Upon whom did the responsibility rest at present? Did it not rest on a Minister of State who enjoyed a high reputation for his capacity, namely, Count Inouye? It was not to be supposed that Count Inouye had ceased in any way to be the competent statesmen of former times, yet during his two years of office no thorough-going plan for riparian improvements had been introduced. The speaker felt that some steps must be taken in the matter, and had accordingly propounded Questions to ascertain the relation existing between the problems of forests and rivers, the source whence funds for riparian purposes were to be drawn, and the amount which the Treasury was prepared to give for the purpose of supplementing the sums contributed by the localities.

Mr. Nakazawa Hikokichi, on behalf of the Special Committee, said that the Committee had very fully investigated the question of the present state and prospects of the cotton-spinning industry in Japan, and had found that enterprise of this character is growing rapidly. There were already 46 large cotton-spinning factories in Japan, with a total of 684,200 spindles, and the quantity of yarn produced was in excess of domestic demand. Undoubtedly the necessity of finding markets abroad was beginning to be urgent. The Committee, on investigation, had ascertained that at present the chief market for Japan Yarns was Shanghai. They there came into direct competition with Bombay Yarns, and it appeared that the Indian product could be sold at a rate 1.84 *yen* cheaper per bale than the Japanese. But if this Bill passed, and the export duty were withdrawn, the Japanese Yarns could be placed upon the Shanghai market for 1.36 *yen* less per bale than the Indian. Hence there was good prospect of extending the demand for the former, and the Committee, considering that every possible encouragement should be given towards the attainment of that object, recommended the Bill to the favourable consideration of the House.

Mr. Tatekawa Umpei briefly supported the Bill, and the House voted to carry it to a Second Reading, but declined to proceed with the Reading at once.

Mr. Kato, Government Delegate, said that, with regard to the Bill for transferring prison expenditures to the charges of the Treasury, the Government must oppose the measure for financial reasons. The surplus revenue for the next fiscal year was already disposed of, and no funds were available for the purpose of this Bill.

The Bill was entrusted to a Special Committee elected by the Sections.

The Second Reading of the Bill for amending Law No. 84—relating to penalties for breaches of Administrative Ordinances—was then voted without discussion, and the Third Reading was passed.

The Bill for supplementing the System of Special Ports of Export, was then read:—

The Special Ports of Export established by Law No. 12 of the 22nd year of *Meiji*, shall be increased by the addition of Sakai in the province of Hoki.

Mr. Sasaki Zenyemon, explaining the Bill, said that the port of Sakai was frequented by vessels belonging to three steamship companies, and that a brisk trade flowed to it—the trade between the provinces of Izumo and Hoki. Considerable quantities of rice and barley were exported yearly, namely, 300,000 *koku* to Osaka and Kobe and 30,000 *koku* to foreign countries, yet there was no port of export within 500 miles (English) and great obstacles were thus placed in the way of trade. Finally, the expense of opening the port would be trifling, only five or six hundred *yen* annually.

Mr. Kato, Government Delegate, said that the Government desired nothing less than to place any obstacles in the path of trade, and would not advance any objections on the score of expense were there corresponding advantages to be secured. But it did not appear that any sufficient cause existed for the opening of Sakai. The proposer of the Bill had stated that rice and barley were exported thence annually to the extent of 30,000 *koku*. The Government's investigations, however, showed that the export did not exceed from three to five thousand *koku*. One steamer could carry away that quantity. There were many other places not less favourably circumstanced than Sakai as ports of export, and though the expense of opening any one of them might be small, the aggregate outlay on account of the whole would be very considerable. Hence the Government must oppose the Bill. In answer to Mr. Sasaki, he said that, though he could not enumerate all the ports having equal claims with Sakai, he was in a position to say that applications based on similar grounds had already reached the Government from 13 or 14 places.

Mr. Watanabe Yoshizo traversed the Government Delegate's views. He said that the expense attending the despatch of cereals from Sanin-do to Osaka and Kobe was very great at present—from 50 *sen* to 1 *yen* per *koku*. Sakai was the most progressive place in the whole re-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

gion, and the House knew that a railway debouching there was among the projects for the First Construction Period. He failed to see how such a place could be counted unsuitable for purposes of special export. On the contrary, Sakai appeared to him eminently fitted for foreign trade.

The House rejected the Second Reading of the Bill.

The Representation relating to the establishment of an Iron Foundry was then read, and explained by Mr. Kashiwada Yoshibumi, who asserted that it must be evident to every observer that the prime object of all countries at present was to strengthen their military organization and place them on an independent footing. Japan was bound to suffer if she neglected to adopt the same policy. Investigations had shown that she possessed an ample supply of excellent iron, and that the metal was even better suited for her purposes than imported iron; she had plenty of coal, also, and it cost her much less than it cost other countries where iron foundries flour shed. In short, from a practical point of view, everything favoured the establishment of an iron foundry in Japan as urged in the Representation. With regard to the question of establishing the foundry under official auspices, he himself, speaking generally, was opposed to official meddling in such matters. But there did not appear to be any reasonable prospect of success under private management, for the present, at all events. The Government alone could command sufficient capital and a sufficiency of expert assistance. The argument in favour of the foundry had acquired much additional force from the recent heavy depreciation of silver. Any goods bought abroad had now to be paid for at a cost far higher than was formerly the case, when converted into the currency of Japan. On the other hand, they were confronted by the imminent necessity of having to make very heavy purchases in foreign markets unless they established a foundry of their own. The spirit of railway enterprise was active. The country was about to spend at least a hundred millions on railroads. Already, in addition to the works of that kind contemplated by the State under the provisions of the new Railway Law, applications for charters to build lines had been received from over thirty private associations. He need not remind them that a considerable part of the money spent on railway construction must go abroad, unless they had an iron foundry at home. Then again for the construction of iron men-of-war an outlay of some three millions annually was needed, and he thought that the House was agreed as to the necessity of increasing that sum to five millions at least. Here was another channel through which large sums must flow out of Japan every year. Again, it might at any moment happen that owing to international complications Japan's supply of iron and war material from abroad would be cut off. In that event, what resource had she? He failed to see any except application to China. The neighbouring empire was so far ahead of Japan that an iron foundry had already been established there. Thus Japan might at any moment find herself a suppliant for supplies from China, whereas the rôle they must all desire to see their country play would be that of supplying China. He might remind them that great opposition to the establishment of an iron foundry in Japan had come from the foreign side, a fact which, in itself, should suffice to establish the advisability of the step.

An animated dialogue occurred between Mr. Hashimoto Kintaro and the last speaker, the President being twice compelled to call them to order.

Mr. Kagami Kahei opposed the Representation in a speech of great length. He expressed surprise that the House should be asked to accept as conclusive the investigations hitherto made as to the supply of iron in Japan. Those investigations had been conducted entirely under the auspices of the Department of Agriculture and Commerce, which was the Department of all others deemed least worthy of the House's confidence. Several places were mentioned as sources of iron supply but among them incomparably the most important was Kamaishi. It was alleged that Kamaishi alone could give all the iron needed, but according to information obtained by the speaker from a thoroughly competent expert, the vein at Kamaishi was not continuous, and although a certain quantity of suitable iron might be procured near the surface, deeper workings would give ore quite unfitted for the manufacture of wrought iron. Experience did not recommend Kamaishi. Already the State had spent some three million *yen* on the mines there, and had obtained virtually nothing in return. So hopeless had the prospects of the place seemed, that the Minister of Finance had declined to devote a comparatively small sum annually for the purpose of keeping the works open. It was therefore more than problematical whether, if they had an iron foundry, they could find in Japan iron to keep it going. Then again, could they be sure of manufacturing fire-proof bricks for their furnaces? At present, England was the only country in the world where such bricks were produced. Russia had to obtain a supply of them from Great Britain. The probabilities were against Japan's being able to furnish herself with this important item, yet the promoters of a foundry talked as though its establishment would make the country absolutely self-supplying in the matter of war-material. As to coal, again: experts said that Japanese coal, with the exception of that of Chikuzen, was too sulphurous for smelting iron such as they needed. Could Chikuzen be counted on to give a sufficient supply? They were aware, also, that not even the question of locality had been agreed upon, so vague and nebulous was the whole project. Experts, too, were said to be wanting in Japan. He had heard that only one competent man was available. From every point of view he recommended the House to pause before addressing such a Representation to the Government. He himself was not opposed, in the abstract, to a project of the kind advocated. But he was emphatically of the opinion that they did not yet possess sufficient information to justify them in advocating a heavy expenditure of public money for such a purpose. He might remind them in conclusion that even the Government's ideas were not yet fixed, and that the Minister of State concerned was still understood to be making investigations.

Mr. Ooka Ikazo had listened with interest to the erudite speech of Mr. Kagami. He was curious to know, however, to whom Mr. Kagami had referred when he spoke of "the Minister of State chiefly concerned who was still engaged in investigations.' Did he mean Count Goto? And was it then possible to place immediate confidence in the doings of Count Goto? Perhaps the House might remember that Count Goto was among the Ministers of State who affixed his seal of approval to the Bill introduced by the Government in the third session for the establishment of an iron foundry. Yet they were now told that the same Count Goto was engaged in investigations essential to forming a decision as to the advisability of the foundry. For his own part, he considered that the House had better wait until some definite information was forthcoming as to the results of the small experimental foundry, the establishment of which had been recommended two years previously.

The closure was moved and carried, and the House rejected the Representation.

The House rose at 3.25 p.m.

MONDAY, DECEMBER 11TH.

HOUSE OF PEERS.

The House met at 10.40 a.m. the Order of the Day being,

1.—Second Reading of the Game Law Bill.

The receipt of various Bills, &c., having been announced, the Order of the Day was proceeded with.

The Game Law Bill was discussed clause by clause, and various amendments having been introduced, it was finally passed through its Second and Third Readings.

The House rose at 3.30 p.m.

HOUSE OF REPRESENTATIVES.

The House met at 1.15 p.m. the Order of the Day being,

1.—Report of the Special Committee on the Government Bill for giving Aid from the Treasury for purposes of Technical Education.

2.—First Reading of the Government Bill for amending portions of the Treasury Notes Regulations.

3.—Appointment of a Special Committee to report upon the same.

4.—Second Reading of the Government Bill for abolishing the Export Duty on Cotton Yarns.

5.—First Reading of a Bill introduced by Mr. Ooka Ikuzo for amending the Bail Bond Regulations.

6.—First Reading of a Bill introduced by Mr. Nakamura Yaroku for amending the Mining Regulations.

7.—First Reading of a Bill introduced by Mr. Ono Ryosuke for amending the Regulations for the Control of Pawnbrokers.

8.—First Reading of a Bill introduced by Mr. Kozaka Zenmosuke for amending the Banking Regulations.

9.—First Reading of a Bill introduced by Mr. Kakano Toshiro for amending Law No. 10 of the 22nd years of *Meiji*.

The Vice-President announced the receipt of a Supplementary Budget which the Government desired to have treated as a matter of urgency.

The receipt of various Bills, &c., having been reported,

Mr. Watanabe, Minister of State for Finance, explained that the Supplementary Budget introduced by the Government was necessitated by the recent sudden depreciation of silver, and the time for the payments affected being close at hand, the Budget was presented as a matter of urgency.

Mr. Kashiwada Moribumi complained that a proper answer had not been given by the Minister of Finance to the Question submitted by the speaker on the 4th instant. The Minister, in his speech recently delivered in the House, had adduced the growth of the country's foreign trade as a proof of national prosperity, noting especially the marked increase of exports recorded during recent years. But on examining the statistics, it appeared that during the 13 year period from 1879 to 1891, the exports had aggregated 613,442,311 *yen*, and the imports, 608,639,548 *yen*, the excess of the former being 4,802,763 *yen*. But it had to be remembered that the imports appearing in the statistics were calculated at their prices at the ports of export. To obtain their selling value in Japan, at least 10 % of those prices must be added on account of freight, insurance, and charges. If this correction were made, it resulted that imports exceeded exports in the period under consideration by no less an amount than 56,061,191 *yen*. Turning again to the movement of coin and bullion in the same period, it appeared that gold and silver to the value of 104,165,571 *yen* had been exported against a total import of 98,121,596 *yen*, the excess on the side of export being 6,043,975 *yen*. Hence it appeared that the country had paid away some fifty millions less than it ought to have done were there question merely of the difference in value between the exports and imports of commodities. What had become of that money? To what purposes was it applied? He believed that it represented funds brought to this country by foreigners to purchase land or employ as capital in businesses organized by them in violation of the Treaties. Had the Minister of State for Finance taken these points into consideration when he spoke of the increasing bulk of the exports as a sign of the country's development? That was what he, the speaker, had wished to ascertain when he addressed his Question to the Government. But the Minister of State for Finance had merely replied that the Government counted an increasing export trade as one proof of national prosperity. Determined not to be content with such an irrelevant answer, he had re-formulated his Question, and he should go on doing so until he obtained a satisfactory reply.

Mr. Murayama Riyobei, on behalf of the Special Committee, asked permission to defer the Committee's report on the first Bill set down for discussion. Leave was granted and the House proceeded to the Bill for amending the Treasury Notes Regulations, which was entrusted to a Special Committee nominated by the President.

The Second Reading of the Bill for abolishing the Export Duty on Cotton Yarns was then passed without debate.

Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

Mr. Ooka, introducing the Bill for amending the Bailiffs Regulations, said that no explanation was needed, as the Bill had been before the House last session, and as the abuses existing under the present Regulations were well known to all.

The Bill was entrusted to a Special Committee nominated by the President.

Mr. Nakamura Yaroku, introducing the Bill for amending the Mining Regulations, said that it had been before the House in the preceding session. Experience had demonstrated the necessity of changing the law now in force, which was only a copy of the German law, and in many respects unfitted for Japan.

The Bill was entrusted to a Special Committee of 9 nominated by the President.

Mr. Ono Rinsuke, introducing the Bill for amending the Regulations for the Control of Pawnbrokers, said that the present Regulations caused great inconvenience to a class of persons who carried on a trade representing some 80 million *yen* annually.

The Government Delegate said that the Government also recognised the necessity for some amendment, and was engaged in investigations with that object. The Bill now before the House seemed commendable in all respects but one, namely, the provision for bringing pawnbrokers and dealers in second hand goods into the same category. Against that the Government wished to enter a protest.

The Bill was entrusted to a Special Committee of 9 nominated by the President, as was also the Bill for amending the Banking Regulations.

Mr. Katano Toshiro, introducing the Bill for amending Law No. 10 of the 22nd year of *Meiji*, said that the present Physicians' Regulations were based on the system of feudal times: they allowed doctors themselves to compound medicines for their patients, a method that gave rise to many abuses. The time had come for distinctly separating the professions of apothecary and physician. The Bill now under consideration had been framed chiefly with that object.

Dr. Hasegawa Tai opposed the Bill at great length. After considerable discussion, the House refused to carry the Bill to a Second Reading, and rose at 3.45 p.m.

TUESDAY, 12TH DECEMBER.

HOUSE OF PEERS.

The House did not sit, the Committees alone meeting.

HOUSE OF REPRESENTATIVES.

The House met at 1.15 p.m., the Order of the Day being:—

1.—Report of the Special Committee on the Government Bill for amending the Tax Collecting Regulations.
2.—Report of the Special Committee on the Government Bill for making certain Additions to the capital of the Tokyo Military Arsenal.
3.—Report of the Special Committee on the Government Bill for creating an Emergency Reserve Fund.
4.—First Reading of a Supplementary Bill introduced by Mr. Kagami Kahei for amending the Law of the Houses.
5.—First Reading of a Bill introduced by Mr. Inouye Hikosaburo relating to the Management of State Property.
6.—First Reading of a Bill introduced by Mr. Kozuki Jokei for amending the Medical Diploma Regulations.
7.—First Reading of a Bill introduced by Mr. Motoda Hajime for amending the Law of Organisation of the Law Courts.

The receipt of various Bills, &c., having been announced, the President, who had resumed his seat after a week's suspension, informed the House that an assault having been committed the preceding evening on Mr Shimada Saburo, he had addressed to that gentleman a message of condolence in the name of the House.

Mr. Takata Sanaye asked leave to introduce an urgency motion for again handing over Mr Hoshi Toru, the President, to the Disciplinary Committee, on the ground that he had shown contempt for the House's decisions by resuming the Presidential seat after the passage of the House's vote of want of confidence.

The House voted by a large majority to permit the introduction of the motion, but on application for the Government's permission to change the Order of the Day for the purpose, the permission was refused. Mr. Takata therefore announced that he should re-introduce the motion so soon on the Government Bills were disposed of.

At this point Mr. Tanaka Shozo, who had made several attempts to speak out of order, shouted from his seat that the assailants of Mr. Shimada Saburo had been instigated by a person now in disgrace (evidently referring to the President). The President took no notice of the interruption, and the Order of the Day was proceeded with.

Mr. Ando Kiuka, on behalf of the Special Committee, reported in favour of the Bill for amending the Tax Collecting Regulations and the House voted to carry it to a Second Reading.

Mr. Awaya Shinazo, on behalf of the Special Committee, reported in favour of the Bill for making certain additions to the capital of the Tokyo Military Arsenal. He said that the Bill embodied a measure of which the House had always approved, namely the transfer of the Naval Powder Factory to the Army Department.

The House, without question or debate, voted to carry the Bill to a Second Reading.

Mr. Kawashima Jun, on behalf of the Special Committee, reported that as the 62nd and 69th Articles of the Constitution contained provisions enabling the Government to take financial measures in the event of calamities requiring grants from the Treasury, the Committee saw no reason to create the Emergency Reserve asked for by the Government in the third Bill on the Order of the Day. There were plenty of pressing uses for any surplus revenue that might be forthcoming: there were reforms such as reduction of the land tax and reassessment of the taxable value of land. To provide for the storing up of such money in the Treasury vaults would be like creating a special fund for a spendthrift son to squander. Therefore the Committee were opposed to the Bill.

Mr. Tajiri, Government Delegate, said that the object of the Bill was simply to place the Government in a position to deal promptly with emergencies such as the country was unfortunately liable to. There were provisions in the Constitution for imposing a new tax, raising a national loan, or contracting other liabilities to the charge of the Treasury, and also for creating a reserve fund in the Budget, but there were no means for meeting emergencies such as this Bill contemplated.

Mr. Fukuda Hisamatsu thought that the Bill, though it had the mien of a god, carried the heart of a demon, as the saying went. It might be pleasant for folks that suffered from natural calamities to have large sums lying ready for their succour, but it was not equally agreeable to the country that money should be held idle on the chance of such occurrences. There was a Famine Relief Fund amounting to many millions, and moreover, the Government, provided that it adopted a proper course of procedure, might at any time make large grants in aid of afflicted people. The House had raised objections to grants made on the occasion of the Ai-Gi earthquake, inasmuch as the procedure followed had been faulty, but the Government need never fear that there would be any reluctance to endorse State munificence exercised in a worthy cause and in accordance with constitutional provisions.

Mr. Suyematsu Kencho supported the Bill. He did not hesitate to say that if the question of the proposed measure's expediency were submitted to the constituencies there would be an almost unanimous vote in its favour.

Mr. Awaya Shinazo remarked that Mr. Suyematsu's position was somewhat ambiguous. One day he appeared as a Government Delegate; the next he addressed them from his place as a member. It was like listening to singing with too loud an accompaniment; one never could get a clear idea of either the song or the *samisen*.

Mr. Suyematsu said that, though a member of the House, he was a Government Delegate. This position was perfectly intelligible to any one familiar with the methods of constitutional Government. If Mr. Awaya had practical experience of being a Minister of State, he would find no difficulty in understanding these matters.

The House voted against carrying the Bill to a Second Reading.

Mr. Takata Sanaye now introduced his urgency motion. He was well aware, he said, of the old proverbs "do not follow a beaten foe" and "the hard-pressed rat will bite the cat," but in a case like the present, where the House's decisions had been despised and its dignity insulted, the strongest measures must not be shrunk from. Mr. Hoshi Toru, in the face of a vote by a large majority that the House no longer placed confidence in him, and in the face of an Address to the Throne, had persisted in retaining his seat, thereby showing contempt for the decisions of the House, and bringing it into disrepute.—(Mr. Tanaka Shozo at this point shouted out, "He is a fool.") The motion he had to propose was this:—"Hoshi Toru, member of this House, by resuming the Presidential seat to-day, has treated the vote of the House with contumacy, and has insulted the House. It is therefore resolved that he be handed over to the Disciplinary Committee for proper punishment." Some persons might imagine that Mr. Hoshi was entitled to resume his seat at the expiration of the sentence of a week's suspension previously pronounced against him, but that sentence had been entirely unconnected with the original vote of want of confidence; it has been necessitated by Mr. Hoshi's conduct when the motion for the vote was on the eve of debate. He had then declared that he should not respect the House's decision, and the contumacy displayed by that language had been punished by a week's suspension. He had now acted up to the declaration then made, thus showing his contumacy by deed as he had previously shown it by word. For this second act he must be punished a second time. He claimed, indeed, that his refusal to respect the House's decision was because of illegalities in the procedure adopted. Concerning that, nothing need be said except that Mr. Hoshi seemed unable to recognise an offensive object when it came under his eyes—(Mr. Tanaka Shozo in a loud voice, "He is the Government's beast,")—for while himself refusing to obey the dictates of the House and treating it with contempt, he ventured to accuse others of illegality. It was out of the question that the matter should be dropped at this stage. The House must assert its authority, and the only way to do so was to hand over Mr. Hoshi to the Disciplinary Committee.

Mr. Tatekawa Umpei had a question to ask. If Mr. Hoshi's appearance in the Presidential chair to-day constituted an offence, why had not his appearance there on the 30th ultimo and the 1st instant equally constituted an offence?—(Mr. Tanaka Shozo, "Hold you tongue, No. 300.")

Mr. Takata replied that the events referred to had occurred while the vote of want of confidence and the Address to the Throne were on the tapis.

Mr. Inouye Kakugoro said that, according to the wording of the vote of want of confidence, the question of resignation had been left to Mr. Hoshi's discretion. Further, the House itself had declared that its Address to the Throne did not exceed an expression of its own want of light and leading. Were they then entitled to punish Mr. Hoshi for not choosing to do as they wished, when liberty of choice was expressly reserved to him, and for not taking upon himself the consequences of a blunder which the House confessed it had made?

Mr. Takata replied that whatever might have been the wording of the vote of want of confidence, it amounted to an injunction addressed by the House to Mr. Hoshi, and he was bound to abide by it. As for the Address to the Throne, there could be no greater mistake than to suppose that it did not directly concern Mr. Hoshi.

The President said that as the motion before the House was for handing over a member to the Disciplinary Committee, the pros and cons of the step must form the subject of preliminary debate.—(Cries of "No, No," from all parts of the House, especially from Messrs. Tanaka Shozo and Shimizu Bunjiro.)

The President said that his ruling was in accordance with Art. 117 of the Law of the Standing Orders.—(Mr. Tanaka Shozo here shouted out a filthy expletive.)

Mr. Muramatsu Kameichiro moved, as a preliminary motion, that no debate take place.

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

The President, however, persisted in his ruling and the House became much excited.

Mr Ooka Ikuzo moved that the President's present ruling was a violation of the Standing Orders, he should be handed over to be Disciplinary Committee.

Mr. Yamaguchi Chiosaku supported the motion, but the President ruled that as he could not be punished for his interpretation of the Rules in the discharge of his Presidential duties, Mr. Ooka's motion was out of order.

Mr. Hashimoto Kintaro pointed out that it was for the Disciplinary Committee to decide whether Mr. Hoshi should be punished or not: consequently, no occasion existed for the House to debate the question,

Mr. Inouye Kakugoro recommended the President to expel the members who were creating such a disturbance.

Mr. Nakamura Yaroku recommended the President to resign his chair to the Vice-President, since his own acts were under consideration.

The President declined.—(Confusion.)

After some further altercation, the President, in deference to the urgings of many of the members, put the question to the House whether the propriety of handing him over to the Disciplinary Committee should first be debated, The House voted unanimously in the contrary sense.

Mr. Takata Sanaye's motion was then put and carried by a large majority.

The President then left the chair.

Mr. Ooka Ikuzo, pressed his motion for handing over the President to the Disciplinary Committee on the separate count that he had violated the Standing Orders in the discharge of his Presidential functions.

The House passed the motion, and proceeded with the Order of the Day.

Mr. Kagami Kahei having explained his Bill for amending the Law of the Houses, it was handed to a Special Committee nominated by the President. The same course was pursued with regard to the remaining Bills on the Order of the Day, and the House rose at 4.50 p.m.

WEDNESDAY, DECEMBER 13TH.

HOUSE OF PEERS.

The House met at 10.35 a.m., the Order of the Day being :—

1.—Report of the Chairman of the Petitions Committee.
2.—Report of the Special Committee on the Bill relating to the Period of Probation for Judicial Officers.
3.—First Reading of the Bill sent up from the Representatives for amending Law No. 84 of the 23rd year of *Meiji*.
4.—Appointment of a Special Committee to report upon the same
5.—Representation to the Government with regard to the Law of Election for Representatives of the Highest Tax payers in the House of Peers.

Prince Tokugawa Iyesato, Chairman of the Petitions Committee, reported that the total number of Petitions received by the Committee was 1,792, of which 436 had been presented every session since the first. Among these the Committee had decided that 4 should be submitted to the House; that 14, relating to railway construction, should be considered later on, in conjunction with others of a like nature; that 6 were not in accord with legal provisions, and that the remainder need not be laid before the House.

The Order of the Day being taken, Prince Tokugawa, on behalf of the Special Committee, reported in favour of the Bill relating to the period of Probation for Judicial Officers, and after a debate of some length, the House voted to carry the Bill to a Second Reading, and to proceed with it at once. The Second and Third Readings were passed.

The Bill for amending Law No. 84 of the 23rd year of *Meiji* was then entrusted to a Special Committee nominated by the President.

Mr. Takeguchi Kichiro, introducing the Representation relating to the election of members to represent the highest tax-payers, explained that according to the present law, when a vacancy occurred among such members after the 1st of April in any year, an election to fill the vacancy could not be held until June of the following year, the result being that the highest tax-payers in a City or Prefecture might find themselves unrepresented in a session of the Diet, since the latter met in November and rose in February. The Representation sought to have this defect remedied.

The House passed the Representation and rose at 1.37 p.m.

HOUSE OF REPRESENTATIVES.

The House met at 1.20 p.m., the Order of the Day being :—

1.—Third Reading of the Bill for abolishing the Export Duty on Cotton Yarns.
2.—Report of the Special Committee on the Bill for amending Imperial Ordinance No. 141 of the 22nd year of *Meiji*.
3.—Report of the Special Committee on the Bill for amending Law No. 4 of the 22nd year of *Meiji*.
4.—Report of the Special Committee on the Bill for amending the Law of Registration.
5.—Report of the Special Committee on the Bill for the Protection of the Aborigines of Hokkaido.
6.—Representation to the Government, introduced by Mr. Imaizoich ro, with relation to Moors and Forests.

The receipt of various Bills, etc., having been announced, the Government's Reply to Questions addressed to it by Mr Kawashima Jun and others was read follows :—

With regard to the first question, the Government affirms that the existing Treaties are validly enforced in fact as well as in name.

In the statement of Reasons attached to the above Question, it is alleged that the executive power in the Foreign Settlements is more or less usurped by the Foreign Consuls, and that as a consequence, the orders of the Japanese Local Officials cannot be directly enforced. But the municipal system in force in the Settlements of Osaka and Kobe was established by the provisions of a treaty with Foreign Governments that has been in operation since the fourth year of the *Keio* era, and is therefore a part of the existing treaties. Excepting these two Settlements, however, police functions, that is to say the duty of preserving peace and good order, the arrest of offenders and their prosecution are now actually exercised by the Imperial Government. Further, in the cases of Yokohama and Nagasaki, matters relating to engineering, sanitation, and police were all regulated by special treaty from the time of the *Bakufu* Government, but the provisions of that treaty were gradually abolished or relaxed until the Treaty ceased altogether from the 10th year of *Meiji* to have any practical existence.

As to the second question, its meaning is not quite clear, but in reply to the accompanying explanation, it may be stated that foreigners have no right of ownership in land even within the Settlements still less without them; further, that since there is no express clause in the Treaties forbidding business partnerships, persons entering into such partnerships are not directly liable to penalties. Of course it is contrary to the Treaties that foreigners should carry on business outside the Settlements, and therefore the Government has no reason to overlook such transactions. With regard again to the travelling of foreigners in the interior, that is limited to persons having received special permission from the Government. Should any foreigners travel beyond Treaty Limits without such permission, the Government never fails to take proper steps for their punishment.

With the exception of the above questions, none of those addressed to the Government calls for any answer.

(Signed) MUTSU MUNEMITSU.
Minister of State for Foreign Affairs.

The President announced that Mr. Osaka Katsutaku had been attacked on his way from Tsukiji to the House, but had received no injury.

Mr. Yamoto Yoshinori, explaining Questions addressed by him to the Government on the subject of river control, dwelt upon the sufferings of the people from inundations, and the apparent neglect of the Government to investigate the subject thoroughly.

Mr. Hatoyama Kazuo said that not having received satisfactory answers to his previous Questions about the *Chishima-Ravenna* lawsuit, he had addressed fresh Questions to the Government. In reply to his query why the Emperor's name had been used in bringing the suit, the Government had replied that the suit had been brought in the name of the Imperial Japanese Government. But it was beyond all doubt that the Sovereign's name had been employed in the arguments used to oppose the motion for a cross action, and he now wished to know why it had been so employed. In the second place, if the Government claimed that whereas the suit had been brought in the name of the Government, the counsel on the Japanese side had, of his own motion, used the Sovereign's name in his arguments, then the query arose, why had not proper steps been taken with regard to the counsel. But in point of fact, the Government could not claim anything of the kind, inasmuch as the counter-claim had been rejected by the Yokohama Court last June in consideration of the arguments in which the Emperor's name was employed, and His Majesty's prerogatives were asserted. Hence the Government must have had full cognisance of the affair, and must have allowed the case to go before the Appeal Court in Shanghai with a complete understanding that the same arguments would be adduced. In the third place, the Government had stated that it appeared in the Shanghai Court to answer the appeal in accordance with precedent. What was the precedent? He desired to have accurate information. In the fourth place, was the precedent pretexted by the Government a proper one to follow? There were many precedents to follow which would be obviously mischievous. For example, the Treaties did not impose upon the Government any obligation to protect foreign copyright or foreign trade-marks. Nevertheless, when a Japanese reprint of an American book appeared, the American Government had complained to the Foreign Office and the sale of the work had been suspended. Similar action had been taken with regard to English soap and German beer, the trade marks of which had been copied in Japan. Were such precedents as these to be necessarily followed? If all precedents were to be observed, every error made by the Government during the *Meiji* era would be repeated in perpetuity. There was no conceivable reason why British Orders in Council should have any binding force upon the administration of justice in Japan, and a Japanese suitor could not lawfully be required to follow a case in which he was plaintiff to a British tribunal in Shanghai. He trusted that the Minister President of State and the other Ministers of the Crown would attend in their places and give a full and complete answer to his Questions.

Mr. Haseba Junko moved that, in view of the national importance of the subjects referred to in Mr. Hatoyama's Questions, the President invite the Minister President of State and the other Cabinet Ministers to attend in their places and make answer.

The House agreed to let this motion stand over until the Order of the Day was concluded.

Mr. Otsubo Rishiu explained that the ships of the Nippon Yusen Kaisha, on their voyages to Korea, had hitherto touched at the Goto Islands and at Tsushima, but although the Company was in receipt of a large subsidy from the Treasury, and although the people of those islands had incurred considerable expense to secure the service, it had been abandoned. He desired to know the reason.

The Chairman of the Petitions Committee made a report of the Committee's progress. The number of petitions received since the last report was made had been 752.

The Bill for abolishing the Export Duty on Cotton Yarns was then passed through its Third Reading without debate.

The Chairman of the Special Committee asked for and obtained permission to defer the Committee's Report on the Bill relating to Imperial Ordinance No. 141

Mr. Takanashi Tetsushiro Chairman of the Disciplinary Committee, asked that the Order of the Day be changed so as to allow of the presentation of the Committee's Report on the case of Mr. Hoshi Toru.

The House agreed and proceeded, at 2.45 p.m., to receive and discuss the Report with closed doors.

The doors were re-opened at 4.20 p.m., and the President announced that the House had decided to expel Mr. Hoshi Toru.

The House took a recess and re-assembled at 5 p.m.

The House was counted out at 5.05 p.m.

THURSDAY, DECEMBER 14TH.

HOUSE OF PEERS.

The House did not sit, the Committees alone meeting.

HOUSE OF REPRESENTATIVES.

The House met at 1.25 p.m. for the purpose of electing a new President. The first ballot resulted as follows:—

Names.	Votes.
Kusumoto Masataka	111
Kono Hironaka	105
Abei Hankon	93
Kataoka Kenkichi	80
Sasa Tomofusa	77
Suzuki Shoji	70
Kikuchi Kuro	58
Haseba Junko	40
Hatoyama Kazuo	26

A final ballot was then taken for the first five on the above list, the result being:—

Names.	Votes.
Kusumoto Masataka	149
Kono Hironaka	108
Abei Hankon	119
Kataoka Kenkichi	67
Sasa Tomofusa	82

Hence the names of Messrs. Kusumoto, Kono, and Abei were sent up to the Emperor.

The House rose at 3.40 p.m.

CORRESPONDENCE.

LYNCH LAW IN THE UNITED STATES.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Though separated by time and distance from Japan and from your leader on Lynch-Law in the United States" (Sept. 30th, 1893), I do not think it right to let the matter pass without a word from one whose deep interest in the community for whom you write and in the people of whom you write, must plead pardon for re-opening so painful a subject.

For many years your paper has contended with the false impressions, the shallow judgments, the unjust and oft-times cruel aspersions, which find their way into print with reference to the Japanese people, and none the less has it stood for defence of the fair name and fame of the foreign community residing in Japan. It is therefore with regret that we note in the leader referred to just those same faults and failings which have been so plain to you in dealing with the views of others in reference to the social, civil, and moral tone of Japan and of its foreign population.

There is the argument, resting on the sensational newspaper article (how often you have held it up to scorn), the parading of ill-gathered statistics (how keen has been your blade into the lying form of truth-telling figures), the appeal to Judge Tourgee's statement, Judge Tourgee who stands alone as the reckless defamer of the South (how your righteous soul has been stirred by some ill tempered Japan-phobist): the inapt comparison of the Southern States to the West Indian Islands (with what skill you have often shown how ill odorous and odious mis-matched comparisons are); and lastly, there is the sweeping indictment of a whole people at the bar of editorial opinion—"a persistent and successful attempt ..... to keep the coloured population of the South in a hopeless condition of social, political and industrial inferiority"—an indictment framed I claim, in ignorance of the true facts, and with a Caligula like comprehensiveness that puts to blush Clement Scott and all the little Scotts who ever put a whole nation in the moral ditch. I do not believe you so intended it, but this is the way it reads on our side. No, Mr. Editor, I appeal to your English sense of fair play, no thing more and nothing less. Speaking for the best elements in the South, with you we deplore the prevalence of lynching—without you, we would do all we could to stop it. My own father adventured his life thirty years ago to save a criminal from lynching in my native town, and many like instances of brave men are on record to-day. The fact that the newspapers call the mob "the most distinguished Citizens" does not make them so. There is no defence for lynching in cases of homicide, but the state of the case is this, that in the Southern States any brutal crime, whether committed by black or white, is in danger of the sentence of Judge Lynch. White men are lynched in the South and lynched repeatedly, negroes lynch negroes. The other day, white men shot down a white desperado for beating brutally (not killing) an inoffensive coloured man. This last instance you say is exceptional. So it is, and so is the Coy case quoted by Judge Tourgee one as rare as the latter, and only quoted here to show the fallacy of a single instance. Why are more blacks than whites lynched? Because more crimes are committed by them, and the crimes accompanied by greater brutality. In Washington City, where the negro enjoys all the privileges of the "ward of the nation" he constitutes one-third of the population, and contributes nine-tenths of the crime. (See the last annual report by Maj. Moore, Superintendent of Police, D.C., U.S.A.) Note please that we do not defend lynching, but we do deny that it is a part of any plan to "wither the fruits of emancipation."

But the part of your leader where you discuss rape is, of the whole, the worst. In the South, a woman's honour is counted dearer than life. They may be mistaken, the breach of promise case, the divorce court, the cross-examination, may mark a higher type of civilization, but the South is yet in the rear. The seducer and the betrayer are as a rule shot without trial, and there is no colour line. You say that rape is the act of a lunatic, by a like use of words so is incest, so are other unnamed crimes, but before what English Court would a barrister invariably plead lunacy as a defence in such cases? That women in the South, in order to extort money, should falsely accuse a negro of rape is so pitiful an argument that to state it is to confound it. That the charge is brought by women of unsound mind, has no bearing on one in one hundred cases, is as evident. The shame, the humiliation, aye more, the poor wounded frames, the horrible bruises, the sickening wounds, plead mute witnesses against any suggestion save that of a horror which takes hold on hell. That mistakes are made sometimes as to the guilty party, is true, but no oftener, we venture to state, than mistakes in courts of law arising from circumstantial evidence.

Against the sweeping judgment upon the whole Southern people, I plead the large sums spent on negro education, the increase in their holdings of real estate, the protection they enjoy with reference to property, the general condition of the race as evidenced by investigators on the spot.

I have written at length and endeavored to show the errors of your leader. Let me say in conclusion that as a reader of the *Mail* for ten years, I cannot recall an instance in which your paper ever did such flagrant injustice to a whole people, and I am unwilling to believe you will let your verdict stand when you review the case.

Respectfully yours,

J. THOMPSON COLE,

1777, Madison St., Washington, D.C.

November 15th, 1893.

A LOCAL RUSKIN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Mr. Wores must consider himself fortunate in having elicited the brilliant essay on Art in general and criticism of his own work in particular, that appeared in a recent issue of the *Herald*, and the Yokohama community is to be no less congratulated on the discovery of a local Ruskin, who, although at present hiding his identity under the modest pseudonym of "Q." will not be long allowed to evade the penalty of genius.

Here in Japan we have so little opportunity of educating ourselves in the tenets of modern art and of becoming learned in its technicalities, that we find ourselves unable, when, once in a way some "travelling artist" (as "Q." gracefully phrases it) kindly gives us an opportunity of viewing his work, to express ourselves in correct artistic, terms to discourse on tones, values, technique, and chiaroscuro. We can only acknowledge the pleasure we feel in seeing, what appears, at least to us, a faithful rendering of bits of every day Japanese life, well known points of interest of our walks and rides, and the many colours of the changing year.

But "Q." knows better than this. A glance tells him whether the "School" has been the ponderous method of Munich or the fantastic impressionism of Paris, and he proceeds to offer some valuable hints which Mr. Wores can not fail to appreciate. Artists are too prone to ignore in their pictures the passing effects of cloud, sunlight, and atmosphere, and do not sufficiently study these phenomena. They are too anxious to make photographic reproductions of their subjects without considering whether the hour be early morn or dinner time. These points, "Q." remarks, should be more faithfully observed, as it is an indubitable fact that sunlight has an appreciable effect on nature, and it appears to him curious that Mr. Wores should have overlooked that important fact.

It is somewhat strange that we have not had the benefit of our local Ruskin's art opinions before, and it should be a source of gratification to Mr. Wores that it not his work which first evoked his criticism, but as "Q." says himself "there has not been so much as a single artist who has really succeeded in making by means of his productions thoroughly unexceptional counterfeit presentments of scenes and life in Japan." Dillon, Gay, Varley, Alfred East, La Farge, Alfred Parsons; none have succeeded in satisfying his cultivated and fastidious taste. They have failed and gone away. Where indeed shall we find a Turner for our Ruskin?

Perhaps some day "Q." will give the world the work of his own hand. No meretricious attempt to "show how many sketches can be made in a limited space of time," but the rich results of a long life's work. For, of course, "Q." is no rising star, his letter tells this much itself. As a certain French Artist remarked, on seeming a beautiful painting by an unknown hand, "*C'est la fin d'une vie.*" Only after years of the contemplation of nature, amongst the smiling paddy fields of Yokohama or the breezy slopes of Ikao could such mastery of expression be attained or such a specimen of transcendental impertinence and abounding self-conceit be written.

I remain, yours obediently,

X.

Yokohama, December 14th, 1893.

ASPECTS OF LIFE.

ADDRESS DELIVERED AT THE BIRMINGHAM AND MIDLAND INSTITUTE ON THE 10TH OCTOBER, 1893, BY SIR EDWIN ARNOLD, M.A., K.C.I.E., C.S.I., PRESIDENT FOR THE YEAR.

LADIES AND GENTLEMEN:—It is thirty-five years ago from the day when I last stood in Birmingham. More than a generation has, in fact, elapsed since, as a very young man, newly graduated at Oxford, I had the good fortune to be selected as a Master in your King Edward's School. And now a much greater honour—one far beyond my merits—has fallen upon me; to be chosen to address this important and enlightened Institute, in your famous, patriotic, and prosperous City. I should hold it an impertinence to dwell at any length on that which must be too obvious, my inability to discharge with becoming credit the responsibilities of such a succession. For, you have established upon the Records of your Institute, in its list of Presidents, a dynasty of such intellectual and social splendour, as hardly any other Association could rival. Finding myself in the place which they have rendered august, it is with true respect that I recall some among the names of my brilliant predecessors. That Master of all English hearts has spoken here—Charles Dickens—as well as those illustrious physicists Professors Huxley and Tyndall; and Lord Kelvin. The wide and gentle genius of my friend Sir John Lubbock has graced this seat; and the kindly learning of my old Tutor, Arthur Stanley; together with the research and the philosophy of renowned historians like Mr. Lecky, Prof. Keeley, and Mr. Froude. You have been addressed by a Primate of all England in His Grace of Canterbury; an Indian Viceroy in Lord Northbrook; by a chief of critics in Mr. James Russell Lowell, and by an accomplished Astronomer in Sir Robert Ball. The glory of these and other names which glow upon your catalogue during the past quarter of a century forbids to him who follows them here to-day any hope of being worthy of so grand an inheritance. He must regard himself as but a link of silver in the chain of gold, contented if the current of your high traditions passes safely by him; and relying for your indulgence on two qualities only; an appreciation of the eminence of his Antecessors, and a desire to show his regard for this important Institute, and his gratitude for its choice of him, by saying the best he may.

That galaxy of great minds to which I have alluded has illuminated well-nigh all possible topics of speech in this Hall. I have, indeed, asked myself with no small anxiety what was left which might be handled with freshness and profit, since it would not seem decorous to talk of science, of history, of education, and many other tempting subjects, after such commanding authorities. Still, experience, if any one, honestly stated, has a value; and seeing that I am here again, after so many years, it is natural to ask myself, and it may not be useless to answer briefly before you, what I have learned—and to what conclusions study, observation, travel, public toils, and private meditations have led me—upon life in general. Will it be worth while frankly to compare the aspirations of the youth of twenty-one with the realisation of the grown-up man of the world? Shall I venture once more, and for an hour or two, to become a Teacher in Birmingham? If you can have the patience to listen, I think I will have the courage to speak; and my address to-day shall therefore, be upon some aspects of Human Life, free of course, from all Theology and Politics.

I fear I must alienate certain friendly minds, and appear to commence by presumption, when I

say that I return to Birmingham just as convinced of what can never be proved as when I left it. I have found life in the highest degree charming and interesting, and this notwithstanding an ample share of what are styled,—sometimes I think, a little too querulously,—its "pains and sorrow." I quitted Birmingham in the pleasant beginning of my days, glad to live; I come back to it, after much experience and many labours, glad to have lived—well satisfied with my share in the world, and a resolute, philosophical opponent of those who love dismal dialectics and drape the Universe in the black hangings of pessimism. If there have been ages in which because it did not know much—our race had good reason not to hope much—the time seems to me to be now arrived when the despair which has been so fashionable grows foolish as well as needless. It is true we have inherited so much fear and superstition from the past; dogmatic religions and artificial moralities have wrought so much to degrade natural virtue and check instinctive joy; our inner vision is still so rudimentary and our sense-knowledge so limited, that I dare not say worse of the pessimists than that they seem to me stupid. As for that noble love of fact and truth which is at the bottom of sincere agnosticism, there is nothing, I think, to be more respected. We must not deceive each other with soft sayings. Ajax demanding light from Zeus, even though he must die in that light, is the immortal example of a faithful and valiant human spirit. Speaking from this place in 1877, Professor Tyndall well remarked. —"When facts present themselves, let us venture to face them, and let us be equally bold to confess ignorance where it prevails." But the day seems to be arrived when there is really so much to make us think well of the destiny of man; such fair reason to rejoice in the mere fact of existence; so large a promise of ever extending human knowledge and insight; such general softening of manners, spreading of intelligence, and enlarging of average happiness; that it appears more becoming for Man, the chief, at least, of animals, to be singing with the lark in the sky than croaking with the frog in the swamp. Mahommedans follows a habit of reciting their morning formula of praise—the *Fatihah*—as soon as the light enables them to distinguish a black garment from a white one. I think we also have by this time passed far enough through the night of ignorance and fear to discern in our beliefs what is the black of wilful blindness from the white of rightful hopefulness, and to realise the truth of that fine line of Mr. Frederick Myers:—"God will forgive us all but our despair."

From the lowest points of view, hope is very cheap, and gladness is a sovereign medicine. Consider the social, moral, and individual advantages of a cheerful view of life contrasted with the cheerless view. Sunshine has not a stronger effect in developing the beauty of flowers and the form of leaves than radiance of mind and lightness of heart in bringing forth all which is best in men and women. We have partly found this out as regards children, and Society conspires pretty generally now-a-days to render their early years happy. The Japanese knew that high duty, two thousand years ago, and possess in consequence the best mannered and most joyous little ones in the world. But why stop at childhood? I should like to see the pastimes and recreations of the people made henceforth a department of administrative solicitude. I should like to have a Minister of Public Amusement sitting in every Cabinet; and Municipal Councils spending rates royally upon new popular pleasures of the right kind. There is nothing better than to be happy; joy is the real root of morality: no virtue is worth praising which does not spring from minds contented and convinced, and free of dread and gloom. No religion was ever divine which relied on terror instead of love; and no philosophy will bear any good fruit which propounds despair and deduces annihilation. This is where, by their own true instincts the great Poets have done so much more for mankind than most of its benefactors—delighting as they do in life and preserving amid its deepest mysteries and hardest puzzles a divine serenity about origin and purpose. Observe our English Shakespeare! How calm, how complacent! How assured his glorious genius always abides! A page of him taken almost anywhere—set beside a page of modern pessimism—is like the speech of a prince in his pleasure-house compared with the moanings of a sick wretch in a Spital. All genuine Poets—from Homer to Browning—are radically joyous. Keats writes:—

> They shall be accounted poet-kings,
> Who simply tell the most heart-easing things.

And Hafiz says:—"It was whispered of me in Shiraz that I was sad, but what had I to do with sadness?" Art, in all its highest forms, bears no message so imperative as to emphasise the beauty and maintain the dignity and delight of life, and you may judge first class writers and painters, as we shall some day judge philosophers, by their fidelity to this wholesome errand of joy.

Poets, however, are not much accepted as authorities in certain quarters; and beyond doubt we must have better reasons than their melodious verses furnish, if we are to be securely glad of life, and serenely unperturbed by death. Yet, upon the face of facts, is life—even were it transient—so bad a thing as some people make out? Look at common modern existence as we see it, and note to what rich elaboration and large degrees of comfort it has come. I leave aside for the moment uncivilised nations, and the bygone struggles of our race; its wars and woes; its tyrannies and superstitions; all of which History has greatly exaggerated, not telling us of the contemporaneous contentments. I invite you briefly to contemplate an artisan's existence in your own Birmingham. Let alone the greatness of being an Englishman, and the supreme safety and liberty of his daily life, what King of old records ever fared so Royally? What magician of fairy-tales ever owned so many slaves to bring him treasures at a wish? Observe his dinner board! Without being luxurious, the whole globe has been his serving-man to spread it. Russia gave the hemp, or India or South Carolina the cotton, for that cloth which his wife lays upon it. The Eastern Islands placed there those condiments and spices which were once the secret relishes of the wealthy. Australian Downs send him frozen mutton or canned beef, the prairies of America meal for his biscuit and pudding, and, if he will eat fruit, the orchards of Tasmania, and the palm woods of the West Indies proffer delicious gifts, while the orange groves of Florida and of the Hesperides cheapen for his use those "golden apples" which Dragons used to guard. His coffee comes from where jewelled humming-birds hang in the bowers of Brazil, or purple butte flies flutter amid the Javan mangroves. Great clipper ships, racing by night and day, under clouds of canvas convey to him his tea from China or Assam, or from the sunlit Singalese Hills. The sugar which sweetens it was crushed from canes that waved by the Nile or the Orinoco: and the plating of the spoon with which he stirs it was dug for him from Mexican or Nevada mines. The currants in his dumpling are a tribute from classic Greece, and his tinned salmon or kippered herring a token from the seas and rivers of Canada or Norway. He may partake if he will of rice that ripened under the hot skies of Patna or Rangoon; of cocoa, that "food of the gods" plucked under the burning blue of the Equator. For his rasher of bacon, the hog-express runs daily, with 10,000 grunting victims, into Chicago; Dutch or Britanny hens have laid him his eggs, and Danish cows grazed the daisies of Elsinore to produce his cheese and butter. If he drinks beer, it is odds that Russia and Bavaria have contributed to it the barley and the hops; and when he has finished eating it will be the Mississippi flats, or the gardens of the Antilles, that fill for him his pipe with the comforting tobacco. He has fared—I say—at home as no Heliogabalus or Lucullus ever fared; and then, for a trifle his daily newspaper puts at his command information from the whole globe, the freshness and fulness of which make the news-bearers of Augustus Cæsar, thronging hourly into Rome, ridiculous. At work, machinery of wonderful invention redeems his toil from servitude, and elevates it to an Art. Is he fond of reading? There are free libraries open to him, full of intellectual and imaginative wealth. Is he artistic? Galeries rich with beautiful paintings and statues are prepared for him. Has he children? They can be excellently educated for next to nothing. Would he communicate with absent friends? His messengers pass in the Queen's livery, and bearing his letters everywhere by sea and land; or in hour of urgency the Ariel of electricity will flash for him a message to the ends of the Kingdom at the price of a quart of small beer. Steam shall carry him wherever he would go for a penny a mile; and when he is sick, the charitable institutions he has too often forgotten in health, render him such succour as sick goddesses never got from Æsculapius, nor Ulysses at the white hands of Queen Helen. Does he encounter accident? For him as for all others the benignant science of our time, with the hypodermic syringe or a waft of chloroform, has abolished agony; while for dignity of citizenship he may help, when election-time comes, by his vote, to sustain or to shake down the noblest Empire ever built by genius and valour. Let fancy fill up the imperfect picture with those thousand helps and adornments that civilisation has brought even to lowly lives; and does it not seem stupid and ungrateful to say as some go about saying that such an existence, even if it were transitory, is not for itself distinctly worth possessing?

But will it last? That ordinary human life is fairly agreeable stands sufficiently confessed by the fact that people want it to go on in the same way for ever. Very few, even among our gloomiest pessimists, appear to be in any particular hurry to die. And they, too, are obliged to allow that human life exhibits everywhere an almost universal advance in social elevation and range of perception. Two fatal blows, among others, have fallen upon the old narrow minded theologies and philosophies. One was the Copernican discovery that instead of being the centre of things, furnished with sun, moon, and stars for lamps, and created as the sole care of Heaven, our globe is but a small obscure islet of the celestial archipelago, an almost insignificant speck in the galaxies of glory-filling space. The chief religions of the world have not even yet adjusted their doctrines to the great verities of Galileo and Newton, although they will have to adjust them. A second revolutionary announcement which has altered bygone ideas is that of the revealed vastness of geological time followed by Darwin's "Origin of Species." Modern Astronomy and Evolution have silently swept away "dark-tangled schemes of sad salvation," and the belief in special creations. It seemed at first to some conservative minds that all was hereby lost for human hope and pride, if we were indeed so closely akin to lower life, and so humbly placed in the stellar systems. But those prodigious truths have really enhanced unspeakably the dignity and value of human existence. If Earth knows now that she is only, as it were, a bit of drift-wood in the "blue Pacific of Infinity," she has also learned that she influences by attraction every orb in the sky, and is influenced by every orb. The descent of man from an ascidian mollusc immediately implies his ascent towards unimagined perfections. If we started so low down, we have already climbed up most promisingly. The amphioxus has no cerebrum at all: the halibut, as big as a man, possesses that organ in size smaller than a melon-seed; while the cranial capacity of the Australian savage exceeds that of the gorilla by ten cubic inches, and our Birmingham artisan's skull is better than the "Black Fellows" by forty cubic inches; to say nothing of those convolutions of the brain in the civilized man which are its most important feature. There, by the way, is the physical throne of that consciousness which puzzle the boldest materialist and obliges him—if really scientific—to confess his ignorance. An illustrious interpreter of the ways of nature, Professor Tyndall, asked from this very place, "What is the casual connection, if any, between the objective and the subjective—between molecular motion in the brain and states of consciousness? Does water think and feel when it runs into frost ferns upon a window pane? If not, why should the molecular motion of the brain be yoked to this mysterious companion, consciousness?" His answer was, "I do not know, and nobody knows." In the same honest spirit, Dr. Burdon Sanderson said in his Address this year to the British Association at Nottingham: —"Between sensation and the beginning of action, there is an intervening region which the physiologist willingly resigns to psychology, feeling his incompetence to use the only instrument by which it can be explored, that of introspection." I quote these not to lead you into the wilderness of physiology, but merely to show that science has no final or final word to say about the prospects of continuous Life. She capitulates here by the lips of two of her truest and most fearless spokesmen, to the unseen and the unknown. Do not therefore think that you are warned off from endless hope and utmost probabilities of immortal and ever-increasing gladness by the scalpel of the brain-doctor or the dyspeptic logic of the Agnostic. A boundless aspiration is not only cheap, but strictly reasonable; and what has come from evolution in the visible region is nothing to what may come from it in the invisible. The dove of right Reason can bring you back a branch of olive from the waste of physiological waters, where the raven of Unfaith never finds so much as a single leaf.

The "Cosmic process," as Professor Huxley calls it, has led us thus far; yet that justly famous expositor of science, in his Romanes Lecture at Oxford, delivered on the 18th May last, arraigned the cosmos for immorality and declared that "the ethical progress of society depends not on imitating the Cosmic process, but on combatting it." I could not speak of my illustrious predecessor here without gratitude and admiration, and should ordinarily distrust myself in differing from him. But so luminous a mind certainly over-looked the fact that the ethical faculty and the ethical ideal which he contrasted with the course of nature, have likewise come, by evolution, forth from the cosmic process, just as much as those things that shock

h m in the natural world. As I have written in my "Light of Asia,"

"Out of the dark it wrought the heart of man,
Out of dull shells the pheasant's pencilled neck:
Ever at toil it brings to loveliness
All seeming wrath and wreck."

"It is not marred nor stayed in any use
All liketh it the sweet white milk it brings
To mothers' breasts, it bri gs the white drops, too,
Wherew th the young snake stings."

"Reckless of Good or Evil," writes another highly enlightened metaphysician—Mr. John Fiske of America—"natural selection develops at once the mother's tender love for her infant and the horrible teeth of the ravening shark." But the cosmic process is not immoral on that account; not even cruel! On the contrary, it is supremely equitable and ultimately tender. It is as sedulous to provide the shark with the means of living as the newborn heir of a Queen with his natural food. Professor Huxley accordingly erred, I think, in saying at Oxford:—"The practice of that which is ethically best—what we call Goodness or Virtue involves a course of conduct in all respects opposed to that which leads to success in the Cosmic struggle for existence. In place of ruthless self-assertion it demands self-restraint. In the place of thrusting aside or treading down all competitors—it requires that the individual shall not merely respect but shall help his fellows. Its influence is directed, not so much to the survival of the fittest as the fitting of as many as possible to survive." Yes, but the nobler specialised justice reached in this passage is exactly what has been developed out of the initial imperfections of the natural course. The morality has come forth from the "immorality." Out of the simple instinct or gregariousness we see Nature making something like citizens even of bees and ants, penguins and seals—teaching rudimentary ethics by lessons of the savage struggle itself; and in the brain and heart of man she attains to that goal of all morality embodied in Christ's Golden Rule. Is there not a clear demonstration here of the fundamental and far-off beneficence of the cosmic process, if we will only get two foolish notions out of our heads, one that the Universe was made for us alone, and the other that death is an ending and an evil? I do not know how Mr. Huxley could more nobly justify the ultimate objects of the cosmic process than, being as he is its brilliant product, thus to reproach it with precisely what he has derived from it. It is Coriolanus at the head of his army splendidly rebuking his mother Volumnia, by warrant of those very qualities which he drew in at her breasts. Well might she say:

"Thy valiantness was mine, thou suck'dst it from me
But owe thy pride thyself."

The gifted orator put the problem back, I readily confess, into a very different region when he asked me at Oxford, "Why among the endless possibilities open to omnipotence—that of sinless, happy existence among the rest—should this present actuality be selected in which sin and misery abound?" That eternal dilemma puzzled the Buddha himself; as in the "Light of Asia" where Prince Gautama says:

"Since if all powerful—He made us so,
He is not good, if not all powerful,
He is not God."

There is no present answer to it. Mr. John Stuart Mill in a valuable letter which I possess upon the question, wrote me:—"I can believe in a God or Gods, but not, as matters appear to stand, in an Omnipotent Deity." As to the "sin and misery" business, however is it not now-a days absurdly exaggerated? I have alluded to the almost universal willingness to live which of itself shows that pleasure and satisfaction largely preponderate over pain and discontent. The average number of days of sickness in every decade for each man is said to be only sixteen. Under rules of scientific hygiene and principles of health better practised, our span of life—be this desirable or the reverse—has by the evidence of insurance societies considerably increased. The power of mitigated physical pain to terrify or trouble is practically at an end with the general use of those benign anæsthetics which have brought a new era of confidence to the hospital and sick room, and taken away all its horror from the surgeon's knife. Doubtless, to judge from your average daily journal, murders and suicides, crimes and catastrophes, wars and feuds, and frauds would seem to remain the staple of the human record. But be it remembered that for obvious reasons all our worst and darkest is collected there. One might as well judge of public health by the painful cases described in a Medical Publication as of the vast mass of solid human happiness and innocent living joy by the daily catalogue of these really trivial exceptions to it. As for "sins" (the most serious of which are only such as are malicious), though the population increases, they seem steadily to diminish. We had 87,668 "habituals" in 1868, now the evil roll is only 52,153. When the population was 19,257,000 in 1889 there were 2,589 persons undergoing penal servitude; now with a population of 27,830,179 the number is only 947. In 1878, the entire number of prisoners in our gaols was 20,833: the entire number at the same date last year was 12,663, though the population had increased by six millions. Pauperism is also declining. In 1870, 1,079,391 persons were in receipt of relief: in 1891, with an addition of more than seven million inhabitants, there were only 774,905. The upshot of these figures—without pressing them too much—seems surely to be that the "cosmic process" in our own little corner of the universe is not doing so badly.

If in truth that process contained and developed no other wonder of love and wide reaching purpose than the far-reaching instinct of motherly affection, Professor Huxley's indictment against it would have to be abandoned. I say nothing here of the beauty which its action has produced on land and water; in wood, and field, and garden; of the glories of form and colour, and the delights of sound and taste and touch; nor of the faculty to rejoice in these which it has also bred out of the salutary struggle. I would be content to trust a defence of the cosmic scheme to that one profound and ever-present passion for futurity which is at its centre; the love namely of the mother for her offspring. Why, except for glorious ultimate ends and rewards, should it exist in all its strange gradations from the fish which feels the diluted rudiments of its mandate, to the fierce and fearless maternal devotion of the tigress and bear; and the unwearying and unselfish tenderness of the Christian mother? Why should the eider duck pluck the down from her breast to make her delicate nest, at one end of the scale; and the Princess Alice at the other die so divinely from the kisses of her sick child, if the Universe were not bound together in some sweet secret of a common life; and in some far-off profits of a vast hidden partnership, as to which female parents are the semi-conscious trustees. I have always greatly admired an answer made to me by an American woman when I was wondering at the patience of a nursing wife with her complaining child, and at the general marvels of maternal care throughout nature. "Well! Stranger!" she said, "God Almighty can't be everywhere at once, and so I guess he invented Mothers."

Nevertheless, in spite of parental protection and individual effort to live—the "cosmic process" no doubt, has plenty of innocent victims, and to some minds seems to be likely to end by cutting short all which it has developed, including progress, pleasures, arts, learning, races, realms, and eventually the planet itself; nay even the solar system amid which these were produced. But that is only in the Visible Sphere. The Cosmic Progress perhaps secretly mocks at those whom it thus succeeds in deceiving for their own good, like a mother administering hidden medicine. Its strenuous purpose, in the midst of its slaughters and by means of its very terrors and cruelties may be to make everything strive to live. If its tribes and races knew too much, they would not be sufficiently anxious to exist. Two conditions have been necessary to the full exploitation of our earthly passage, dread of death and ignorance of the future. Nature hoodwinks her children everywhere. When she has trained a bird to feed on butterflies, she teaches the butterfly to look like the dead leaf of a tree; when she has given the fish hawk his keen vision, she makes his food—the fish—take on the colours of the weeds and riverstones to escape him. She has put man to school here with Death and Pain and Want for his stern teachers; but possibly it is only because we are children that we think our instructors merciless. Deeper down we evidently know better than to be afraid of them. Note, in those moments when they leave a man to the best and greatest that is in him, how we let go and give up of those lower instructions. Pliny says in vigorous Latin that the cessation of the breath is probably the most delightful moment in life, and I myself have conducted to the dinner-table a charming actress, twice drowned (and twice restored to consciousness), who protested that dying was the nicest sensation she knew.

As is written in my "Death and Afterwards," "What a blow to the philosophy of negation appears the sailor leaping from the taffrail of his ship into an angry sea to save his comrade, or to perish with him! He has never read either Leopardi or Schopenhauer—perhaps not that heavenly verse, "Whoso loseth his life for my sake, the same shall save it." But arguments which are as far beyond dismal philosophies, as the unconscious life is deeper than the conscious, sufficiently persuade him to plunge. "Love that stronger is than death" bids him dare, for Love's impetuous sake, the weltering abyss; and any such deed of sacrifice and heroic contempt of peril, in itself almost proves that man knows more than he believes himself to know about his own immortality. Every miner working for wife and children in a "fiery" pit; every soldier standing cool and firm for his country and flag in the face of instant death, offers a similar endorsement of Walt Whitman's indignant sentence:—"If rats and maggots end us, then alarum! for we are betrayed." It is quite possible that in respect to the mysteries of life and death we precisely resemble the good Knight Don Quixote, when he hung by his wrist from the stable window and imagined that a tremendous abyss yawned beneath his feet. Fate, in the character of Maritornes, cuts the thong, with light some laughter; and the gallant gentleman falls—four inches!

As to this aspect of the question, Asia—from which you have derived all your past religious ideas, and from which you have many more to learn—is far in advance of our West. St. Paul's great declaration, "The things seen are temporal; the things not seen are eternal"—accepted timidly here by the pious, but regarded as a mere phrase by materialists—is in India a common place of daily certainty. Nobody there doubts the continuity of life, any more than he doubts that the setting sun will rise again, the same orb, tomorrow. I have heard a Mahratta woman, while chiding her child for spilling milk, exclaim,—"You must have been a very bad girl in your last life!" The popular reason why Hindoo widows do not remarry is because the loss of a betrothed or wedded husband is looked upon as the fatal expiation for some extreme offence in a previous existence, to be borne with patient continuance in this one; on which condition the family of the deceased husband will faithfully maintain the widow, as still belonging to the dead man, and to be surely reunited with him. This was the basis of the heroic though tragical custom of "Sati," or widow-burning, one of the grandest defiances ever flung by human faith and love at the face of the doctrine of annihilation. The respect for the animal world, general in Hindoo and Buddhist societies, is founded, with the tenet of transmigration, on the same fixed belief in the endurance, and evolving advance, of every individual being. No spot is empty of life to the Indian mind. A Deccani or Bengali labourer, at his meal in the jungle, throws behind him fragments of his chupatty for the invisible Bhuts and Prets to eat. In India, as in Japan, festivals (*shraddhas,*) are made for the Dead with scrupulous regularity, at which their seats are duly set. The East is saturated with the mental and social results of this universal acceptance of the notion that individual life is inextinguishable. A dignified calm spreads throughout the Oriental populations, a permanent unenquiring placidity—noticeable by the most careless or prejudiced eye. India would never indeed have invented the locomotive, or the Gatling gun—but her poorest peasants, by inheritance from profound philosophies, and by the religious atmosphere of their land, stand at a point of view far beyond the laboured subtleties of a Priestley or a Hegel. And if they could be familiar, as you are, with the splendid achievements and vast researches of modern science they would not, any the more, abandon their fixed faith in the Unseen and Unknown. Rather would they think it odd that Western savants would teach the law of the Conservation of Forces to abandon it when the highest and most elaborated of all forces come into question; that they should study cell-life under their microscopes and not perceive that the same Protamœba they examine—that shapeless jelly—has been living 40 thousand years, as certainly as 40 minutes; that an illustrious chemist like Prof. Dewar should compress the air we breathe into a skyblue liquor, and, when he lets it loose again, fail to suggest to his audience that what their eyes see of the real life and furniture of the Universe is next to nothing. The wisest Indian philosophy has never boggled, like ours, over that silly word "supernatural." The Upanishad says:—"What is in the Visible, exists also in the Invisible, and what is in Brahm's world that is also here." The Ultimate, albeit Unreachable, is as real to the Asiatic mind as Force, and in the Bhagavad-Gita Arjuna is actually permitted to behold the embodied Infinite. Indeed it is rather this present existence which India regards as the illusion, the *Maya*. To see the stars we must wait for night, and to live we must die. Nor is it uninteresting to note in Hindoo classics, how these large and happy serenities of Oriental view have softened personifications of Death. I have translated from the Sanskrit of the Mahabharata*, among other episodes, two remarkable examples of this. In one, the Princess Savitri follows Yama, the god of death, who has taken away her husband's soul, and sings to him

such beautiful words of love and faith, that, bestowing many boons to show his delight in her virtue, the vanquished Deity at last gives back to her the spirit of her lord. In the other, "The Birth of Death," it is represented how Death was created by the Supreme Being in the form of a most lovely and compassionate girl, to lighten the earth of that growing burden of living things, of which it had complained. But Death, "Mrityu," is pictured as too full of love and tenderness for all living creatures to kill them, until "Bhagavan" turns the tears which she has shed upon his hand into diseases, and ordains that she shall bring lives to an end indirectly by these.

"So passed she from the Almighty Presence, mute,
The tender Angel made to slay mankind:
And works the will of Heaven, and slays what lives,
Not with her own kind hand, she doth not kill!
By ills and pests which foolish pass ons breed
As many as those pitying tears that rolled
Forth from her eyes, they perish."—*Indian Idylls.*

I do not presume to say that Asia is wiser than Europe, or than our illustrious agnostic Professors, but her children live more happily and die more easily. Since it is not the eye which sees, or the ear that hears, but the self behind those instruments; they believe in that self and discount by peace its assured perpetuity. Masters of metaphysics, they sweep the puzzle of Being aside with one decisive maxim:—"Never can the thought know the thinker." Of that which daunts and troubles us, the boundless mystery of the Universe, their quiet genius has made a daily delight, congenial to the limited powers but illimitable desires of the ever-awaiting Soul. They have perceived, without seeking to explain, the two supreme celestial laws that govern the Cosmos,—Dharma which is Love, and Karma which is Justice. By light of these they have partly discerned how, under an immutable and sometimes seemingly pitiless equity, all things will advance from good to better, and from better to best, until it be time for a new and higher order. "Ahimsa," therefore, "the doing no injury" is their central commandment, as it was that of Christ in the "Golden Rule," and as it is the last word of Hafiz in his Persian verse:—

"Do no one wrong, and then do what thou wilt,
My statutes recognise no other guilt."

They await death, not as some of us do, like complaining prisoners under a tyrannical sentence without appeal, attending with gloomy courage the last day in this condemned cell, the flesh—but rather like glad children of a Great Mother, whose will is sweet and good, whose ways are wise, and who must lull them to the kind brief sleep of death, by and bye, in order that they may wake ready for happier life, in the new sunshine of another and a larger Daylight.

If you would banish the evil taste of Pessimism from your lips, read sometimes a page or two of the "Leaves of Grass." There lived recently that great and gifted, if somewhat outspoken, Poet of the West, my dear and venerated friend Walt Whitman, who had somehow learned this vast Asiatic complacency, which comes from acceptance of the cosmic process, and from good will to all its living things. Walt Whitman will tell you that:—

"Whatever happens to anybody it will be turned to beautiful results:
And nothing can happen more beautiful than death.

He will say:—

"All goes onward and onward—nothing collapses!
And to die is different from what anybody supposed it, and luckier!"

He sings right cheerily

I know I am deathless;
I know this orbit of mine cannot be swept by a carpenter's compass;
I know I shall not pass like a child's carlacue cut out with a burnt stick."

Yes! I read a little sometimes in that large minded and clear-sighted Master—alive with the vast new life of America—who has seen with eyes divinely opened and inspired heart how persistently kind is the unkindness of the Cosmos, and how the beginnings of its work point to far off consummations alike in the visible and invisible. The Cosmos is not immoral for him! He writes:—

"I believe a leaf of grass is no less than the journey work of the star,
And the pismire perfect; and a grain of sand, and the egg of the wren,
And the tree-toad, a chef d'oeuvre for the highest;
And the running blackberry, an adornment for the parlours of heaven;
And a mouse, miracle enough to stagger sextillions of infidels."

In his wide affection for humanity, the sense of comradeship with all life, high or low, you may perceive what Buddhism taught to Asia, and what Christ tried to teach to Christendom, that the secrets of content, the spells which bring us into harmony with the cosmic process, are faith in its purpose, work for its furtherance, and fixed goodwill towards all creatures (*Ahimsa* the desire to help, the readiness to love), which qualities the Cosmos has cheaply evolved by rivalries, and destruction, and the temporary wretchedness of hating. Not is it only inspired teachers, and authentic poets who have seen this. The shrewdest minds all know it. Talleyrand was sharing once in a round game of "questions and answers" at a French Chateau, where one of the queries was:—"What is the proper object of Life?" Which received an almost unanimous reply in the word, "Happiness." The next question ran:—"What is the secret of securing it?" But this caused deliberation, and greatly perplexed a young and gay Countess, who accordingly consulted in private the Prince of Benevento. That cynical old Diplomat, who had seen and done everything, and had no illusions left, exclaimed with impetuous simplicity, "Le secret du Bonheur, chere Madame! il n'en a qu'un. a Bienveillance!"

To what point then have I to day ventured to lead you? To this! I say this to my age:—"Sursum Corda!" Lift up your hearts! I say that it seems time for enlightened minds to lay aside misdoubt regarding the continuity of individual life, as wholly contrary to the balance of evidence—to taste the easy pleasure of trust in the cosmic process, as gradually justifying itself; to become partners in the objects of that process by active, earnest, rejoicing good will to all that live, and so to pass at last out of the rudimentary stage where fear and incertitude have been necessary and natural. We must put aside that deeper question which Mr. Huxley asks, as to why it all is so; and must take things as they are. Nay; there is a charm and an advantage in this similar to the delight which a healthy man feels in breathing the air in which he was born, the delicate medium which so softly and fittingly surrounds him. Mr. Ruskin has admirably written:—"Our happiness as thinking beings must hang on our being content to accept only partial knowledge, even in those matters which chiefly concern us . . . Our whole pleasure and power of energetic action depend upon our being able to breathe and live in a cloud; content to see it open here and closing there, delighting to catch, through the thinnest films of it, glimpses of stable and substantial things; but yet perceiving a nobleness even in concealment, and rejoicing that the kindly veil is spread where the intempered light might have scorched us, or the infinite clearness wearied." If, as seems certain, the social virtues have been evolved out of the social alliance forced upon Man by the fierce and universal struggle of life, then we will not call the Cosmos immoral. And if, out of the uncertainty that hangs over Death and the Future have sprung—like flowers in a shadowed place—courage and self sacrifice; faith and love; poetry, art, and religion—we will not call the "Cosmos" blundering. It it be keen necessity that has sharpened wits, deadly dangers that have bred courage, anxious fears that have produced faith and aspiration, and Death that has intensified and glorified Love; we will not think the Cosmos cruel. Among Mr. Walter Besant's charming works is one remarkable book entitled "The Holy Rose," in which that ingenious author draws a thoughtful and instructive picture of Society relieved from the laws of change and dissolution. A German savant has discovered the elixir which prolongs human life indefinitely, and nobody any more in this new city of hard facts grows old or in any way alters. A vast and featureless equality is established, a ghastly democratic sameness; everybody is like everybody else and takes an idle share in the common commodities which all powerful science commands, instead of more happily joining under the shield of a common justice, in the old fashioned common struggle. The end is a superb but miserable monotony; which is broken up at last by a glad return on the part of the leaders in the Improved Order to the pleasant anxieties and agreeable mysteries of Life as we also day know them. I neither ask you, nor am I competent to ask you, to live any other life. It has been good enough, and sweet and wonderful enough for me, and I rejoice to believe there is no end to it and nowhere any limit to what we have to earn. It would be death indeed, if there were any such boundary fixed! Never can "the thought compass the thinker," and never shall we get nearer, nor need we wish to get nearer, to a final definition of the infinite existence than that mystical verse from the Sauscrit:—

"He is unknown to those who think they know
And known to those who know they know him not."

But my humble contention is that, having now such ever-augmented glimpses of the wisdom and benignity of the cosmic process, we ought all to begin henceforth to import into life a quite new delight, an entirely fresh solace, a very much happier comradeship and confidence. If Epictetus, the lame Phrygian slave, could cry "Lead me Zeus and Necessity withersoever ye ordain, I will follow," an enlightened Englishman to-day might—I think—repeat, at once with the largest freedom of the philosopher and with the lowliest simplicity of the child, neither attaching himself to any special dogmas nor detaching himself from the Eternal Love, which is the last and largest and truest name for God, those words that fold the wings of the soul, and stay the beatings of the heart—"Thy Will be done!"

YOKOHAMA SKATING CLUB.

The annual meeting of the Yokohama Skating Club was held on Tuesday evening at the Club Hotel. Mr. C. D. Moss was voted to the chair, and there was also present Messrs. W. W. Campbell, H. V. Henson, E. R Morriss, C. S. Averill, and W. W. G. Ross.

The following accounts were taken as read:—

TO THE MEMBERS OF THE YOKOHAMA SKATING CLUB

There was no meeting of this Club held last season. Although duly advertised, only two men put in an appearance. The accounts for the previous season having been placed before the members, in the form of a circular, and the support of a sufficient number to pay expenses, being secured, the Club was carried on by Mr. Campbell and Mr. Averill, of the old committee, on the same basis of cost as the previous two years.

The season proved a most successful one. Owing to unusually early frosts, we had our first skating on the morning of Dec 19th During the season we had skating 64 times: 34 mornings, 24 afternoons, and seven times after dinner. Twenty-two new members joined the club, and we had in all nearly seventy names on the list.

This is, so far as known, the best record ever made by the Club. Christmas Day is the earliest date in previous years for the beginning of the skating, and 46 times is the best record of the duration of the skating, and the membership list was probably larger than ever before.

Attached to this report will be found a record of the temperature, direction of the wind, condition of the ice &c., during the season, and also the Accounts of the Club.

C S, AVERILL.

Yokohama, December 5th 1893.

SEASON 1892-1893.

E. & E. O.

Yokohama, December 5th, 1893.

C. S. AVERILL.

Mr. AVERILL proposed, and Mr. CAMPBELL seconded, the adoption of the report and accounts, and the were carried unanimously.

Mr. H. V. HENSON proposed that Messrs. C. S. Averill, W. W. Campbell, and W. Sutter form the Committee for the following year.

Mr. E. R. MORRISS seconded.—Carried unanimously.

A discussion arose as to the disposal of the Club's balance.

Mr. CAMPBELL suggested that a band might be engaged for some nights during the season

Mr. MORRISS thought that the suggestion was an excellent one.

The CHAIRMAN opined that there was no necessity carry to forward a large balance from year to year.

Mr. HENSON thought that the members had every confidence in the new committee and that the matter should be left to them

The CHAIRMAN said that would be the best thing, but he thought that if it was known that on good freezing nights a band would be engaged, the membership would be increased.

Mr. H. V. HENSON proposed a hearty vote of thanks to Messrs. Averill and Campbell for their admirable efforts in backing up King Frost last season and helping him to provide good skating.—Carried unanimously.

A vote of thanks to the Chairman concluded the proceedings.

THE PHOTOGRAPHIC SOCIETY OF JAPAN.

A regular meeting of the above mentioned Society was held at the rooms of the Geographic Society (Chigaku kiokai) Nishi Konya cho, Tokyo, on the 8th inst., at 5 p.m., Prof. J. Milne in the chair. The minutes of the last meeting, having appeared in the *Japan Mail*, were taken as read.

The following gentlemen were duly proposed seconded, and balloted for. They were unanimously elected. Capt. W. H. Forbes and Messrs. L. Brower, C. M. Duff, Kano, Emil Marx, and K. Sato.

Mr. Kajima Seibei showed a panoramic camera for working films 45 × 16 inches and including an angle of about 120°. The principle of the camera is as follows:—The film is placed in a flexible dark slide that can be bent into a circular form constituting about one-third of a complete cylinder. The lens can be revolved on a vertical spindle, the axis of which passes through the optical axis of the lens. The light is allowed to reach the film only through a narrow slit close to the film, this slit being at the end of a tapered box fixed to the same front as the lens and revolving with it. The camera is by Scovil, Adams and Co, and is a very handsome and substantial piece of work.

An ingenious arrangement for photographing from a captive balloon was shown by Mr. K. Ogura, of the Photographic Laboratory of the General Army and Navy Staff. The camera is suspended on gimbals on a frame so arranged that the ground glass will remain either in a vertical or a horizontal plane or in a plane at any intermediate angle as desired. The exposure can be made by an ingenious electrical arrangement.

Two prints from the same negative were shown by Messrs. W. K. Burton and K. Arito. In one far too great an expanse of nearly white sea appears between the foreground and the middle distance; in the second the distance is reduced, and the sky is added to with the effect that the picture is greatly improved. The effect is got by double printing. Mr. W. K. Burton presented to the Society, in the name of the Duke of Newcastle, several bottles of Messrs. Burrough, Welcome and Co.'s Photographic "Tabloids." These are small disks or "tabloids" of compressed photographic chemicals, of exact weight. Both Mr. Burton and Mr. K. Arito could testify to the extremely good results that could be got with these tabloids. They are likely to be of the greatest use to photographers either amateur or professional, whilst travelling.

Some excellent results of the balloon camera already mentioned, were shown by Mr. K. Ogura Also a very beautiful collotype, 16×10 inches on paper 26×18 inches, from his own negative, by Mr. I. Tanaka.

The proceedings ended with a vote of thanks to the Chairman.

LETTER FROM CHICAGO.

(From our own Correspondent)

Chicago, November 16th.

"Imperial Powers of Japan" is the title of an article by Nancy Mann Waddle in the November *Ladies' Home Journal*.

The *Tribune* of this city recently gave as an art supplement to a Sunday issue a reproduction of Namikawa's cloisonné enamel of Fuji San. That same issue contained a strong commendation of both the original and the reproduction from Mr. Gustavus Goward; and a later issue contained similar praise from Mr. H Shugyo, the famous art critic.

The Japanese, by the way, have again lost valuable exhibits, probably stolen. Several small articles of bric-a-brac have been taken from the Manufactures Building; and two vases, valued at $550, have disappeared from the Fine Arts Section. The thieves displayed good taste and judgment!

It is possible that the new Liberty Bell may go on a journey around the world with a message of peace and good will.

Mr. R. C. Givins, of this city, has returned from his trip to Japan. During his stay in that country he sent the Chicago *News Record* a series of interesting letters, which, though containing nothing new, were yet also unusually free from the errors of hasty travellers

Mr. E. Burton Holmes, who spent a few months of 1892 in Japan, is lecturing on "The Country" and "The Cities" with stereoptican views.

Mme. Minnie Hauk is on her way to Japan, where she will favour audiences in the large cities with her beautiful voice

A Methodist Minister, Dr. J. O. Peck, who had been designated to make a tour of mission fields in Asia and Malaysia, has declined the junketing trip in the interests of economy.

The Methodist Conference appropriated for the work in Korea $15,967, in Japan $52,308, and in China $118,711. An earnest appeal for the Japanese in California was made by Bishop Goodsell, who also expressed regret that the mission among the Japanese in the Hawaiian Islands had been abandoned.

Among the speakers at the recent Inter-Seminary Missionary Alliance were Pres. Kozaki, Mr. L. D. Wishard, and Mr. J. H. Kobayashi. Mr. Wishard spoke on "The Christian Movement among the Students of Asia"

Fourteen Chinese, in the custody of the U.S. Marshal at San Francisco, were yesterday released per U.S Attorney General Olney's orders.

The situation in Hawaii is, of course, the great topic of discussion at present. In spite of the fact that Blount's report was supposed to be favourable to Hawaiian royalists, it was, nevertheless, a great surprise to learn from the papers of the 11th inst., that Minister Willis had gone to Honolulu with instructions to restore the former Queen to her throne. The public had accepted the bloodless revolution as an historical fact, and regarded the provisional government as at least a *de facto* government which had become a *de jure* government by the official acknowledgement of the Powers. But President Cleveland and Secretary Gresham, relying on the testimony of Blount's report, claim that the Queen was dethroned by a conspiracy in which the U.S. Minister and naval officers took an active past inconsistent with their duties and the doctrines of international law, and that it is, therefore, only justice that the old *status* should be restored.

It is needless to say that the publication of these recommendations made by Secretary Gresham to President Cleveland aroused a fierce discussion. Republican papers and politicians have exhibited an unseemly bitterness in assailing Secretary Gresham; have attempted, as usual, to obscure the real points at issued by Jingô appeals to sentimentalism, and have displayed partisan prejudice by not waiting to hear the testimony on the other side. Nobody censures either ex Minister Stevens or ex-Pres. Harrison for defending his own acts or policy. No one can blame the Republicans even for trying to make the most of a possible vantage-ground, if they discuss the question reasonably without appeals to prejudice But most independents, while regretting the necessity of the position, yet acknowledge and admire the courage of Secretary Gresham and President Cleveland in recommending, on the simple ground of justice, a course well fore-known to be unpopular. This is not the first time that Cleveland has had the courage of his convictions; he pursued a similar course on the silver question, and has been sustained therein by the verdict of time. That trait of character is, in fact, an important element of his popularity among non partisans. He may be wrong on the Hawaiian question; but he and Gresham certainly do not deserve the torrent of abuse and vilification which partisan papers have heaped upon them. They are, very properly and wisely, attempting at present no defence; they are waiting until, probably, by the publication of Blount's report in connection with the President's message to Congress, they can present their evidence. That will be the proper time for discussion; until then fair minded men will reserve their verdict.

The Chinese Minister is said to be dissatisfied, because the U. S. Government declines to accept the certificates of the Chinese Consul General at Havana. This is, however, said to be a loop-hole through which thousands of Chinese have come in.

An episode with Honduras has been forgotten in the excitement over Hawaiian affairs. The Pacific Mail Steamship *Costa Rica* flying the U.S. flag and carrying U.S. Minister Baker, had on board a political refugee named Bonilla. When the vessel entered the harbour of Amapala, President Vasquez, of Honduras, demanded the surrender of the fugitive, and, receiving, of course, a refusal, ordered the guns of the port to be turned on the ship. When the U.S. authorities complained of this clear breach of international law, Honduras promptly apologized.

The Canadian Pacific Railway received the highest award at the World's Fair for its standard passenger train and locomotive. One "Sleeper" of this train bore the name "Satsuma."

The U.S. cruiser *Olympia* on a recent trial trip made an average speed of 21 knots and since then the *Columbia*, our first triple screw war ship, on an unofficial trip, made the "unprecedented" time of 22.87 knots per hour.

Hon. J. M. Rusk, ex-Secretary of Agriculture, is rapidly sinking from the effects of an operation recently performed.

Francis Parkman, the eminent historian, died on the 9th inst. at Boston.

The elections this month resulted in a tremendous land slide in favour of the Republicans, who carried Ohio, Massachusetts, New York, Pennsylvania, South Dakota, Kansas, Iowa, and Nebraska; while the Democrats won only in Kentucky, Virginia, and Maryland. In this city Judge Gory, opposed by the Anarchists and Democratic "bosses," led the Republican ticket to victory. McKinley has 80,000 or more majority in Ohio, and stands now as the "logical" Republican Nominee for President in 1896. But as the "off year" elections invariably go strongly against the party in power (see *Tribune* Almanacs), no meaning is attached to this landslide. Members of the Ways and Means Committee of the House of Representatives say that the election will have no effect on their tariff reform measure.

Alderman George B. Swift (Rep.) has been elected Mayor *pro tem* of this city.

The late Mayor Harrison has been called a millionaire, but, according to his will, he rated himself at only $96,000.

In both the Coughlin and the Prendergast cases no jury has yet been secured. The latter, having entered insanity as his plea for defence, has been examined by experts, who will make known their conclusions at the trial, which is to be opened on the 27th inst.

Wm. T. Stead, the famous London editor, has been in this city, and has been stirring us up with some of his radical ideas on social questions. An attempt is being made to carry into effect his plan for a civic federation.

The mills of Minneapolis, Duluth, and Superior are reporting big outputs of flour.

This city has now another elevated railroad, running on Lake Street on the West Side.

The chrysanthemum show at the Art Institute was a magnificent success, and enjoyed a large attendance. From the place where it was held it was jocosely called the "Congress of Chrysanthemums."

The Ferris Wheel proved a big success financially, and brought its owners a dividend of over $150,000.

The price of admission to the Fair has been reduced to 25 cents. The daily paid attendance now averages about 1,000, of whom the majority go in probably to make purchases.

Treasure Seeberger's report shows a total disbursement up to Oct. 30th of $31,031,585.

The Ceylon Building has been sold for $2,800, and will become a summer residence at Geneva Lake, Wisconsin.

The Foreign Commissioners united the other evening in a grand banquet to Director General Davis.

The "Columbian Museum" continues to have a fairly good "boom." Recent donations of exhibits include "a number of embroidered tablets and two rare porcelain vases from Commissioner Tejima;" the statistical tables and diagrams of the Department of Home Affairs in Japan; and negotiations are going on to secure the unique façade of the Japanese Pavilion in the Manufactures Building. Cash contributions include $50,000 from the Chicago City Railway Company; $10,000 from Mr. H N. Higinbotham; and $10,000 from Mr. L. Z. Leiter. The last-named makes two conditions; that the museum be located in Jackson Park, and be known as the "Columbian Memorial Museum."

This prospective museum is not getting all the treasures of the Fair; the University of Pennsylvania has secured large educational exhibits from many foreign countries, including Japan; and the University of Chicago has received from Korea a collection of costumes, and from Japan an exhibit illustrating Shinto.

The University of Chicago has also been so fortunate as to receive a gift of $500,000 from Mr. John D Rockefeller on condition that another $500,000 are secured under the terms of Mr Ryerson's pledge of $100,000. In short, if by July 1, 1894, the University can raise $500,000, Mr. Rockefeller will add the same amount. Of the half million to be raised, $275,000 have already been pledged.

Prof. S. W. Burnham, formerly connected with Lick Observatory, has been elected Professor of practical astronomy in the University of Chicago.

A famous French doctor and professor of medicine contended that every disease was due to a process of inflammation. On dissecting one of his patients, not a trace of inflammation could be found. He explained the circumstances to his pupils as follows:—"Gentlemen, you see that our mode of treatment was thoroughly effective. The patient is dead, but he died cured."

CLOSE OF THE WORLD'S FAIR.

(FROM A CORRESPONDENT.)

Chicago, November 7th.

The great Fair is over. The tragic death of Carter Harrison, Mayor of Chicago, and also Director of the Fair, threw a deep gloom over the closing ceremonies, which, in view of this terrible murder, only consisted of a prayer, an organ recital, a few addresses of condolence to the bereaved family, and a benediction pronounced by a clergyman over man's efforts at this immense and successful exhibition.

I will to-day complete our tour around the Woman's Building, which has lasted us several months, and I hope my readers will be as sorry to take leave of it as I shall be.

American women artists have contributed many beautiful paintings in the Gallery of Honour, as have also women artists all the world over. "Eurydice falling back into Hades," attracts a great deal of attention. The artist, Miss Rae, has shown the moment when Orpheus looks at her whom he has brought safely through the shadows, and she, knowing that her doom has come upon her, hopelessly prepares to turn back

In another picture a boy's dirty foot claims notice, and every mother who has ever had a tenant son, pauses to look. It is such a perfect foot, so dirty, so callous and seamed that one scarcely notices the face above it, or the girl blowing bubbles.

Marie Bashkirtseff has at least one picture there, two sturdy urchins of the order of street *gamins*,—a delicious bit of rowdyism. A sculptured head in basrelief is the work of Sarah Bernhardt. A great picture of a dead maiden in a boat, caused many a one to say half aloud, "the dead steered by the dumb," and yet it is not Tennyson's Elaine who sleeps there, but Hermione; no lily-white maid, but one wrapped in rich robes fit for a queen.

There are bits of English landscape, fishing scenes, and fruit pieces, a wealth of beauty destined to be an unfailing source of pleasure to the purchasers thereof.

From the four corners of the Gallery of Honour, stairs lead to the corridors above, and in the landings midway, exhibits of Mexican and Turkish work were laid out. On the east side are rich decorations of tapestry; while in the west, the women have fitted up a bridge, over which in stately and solitary grandeur a grim old Indian warrior keeps watch.

At the north end of the corridors is the Assembly Room, devoted to Congresses and other notable gatherings, as well as for a reception room and a music hall. There are three stained windows in this room sent by the women of Massachusetts, and on the platform is the furniture of mahogany and gold, the gift of the women of Mobile. The walls are hung with the pictures of noted English women, of yesterday as well as to-day. Among them is the full length portrait of the Baroness Burdett-Coutts. In this room, daily, during the whole Exposition, prominent American and foreign women gave addresses and read papers.

Off the Assembly room opens the model cornkitchen where Mrs. Rorer, Superintendent of the Philadelphia Cooking School, gave, at 10 30 every morning, ectures on the preparation of corn products. The walls of this room are artistically draped with fishing-nets, senes of dark brown, with corks and leads, which gave a quaint and fantastic look to the room

At the south end of the corridor are the rooms devoted to the use of the Lady Managers and the Women's Organization Room. Fifty organizations are represented there. The Women's Christian Temperance Union has, perhaps, the largest space. Among the organizations represented are religious societies, relief corps, editorial and educational associations, the Order of the Eastern Star, industrial societies, societies for physical culture, and many others. In order that no organization should interfere with another, the dividing lines are brass hand-railings, from which blue silk draperies hung suspended.

Just outside the door of this room is the lift, running from the ground floor to the café and roof-garden. Off the eastern corridor, open two private committee-rooms, while further along are three splendid reception rooms, donated to the building by the city of Cincinnati and the States of Kentucky and California.

The Cincinnati room is in the centre of the suite, and is in every respect an ideal drawing room. The ceiling and walls are decorated in the perfection of high art, and the furnishings are exquisite. At one's feet, as one looks from the gallery opening out of these three rooms, the lagoon lies with the wooded island, and all around the mystic, dome-like palaces of the White City

Kentucky's room is in cream and gold in the old Colonial style, while California's is red wood splendidly carved and polished, the spaces above the panelled dado being filled with fresco paintings, many of them scenes which suggest the days of 1849.

Next to the California room is one devoted to Japan, the crossed flags over the door, the screens in the designs so familiar to all, the paintings on the walls all telling their own story.

The rooms for the western corridor are of equal interest, none probably attracting more attention than that devoted to the British Nursing Section. The cases in this room contain all surgical appliances, bandages, and hygienic crockery, reclining chairs and invalid cots, and models of the nurses belonging to the Royal British Nurses Association; native Indian nurses as well as British are represented. The walls are hung with the portraits of nurses and philanthropic women; Her Majesty Queen Victoria and Princess Christian, patroness for the London and Windsor schools for trained nurses, being conspicuous. Florence Nightingale and Sister Dora, too, are there.

Three rooms "en suite" are next, and these three comprise the Library and two record rooms. The Library occupies the centre room, and is the donation of New York's women. The building is fitted up from floor nearly to ceiling with handsome dark-wood shelves and book cases. There are collected the works of all feminine authors considered worthy of such a place of honour. The task of cataloguing this library has been tremendous, and is not yet completed. The Library and record rooms, which contain charts and statistics of women's work in all nations, are very handsome.

Connecticut's room comes next, and is very dainty. The ceiling is in cream and gold, with coverings of robin's egg blue. The walls are of tan with a frieze a shade darker. The windows are of stained glass with jewelled effects. This room was placed at the disposal of the Foreign Lady Commissioners and Representatives, but as it was also thrown open to the public as an exhibit room it was quite impossible for any private use, and so the poor foreign ladies had nowhere to lay their heads.

Outside the New York room, in the gallery, is the New York Loan exhibit, consisting of rare old foreign laces, tapestries in gold and silver, fans with sticks of pearl and tortoise, jewellry quaint and ancient, and miniatures set in gold and precious stones.

Not the least of the attractions of the Woman's Building, was the roof-garden and café, the latter doing an immense business all the time the Fair was open. As the summer advanced, the garden on the roof, with handsome urns and other garden pottery filled with flowers and shrubs, made a beautiful resort, and of all the attractive places on the grounds, there was none to equal it. The view was superb; turn which way you would, almost every building was in sight. But if beautiful by day, it was still more beautiful by night, whether the moon rode in silver glory in the sky, or only the stars looked down upon the "Fairy City," which one might well imagine the realization of some fabled dream.

In nights when the grand illuminations took place, the scene was indeed beyond comparison; as the flashing search-lights brought out in bold relief the white palaces and the golden dome of the Administration Building which gleamed in lines of fire against the evening sky,—its crown of glory more brilliant than any diadem monarch ever wore.

But with all its beauty of interior and exterior, its rich treasures of art, etc., the lesson this building teaches is more beautiful and of more worth than ought else besides. It typifies woman's emancipation from bonds worn for ages past. It does not repudiate wifehood and motherhood. It but glorifies them, for what man or woman in the ages to come but will point proudly to the fact that his ancestors were among them who, by earnest prayer and labour of mind and body helped to erect in the year 1893, in the youngest and most pushing city in the world, a monument which will not crumble into nothingness now that the six months of the Exposition are past, but will be perpetuated in the memories of men and women of all nations.

Regardless of the sneers of both men and women, the Board of Lady Managers has gone steadily on, and in the dark days when even men's hearts grew faint with the fear of having undertaken too much, this little Board worked on, cheered by the thought of the good they were doing for their sisters.

To day they have seen the consummation of their dream, and not only America but all the world acknowledges that "when a woman wills, she will, you may depend on't," and that in fair competition with man she has not fallen behind in the race.

It has been no suffrage movement. The Woman's Building does not stand for that, but it is the first link in an endless chain which will bind in sweet sisterhood the women of the world, whether from the Occident, the Orient, or from climes nearer here.

It is, typically, when we consider what it represents, a temple more beautiful than that which stood in Jerusalem, and though its foundation stones were not laid with mystic rites, a password has been uttered in the universe more potent, because more holy, than that given by the old master mason to his followers, and that password, graven deep in the heart of every woman, is "sisterhood."

IN H.B.M.'s COURT FOR JAPAN.

Before R. A. MOWAT, Esq., Judge.—MONDAY, 11th December, 1893.

TSUNE KIJIMA AND OTHERS, PLAINTIFFS, v. THE P. & O. S. N. COMPANY, DEFENDANTS.

MOTION TO DISMISS THE PETITION

The Court assembled at 10.30 to-day.

Mr. A. B. Walford said he appeared to resist the granting of the application, with him sat Mr. Okamura Teruhiko; Mr. Lowder appeared to support the application for the motion.

Mr. Lowder said that the application which he had to support was a motion that a certain petition which had been filed in a case brought by Tsune Kijima and others to recover damages from the Peninsular and Oriental Steam Navigation Company, in respect to damage done to them by the collision of the *Ravenna* with the *Chishima-kan*, be dismissed and substantial costs be awarded defendants. The motion was based upon rule 39 of the Order in Council dated March 9th, 1865, which defined the discretion of the Court in matters pertaining to the dismissing of petitions.

Rule 9—In case a petition states two or more distinct causes of suit by and against the same parties and in the same rights, the Court may either before or at the hearing, if it appears inexpedient to try the different causes of suit together, order that different records be made up and make such Order as to costs as justice may require

In case a petition states two or more distinct causes of suit but not by and against the same parties, or by and against the same parties but not in the same rights, the petition may on the application of any defendant be dismissed

In case such application is made within the time for answer the petition may be dismissed with substantial costs to be paid by the plaintiff to the defendant making the application; but in case the application is not made within the time for answer, the petition when the defect is brought to the notice of the Court may be dismissed without Costs, or on payment of Court fees only, as to the Court seems just

The Rule being cited, the learned Counsel said that his case lay upon the construction to be placed upon the second paragraph, which dealt with the granting of such an order as the Court was now asked to make. The terms of the motion ran that the Court should make an order that the petition be dismissed and award substantial costs to the defendants in regard to it. The petition, Counsel proceeded, concerned 62 different and distinct causes of action which 62 different and distinct plaintiffs could bring in respect of damages sustained by 116 different plaintiffs, and these causes of action were in respect of different and distinct rights. The propositions which he wished to lay before the Court were two. The first was, that there were 62 groups of plaintiffs who brought 62 distinct cases in respect of 62 rights of action. The second proposition would be, that under the rule just cited, No. 39, the word *may* in that rule should be read as *must*. In other words, that it was obligatory on the Court to grant the application if the first proposition is borne out—that, in fact, it was not in its discretion to do otherwise. The proposal made to the Court was, in effect, that it was asked to exercise its authority in a case that falls under the words "may on the application," the application being, in the first place, duly made, and secondly made by a person having the right, by duly received authority, to make such application.

His Honour, to Mr. Walford—Do you dispute that.

Mr. Walford—Yes, I dispute that.

His Honour—You think I have discretion?

Mr. Walford—Yes.

Mr. Lowder—I have seven authorities to cite. The first one is in 1878, *Lamb v. Walker*, 3 Q.B.D., in the judgment of Chief Justice Cockburn; the next is in 1884, *The Darley Main Colliery Company v. Mitchell*, 14 Q.B.D., p. 125 and p.p. 400-402; and 11 Appeal Cases 127. The next case is in 1884, *Brumsden against Humphrey*, 14 Q.B.D., p. 121; and also 11 Appeal Cases at p. 139, where it was cited with the approval of Lord Blackburn. In 1884, the case of the *Vera Cruz*, 9 Probate

Division, p. 99, an exequatur. In 1884, *Seward v. the Vera Cruz*, 10 Appeal Cases, page 67. These cases are cited in support of my first proposition; and in support of my second proposition there is the leading case of *Julius against the Bishop of Oxford*, reported in 5 Appeal Cases p. 214. The first question to be discussed is, what is a cause of action? At the first blush it would appear to be a question easy to answer, but I need not remind your Honour that it is a question which has puzzled the heads of many learned judges during a long series of years.

His Honour—First of all, does Mr Walford dispute that there are 62 plaintiffs?

Mr. Walford—I do not dispute that. In fact I will admit that there are 62 plaintiffs, at least at present

His Honour—Then that point is settled.

Mr. Lowder—Then I need only go on with my second proposition, in support of which I shall cite *Julius against the Bishop of Oxford*—that it is obligatory on your Honour to grant the application. The whole question in this case turned on the construction to be placed on the words, "it shall be lawful," which occur in the Church Disciplinary Act. I cite this case because all the authorities relating to the construction to be placed upon these words are collected in the judgment delivered in this case. I think that however frequently the case, and the judgment, is read over, that its perusal will always be worth the time spent upon it. But first of all, I will refer back, for the consideration of the meaning to be placed on the word *may*, to the judgment given on page 224 and again on page 242, in the case of *McDougall v. Patterson*, cited with approval before the Lord Chancellor, Earl Cairns, and also before Lord Blackburn. Counsel then cited the judgment of Chief Justice Jervis, which had been quoted in support of the case previously mentioned. The judgment of Lord Cairns in this case was afterwards cited, Counsel contending that it had a direct bearing upon the case then before the Court. Upon his judgment Counsel submitted that his conclusion would be that the power reposed in the Court was given to it to be used for the benefit of the parties now appearing before the Court in the motion for dismissal of the plaintiffs' petition. Mr. Lowder then cited the case of *King v. Barlow*, and was going to quote Lord Justice Blackburn upon the rule, but

His Honour thought that it was unnecessary.

Mr. Lowder—Your Honour, I perceive, sees the points upon which I rely in asking that the petition be dismissed, it is therefore unnecessary to say anything further just now.

Mr. Walford, in reply, said that he could see that his Honour would have some difficulty in acceding to the arguments addressed to him by his learned friend, that the word *may* will have to be construed into *must* No doubt there are some cases that can be cited where *may* has been construed into *must*, but they do not apply to the present case. Those were all cases of applications made to enforce a right. Of course, if he has a right to what he applies for, then the Court must be satisfied that it is necessary, in the interests of justice, to grant that right. My learned friend urges that the Court has the power which he suggests, conferred upon it, and must exercise that power as it is coupled with duty. Now such a power, if it is conferred, is in no sense coupled with duty. In fact, I submit that my learned friend is wholly mistaken in bringing forward this application, for it is brought under a rule that is now obsolete. The rules of procedure which prevailed at home when the Rule, under which this motion is brought, was made, do not now exist. I submit that under the new rules of procedure in the home practice the Rule relied upon by the other side has ceased to have any application whatever. It may be convenient in this place to refer to the Order in Council under which this old rule was made. I refer to it simply to show that under no circumstances can the word *may* be so construed as to mean *must*. I refer to it also, because even in the days when it was made, although cases may have arisen in which such a construction could be urged, it was as a matter of fact, never brought forward. Section 4 of the Order in Council of 1865 section 25, and section 27, having been read, the learned Counsel submitted that they must be taken together in order to gather the object of the Rules. It was this. They were framed so as to provide a simple mode of procedure for this Court to follow, and where our rules are silent, then the rules of the home procedure are to be followed, in order to make the procedure as simple as possible. When, therefore, the practice of the Courts in England was simplified, it followed that the Rules of this Court must necessarily conform with the simplified procedure of the Courts in England. It was obvious that this was the intention of the framers of Rule 39, for even in 1865 it was a common mode of procedure that all creditors of a deceased person should join in an action for the administration of the estate.

His Honour—But is that in the Order itself?

Mr. Walford—According to my learned friend's contention Rule 39 must overrule all the Rules

His Honour—You cannot overrule all the Rules. How about Rule 139?

Mr. Walford—I was referring to the practice which enabled all the creditors of a deceased person to join together to bring an action.

His Honour—Have the Rules any reference to it?

Mr. Walford—Only indirect reference. In Rule 34 it is assumed that it can be done.

His Honour—Then your answer to him will be that Rule 39 must be read subject to Rule 34

Mr Walford—Then I shall further submit that these Rules were drawn up in accordance with the practice that prevailed at the time in Eng and. The petition is framed, I submit, in accordance with the practice now prevailing in England.

His Honour—Could you have one petition in which 62 plaintiffs are concerned?

Mr. Walford—Yes, I will prove, on reference to Order 16, Rule 1, of the New Judicature Act of 1883, that "All persons may be joined as plaintiffs in whom the right to any relief claimed is alleged to exist, whether jointly, severally, or in the alternative. And judgment may be given for such one or more of the plaintiffs as may be found to be entitled to relief, for such relief as he or they may be entitled to without any amendment," etc. This rule has been before the Courts on several occasions I will refer your Honour to the case of *Booth v. Briscowe*, 2 Q.B.D., p.496. In that case eight plaintiffs were joined in a libel action, and the question arose relative to costs. Lord Bramwell in delivering judgment, said that if the case had arisen before the new Judicature Act this procedure would have been erroneous, but under Order 16, Rule 1, the plaintiffs may be joined together as plaintiffs in the action. Counsel then quoted *Viscount Gort v. Rowney*, 17 Q.B.D., p. 633, reading Lord Esher's judgment, as Master of the Rolls, on the following page. The next case cited in support of his contention that the new rules of procedure in the Home Courts must apply here, was *Harrison v. Smith*, 41 Ch D., p. 98. In this case there were 54 different plaintiffs, and judgment was given by Mr. Justice Lindley. All the plaintiffs had seperate rights in that case, but all were joined. I shall submit, continued the learned Counsel, that all these cases go to prove beyond doubt what the practice is in England. The present petition has been drawn up in accordance with the English practice, and therefore the plaintiffs in this case are properly joined in seeking relief from the P. & O. Company in respect of damage received from the defendant Company. The petition was framed in accordance with Order 16, Rule 1, and relies with faith upon the case of *Scott v. Forrester*, a case which your Honour must remember, as it was heard and decided in the Supreme Court at Shanghai, and is reported in the *North China Herald* of August 1881, p. 177. The question in that case arose upon Rule 55, as to whether a counter-claim should be admitted with the leave of the Court first obtained, or whether the Rule should not be followed but the practice obtaining at home pursued, in which a counter claim is filed without leave. That case is a conclusive authority enabling the plaintiff to be joined under Order 16, Rule 1, for judgment was given in favour of following the simplified forms of procedure in the Courts of England. The judgment points out that our Rules were framed to give a simple form of procedure to these Courts of China and Japan. I have now established the practice prevailing in English and proved that the word *may* confers simply a discretionary power on the Court and does not compel your Honour to act in the sense understood by the Rule. As my learned friend was about to insist when I agreed with him, this action shows many causes of action. Causes of action, it has been laid down, mean the discovery of every fact material to be proved to enable plaintiff to succeed. Every creditor in a bankruptcy administration case has a distinct cause of action, because he has to prove his individual debt. If so, then this Court would never dismiss an action of the creditors of an estate, simply because the cause of action was different for each plaintiff. Rule 34 assumes that all creditors may be joined, although provision has not been found for such a case.

His Honour—Then that would be a good reason why it should be read with the other Rule.

Mr. Walford—Rule 34 only provides that an action be taken by one creditor, but it can be assumed that the others would be joined with him.

His Honour Then the petition should run, "A" suing on behalf of "B," and so on.

Mr. Walford—It is not necessary that one creditor only should sue, but that all should be joined.

His Honour—But may not the names be set out, as in this case?

Mr. Walford submitted that one creditor could not sue on behalf of the other creditors unless all the creditors were entitled to sue. Rule 36 enabled a plaintiff to sue several defendants in respect of several causes of action, but if my learned friend's construction of Rule 39 is correct, the Court would have power to allow such to petitioned to be dismissed.

His Honour—But the two Rules must be read together. Rule 36 deals with one plaintiff with two parties as defendants, Rule 39 deals with several parties being defendants.

Mr. Walford did not see the matter that way; he thought Rule 39 would apply whether the parties were too many plaintiffs or too many defendants.

His Honour—If Rule 36 did not exist that would be so, but as things are, it did not follow.

Mr. Walford—I contend that your Honour cannot ignore the spirit of the Order in Council. The suggestion that *may* shall be construed into *must* would be absurd, for it would be in conflict with the spirit of the Order in Council. If there is any distinction to be drawn in this Court as to the wording of the Rule, my friend has not shown any reason why it should be exercised in favour of his clients. He has not shown that it was inconvenient to them at all. Rather had his argument tended to prove how inconvenient it would be if the application were granted. If it was not possible to bring the case under the rules of the Judicature Act, then each case would have to be tried before different juries.

His Honour—I hope it will not prove so, for the juries' sake.

Mr. Walford—I was only proving that under this Rule there would be many different causes of action, as many as there are plaintiffs. There were 116 different causes for action in the petition, and if those 116 different causes had to be taken separately upon their merits then the action of the defendants would not only be inconvenient to all concerned, but most unjust; because the question as to the liability of the collision, the original cause of action, would have to be argued 116 times before different juries. Defendants would then no doubt apply to have all the actions consolidated, and, as likely as not, would argue that the bringing of the case in that way, was both vexatious and unjust. The effect of consolidating the various causes of action was to place the plaintiffs in the same position as co plaintiffs. The whole proceeding now stands in a form most correct and proper. It was convenient to all concerned, and had the effect of saving expense, and also enabled a number of poor plaintiffs, who could not under ordinary circumstances have instituted proceedings, to appear before the Court and apply for justice to be done them, in company with other plaintiffs.

His Honour—What is the date of the letter in which dfendents undertake to abide by proceedings entered against them by the next-of-kin?

Mr. Walford said he did not know, being away from Japan at the time.

Mr. Lowder said it was towards the end of Decembe. last year. It had been filed in the other case.

His Honour Yes, I will send for it. The date was then found to be 29th December.

Mr. Walford, continuing, said that if the application was granted, after the decision in the *Scott v. Forrester* case the effect would be—

Mr. Lowder—I must object to that.

His Honour—Let us hear it first.

Mr. Walford—The effect would be that plaintiffs would never be allowed to bring another action.

His Honour—Why, because of the lapse of time?

Mr. Walford—I can explain why there has been a seeming delay in the case, why the time has elapsed.

His Honour—I do not think that matters.

Mr. Walford—It would be very hard for foreigners, by that I mean Japanese, who are invited to apply to the Court in these matters, if their petitions are to be dismissed because the decisions of a concurrent Court in regard to the question of Rules, is not upheld in this Court. It would, in my opinion, inflict great hardship, and one which I feel sure this Court will never inflict. This discretion, as I shall call it, given by Rule 39 would apply to a case where the parties have been improperly joined, according to the old practice prevailing at home. But Order 16, Rule 11 provides that no cause shall be defeated by misjoinder of parties. That Order and Rule have the force of a Statutory provison and takes away any discretion which may have once existed under Rule 39.

His Honour—The Rule goes on to say that if there has been misjoinder, the Court may strike out the names of the parties so misjoined.

Mr. Walford—If *may* is to be read *must*

His Honour—It is in order that justice may be correctly rendered.

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

Mr. Walford—But the case must not be stopped; the case must go on. Rule 18 provides that the Judge may split up the causes of action. Therefore the Court is justified in making an order striking out of the petition the names of all plaintiffs improperly joined in order to render justice.

Mr. Lowder—That is not the application before the Court. The application now under the consideration of the Court is based on Rule 39 of our Rules.

Mr. Walford—I am contending that if there has been no misjoinder there can be no dismissal of the action under these Orders. If there has been no misjoinder then we come under Order 18, Rule 1.

His Honour—Your argument really rests on Order 16.

Mr. Walford—Yes, on Order 16. It shows that joinder is permitted and Order 18 shows what procedure must be followed—

His Honour—That refers to trial, we have not got so far yet.

Mr. Walford—This application then, is resisted on the grounds of Order 16, Rule 1 of the Rules prevailing at Home, and rests on the authority of the judgment of *Scott* v. *Forrester*.

His Honour (to Mr. Lowder)—I only wish to hear you in reference to Order 16 and on *Scott* v. *Forrester*.

Mr. Lowder—I have not had an opportunity of reading that case your Honour, and before proceeding further, I should like to draw your attention to the judgment given in the Shanghai Supreme Court recently, in the *Chishima-Ravenna* case, in reference to the Rule to be followed in the case, the question being whether I should apply for leave under the Rules of the Court or under Admiralty Rules. Counsel went at some length into the case which he personally conducted in Shanghai, and gave extracts from the finding of Chief Justice Hannen, who said in regard to the Rule of H.M.'s Courts for China and Japan that it must be followed in preference to the Rule of the Admiralty procedure. In this opinion, he added, Mr. Jamieson bowed to the Chief Justice, although he said he was inclined to think otherwise. The Court at Shanghai had found in that case that there was no necessity to go outside that Rules of the Court.

His Honour—That action was in Admiralty *in personam*.

Mr. Lowder—I should say that it was, to look at the original cause, an action *in rem*. But I don't think it makes any difference.

Mr. Walford—It was an action *in personam*, the ship not being seized.

Mr. Lowder—The arrest of the ship was got over by arrangement between the parties, so I should say that it was an action *in rem*.

His Honour referred to the title of the action, and inferred that as no ship's name was used the action was *in personam*, and accordingly the action should be conducted in accordance with the Rules of the Court, and so the Rule in the case would be 55.

Mr. Lowder—I may state that in cases where our Rules do apply, those Rules should be looked to and not the general practice.

His Honour—That is precisely the point taken by the other side in *Scott* v. *Forrester*, that the Rule in the Judicature only applied.

Mr. Lowder—I don't know whether I am justified, in my recent knowledge of the case, to ask whether, supposing the whole of our procedure to be dependant on the home procedure, that in the event of the home procedure being simplified our own Rules would have to be simplified also?

His Honour—That is the point on which the other side relies.

Mr. Lowder—It is a new point to me. I don't think it was applied in the case of the *Chishima*.

His Honour—Our own Admiralty Rules, I take it; do not they embody the English Rules? If our own Rules do not provide, we have to turn to the home procedure.

Mr. Lowder—Our own Rule 139 decides the point. If anything is provided for in our own Rules, then if not provided for in the home procedure it does not matter, because our own Rules are what have to be followed.

His Honour—In the case of *Scott* v. *Forrester* it is not mentioned.

Mr. Lowder—No, it was not mentioned. But turning to the case of *Harrison* v. *Smith*, cited by my learned friend, I shall also cite the judgment of Lord Chief Justice Cotton and Lord Justice Lindley, and draw your Honour's attention to the fact that they call attention to the great inconvenience arising from the joining together of 54 plaintiffs. No objection was made to the joining of groups of plaintiffs in any of the cases cited by my learned friend, but if objection had been made it would have been sustained in every case. Rule 16 referred to, deals only with the misjoinder of parties, but this is a case of misjoinder of causes of action, and therefore the Rule does not apply. Referring to the case of *Cook* v. *Bristowe*, Counsel admitted that it was certainly a case were co-directors had been libelled and that a legal relationship existed between them. In the case of *Gort* v. *Rowney*, Counsel for the other side read only part of the judgment of the Master of the Rolls, but he did not read the judgment of Lord Justice Bowen upon which, he (Mr Lowder), should rely. Lord Justice Bowen declined to followed the interpretation put on Order 16 by the Master of the Rolls. Now we have got to this point, that eminent judges are not of the same opinion as to the use of Order 16 Rule 1. Counsel then cited *Booth* v. *Burn*, to prove his contention as to the difference of opinion as to the construction to be placed on the Order

His Honour—The cause of action in this case seems to have been the same; each seem to have had the same right.

Mr Lowder—I should say the cause of action is distinct in each case.

His Honour—"A" sues in consequence of the same collision, so does "B," and "C," and so on.

Mr. Lowder—I assume that in this case there is a distinct cause of action in each case. I was going to demonstrate this when your Honour stopped my pleadings, and my friend concurred I am arguing that these 64 persons have 64 rights; there was one element which bound them—

His Honour—One collision damaged them all

Mr. Lowder—I am about to meet the argument that because no objection was made to the joining of plaintiffs in the case cited, that no application can be made. For this reason I shall cite the case of the *Vera Cruz*, No 2, Appeals. I cite these two adverse opinions to the Court in order to prove that the Court is at liberty to follow one opinion or the other.

His Honour—I don't think Lords Bowen and Esher disagreed; they granted the application.

Mr. Lowder—But they disagreed as to the reading of Order 16, Rule 1. Bowen declined to follow *Booth* v. *Briscowe*. In *Harrison* v. *Smith* the Judges spoke of the joining together of 54 plaintiffs as an inconvenient experiment. Counsel then quoted *Smith* v. *Richardson*, C.P.D. p 112, arguing therefrom that where there was no identity of interests there could be no identity of causes of action. The last case cited was that of *Sands and another* v. *Wildsmith*, 1893, 1 Q B.D. p. 771, and the judgment of Mr. Justice Wills. That was the latest case on record, and would meet the difficulty which Counsel could see was in his Honour's mind. The three cases cited by the other side were a group in which the construction of the Rule was questioned. But he would remind the Court that reference to the procedure of the Courts at home was only allowable where its own Rules were silent Sir Richard Rennie's instructions, issued to the Courts in China and Japan in 1885, were cited in support of the contention. Counsel failed to follow his learned friend in his contention that the Rules of the home practice should be followed whenever they simplified procedure, because Rule 39 was infinitely easier than the home practice. In reference to the plea of ignorance put forward on behalf of foreigners in regard to the Court Rules of Procedure, it did not hold good in the present case, because Counsel on the other side had admitted that the petition had been carefully thought out by him, and based on the home procedure.

Mr. Walford—I did not say that. I do not appear for the plaintiffs generally.

Mr. Lowder—I do not refer to my friend personally, I merely refer to the manner in which the petition has been drawn up, for it is evident that most careful attention has been paid to the rules of of procedure prevailing at home. Section 127 was relied upon my learned friend to prove that the spirit of the Rules was that too excessive regard should not be paid to technicalities in interpreting the procedure to be pursued in this Court. But I would remind him that Section 127 and Rule 39 were drawn up by a Judge of the Court and received the sanction of a Secretary of State, both at the same time, so it would be absurd to think that they would be allowed to be in conflict one with the other. With these remarks he left the matter in the hands of the Court.

His Honour intimated that he would read the authorities and cases cited, and judgment was reserved.

The Court then rose.

WEDNESDAY, December 13th, 1893.

Judgment was delivered this morning upon the application made by defendants to dismiss the petition of the plaintiffs, the next-of-kin of the men drowned in the collision which took place between the *Chishima-Kan* and the *Ravenna*, in the Inland Sea last November twelvemonth.

Mr. A. B Walford appeared for plaintiffs, Mr. J. F. Lowder representing defendants.

His Honour said—This is an application by the defendants, under the second and part of the third paragraphs of our Rule of Procedure 39, to dismiss the petition in the suit. The whole Rule reads as follows:—

"In case a petition states two or more distinct causes of suit by and against the same parties, and in same rights, the Court may either before or at the hearing, if it appears inexpedient to try the different causes of suit together, order that different records be made up and make such Order as to costs as justice may require.

"In case a petition states two or more distinct causes of suit, but not by and against the same parties, or by and against the same parties but not in the same rights, the petition may on the application of any defendant be dismissed.

"In case such application is made within the time for answer the petition may be dismissed with substantial costs to be paid by the plaintiff to the defendant making the application, but in case the application is not made within the time for answer, the petition when the defect is brought to the notice of the Court may be dismissed without costs, or on payment of Court fees only, as to the Court seems just."

It is admitted by Counsel for the plaintiffs that in the petition there are as many as sixty-two distinct causes of suit brought by as many different plaintiffs, or rather groups of plaintiffs, for the actual number of individual plaintiffs was stated by defendants' counsel to be 116. But it is contended, in the first place, on behalf of the plaintiffs that the Court has a discretion in the matter, and that it is not bound to dismiss the petition on the defendants' application. The defendants, on the other hand, contend that it is a matter of right and not of discretion, and in support of their view of the construction to be put on the word "may" in such a provision, they refer to the case of *Julius* v. *The Bishop of Oxford* (L.R., 5 Appeal Cases, p. 214). Apart even from that case, it seems to me impossible to hold, on the true construction of the Rule, that the Court has any discretion at all in the matter. When the 1st and 2nd paragraphs are read together, it is seen that there is a sharp distinction drawn between petitions stating distinct causes of suit by the same parties. Petitions of the former class are permitted, but even then subject to the Court directing in any given case that different records shall be made up if it should appear inexpedient to try the different causes of suit together. There is no such provision as to the petitions of the other class, viz., those stating distinct causes of suit *not* by the same parties—which are, it seems to me, treated as so "defective" that the Court is not permitted to deal with them in any way except by dismissal—dismissal on certain terms if the defendant applies before answer; and if not, then on one or other of the terms specified "as to the Court seems just." But it is dismissal in any case. The first ground on which the plaintiffs rely therefore fails.

It appears to me unnecessary to say anything as to *Scott* v *Forrester*. The construction of the rule under the Judicature Act on which the plaintiffs rely has been several times before the Courts in England, and the Judges have not always been in accord as to its meaning. The latest case upon it is that of *Sandes* v. *Wildsmith* (L.R., 1 Q B.D., 1893, p. 771) tried in May last, to which defendants' Counsel referred me. There Mr. Justice Wills said:—"The meaning of the rule is, that where it is doubtful in whom a right sought to be enforced is vested, it is permissible to put in all possible claimants, but it does not mean that, where there are two rights which are essentially different from each other, and there is no doubt as to the person in whom each of those rights is vested, it is permissible to roll two actions into one:" and Mr. Justice Lawrence concurred. That being the latest decision in England as to what the Rule means and what it does not mean, I must hold that such an action as the present one is not permissible under the Judicature Act. It plainly is not permissible under our own Rules. I therefore grant the application. Costs must follow the event.

The Court then rose.

ECZEMA.—Book on "Skin Trouble," net, free for One Stamp by Messrs. NORTH & RAE Limited, Yokohama.

Two broomsellers were rivals. Said one to the other, "How can you undersell me, for I steal the stuff and make my brooms myself?" "Why," replied the other, "I steal them ready made."

SOLUTION OF PROBLEM No. 99

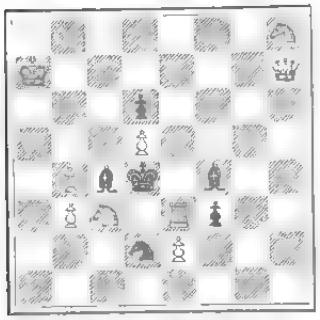
WHITE.	BLACK
1—P — K Kt 4	1—Anything.
2—B or Kt, mate accordingly.	

Correct solutions received from Digamma, W.H.S., J.D., Omega, J.W.E., and O.B.

PROBLEM No 101

BY W. B. MASON, TOKYO.

BLACK.



WHITE.

White to play and mate in two moves

There is not much local news of interest. Tournaments and Championship contest are in full swing, but the results are still far distant.

TARRASCH-TSCHIGORIN MATCH.

We have not yet learned the final outcome of this world-renowned contest. The players appear to be well-matched, although we believe that German science must eventually win against Russian brilliancy. We give from the *London Times* one of the games in which Dr. Tarrasch brought off a "Ruy Lopez" in grand style

Fifth game of the match. (Games 3 and 4 were two hard and well-fought games of 62 moves each, resulting in one win for each).

WHITE. Tarrasch.	BLACK. Tschigorin.
1—P to Q 4	1—P to Q 4
2—K Kt to B 3	2—Q Kt to B 3
3—B to Kt 5	3—P to Q R 3
4—B to R 4	4—Kt to B 3
5—Kt to B 3	5—B to Kt 5
6—Kt to Q 5	6—B to R 4
7—Castles.	7—P to Q Kt 4
8—B to Kt 3	8—P to Q 3
9—P to Q 3	9—B to R Kt 5
10—P to B 3	10—Kt to K 2
11—Kt takes K P (*a*)	11—P takes Kt (*b*)
12—Kt takes Kt ch.	12—P takes Kt
13—Q takes B	13—Kt to Kt 3
14—B to Q 5	14—R to Q Kt sq.
15—P to K B 4	15—P to B 3
16—B takes Q B P ch.	16—K to K 2
17—B to Q 5	17—P to Kt 5
18—P takes K P	18—Q to Kt 3 ch.
19—K to R sq.	19—Kt takes P
20—Q to R 5	20—Kt to Kt 3
21—R takes P (*c*)	21—K takes R
22—B to Kt 5 ch.	22—K to Kt 2
23—Q to R 6 ch.	23—K to Kt sq.
24—R to K B sq.	24—R to K B sq.
25—B to B 6	25—Q takes B
26—R takes Q	26—Resigns.

(*a*) A coup of surprising beauty. White, it will be found on close analysis, wins a pawn. Supposing 12—, B takes Q; 13—Kt takes Kt ch., K moves (if P takes Kt he is mated in two); 13—Kt at K 5 checks and the Q must capture.

(*b*) As we remarked Game 1, this is equal to resignation. Black loses the pawn clear, and the position is also such that the defence can only be a short one. We of course have regard to the character of the players here engaged.

(*c*) Playing for the brilliancy prize. Of course Q dare not capture on account of B to Kt 5 and it will be observed there is no real help after this. A fine game elegantly finished.

We reprint the following (also from the *Times*) and are delighted to find that Herr Lasker has shown his magnificent ability to play the Royal Game in spite of his apparent failure to produce a first-class magazine in the *London Chess Fortnightly*.

THE NEW YORK MASTERS' TOURNAMENT.—The tournament which has just been held in New York has proved in many respects of uncommon interest. It was quickly arranged, conducted in a business-like fashion, and the games produced were just such as commend themselves to our taste. Quite a large proportion were full of point, and, a very great recommendation, not too long. A few great mistakes were made of course. Jasnogrodsky left a piece simply *en prise* first game, but he redeemed this by playing a really pretty game against Lee. Delmar, Showalter, Taubenhaus, and the young Boston Champion, H. N. Pillsbury, have performed in the brilliant manner expected of them. Lee's score is good.

But the feature all through has been the play of Herr E. Lasker, who scored game after game with unerring precision. His performance on this occasion, taken in connexion with others which have preceded, stamps him as one of the most remarkable of the great players of the game. His record, a very consistent one be it observed, includes—first prize, without any loss, in a tournament at the Kaiserhof, Berlin, 1889; first prize in the Haupt-Turnier of the German Chess Association at Breslau in the same year; second prize in the Master Tournament at Amsterdam same year, losing only one game, to Van Vliet; while, still in 1889, he defeated Bardeleben by 2½ to 1½. In 1890 he defeated Mieses by 6½ to 1½, and coming at this period to England he, at Liverpool, defeated Bird and Miniat easily. Yet more remarkable are his recent triumphs. In 1892, having apparently adopted chess as a profession and England as his home, Lasker entered the British Chess Association's tournaments, and came out first, three defeating Blackburne and losing only one game in the two contests—to Bird. The result was a match between Blackburne and Lasker, in which the young German scored 6 to 0 and four draws. Since that period Lasker has travelled through the States and to Havana, and everywhere has proved victorious. A contest, single-handed, between him and one of the great masters of chess is eagerly desired by students; but it will be observed that already the evidence of his superiority to the vast majority of first-rate players is abundantly clear. And he is not yet 25 years old.

The following is a most interesting game in itself, and a capital specimen of Lasker's style. Played in the New York Tournament.

(FRENCH DEFENCE)

WHITE. Lasker.	BLACK. Delmar.
1—P to K 4	1—P to K 3
2—P to Q 4	2—P to Q 4
3—Kt to Q B 3	3—Kt to K B 3
4—B to K Kt 5	4—B to K 2
5—P to K 5	5—Kt to Kt sq. (*a*)
6—B to K 3	6—P to K B 4
7—P to Q R 3	7—P to Q Kt 3
8—P to R Kt 4	8—P takes P
9—Q takes P	9—B to B sq.
10—B to Q 3	10—Kt to K 2
11—Kt to R 3	11—Kt to B 4
12—Kt to B 4	12—P to K Kt 3
13—P to K R 4	13—P to Q B 3
14—P to R 5	14—P to K Kt 4
15—Kt takes K P	15—Kt to K R 3
16—Kt takes Q	16—Kt takes Q
17—B takes P	17—B to K 2
18—B takes B	18—K takes B
19—Kt takes B P ch. (*b*)	19—Kt takes Kt
20—Kt takes P ch.	20—K to Q sq.
21—B to K 4	21—B to Q 2
22—P to K B 3	22—Kt to R 3
23—Kt to B 6	23—Q R to B sq.
24—K R to Kt sq.	24—Kt to B 4
25—Kt takes B	25—Q Kt takes Q P
26—B takes Kt	26—Kt takes B
27—Castles Q R and White wins.	

(*a*) A novelty. The moves so far are, however identical with a game played in the Divan first-class Tourney, 1892, Lee v. Tinsley, when the latter player successfully adopted the text move instead of the book continuation, which is of course, K Kt to Q 2.

(*b*) White loses a piece, but gets four pawns which suffices.

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, December 8.

Signor Zanardelli, who recently undertook to reconstruct the Italian Cabinet, has resigned, and subsequently Signor Crispi had a long interview with King Humbert.

Mr. Gladstone is confined to his room with severe pains arising from indigestion.

London, December 14.

During a sitting of the Chamber of Deputies in Paris, a bomb was thrown from the public gallery, but fortunately the missile exploded in mid-air. As it was there were eighty persons wounded, including fifteen deputies. The perpetrator of the outrage was arrested, and confessed that he was a notorious anarchist, and that when he threw the bomb he aimed at the President of the Chamber

The Italian Ministry is nearly complete. Signor Crispi will be Premier and Minister of the Interior.

Mr. Gladstone is better.

["SPECIAL" TELEGRAMS TO "JAPAN MAIL."]

Nagasaki, December 9.

The American sealing schooner *Emma* has arrived here in distress from Saghalien, with her rudder broken. The vessel had been seized by the Russians, and the captain and crew imprisoned at Vladivostock, where orders had been received from St. Petersburg to try the case in a Civil Court under Russian law.

[SPECIALLY TELEGRAPHED TO THE "JAPAN DAILY MAIL."]
(FROM THE "NORTH CHINA DAILY NEWS").

December 5.

Despite the prohibition of the authorities against the proposed meeting of anarchists in Trafalgar-square, a great crowd assembled yesterday, and, after repeated warning, the foot and mounted police charged the crowd and dispersed the meeting.

December 7.

The death is announced of Professor Tyndall.

M. Dupuy, ex-Premier, succeeds the present Premier, M. Cassimir Perier, as President of the Chamber of Deputies.

Mr. John Morley, Chief Secretary for Ireland, is suffering from influenza brought on by overwork, and is ordered absolute rest.

December 8.

The United States Tariff Bill will add sixty million dollars to the already existing deficit, which amounts to twenty-eight millions.

Sir Edward Grey, Parliamentary Secretary to the Foreign Office, announced in the House of Commons yesterday that the protocol between France and England in reference to the Siamese Buffer State would be presented to the House on Monday next, and added that no definite agreement had been concluded for placing the state under the control of the Chinese Government

An inquest has been held on the body of Professor Tyndall, and the jury returned a verdict of "Death by mischance," the Professor's wife having given him a dose of choral in mistake for magnesia.

[TYNDALL, John, LL.D., F.R.S., was born about 1820, in the village of Leighlin bridge, near Carlow, in Ireland. His parents were in very humble circumstances, but they gave him the best education in their power, and sent him to a school where he acquired a sound knowledge of mathematics. At the age of nineteen he joined in the capacity of "civil assistant" a division of the Ordnance Survey which was stationed in his native town. In 1844 he was engaged by a firm in Manchester, and for about three years he was employed in engineering operations in connection with railways. In 1847 he accepted an appointment as teacher in Queenwood College, in Hampshire, a new institution, devoted partly to a junior school and partly to the preliminary technical education of agriculturists and engineers. Here he became acquainted with Mr (now Dr.) Frankland, who was resident chemist to the College, and here he began those original investigations which have placed him in the foremost rank among the explorers of science. In 1848 the two friends quitted England together and repaired to the University of Marburg, Hesse-Cassel, where they studied under Bunsen and other eminent professors. Afterwards Mr Tyndall prosecuted his researches in the laboratory of Magnus, at Berlin. He conducted investigations on the phenomena of diamagnetism, and on the polarity of the diamagnetic force, including researches on the magneto-optic properties of crystals, and the relation of magnetism and diamagnetism to molecular arrangement. He has recently published a volume on these subjects. In 1853, having been previously elected a Fellow of the Royal Society, he was chosen Professor of Natural Philosophy in the Royal Institution of Great Britain, and succeeded the celebrated Faraday as Superintendent. The publication of an essay on the cleavage of slate rocks was the proximate cause of his joining his friend Professor Huxley in a visit to the glaciers of Switzerland in 1856; and they afterwards published a joint paper on the structure and motion of glaciers. He returned to Switzerland, in 1857, 1858, and 1859, and pursued his investigations, reaching Chamouni on Christmas night, 1859, through deep snow, and two days afterwards succeeded attaining the Montanvert, where he remained nearly three days, for the most part amid blinding snow, and determined the winter motion of the Mer de Glace. In 1859 he commenced his researches on Radiant Heat, which disclosed relations previously unthought of between the agent and the gaseous form of matter. Numerous memoirs published in the "Philosophical Transactions," are devoted to this subject. Mr. Tyndall is a Rumford Medallist of the Royal Society, and a member of various foreign scientific societies; he was made LL.D. of Cambridge in 1855, and LL.D. of Edinburgh in 1856, when Mr. Carlyle was installed Rector of the University. In 1872 Professor Tyndall went on a lecturing tour in the United

Digitized by Google

States, in the course of which he delivered thirty-five lectures, which returned him $25,000. After paying expenses, a fund of over $13,000 remained, and this, before leaving for Europe, the Professor placed in the hands of a committee, who were authorised "to expend the interest in aid of students who devote themselves to original research." On the occasion of his receiving the honorary degree of D.C.L. from the University of Oxford, June, 28, 1873, Dr Heurtley, Margaret Professor of Divinity, protested against the proceeding, on the ground that Professor Tyndall "had signalised himself by writing against and denying the credibility of miracles and the efficacy of prayer, thus contravening the whole tenor of that book, which, with its open page inscribed 'Domus illuminatio mea,' the University still bears as her device, and therefore still professes to acknowledge as her guide." Professor Tyndall presided at the annual meeting of the British Association held at Belfast, in Aug. 1874. He accepted the presidency of the Birmingham and Midland Institute for the year 1877. For some years Professor Tyndall was Scientific Adviser to the Board of Trade and to the Lighthouse Authorities, but he resigned those offices in May, 1883, when he also withdrew from the special committee appointed by the Board of Trade to investigate the subject of the best illuminants for lighthouses. He has written "The Glaciers of the Alps," 1860; "Mountaineering," 1861; "A Vacation Tour," 1862; "Heat considered as a Mode of Motion," 1863; "On Radiation: the 'Rede' Lecture, May 16, 1865," published in 1865; a volume on "Sound," 4th edit., 1883; "Faraday as a Discoverer," "Fragments of Science," "Notes on Electricity," 1870, "Notes on Light," 1871, "Hours of Exercise in the Alps," 1871; "The Forms of Water in Clouds and Rivers, Ice, and Glaciers," 1872, "Address delivered before the British Association assembled at Belfast, with Additions and a Preface," 1874; "Fragments of Science: a Series of Detached Essays, Addresses, and Reviews," 5th edit., 1876; and "Essays on the Floating Matter of the Air in relation to Putrefaction and Infection," 1881. He married, Feb 29, 1876, Louisa Claud Hamilton, eldest daughter of Lord and Lady Claud Hamilton.—*Men of the Time.*)

Macnab, Mr. and Mrs. G. Hayashi, Mr. and Mrs. S. Hisamizu, Mr. Yu Sai Lun, Mr. J. Akakabe, Dr. N. A. Stevens, Governor Nagamine, Miss Nagamine, Mr. and Mrs Mikumi, Mr. Matsunabe, Mr. Ichinomiya, and Mr. Nings in cabin; and 40 passengers in steerage.

DEPARTED

Per British steamer *China*, for Hongkong:—Mr. David Jackson and servant, Mr F. Leyburn and servant, Mr. and Mrs. Stokes, Mr. W. E Hunt, Miss Hunt, Master Hunt, Mrs. Stafford and maid, Miss Orissa W. Gould, Mr. J. E. Stevens, and Rev. W. H. Lingle in cabin.

Per Japanese steamer *Yokohama Maru*, for Shanghai and ports:—Miss Francis C. Bless, Miss M. Walton, Miss C. W. Davis, Miss L. Moon, Mrs. F. E. Wight, Mrs. E. M. Yates, Mrs. Ivy and son, Mr. and Mrs. J. F. Seaman, Mr. and Mrs. Viking, Mrs. Yamada, Rev. and Mrs. G. R Hill, Rev. W. M. Imperaft, Rev. H. J. Openshaw, Rev. C. A. Solquist, Rev. W. F. Beaman, Dr. E E. Malcolm, Messrs. A. Eilers, F. J. Bradshaw, H. Dharmapala, H. Baehr, L. Bobstein, C. N. Crasse, N. Soma, H. Kubota, and K. Yoshisuye in cabin; Mrs. Eguchi Mon, Messrs. M. T. Arratoon, G. A. Carlson, N. S. Jackson, and Tong Man Chun in second class, and 54 passengers in steerage.

CARGOES.

Per Japanese steamer *Yokohama Maru*, for Shanghai and ports:—Treasure, $174,400.00.

REPORTS.

The Japanese steamer *Wakanoura Maru*, Captain Tipple, reports:—Left Kobe the 8th December at noon; had moderate variable winds and fine weather; passed Rock Island the 9th at 12.12 p.m. Arrived at Yokohama at 6.50 p.m.

The Japanese steamer *Yamashiro Maru*, Captain C. Young, reports:—Left Otaru the 6th November at 2 p.m.; had strong westerly gale and high westerly sea to Hakodate, arriving the 7th at 10 a.m. Left the 9th at 8 a.m.; had moderate westerly gale to Yamada Head; thence moderate variable winds to Oginohama, arriving the 10th at 6.15 a.m. Left the same day at 1.8 p.m.; had moderate westerly winds and fine weather to Inuboye; thence variable winds to port. Arrived at Yokohama the 11th December at 2 38 p.m.

The Japanese steamer *Tokio Maru*, Captain T. S. Kenderdine, reports:—Left Kobe the 10th December at noon; had light breeze and fine, clear weather; at 2.26 p.m. passed Tomonga shima Lighthouse; thence to Oshima, light variable winds; at 9.15 p.m. passed Oshima Light; thence to Rock Island breeze gradually freshened and blew strong from W.N.W.; on the 11th at noon passed Rock Island Lighthouse; thence to Vries Island breeze fresh and steady; at 2 p.m. passed Observation Point (Vries Island), breeze gradually decreasing; thence to Sagami-saki became light and variable, from Sagami-saki to port fresh westerly breeze; at 4.10 p.m. passed Sagami-saki Lighthouse; at 4.55 p.m. passed Kannon-saki Lighthouse. Arrived at Yokohama at 6.15 p.m.

The British steamer *Mogul*, Captain T. Golding, reports:—Left Tacoma, Wash., the 23rd November and Victoria, B.C., the 24th; had light variable winds and fine weather to the Meridian; thence strong N.N.W. gales and heavy sea with overcast, cloudy weather until the 11th December; thence to port strong N.W. winds and clear weather. Arrived at Yokohama the 12th December at 1 p.m.

The Japanese steamer *Sendai Maru*, Captain T. Saka, reports:—Left Kobe the 12th December at 10 a.m.; had gentle westerly breeze and fine weather. Arrived at Shiotsu at 1.15 p.m. and left at 5 p.m.; had gentle north-easterly breeze and fine weather; after passing round Oshima, moderate north-north-easterly breeze and fine weather, with following sea throughout the passage. Arrived at Yokohama the 13th December at 7.45 p.m.

The Japanese steamer *Takasago Maru*, Captain J. Nire, reports:—Left Otaru the 10th December at 2 p.m.; had strong westerly gale and frequent snow squalls with heavy sea. Arrived at Hakodate the 11th at 11.40 a.m and left again the 12th at 8 a.m.; had strong westerly gale and occasional snow. Arrived at Oginohama the 13th at 8 50 a.m. and left again the same day at 2.40 p.m.; had fine, clear weather and smooth sea, with gentle to strong north-westerly breeze; made Inuboye at 5 44 a.m. on the 14th; thence to port fine weather and moderate north-westerly breeze. Arrived at Yokohama at 5.30 p.m.

The British steamer *Gaelic*, Captain W. G. Pearne, reports:—Left Hongkong the 7th December at 5.30 p.m., viâ ports; had easterly winds and fine weather to Kobe; thence to port fresh westerly winds and clear weather. Arrived at Yokohama the 15th December at 2.17 p.m.

The Japanese steamer *Kobe Maru*, Captain E. W. Haswell, reports:—Left Shanghai the 9th December at 11 a.m. and arrived at Nagasaki the 11th at 2 a.m. Left Nagasaki the same day at 5 p.m. and arrived at Shimonoseki the 12th at 6 a.m. Left again the same day at 11 a.m. and reached Kobe the following day at 7 a.m. Left Kobe the 14th at noon and arrived at Yokohama the 15th December at 2.30 p.m.; experienced moderate northerly winds, and fine, clear weather to Nagasaki; thence to Shimonoseki had moderate north-west winds and cloudy weather, with occasional showers; similar weather continuing through Inland Sea; with variable winds to Kobe; along the coast fresh westerly winds were met, with fine, clear weather to arrival.

LATEST COMMERCIAL.

IMPORTS

The past week has seen no revival in the Import Trade. Single Yarns remain practically unnoticed, but Doubles meet with a light intermittent demand. There has been but one transaction reported in White Shirtings—other lines of Piece Goods failing to attract purchasers. Fancies and Woollens are also neglected, but holders do not appear inclined to lower their quotations.

COTTON PIECE GOODS

	PER PIECE.
Grey Shirtings—8¼lb, 38½ yds. 39inches	$2.15 to 2.70
Grey Shirtings—9lb, 38½ yds. 45inches	2 35 to 3 12½

METALS

The situation remains as last advised. The market continues firm with a few small contracts for various kinds of Iron.

	PER PICUL.
Flat Bars, ¾ inch	$3 80 to 4.00
Flat Bars, ½ inch	4 00 to 4 10
Round and square up to ¾ inch	3.20 to 3 35
Iron Plates, assorted	3 35 to 3.45
Sheet Iron	4 55 to 4 70
Galvanized Iron sheets	8 85 to 9.10
Wire Nails, assorted	5 40 to 5 75
Tin Plates, per box	6.20 to 6 40
Pig Iron, No 3	1.45 to 1.50

KEROSENE

Demand has been well sustained in this market, and prices are very firm notwithstanding the arrival of two cargoes of American Oil. The ship *Charles E. Moody* came in on the 11th with about 70,500 cases, while the ship *St. David* arrived on the 13th with about 60,000 cases. Russian Oil is also well held, as demand is brisk and stocks are running low.

Chester	$1.85 to 1 87½
Comet	1.82½ to 1.85
Devoe	—
Russian Anchor	1 80 to 1 85
Russian Moon	1.77½ to 1 80

SUGAR.

Browns continue to move off at a fair pace, but prices show no change. Whites are also in good demand and rates are firm.

	PER PICUL.
Brown Takao	$4.40 to 4.50
Brown Manila	5.15 to 5.25
Brown Daitong	3.95 to 4.00
Brown Canton	4.10 to 4 45
White Java and Penang	7.00 to 7.10
White Refined	7 50 to 9 10

EXPORTS.

RAW SILK.

Our last issue was of the 8th instant, since which date settlements on this market amount to 852 piculs, divided thus: *Hanks*, 8 piculs; *Filatures*, 635 piculs; *Re-reels*, 131 piculs; *Kakeda*, 74 piculs; *Oshu*, 4 piculs. Direct shipments have been 111 bales, making the total export trade for the week 1,000 piculs.

There has been distinctly less business done than during the previous week; at the same time there has been a fair daily business, prices generally being well maintained. For some sorts, of which there is a small stock temporarily, holders have succeeded in getting an advance, and at closing they do not look nearly so weak as they did a few days ago. Full-sized *Filatures* and *Re-reels*, seem to hold their own well, as do also the better classes of *Kakeda*.

Arrivals are about equal to sales, the stock list showing but a small increase upon that of a week ago.

Exchange has declined somewhat in sympathy with lower silver in London.

There have been two shipping opportunities since we last wrote, the Canadian mail, *Empress of India*, 8th instant, taking 1,008 bales for the New York trade, and the English mail, *Ancona*, 9th instant, having 582 bales for Europe. These departures make the present export figures 21,305 piculs, against 31,036 piculs last year, and 28,993 piculs at the same date in 1891.

Hanks.—Small arrivals dribble in, but the total stock does not exceed 50 piculs. Nothing has been done beyond one or two retail purchases of fair *Joshu* quality at $590.

Filatures.—This class, as usual, has enjoyed the largest share of patronage, and in some cases good prices have been paid. In fine sizes, best No. 1 have brought $780, with No. 1½ at $750; No. 2, $710. In full sizes, the latest sales are *Shojokan*, *Roku-mon-sen* and *Shinyokan* at $780, with *Tokushinsha*, $750; *Choshinsha*, $745; *Kaimeisha*, $732½. *Koshu* sorts have brought $735 for *Kusanagisha*, with *Koseisha*, $710. Lower grades of sundry districts have been bought down to $670.

Re-reels.—These are well held, and a fair amount of business has been done on the basis of *Five Girl* at $705, with *Bushu* sorts at prices ranging from $665 down to $625, according to quality.

Kakeda.—A small business, but prices are well maintained; in fact, some advance has been paid upon the lower grades. The most recent sales are *Horsehead* I., $655, with *Three Roses* at $607½.

In other sorts nothing done beyond one small purchase of *Hamatsuei* at $620.

QUOTATIONS.—(NEW SILK.)

WASTE SILK

A small business, settlements being 490 piculs, divided thus: *Cocoons*, 40 piculs; *Noshi*, 220 piculs; *Kibiso*, 230 piculs. No direct shipments this week.

The sales for export remain very limited and stock is slightly increased, but holders will not reduce their prices sufficiently to make business. They either cannot or will not sell at less than present quotations just now, and the trade is consequently hampered.

There has been one shipping opportunity since we last wrote, the English mail *Ancona* taking 17 bales of *Waste Cocoons* for Europe. The *Flintshire* has also a few bales of *Cocoons* for the United States, particulars of which will be given in our next.

Pierced Cocoons.—Business is limited to one parcel of *Najiko*, for which the prices realized were from $34 to $40, according to quality. The stock now is small in this department and consists entirely of the lower grades.

Noshi.—The trade has fallen away, and the principal business has been in *Tegara*, averaging $110 per picul. Some *Oshu* of fair quality was also booked at $125, with a small parcel of *Filature* at $130. Very little done in *Foshu*, ordinary stock, at $65.

Kibiso.—Considerable business in *Filature* of medium grade, prices ranging from $90 to $100 for the ordinary uncleaned stock. A trifle of better quality was done at $108; *Zaguri* was noted at $55, with no business in other kinds.

QUOTATIONS.—(NEW WASTE).

Established a Quarter of a Century

A DELIGHTFUL MOUNTAIN RESORT.

THE most delightful Mountain Resort in the Hakone District is the KAIKATEI, at KOWAKI-DANI, which is admitted by the Medical Faculty of Tokyo and Yokohama to be the Sunniest, Breeziest, and most healthful spot accessible to Foreigners in the Hakone District, standing alone and delightfully situated upon the mountain side, free from every suspicion of bad drainage and malaria, with a cool and constant breeze in the hot summer weather, and a view not to be equalled in the neighbourhood for variety and extent.

The BATHS are filled with a constant and never failing supply from the HOT MINERAL SPRINGS just above the Hotel, the medicinal virtues of which are too well-known to need recapitulation. It is sufficient to say that whereas Visitors find many of the hot springs enervating, those at Kowaki-dani are distinctly invigorating.

One of the features of the Kaikatei is the detached Suites of Apartments, where perfect quiet and privacy can be secured. This arrangement for invalids and convalescents from the Tropics is a great desideratum, as being entirely removed from the Dining Room, Billiard Room, Bar, and Baths, while all are connected by covered passages.

To a Liberal Table are added an excellent *Cuisine* and good attendance, supplemented by a large variety of Wines, Spirits, and Malt Liquors of the very best kinds.

For the amusement of Guests, a fine English Billiard Table, by Burroughs and Watts, has been added to the Establishment, as well as Archery, Quoits, and other Games, and Ponies for riding over the hills and a Yacht for sailing on Hakone Lake can be hired.

Visitors to Kowaki-dani who bring a rod with them will be shown the haunts of the speckled Trout, a nice stream of several miles in length being within easy walking distance of the Hotel; Hakone Lake is also well stocked with a variety of fish, including salmon, and the Fishing is FREE; while Entomologists will find rare and valuable specimens in the surrounding hills, and the Flora of the district is extremely interesting to the Botanist.

Apartments may be secured by Letter or Telegram, and Special arrangements made for the conveyance of Visitors and Baggage from the Tramway Terminus at Yumoto, by addressing

THE GREATEST WONDERS OF MODERN TIME.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

MR. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871 says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude, and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a tea spoonful of Ointment was worth a fowl and any quantity of peas and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors throughout the World. May 1st, 1890.

Contractors to the British Admiralty, Foreign Governments, Leading Steamship Companies, & Yacht Owners in all parts of the World.

STEAM LAUNCHES & YACHTS

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others The chief advantages are:—

1. Wonderful Economy of Fuel
2. First class Workmanship
3. Moderate Prices.
4. Greatest obtainable power for weight and acesp accupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 40 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boatsin Frames, &c., &c. We supply sets of Machinery separately. We are also sole makers of the

KINGDON PATENT LIGHT PORTABLE ENGINE

Stock sizes, 1½ to 6 H.P. Burns less fuel, and gives *three times the power*, weight for weight, of any other engine Awarded First Prize by Royal Agricultural Society England, 1890, in competition open to all makers.

YOKOHAMA: SATURDAY, DEC. 23RD, 1893.

BIRTH

On the 18th inst., at the Imperial German Consulate, Nagasaki, MRS. HELMA MÜLLER-BERCK, of a Son.

SUMMARY OF NEWS.

HEAVY snow fell in Nagano, Wakamatsu, and Hiroshima on the 15th inst.

THE British Court in Yokohama rises to-day for the Christmas and New Year holidays.

THE Diet has been prorogued by the Emperor for a period of ten days, commencing from the 19th inst.

A SMALL fire occurred in a house at Ota, near Yokohama, on Tuesday morning. Little damage was done.

MR. HOSHI TORU is seeking re-election in his old constituency, the First Electoral District of Tochigi Prefecture.

LORD HERSCHELL'S Committee are said to be considering Hongkong's proposal to legalize the Japanese *yen* in the Crown Colony.

THE frosts of the last few mornings have proved very severe, and skating prospects for the Christmas holidays are looming bright.

THE capital of the Yokohama Dock Co. has been reduced from *yen* 3,000,000 to *yen* 500,000, which sum will be raised among the promoters.

THE immediate cause of the Diet's prorogation is attributed to the motion about to be introduced by Mr. Abei Hankon with reference to the treaties.

MR. KOIZUMI TANEKICHI, ex-Governor of Kanagawa Prison, has been appointed to the Governorship of Nugata Prison, that position being vacated by Mr. Kobayashi Saburo, who has been promoted to the Osaka Prison.

KIRISHIMA-YAMA, in Osumi Province, broke into violent eruption on the 21st ult. Pumice stone was thrown for a distance of a *ri* in all directions.

THE annual Christmas dinner to seamen will be given on the 26th inst., at the Seamen's Mission. An entertainment is being arranged for the 30th inst.

THE Choral Society's Concert on Wednesday evening proved a very delightful affair. Barnett's "Ancient Mariner" was the principal piece in the programme.

THE Mutual liner *Oopack*, having been purchased by the Nippon Yusen Kaisha, has been renamed the *Nagoya Maru*. She is intended for the Bombay-Kobe line.

A RUMOUR is current that the Ito Cabinet will soon resign; Mr. Mutsu is said to have presented his resignation, and Count Goto and Count Saigo will follow suit.

THE reparation obtained by Mr. Consul Bock for the murder of the two missionaries at Sungpu, is the striking-off of the heads of two men, and a payment of forty thousand dollars.

THE *Choya Shimbun* is to be revived by Mr. Kawamura Jun, a late editor, under the title of the *Shin Choya Shimbun*. The policy of resuscitated journal is not yet made public.

THE naval authorities at Yokosuka have recovered the torpedo boat which sank off Haneda some time ago, after laborious exertions. The boat was towed into Yokosuka on the 14th inst.

THE *Kaishin-to* were roughly received by the *soshi* at a recent meeting held in Tokyo. So disorderly did the proceedings become that the police had to bring them to a summary close

OWING to last Saturday being a mail-day, the foot-ball match nearly fell through, teams having finally to be picked up from the spectators and members of the Club then on the ground.

SOME nine Russian sailors had a ducking in the harbour the other evening, owing to their sampan capsizing. Fortunately they were near the landing steps at the English Hatoba and so were able to scramble ashore.

DURING the night of the 17th inst. a robber, armed with a drawn sword, broke into the residence of Major-General Yamakawa Ko, at Morikawacho, Hongo, Tokyo, and decamped with a small sum of money.

THE new Governor of Tokyo gave a congratulatory banquet at the Seiyoken, Tsukiji, on the 16th inst., to a number of leading officials in the Home Department and the Tokyo Municipal Government Office.

THE antipathy between Mr. Hoshi Toru and the members of the *Kaishin-to* continues unabated. In the speeches and addresses which the ex-President of the Lower House has been delivering of late, he makes some bitter onslaughts upon that Party.

ALL the European Chambers are considering what measures can be taken against bomb-throwing; the Princess of Wales has been suffering from influenza, but is now convalescent; the strength of the British Navy is being hotly debated by both political parties in the House of Commons; serious riots by Socialists have broken out simultaneously in Rome, Genoa, and Naples, the military failing to restore order, even after firing upon the mob.

A FATAL landslip occurred at Nakamura, Yokohama, on the afternoon of the 17th inst. Four coolies were engaged in cutting the cliff when a huge mass of earth fell, burying one man. He died almost immediately.

COUNT YAMAGATA, President of the Privy Council, who returned to the capital on the 17th inst., proceeded to the Palace at 1.30 p.m. the following day and had a lengthy interview with the Emperor. The Count left the Palace at four o'clock.

THE Oriental Radical Party has been dissolved. This organization was composed of followers of Mr. Oi Kentaro in his Anti-Mixed Residence campaign. The members have, however, joined other political associations having similar objects in view.

MR. HIRANUMA, the well-known and equally well detested Yokohama money-lender, has been arrested and thrown into prison on a charge of forgery, in connection with the Nishigori affair, which has developed out of the Soma case. It is this man's avowed object to bring ruin on the members of the noble families of Japan. He started life as a common coolie.

THE following are the latest returns of epidemic diseases:—12 typhoid fever cases and one death in Aomori; 15 typhoid fever cases and 3 deaths, and 28 small-pox cases, and 4 deaths in Yamanashi during the week ended the 16th inst.; 20 typhoid fever cases and 4 deaths, 22 dysentery cases and 20 deaths, and 10 diphtheria cases and 11 deaths in Hyogo; and 16 typhoid fever cases and 2 deaths in Ibaraki during the week ended the 17th.

THE Import trade remains much as last reported, though perhaps there is an improvement to be noted in Yarns, Singles being in demand at better figures, holders of certain counts asking more money, but Doubles are quiet. Grey Shirtings are in some demand at better rates, and there is also an enquiry for certain lines of Fancies, while others are dull, and Woollens neglected. There is nothing to report from the Metal market. The late heavy purchases and free arrivals of Kerosene have had a weakening effect upon the market, in which there is now not much doing at unchanged values. A moderate business continues to be done in Brown Sugar, certain grades hardening in value, and all fetching full rates. Whites are still in fair request at late prices and close firm. The Silk trade has been on much the same scale as that of the previous week, and not counting the direct export, less than 1,000 piculs have been settled during the interval. The business done was principally for Europe, and at the close prices hardened all round, and holders are firm at the full figures obtained. Arrivals keep pace with settlements, and the stock on this market is practically unchanged. In Waste Silk more has been done, and there are settlements said to be pending of 2 000 piculs. Holders are very firm, and have succeeded in raising the price of the grades in particular request; arrivals have not quite kept up with the transactions concluded. The stock still totals 20,000 piculs, though a large quantity of this consists of undesirable descriptions. There has been but few operations in Tea, and for the small parcels of leaf taken recent rates have been paid. Exchange has been steady during the interval, and closes at about last week's rates.

Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK

The political situation remains uncertain. Rumours of all sorts are circulated about probable changes in the Cabinet. To mention some of them—it is stated that Count Yamagata will form a new Ministry with Viscount Shinagawa, Mr. Shirane, and other statesmen of the so-called military school; that Count Yamagata, though extremely unwilling to enter the Cabinet at a juncture like the present, will consent to take the portfolio of Agriculture and Commerce in obedience to the pressing command of the Emperor; that Count Ito, Mr. Mutsu, Count Kuroda, and Count Goto will resign; that Count Goto alone will resign. It would in fact be tedious to enumerate the endless items of political gossip. We may observe that at the time of writing this, the impression prevails in political circles in the capital that, despite all that is written to the contrary, Count Ito will not resign, and that, though possibly Count Goto may go out of office, the Cabinet will remain essentially unaltered. Count Yamagata's acceptance of a Ministerial portfolio seems to be still uncertain. As to the Diet, the papers of course state that the Government's principal hope lies in "taking the backbone" out of the members by threats of dissolution and possibly by the use of money. Some papers report that one-half of the National Unionists have already shown a disposition to give up the position they have thus far taken on the questions of official discipline, the strict enforcement of the treaties, and the *Chishima* case. Nothing could be more desirable than that the House of Representatives should reconsider its course of action. But, despite the libellous rumours which some papers circulate concerning the inconstancy of the members of the Lower House, there is as yet but slender hope of the rejection, on the Lower House's reassembly on the 29th inst., of the proposed Representation to the Government concerning the strict enforcement of treaties and the Address to the Throne on the *Chishima-Ravenna* affair. Dissolution seems at present to be the most likely outcome of the present situation.

* * *

The Progressionist papers call upon the statesmen in power to resign. We will notice here a representative article in the *Hochi Shimbun*. Our contemporary thinks that the issue is not between the present Cabinet and the Diet but between the clan Government and the people. The clan Government is the root of all evil; if only that be done away with, everything will go on right. The Cabinet Ministers are recommended to recollect their own attitude towards the Bakufu in the troublous pre-Restoration days. They represented the general opinion of the country, and they were therefore uncompromisingly opposed to the Government of the time. They now occupy the very position in which the Tokugawa Government was then placed. Public opinion may be wrong in its dissatisfaction with the clan Government, but it is nevertheless an inevitable consequence of public opinion that clan Government must fall one of these days. Such being the case, those now in office are advised to resign *en bloc* and await the development of events. Should public opinion be wrong in opposing clan Government, the mistake will be discovered sooner or later, and a revulsion of sentiment in favour of the clan statesman is sure to take place. Moreover, the present Opposition politicians supposing them required to form a Cabinet, might commit blunders, and thus give an opportunity to the clan statesmen to come into office once more with their effective strength increased and with the people heartily in sympathy with them. Hence the *Hochi* strongly advises the present leaders of officialdom to retire into private life for some time and hand over the reins of power to the Opposition.

* * *

The *Kokkai* is dissatisfied equally with the conduct of the Government and with that of the Opposition. Why did not the Cabinet, it asks, allow the Diet to proceed with the discussion of the questions of the enforcement of treaties and the *Caishima-Ravenna* case, and do its utmost to refute the arguments of the Opposition members? To order prorogation before these subjects had been fully discussed and the sense of the House clearly taken, was, in the *Kokkai's* opinion, an act of cowardice on the part of the Cabinet. On the other hand, the Opposition's tactics have not been above board. Why did they not put their intended measures in the Order of the Day and thus give due notice to the Cabinet, instead of introducing their motions at most unexpected moments, as if they had been uncertain of their majority in the House? Both the Cabinet and the Opposition are recommended by our contemporary to be more courageous and open-handed in their policy against each other.

* * *

The *Nichi Nichi Shimbun* is firmly convinced that, in spite of occasional extravagances on the part of both the Government and the Diet, the Constitutional system of Japan is in no real danger of a fate like that which befell an essay in Constitutional Government in Turkey. As to the present political situation, our contemporary takes a similar view to that of the paper noticed in the preceding paragraph. The Opposition is strongly censured for inconsistency in its attitude toward the Ministry, for while, on the one hand, it has charged the Ministers of State with putting a stain upon the honour of the Throne, and injuring the national rights of the country, it seems to think, on the other, that these offences would be more than atoned for, did the Ministers resign their official posts. In the *Nichi Nichi's* opinion, if the Ministers are really guilty of such offences, stronger measures than mere resignation should be meted out to them. On the other hand, the Cabinet is not less stoutly censured for its hesitancy and weak policy toward the Diet. Do the Ministers of State think that they can cöoperate with a House which has called them the ughest of names? If they think that they have done nothing of which they need be ashamed, why have they not dissolved the Diet instead of ordering its prorogation for ten days? "The one side," says the *Nichi Nichi*, "thinks thus: If we attack them in this way, they may perhaps resign. The other side hopes thus: If we take their attacks in good part, they may perhaps become reconciled." Thus neither is marked by any strong self-confidence; they are both vacillating and undecided.

* * *

The *Jiji Shimpo*, as usual, writes in an interesting manner. It seems to have been not a little disappointed in the *Gen-kom* Cabinet. When asked to choose between the present Cabinet and an imaginary Cabinet composed of the politicians of the parties in Opposition, our contemporary would not easily declare itself for either, for in neither does it repose much confidence. Comparing individual members of both sides, the *Jiji* observes that the Government camp can show men of experience, but the Opposition is strong in ability and energy. But the latter must yield the palm to the former in point of possessing the confidence of the general mass of people, for the statesmen of the clan Government have the credit not only of experience but also of long and splendid services to the country—services which none dares to dispute. Yet it is a singular circumstance that, while occupying such an advantageous position, the clan Government is unable to accomplish anything remarkable for the benefit of the country. To be frank, there is not on the Government side any great statesman capable of uniting his comrades in an effective combination. What deprives the clan Government of its vitality, more than anything else, is the prevalence of personal considerations (*jôjitsu*). The *jôjitsu* is the blight of clan Government. As to the distinction between the statesmen of the Civil and Military schools, it is stated to be of little consequence, for while the former are weak and vacillating, the latter are deficient in talent and knowledge. So, there being little hope of getting a good Administration out the clan statesmen, our contemporary is tempted to raise its voice for calling the Opposition politicians into power. There are, in the *Jiji's* opinion, many statemen of superior calibre and energy in the Opposition, who would find no difficulty in disposing of some of the questions that perplex the clan Government. The only drawback to such an experiment would be that, since these young men do not as yet enjoy a large measure of public confidence, no Cabinet composed of them would be long lived. But then the same may be said of the clan statesmen: what Cabinet formed by them has been of long duration? Party Government is inevitable in Japan, and perhaps it might be better to begin the experiment early. At first there will be much trouble and confusion, but that need not cause any anxiety, for, in the *Jiji's* opinion, an age of political improvement and progress is always marked by trouble and confusion. However, our contemporary would be well satisfied with the present Cabinet, if it be willing to fulfil its responsibilities.

* * *

The question of the so-called strict enforcement of the treaties attracts much journalistic attention. The *Nippon* devotes itself almost entirely to the discussion of this question. It is a noteworthy circumstance that many of the facts mentioned in the explanatory document attached to the proposed Representation to the Government on the same subject, are exactly those published by the *Nippon* in a recent series of articles to which allusion was made at the time in these columns. The *Nippon* was also the first to publish the document in question. Our contemporary makes some significant hints, to the effect that either the President or the Chief Secretary of the Lower House used his official authority to prevent the appearance of the explanatory document in its original form, thus causing a delay in the distribution of copies among the members of the House. What alleged corrections may have been made, we are not told. At all events, it seems silly to maintain that either the President or the Chief Secretary of the Lower House would or could have introduced the alleged corrections in opposition to the wish of the introducers of the motion. The *Nippon*, to say the truth, is perhaps too much excited to appreciate the force of any reasoning except that of its own partisans. In one of its latest articles on this subject, is remarks that the controversy is not between the Government and the people, but between Japanese and non-Japanese. Everybody who opposes the so-called strict enforcement of the treaties is declared to have no claim to be considered a Japanese.

* * *

This hysterical tone is echoed by the *Niroku Shimpo*. The latter paper observes that the strict enforcement of the treaties could be opposed by none but the foreign residents, the Government, and the Radical party.

* * *

The Progressionist papers generally maintain an attitude of silent approval. They know very well the absurdity of the agitation for the strict enforcement of the treaties, but nothing is unwelcome to them which can be turned into a weapon of attack upon the Government.

* * *

The Radical Party's attitude on this subject is a little ambiguous. It is known that the Party recently decided to oppose the motion for the Representation, should it be brought up for discussion on the re-assembling of the Diet. This resolve has brought down upon the heads of the Radicals the ridicule and wrath of the papers in favour of the motion; they held up the fact as a proof of the Party's connection with the Government. The Radical organ, the *Jiyu Shimbun*, at first wrote in a tone which clearly indicated that its Party was resolved to offer a stout opposition to the passage of the motion in the Lower House. But now it declares, in answer to a libellous article of the *Nippon*, that, should the motion again come up for discussion, the Radical Party will not oppose it, though not attaching much importance to the question. Of course electoral considerations must not be lost sight of.

* * *

The newspaper comments on the prorogation of the Diet have already been noticed separately.

EDITORIAL NOTES.

ADDRESSES TO THE THRONE.

THE following Address to the Throne has been introduced in the Lower House of the Diet by the *Kokumin Kyokai*, and will doubtless come up for discussion immediately :—

ADDRESS TO THE THRONE.

May it please Your Majesty—Your Majesty's humble servant, Kusumoto Masataka, President of the House of Representatives, with the utmost humility and respect ventures to submit :—

Your Majesty, on the 10th day of the 2nd month of this year, was graciously pleased to convey a Message to Your Majesty's Ministers and to the two Houses of the Diet, to the effect that, as the military defences of the Empire must be completed without delay, Your Majesty would reduce the expenditures of the Imperial Household, and grant a sum of three hundred thousand *yen* yearly towards the construction of ships of war. Your Majesty's subjects, profoundly touched by Your Majesty's gracious and far-seeing design, would have seconded it in however humble a manner, but Your Majesty benevolently refused to allow this, and Your Majesty's servants could only feel painfully sensible of the shortcomings and neglect of duty on their part that had been responsible for causing such concern to Your Majesty. Your Majesty's servants, sensible that did they decline Your Majesty's contribution for ship-building purposes they would have been opposing the Imperial will, while, on the other hand, did they accept the Imperial munificence, the nation would be disturbed by a consciousness of unmerited benevolence, have remained until now in doubt and perplexity. Now, however, Your Majesty's servants venture to Address Your Majesty.

There is now a surplus in the national Treasury, and no occasion exists for Your Majesty to be troubled about the matter of ship-building. Your Majesty's servants, therefore, would humbly desire to return Your Majesty's contributions from henceforth. Most humbly do Your Majesty's servants entreat that, in consideration of the nation's earnest hope, Your Majesty will graciously approve the prayer thus conveyed to Your Majesty through Your Majesty's servant, Kusumoto Masataka.

* * *

Another Address, the text of which is not yet in our hands, has been introduced in the Lower House by the *Jiyu-to*. It bears the names of Messrs. Kono Hironaka, Kataoka Kenkichi, Suzuki Shoji, Sugita Teiichi, Ishida Kwannosuke, and others, and its object is to pray that the contributions of 10 per cent. from official salaries, which the Emperor last session ordered to be made on account of ship-building, shall henceforth be dispensed with.

* * *

Of course the object of these Addresses is to enable the House to deal freely with official salaries in the Budget. The House has not a particle of right constitutionally to touch official salaries: they are fixed by the Emperor, and when the House attempts to reduce them in the Budget, it frankly and flagrantly invades the Imperial Prerogatives. On the other hand, official salaries offer the only ground on which the Opposition can hope to fight a battle *à l'outrance* with the Government, and since the Sovereign's message last session amounted to a clear intimation that His Majesty considered a reduction of ten per cent. quite sufficient, the House, whatever may be its ultimate estimate of the respect it owes the Throne, dare not attempt further reductions without at least an effort to dispense with that troublesome ten per cent. In a word, these two Addresses mean that the House wants a free hand for cutting into official salaries, and does not wish to be hampered by any delicate considerations such as the Sovereign's munificent action and wise direction continue to suggest to the nation. It is not easy to preserve a semblance of respect while saying to a Sovereign, "We decline Your Majesty's arrangement and propose to make our own," and the framers of the Address have evidently felt the difficulty. Besides, they had to deal with the dilemma that, a few months ago, they accepted with acclaim the plan which they now rebel against. That obstacle they quietly surmount by confessing that they were in a quandary last session, but have recovered their wits now. "Truly we did not then know what to do, Your Majesty; but we see our way more clearly now, and we can not conform with Your Majesty's methods. We must be at entire liberty to cut the Budget about in our own fashion, for a fight we must have under any circumstances." It is a curious object lesson in parliamentary procedure. Consistency is evidently the last thing that the present House of Representatives desires to be credited with. A few days ago it solemnly assured the Throne that it had made a sad blunder in recommending Mr. Hoshi Toru for the post of President. Now, it adds a confession that it lowered its arms last session, and enthusiastically accepted the Sovereign's ruling, not because it approved His Majesty's wisdom, but because it was really too much bewildered to know what to endorse and what to reject.

COUNT ITO AND THE CABINET

THE *Kokkai* says that Count Ito has spoken some very strong words to the Cabinet with reference to the Address to the Throne on the subject of Official Discipline. The view of the Minister President, according to this authority, is that the Address is a kind of impeachment of the Government, for although the power of impeachment is not vested in the House by the Constitution, the right to address the Throne is accorded to it, and of course that right may be exercised so as to amount virtually to an impeachment. The Count therefore told his colleagues either that the Cabinet must accept the whole responsibility and resign in a body, or that a decisive step must be taken towards the House of Representatives. None of the Ministers of State present at the meeting, adds the *Kokkai*, raised any objection to this view.

* * *

We cannot, for our own part, see that serious importance attaches to the Address in the sense of an impeachment. The House's treatment of Mr. Hoshi Toru has furnished a fatal guide for gauging the value of its impeachment. It is a House swayed at present by a majority without any sound sense of justice or responsibility. We do not believe that in the history of nations there is recorded a parallel instance of a solemn conclave of legislators carrying a complaint to the Throne that their Sovereign's Ministers keep low company and frequent vulgar resorts. It these be the kind of matters that the Japanese Legislature considers itself bound to supervise and make the subject of Addresses to the Throne, this country stands in sad need of a few masters of satire. The whole affair is supremely petty and ridiculous. To notice it at all involves a loss of dignity. To leave it unnoticed, is to run the risk of being misunderstood by the unreasoning section of the public. What it displays before everything is the very shallow character of the House of Representatives' respect for an Emperor whom it troubles about such trifles, and the great difficulty that the leaders of the Opposition experience in finding straw to construct bricks for breaking the Government's head.

* * *

Count Goto's view of the affair, according to the *Kokkai*, is characteristic. He was visited recently, says our contemporary, by a leading member of the *Jiyu-to*. The conversation turned on the Address to the Throne and the visitor said :—"Now that the Emperor has been troubled about the business, the Ministers of State ought to take the responsibility on themselves and distinctly clear up the rights and wrongs of the accusation. You, Excellency, are very intimately connected with it. What is your view?" To which Count Goto is said to have replied, laughing :—'You gentlemen will make nothing of it, however much you agitate. So long as my conscience tells me that I have nothing to reproach myself with I shall not be moved by silly theories. The charges brought against me amount simply to this, that I have associated with merchants and frequented teahouses. I am a connexion of Mr. Iwasaki. He is a merchant. The majority of his acquaintances are merchants, and I have often accepted invitations from him to meet his friends and dine with them. If any commotion is to be raised whenever I associate with merchants, then obviously I must sever all relations with my relative. Not a few of your Party's members came to me and wanted me to join them in a choice scheme about that affair of the Exchanges, but I declined to have anything to do with such shady transactions. Instead of making a row about nothing, don't you think you might be better employed pulling the beams out of your own associates' eyes. I can give you their names." Rather a hot retort that for the leading Radical, whoever he may have been, though the *Kokkai's* comment is the old proverb "You can't make a carving in rotten wood," by which our contemporary would apparently have us understand that Count Goto's reputation is beyond the chisel of slander.

MR. HOSHI TORU.

ACCORDING to the *Mesamashi Shimbun*, Mr. Hoshi's organ, it is stated that the ex-President of the House of Representatives has addressed the following manifesto to the inhabitants of the First Election District in the Prefecture of Ibaraki :—

GENTLEMEN,—As you did me the honour to elect me, I believe you have informed yourselves about my conduct in the recent affair. On which side does the blame lie, on mine or on the House's? It is for you to decide. Have I acted falsely towards the House of Representatives or has the House of Representatives acted falsely towards me? It is for you to decide. I appeal to your impartial judgment, and I intend to abide by whatever verdict you may be pleased to pronounce. Had I betrayed your trust, and had you disowned me, I should have had nothing to say to you. But your faith in me has hitherto been so great that even when I was the object of indiscriminate criticism and censure, you repeatedly assured me of your unaltered trust, and thus strengthened my self-confidence. I, therefore, entertain no doubt that, in the election of a member, you will again honour me with your votes, not only that I may be able to resume my seat in the Diet, but that you may re-assert the rights which have been trampled upon by the House of Representatives. This statement of my purpose and persuasion I respectfully submit to you.

* * *

It is interesting to notice the attitude of some papers towards Mr Hoshi at the moment of his fall. The *Hochi Shimbun*, as might have been expected, seems determined to pursue its enemy to the bitter end. Addressing the inhabitants of the election district lately represented by Mr. Hoshi, the Progressionist organ tells them that a locality which produced Gamo Kumpei, the celebrated Imperialist and patriot, ought to be ashamed to be represented by an agent of the Clan Government, a deserter from the cause of the people. Entirely different is the attitude of the *Kokkai*, which declares itself disgusted with "the base and unmanly" persistence of the Progressionist organ's persecution of Mr. Hoshi. Strongly as it condemned his obstinate refusal to resign his Presidential chair, the *Kokkai* can not but admire the indomitable will and unflinching resolution displayed by him. Our contemporary heartily wishes all success to his canvass of his old constituency.

PARTY INTELLIGENCE.

IT was generally supposed that the *Doshi* Club, a political body composed of the recent seceders from the Radical Party, would on all subjects act in concert with the *Domei* Club and the Progressionists. But this natural expectation has not been fulfilled. Out of the seventeen or eighteen seceders there are doubtless several who sympathise with the Progressionists. But the majority seem to be well affected towards their former comrades of the Radical Party. This fact was clearly demonstrated in connection with the election of candidates for the Vice-Presidentship of the House of Representatives. The *Doshi* Club voted for Mr. Kataoka Kenkichi of the Radical Party, while the *Domei* Club and the *Kaishin-to* supported Mr. Abei Iwane in co-operation with the National Unionists. It is reported that the *Doshi* Club proposed to act concurrently with the *Domei* Club on this question, but that the latter declined, saying that it preferred to act independently. But in point of fact the *Domei* Club worked in common with the *Kaishin-to* and the *Kokumin Kyokai*, and this circumstance has, it

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

is said, given great offence to the *Doshi* Club, the members of which are, consequently, resolved to avoid cōoperation with those parties as far as possible.

* * *

The *Nichi Nichi Shimbun* reports that a section of the National Unionists are dissatisfied with the policy which their leader, Viscount Shinagawa, instructs them to pursue. On the 14th inst., Messrs Sato Shozo, Tsubota Shigeru, and a few others waited on the Viscount and advised him to return to the original policy of the Party. Viscount Shinagawa—so the story runs—acknowledged that he himself was responsible for having landed his Party in a false situation, but could not give satisfactory answers to his visitors as to a future course of action. Our contemporary also states that frequent inconsistencies in his conduct have led his most devoted followers to entertain doubts as to his sincerity of purpose. The principal point of dissatisfaction seems to be the present alliance of the party with the *Kaishin-to*. The *Nichi Nichi* fears that the National Unionist Party may, under the circumstances, undergo serious disruption.

HOW A JAPANESE PAINTER TOTALLY IGNORANT OF ENGLISH MANAGED TO TRAVEL IN AMERICA.

Mr. Kubota Beisen one of the most prominent Japanese painters of the Western school, started for America some time ago, to visit the World's Fair in Chicago, being almost entirely devoid of any knowledge of English. On the road from New York to Chicago, he made a mistake in the name of a certain station, and thinking that the train was to stop there for some while and that he had ample time for lunch, he left the train, went into the dining-room of the station, and there took an ample meal congratulating himself on the quietness of the refreshment room which he had all to himself. When he had finished his repast he found to his utter confusion that the station was deserted and that the train had gone off with all his personal effects. He was indeed in a sore fix, for he knew not how to inform the officials of his awkward situation. An idea struck him however, and he went off and bought a note-book in which he hastily drew a sketch of a lone traveller staring in a sad plight after a train going off in the distance, and showed the sketch to a station official. The officer comprehended the situation at once and drawing a picture of telegraph wires and a few houses, intimated to Mr. Kubota that he had better wire to the next station. The painter then represented to the officer by pictures what things he had left in the train and in which cars they were to be found, and he wired the information to the next station, adding that the passenger could understand no English. Desirous of knowing when the next train was due the painter drew a clock, and the quick-witted officer filled in the long and short hands in their right places. Presently the next train arrived, he got back his effects and so reached his destination without any further accident. This story is taken from the *Nippon*.

DISSOLUTION

The *Niroku Shimpo* attributes to the Cabinet a resolve to dissolve the Diet, and assigns various reasons for the step. Count Ito, it says, is in favour of dissolution when the Lower House becomes more violent in its demeanour towards the Government. Mr. Mutsu, on the contrary, is of opinion that the measure is justified by the Address to the Throne on official discipline; while Count Goto would deal the *coup de grace* in connection with the Hoshi affair, or the Bill for the rigid enforcement of the Treaties. All this sounds very interesting, but we do not see how it is to reconciled with another statement in the same article, namely, that the Ito Cabinet is resolved to resign in favour of the Military Party, and that negotiations are in progress with Count Yamagata to that end. The whole story seems to be nothing more than an ill-considered hypothesis

WRECK OF THE "UNYA MARU."

It appears that this unfortunate vessel, belonging to the Osaka Steamship Company, left Onomichi Harbour for Tadami, Aki, at 7.30 a.m. on the 10th inst., having about 70 passengers on board. Encountering bad weather off Futamado, she struck on the Ushiuo reef and sank in a few minutes, at about 11 o'clock a.m. Fortunately the accident was observed from the shore, and boats were at once sent off which succeeded in rescuing the crew and sixty passengers, the remaining ten, mostly aged persons or infants, having succumbed before assistance could be brought. The survivors were cared for by the Police authorities at Tadami, and, the vessel having sunk in shoal water, the bodies of the drowned passengers have been recovered, and a portion of the cargo salved. Much compassion is felt for a young man named Naruto Toyokichi, a Hokkaido colonist, who with his father and mother, was on his way to his native village in Yamaguchi to visit the tombs of his forefathers. His parents, being old and infirm, were both drowned, and the young man is well-nigh maddened by his sudden bereavement. We take these particulars from the *Kokumin Shimbun*.

THE NEW ITALIAN CABINET.

A TELEGRAM received yesterday in Tokyo announces the formation of a new Italian Cabinet as follows:—

Signor Crispi	President of Council and Minister of the Interior.
Signor Calenda	Minister of Justice.
Signor Sonnino	Finance.
Signor Blanc	Foreign Affairs.
Signor Saracco	Public Works.
Signor Mocenni	War.
Signor Morin	Navy.
Signor Bacelli	Education.
Signor Boselli	Agriculture & Commerce.
Signor Ferraris	Communications.

Signor Blanc, who takes the portfolio of Foreign Affairs, was formerly Italian Representative at Madrid, and subsequently at Constantinople. He is a disciple of the great Cavour, and is married to an American heiress. The return of Signor Crispi to power is an event that calls for congratulation both on Italy's account and on England's, for not only is he one of the leading statesmen of the time, but his friendship for England has been established beyond question.

THE LORD MAYOR AND THE "YOSHINO'S" OFFICERS.

The Lord Mayor of London, at the suggestion of the Japan Society, invited the captain and officers of His Imperial Japanese Majesty's ship *Yoshino*, then in British waters, and the members of the Council of the Japan Society to luncheon at the Mansion-house on 7th November. Captain Kawara, while expressing his thanks for the invitation, stated with much regret that the ship having to undergo some naval and torpedo practice off Portland from the 7th to 13th, he was unable to bring her into the Thames. He conveyed his sincere acknowledgment for the mark of courteous and friendly feelings shown on the part of the first magistrate of the City towards the naval officers of Japan. Captain Y. Kawara and the officers of the *Yoshino* invited the members of the Japan Society to visit the vessel in Plymouth Sound on the 3rd November to celebrate his Imperial Majesty the Emperor of Japan's birthday.

COUNTS OKUMA AND ITAGAKI ON THE HOKKAIDO

We read in the native papers that a deputation from Hokkaido, consisting of Messrs. Hisamatsu and Soshi, lately waited on Counts Itagaki and Okuma with a view to ascertaining their opinions on the development and prospects of that island. Count Itagaki is reported to have told the deputation that although many petitions from the Hokkaido had been sent to the Diet, they had mostly miscarried, owing to defects in the manner of presenting them. This misfortune would, he hoped, be avoided in the future by the appointment of a Board of Investigation, which would take care of such petitions through the preliminary stages. He was very strongly of opinion that more should be done to develop the island and regretted the fact that so many members of the Diet were indifferent to this question. He believed that the clearing and opening up of the country should begin from the sea coast and that the fishing industries had a prior claim to agriculture upon their attention. The coast defences he considered should be very carefully elaborated, and everything done that the Government could do to give the colonists a feeling of security and a reasonable prospect of material advantage. He hoped that much good would be done by the building of the palace at Kanikawa. Count Okuma was also of opinion that the development of the sea-board ought to come first, for which purpose he recommended a railway from Soya in the province of Kitami, along the rich coast of Teshiwo to Nemuro, a distance of about one hundred *ri*. If this were built and Soya, which is separated from Saghalien by only a narrow strip of sea, well provided with fortifications, the richest part of the island would be opened, and also, rapid and easy communication with the Kuriles be secured. The Count was further of opinion that the Hokkaido should possess a legislative body of its own, with powers very similar to, though perhaps somewhat wider than those now enjoyed by the local assemblies on the Main Island. This, he said, would secure for the Island Government according to the wishes of the people: it would also obviate the necessity of re-establishing the Colonial Department, or of separating the province of Oshima from the rest of the Island and erecting it into a separate prefecture.

CLIMBING IN THE WATER.

When a man who cannot swim falls into deep water, he begins to climb. He knows perfectly well that no method of procedure can possibly be worse. He knows, in fact, that to climb is to sink. Yet he climbs. He has been taught that if a man does not know how to swim, his only chance of safety lies in dropping his hands and endeavouring to float calmly. Yet the unfortunate person acts exactly as though he were endeavouring to climb, "thrusts his hands, alternately upwards, with open clutching fingers, as if to grasp something above his head, his legs moving in unison with his arms." Dr. Louis Robinson, writing about this curious propensity, says that it is the recrudescence of habits learned when the human beings of to-day were monkeys. "The drowning man," he writes, "is unwittingly employing those instinctive routine movements which, throughout the vast evolutionary epoch when the tree-tops were the chief place of safety, contributed to survival in sudden emergencies more than any other form of activity."

A VALUABLE SALVAGE JOB.

On the 1st inst., writes our Hongkong morning contemporary, a coasting steamer brought the news to Manila that an American ship was stranded on the Labuan coast, and was understood to have on board a cargo of 76,000 cases of kerosene. The steamer *Batuan*, which was leaving for Iloilo, received orders to go to the scene of the accident to see if she could render salvage services. Mr. Robinson and others who might possibly be interested in the work took passage on the *Batuan*. The stranded vessel was no doubt the *Carl Friedrich*, though the nationality of the latter is German. As already reported, the *Carl Friedrich*, which was bound for Hongkong, was abandoned by her crew. Her salvage will probably be a valuable job for those who reached her first. Another party set off from Sandakan on the news reaching that port.

INCONVENIENCE OF THE ABT SYSTEM.

Numerous complaints are being made about the working of the line over the Usui Pass, an important channel for the ever-increasing traffic between the Hokuetsu district and Shinano on the one side, and the Kwanto districts on the other. The *Nippon* says that, far from being a convenience, the line, as at present worked, is a positive obstruction to commerce. There are now about 200 car-loads of goods waiting for transportation at Yokogawa station and about 30 loads at Takasaki. There are six trains a day, each train taking about five freight-cars. Thirty cars a day is therefore the maximum that can be taken over the pass, so that, at the present

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

rate of traffic, goods are generally delayed at the foot of the pass for about a week—a serious delay in the case of perishable articles. To make things worse, the pack-horse has almost entirely disappeared from the neighbourhood since the opening of the railway, so that there are no means at hand for relieving the strain.

TWO LECTURE MEETINGS.

THE *Kaishin-to's* course with regard to Mr. Hoshi Toru does not appear to have earned for them much popularity. On the contrary, if we may judge from the results of a lecture meeting organized by them at the *Kinki-kan* on Sunday, the present position closely resembles that in which they found themselves at the time of the agitation against Count Okuma's Treaty. Not one of their lecturers could get a hearing, though some of them kept the platform for twenty or thirty minutes, vainly endeavouring to outstay the uproar. Obviously the audience had come there not to listen, but to prevent any one speaking. The din was perpetual and deafening. No one was allowed to make himself audible except an Inspector of Police, who delivered a brief speech to the effect that, though he was not authorized to interfere with any due expressions of criticism or dissent, his duty forbade him to allow a disturbance that obstructed all speaking. The audience listened to this warning quietly enough, but afterwards became more unruly than ever, and finally a struggle took place between the police and some *soshi* that led the commotion. All hope of restoring order was then abandoned, and the meeting was dispersed.

* * *

The next day (Monday) Mr. Hoshi Toru held a lecture meeting on his own account at the same place. The ex-President alone was advertised to speak, and by one o'clock every spot in the house was crowded by an audience of over three thousand people, who listened most attentively to Mr. Hoshi's powerful speech. It may well be supposed that Mr. Hoshi delivered some home thrusts at the members of the House of Representatives who had combined to effect his downfall. He declared that their attitude against their former colleagues of the Radical Party and against himself had been solely due to jealousy of the popularity enjoyed by the Radicals, and that they had attacked him merely for the purpose of robbing him of his seat as President of the House of Representatives. They pretended that it was chiefly through his action that the combination between the three sections of the Opposition, the Radicals, the Progressionists and the *Domei* Club, became dissolved in the present session of the Diet, but for his own part he could not discover what unjustifiable course he had followed to be exposed to such a charge. He believed it to be simply a reflection of their own hostility to the Radical Party. As a proof that their charges against the Party and himself were devoid of any truth, he reminded the audience how the Progressionists and members of the *Domei* Club had lately acted toward the members of the National Union. The members of the House of Representatives identified with the Party led by Viscount Shinagawa were really the off spring of official interference in the general election held last year, against which the Progressionists and the *Domei* Club in conjunction with the Radical Party had gone so far as to carry their complaint to the Throne itself. The National Unionists, in short, had last session been the inveterate foes of the Progressionists and of the *Domei* Club, and ought to be equally their foes this session. But everything had apparently been forgotten and they were all now working in unison. On the other hand, swayed by unprincipled and unscrupulous envy and hatred of the Radical Party, they had turned against it, and treated the President of the House with gross injustice, thus renouncing their former allies and embracing their old foes. What again, had they to urge against him, the speaker? They alleged that his conduct with regard to the Bourse question and the Soma affair had been open to censure. The Progressionists were especially busy in discrediting him, and had employed for the purpose a petty daily newspaper professing their principles the *Kaishin Shimbun*. But what evidence were they were able to bring against him? Nothing whatever of a tangible nature. They relied wholly on a vague pretence that he had been guilty of some wrong-doing or other. As for the Bourse question, he had nothing to say. So shadowy and obscure was the accusation that he knew not how to refute it. But with reference to the Soma affair he wished to speak a word or two. It was simply owing to a chivalrous desire to check the strong and uphold the weak, that he had undertaken to be Counsel for Viscount Soma. In the beginning of that famous case, the situation of the Viscount had been truly piteous; almost everyone was against him, and none would consent to become his Counsel, though it was know from the first to men of sense that the horrible charges brought against the stewards of the house and the Viscount were merely a plot worked up by a band of speculators. To consent, under such circumstances, to become Counsel for the house of Soma did not appear in any sense blameworthy; on the contrary, he thought it should rather be counted one of those chivalrous acts for which the Japanese people are generally praised by outsiders. Yet it was on such vague and indefinable grounds that the notion of want of confidence in the President had been introduced, and finally passed. Surely it was more than singular that if his acts has been really blameworthy, his case was not entrusted from the outset to the Disciplinary Committee to be investigated. His opponents knew, however, that if a charge is really to be brought against any member of the House for a wrong action alleged to have been committed, that charge should be made within the limit of three days from the day on which the action was committed. The limit of time had long expired with regard to the wrong-doing attributed to him. But that was not the main reason why the charge against him had been framed in language so ambiguous and inexplicable. The fact was that his opponents knew that they would be unable to attain their cherished object, the ousting of the President, should the matter be submitted for due investigation by the Committee. Hence their uncermonious and strange way of dealing with this grave affair. Still, out of respect to the decision of the House, he obeyed the unjust sentence and abstained from appearing within the Chamber for the stated period of one week. What had then happened? His re-appearance after the lapse of the prescribed time had been considered an act implying contempt of the House's decision, and on that sole ground he had been expelled from the House. Could anything have been more irrational, more unconstitutional, and more unparliamentary than such a resolution? If his re-appearance at the end of a week was wrong, why did the House vote for his suspension for that period? He was accused of holding a decision of the House of Representatives in contempt, because he carefully observed the period of suspension, and made his re-appearance after that period had expired, strictly in obedience to the resolution of the House. Whether he resigned or did not resign the Presidency of the House, was a matter resting with himself entirely, and his conscience had told him that to resign on such grounds would have been not only absurd but very injurious to the future progress of Parliamentary institutions in Japan. He feared that a bad precedent would be established for the Japanese Diet, if he resigned his Presidency as hinted in the original resolution against him. But his effort was of no avail, and a precedent, which was a novelty not only to the infant Parliament of Japan but to the older ones of Europe and America, had been established. It is an accepted doctrine in every country where constitutional systems prevail, that to overstep the limit of advice and to compel a man to obey the counsel of others is to strip him of his right and to rob him of his freedom. Yet the majority of the House of Representatives has been guilty of this very offence toward Mr. Hoshi. They had robbed him of his seat when he did not do as he was advised to, and thereby trampled upon the right belonging to him. That practically amounted to trampling upon the right of representation of the people living in the 1st Electoral Section of Tochigi Prefecture, which Mr. Hoshi represented. For the wrong he has suffered from the unenlightened *(fumei)* members of the House of Representatives, there was no means for him to obtain redress, it being useless to resort to the common way of appealing to a Court of Law. Hence he has been refused "the right of being tried by judges," as provided in Art. XXIV. of the Constitution. One point which should be considered with special attention in the present affair was in connexion with the right of the Sovereign to nominate the President, as has been pointed out in our columns. Should the President who owes his appointment to the nomination of the Sovereign, be dismissed from his office, at the free choice of the House of Representatives, does it not amount to an invasion of the rights or functions of the Sovereign? He said that he had great doubts on this point, but since it was a question of grave importance connected with the Constitution of the country, he did not venture to give any definite conclusion. He then spoke as to his intention of seeking his re-election from the First District of Tochigi. He was fully convinced, he said, of the unconstitutional practice of the majority of the House of Representatives in expelling him from the House; and he was equally convinced that it was a great stain on the parliamentary history of the country. The primary object of his seeking re-election from the district he had lately represented, was to undo this unconstitutional doing of the House and to wash away the blot with which it has chosen to stain itself. He should move for the reversion of the resolutions voted against him and for blotting out of that part of the proceedings of the House—the record of the debate of the day. This was to guard the Constitution from being disgraced, and the House of Representatives from being placed in a ridiculous situation, both in the present and hereafter. He alluded in this connection to the famous case of John Wilkes in the English House of Commons. He next addressed himself to the question whether or no the House of Peers and the Government itself were not culpable in having remained as idle spectators of the scene, and in having suffered the motion to pass without even trying to interfere. His answer to this question was in the affirmative. He argued that the President of the House of Representatives duly nominated by the Emperor had been prevented from discharging his functions as provided in the Law of the Houses; in other words, the majority of the House of Representatives acted in Mr. Hoshi's case in defiance of the Article in the Constitution in which the competence of the President is set forth. Now the administration of a constitutional country is conducted by the combined effort of the two Houses of Parliament and the Government, and if one of the Houses acts in defiance of the provisions of the fundamental law of the country, is it proper for the other House and the Government to leave the affair disregarded? In the last part of his speech he reminded his hearers of the needlessness of submitting to the opinion of the majority and of public opinion, so long as that opinion is so far perverted from the right course as to affect unjustly the right and freedom of others, as in his case. It was half-past two when the speech ended, amid the applause and cheers of the audience.

TWO MEETINGS.

Two meetings of an interesting character were recently held in the capital. The one was a meeting of firemen organized for the purpose of agitating the claims of the fire brigades to be entrusted with the laying of the water-pipes in the streets. Much enthusiasm was evoked by an enthusiastic orator who "with the characteristic bluntness of a Son of Yedo," ascended the platform in full fire-brigade uniform, and told the audience that in consideration of the self-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

denying services of the firemen the least the citizens of Tokyo could do would be to entrust them with the duty of laying down the pipes. We fully appreciate the bravery of Japanese firemen in general, and of the Tokyo firemen in particular, and certainly think they have some claim upon the substantial gratitude of their fellow-citizens, provided always of course that, in this particular instance, they know how to lay down water-pipes. Amateur water-arrangements are not always successful.

* * *

The other gathering was a meeting of shampooers, for the purpose of organizing a guild for their trade. Competition, it appears, is playing havoc with this old-world industry. The ladies have taken up shampooing with great vigour and are cutting out the men. There is something really touching in the complaint, uttered by one of the speakers, that "girls of seventeen and eighteen who are not even blind," are becoming shampooers now, and get many more customers than the poor old blind men who make our nights melancholy with their sad sounding pipes. We give the shampooers all our sympathy, but we doubt whether they will be able to keep the fair sex out of the business. For the sake of general morality we wish they could.

THE EASTERN RADICALS.

THE *Toyo Jiyu-to*, or Oriental Radicals, a political coterie formed by Mr. Oi Kentaro after his retirement from the *Jiyu-to*, has now been dissolved. We regret to say that the fact must not be taken as any indication of diminished activity in the cause of mischief on the part of the pernicious politicians that muster under Mr. Oi's banner. They all continue their *metier* as agitators though in differently titled associations, several of them have joined the *Kwan-to Sonen kai*, or Young Men's Society of Kwan-to, and the rest have been drafted into the *Dai Nippon Kyokai*, or Unionists of Great Japan, where they will continue with unabated energy to propagate the anti-mixed-residence doctrine. They are a worthy outcome of these topsy-turvy times.

THE ALLEGED CASE OF BRIBERY AT NAGOYA.

WE have already alluded in our columns to the fact of domiciliary visits having been made to the houses of Messrs. Matsumoto, chief of the Nagoya Branch of the Imperial Estates Bureau, and Saiga, chief clerk of the Nagoya Court of Appeal, on a charge of having received bribes in connection with a case now before that Court. We gather from the vernacular press that some time ago two speculators, Nishizawa Shinzo and Tokida Kosuke, procured from Government 150 *cho* of forest land in Mikawa, which they undertook to reclaim. Difficulties, however, arose between the two, and the result was a law-suit which was tried first before the Local Court, and afterwards before the Court of Appeal, at Nagoya. The verdict was given against Tokida, who to revenge himself maliciously brought a charge against his late partner of having forged official documents. In this charge, Messrs. Matsumoto and Saiga, as also Mr. Imai, one of the representatives from Mikawa in the Diet, were implicated; and it was in connexion therewith that the domiciliary visits already alluded to were made. There are, however, many conflicting rumours on the matter, which is being very carefully examined into by the Nagoya authorities.

POT, CUP, AND TEA.

IT is a neat and concise idea to sell a tea-pot, its contents of hot tea and a cup wherewith to drink the beverage, all together. That is what is done at several of the stations on the Tokaido Railway, especially those in the great keramic provinces of Owari and Mino. On the arrival of a train, men pass up and down the platform carrying trays full of tea-pots containing hot tea just made, and on the lid of each pot a cup rests in an inverted position. The pot is a common affair enough, shapely but of unglazed pottery. The cup is of porcelain decorated with blue under the glaze. For the whole little equipage the traveller is asked to disburse two *sen* and a half, or a sum somewhat less than three farthings. The idea is well worth adopting in Europe and America. Nothing comparable in the way of cheapness could be expected, but there is plenty of margin.

TROUBLE BETWEEN NO. 166, YOKOHAMA, AND THE SAWA FIRM.

THE Sawa Exporting Firm, Minami-Nakadori, Yokohama, made a contract, writes the *Shogyo Shimpo*, with certain weavers, in March and April of the current year, for about 800 *hiki* of *habutaye*, in consequence of an order received by them from No. 166, Yokohama. In the month of June, most probably in consequence of tradal depression in America, the foreign firm asked the Sawa Company to annul the order, and the latter, though it was impossible for it wholly to comply with this request, assented to reduce the amount of silk ordered by about 300 *hiki*, the weavers not having yet fully completed the original order: and the balance was delivered by the Sawa House at No 166, as it was received by them from the weavers. The foreign firm, however, steadily declined to inspect the goods thus delivered, and demanded reductions, first in the quantity to be delivered, and then in the price, till finally the Japanese firm was obliged to break off the transaction. The latter claim to have lost about 2,800 *yen* over the affair. We give these particulars for what they are worth.

CHILD-STEALERS.

THE Chungking correspondent of the *North China Daily News* writes thus:—

What seems a well authenticated story comes from an adjoining district of the abduction of children by two women who lived by themselves in a lonely place and were given to fortune-telling and the like. It transpires that they were accustomed to steal children and sell them, or, if they proved intractable or of little value, they were put to death. This gave rise to the usual stories of foreigners kidnapping children, taking out their eyes and hearts, eating them, etc. The discovery came about in this wise. A man, being childless had adopted his brother's son, who was soon after stolen. Search was made in vain for a year or two by both men, but without success. At length a relative of theirs who knew the boy, passing by where these women lived, saw a boy clothed in rags working in the field. Upon questioning him, he found that he was indeed the lost boy. He hastened to give information, and the women were arrested and taken before the magistrate. It is said that they confessed to having stolen twenty-seven children. Nine of these had been sold at points near enough so that they were recovered. The wretched women met with the death which they so richly deserved. Still, there is such a settled conviction that foreigners abduct children that it is almost vain to hope that they will not be blamed the next time children are missing.

ECONOMYIN NAVAL CONSTRUCTION.

THE *Kokkai*, in an article on the expenses of constructing and maintaining an efficient fleet, estimates the average life of a war-ship at 30 years in times of peace and 22 years in times of war, and reckons that, in order to maintain a fleet of 120,000 tons in proper condition, an addition of 5,500 tons every year should be made to take the place of old ships passing out of the service. This would altogether entail an expense of about five million *yen*. The authorities, it is said, have therefore resolved to fix the average estimated life of a warship at 25 years, but to ask for a construction grant every 22 years. The surplus thus gained by the three years added to the life of the warship will be devoted to the construction of new vessels. This measure will shortly be submitted to the Cabinet.

FURTHER CONSTRUCTION OF WAR-SHIPS.

THE *Jiji* reminds us that though the last session of the Diet negatived the proposal for adding to the strength of the Imperial Navy, the project for constructing additional men-of-war was not allowed to fail. H M the Emperor having graciously appropriated a sum of 300,000 *yen* a year for six years out of the Privy Purse, a noble example which was followed by a voluntary contribution of 10 per cent. on all official salaries. The Government, however, in spite of this forcible expression of His Majesty's wishes, seem to be very slow in carrying into execution so laudable a project, and have not yet entered into any contract for the construction of the vessels, though it is said that designs and specifications have been requested from several ship-building firms in England. Our contemporary further adds that it is the intention of several members of the Diet to ask questions in the House about this matter.

THE RADICAL PARTY'S MANIFESTO.

THE following Manifesto has been issued by the Radical party on the question of want of confidence in the President of the House of Representatives:—

We, at the head-quarters of the Radical party, hereby address a circular on an urgent question to all our sympathizers throughout the whole country. We are tempted to cry "O, liberty, in thy name," as did Madame Roland when she made a touching appeal on behalf of liberty. What do we now observe around us but men actuated by motives of personal resentment and bent upon the gratification of their malicious passions, uniting together, on the pretext of the so-called wish of a House of the Diet, to pervert the Legislature into an instrument for indulging unworthy sentiments of private malice and retaliation, not even shrinking from trespassing upon the sacred Throne of the Emperor and trampling upon the constitutional laws of the land. As if they are not satisfied with these extravagances, they are intent upon wreaking their wrath upon the Radical Party to their hearts' content. And what are the grounds for such a high handed procedure? Public opinion, they answer, and the wish of a House of the Diet. Is such, indeed, public opinion, and is such the wish of a House of the Diet? Is it not, under such circumstances, the bounden duty of a party like the *Jiyu to*, which constituted itself the guardian of liberty and the corner stone of Constitutional Government, to rise up and, before things come to an irretrievable pass, to turn the wave of public sentiment into the right direction? Do not you, our sympathizers throughout the country, believe with us that it is high time for the Radical Party to do its duty in order to remove the cloud hovering over liberty and rescue the constitutional system of government from its false position?

What has been the state of things thus far in this fifth session of the Diet? The first thing brought up for discussion was the question as to want of confidence in the President of the House of Representatives. Whether or not the President was unworthy of confidence will be considered presently. Let us first consider whether the Diet is authorized to pass such a resolution. This is a question which ought to be approached in a spirit of perfect fairness and impartiality. In the exercise of its undoubted power of legislation, the Diet is not allowed to overstep the limits imposed upon it by the Constitution and the Law of the Houses. If there be imperfections in the Constitution or the Law of the Houses, procedure should be taken for its amendment in accordance with the method provided for it in the Constitution. Such is the essence of our constitutional system, and anybody disregarding this fact must be regarded as the open enemy of the Constitution. Now the President of the House of Representatives receives his appointment from the Emperor, through the recommendation of that House, and his term of office is fixed for four years. Such being the case, can a mere vote of want of confidence have competency to alter the legally fixed term of his office? It can have no such competency, and is it not, then, clearly at variance with the spirit of the Constitution to attempt in that way to interfere with the tenure of that office? The case is different with a vote of want of confidence in the Cabinet; administrative officials are not, originally appointed for any fixed number of years, and whenever they come in collision with the Legislature in respect of their policy of administration, it is necessary to put the Legislature's confidence in them to the vote as a due gauge of the state of public opinion. To confound these two clearly different cases and to vote want of confidence in a President who is appointed for a fixed number of years and whose office consists merely in the maintenance of order in the House, is an act inconsistently with the spirit of the Constitution. Such is the reason why our Party has pronounced as unconstitutional the vote of want of confidence in the President of the House of Representatives.

Were Mr. Hoshi really guilty of the immoral conduct with which he has been charged by men intoxicated by sentiments of personal malice, why did not the Diet take the proper course of placing him in the hands of the Disciplinary Committee for punishment, and exercising its right of expulsion instead of merely declaring want of confidence

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

in him as President? On a question of morality like that, no distinction should be drawn between the President and a mere member of the House in favour of the former. Such a distinction is plainly a great insult to the private members. As to the alleged immorality of Mr. Hoshi, the question originated in this manner. Some men, impelled by motives of private resentment, caused a baseless story to be circulated in a shameless illustrated journal, which is not considered worthy of perusal by respectable persons, and it was these very men who afterwards joined in the cry and insisted upon a vote of want of confidence. Were the charges preferred against Mr. Hoshi founded on fact, he would not have been worthy of appearing in the House of Representatives even for a day, and the House, instead of voting an ineffectual resolution, ought to have at once proceeded to a disciplinary measure and driven him out of its sacred presence altogether. But what has the House done? It has recorded that conduct, which in a private member would lead to expulsion, does not warrant, in the case of the President, any measure severer than the deprivation of his Presidential chair. It is thus clear that the motive of Mr. Hoshi's persecutors was neither morality nor the dignity of the Diet, but their object was simply to dislodge him from his Presidential chair. The detractors of Mr. Hoshi at first boasted that they possessed proofs of their allegations, but when the production of evidence was permitted in an open court of law, they argued much but utterly failed to substantiate their charges. Instead of apologizing for having falsely accused Mr. Hoshi, as they ought to have done, they were brazen-faced enough to say that, though he had escaped legal punishment, he was still accountable to a moral tribunal. Their conduct is not worth even the pity of respectable persons. Such is the reason why our Party has declared the vote of want of confidence in the President the result of blind personal malice.

Our Party thus came to the conviction that, whether viewed in the light of the constitutional laws of the country or judged from the standpoint of fact, the vote of want of confidence in the President passed in the present fifth session of the Diet has no binding force whatever. Seeing that our Party was firm and immovable, men enslaved by malice charged us with a disregard of the wish of the Lower House. They are evidently ignorant of the true nature of law and public opinion. Public opinion must be obeyed, but at the same time the law of the land must be considered to be legitimately in force in virtue of the general approval of public opinion. Which, then, is of greater consequence, such law or mere public opinion? The answer is self evident. When, as in the present instance, temporarily prejudiced public opinion tramples upon the law of the country, our decision not to obey it must be regarded as an act of homage to true public opinion

But this is not the worst thing done by the Diet Being incapable of perceiving their error in passing the vote in question, their insatiable malice and resentment betrayed them into approaching the Throne on the subject, saying that, as they did not repose confidence in President Hoshi, they did not wish him to continue in office, and that they had acted without knowledge and were profoundly pained to submit that they had erroneously solicited the Imperial nomination of him originally. Such was their language; what could they have meant? When, however, they were subsequently confronted with interrogations from the Sovereign, they were confounded, not knowing what to do, and finally submitted that their object was to crave His Majesty's pardon for the error committed by the House through want of knowledge, and that they were deeply pained to find that their Address was framed in ambiguous language. Now, if the House of Representatives had acted erroneously through want of knowledge, was it sufficient for it simply to present an apology to the Throne? Had they known their duty to the Emperor, the members of the Lower House ought, while their apology was on its way to the Palace, to have resigned their seats for having betrayed the trust reposed in them by His Majesty as well as by the people. Failing that course, they ought at least to have apologized to their constituencies. They know how to ask the Emperor's pardon, but they have done nothing to apologize to their electors. This shows that they have no regard for the people, and that they lack the spirit of constitutional government.

How many of the members of our Party have offered their property, and even their lives, and how many of them have undergone the most painful hardships in resisting the tide of tyranny and in securing the establishment of a constitutional system? The Imperial Diet has been in session five times, but the Government has not entirely succeeded in the reform of evils, and the foundations of Constitutional Government cannot be said to have been yet firmly laid Is it not, then, a most regrettable thing for the sake of liberty that, at a juncture like the present, men infatuated by malice and resentment should endeavour by underground intrigues to destroy an important part of the machinery of Constitutional Government? It is now your duty, our sympathizers throughout the country, to rise and fulfill the great mission of the Radical Party, as the central pillar of Constitutional Government, by turning back the current of unconstitutional waves in the sea of politics.

THE EMPLOYMENT OF WOMEN IN THE PUBLIC SERVICE.

If that dear, silent *Spectator*, who so genially showed up the foibles of our forefathers nearly a couple of centuries ago, had only been present at a recent debate held in Tokyo about the employment of women in the public service, as telephone, telegraph, and postal clerks, what an amusing account he would have given us. What puzzles us, in the account which we have taken from our esteemed contemporary the *Nichi Nichi Shimbun*, is why on earth the fair sex should be dissatisfied with a verdict which is so eminently flattering to them. It is true that the meeting voted, as all sensible men in this country would vote, against the employment of women in the public offices. Here we thoroughly agree with them, though for reasons which we hope have more weight than those alleged by the speakers at this meeting. But the very rejection of the proposal was a compliment to the women. "It is a virtuous custom of Japanese women from olden times to remain at home and apply themselves to their domestic duties," is the first reason mentioned in our contemporary report. We fully agree with it, and should be the last persons to disturb so salutary an arrangement. But what are we to say of reason number two? "Women are by nature passionate and difficult of control." It must have been, surely, an assembly of hen-pecked husbands that came to such a conclusion. Women are generally tractable, that is, when you get them in companies. An individual lady may at times rule her husband. But when you get them together they are wonderfully amenable to discipline. They have no great powers of combination; they never strike for higher wages; they never make themselves corporately disagreeable. Even individually they—but perhaps we had better not express our sentiments. These sages, however, continue: "Woman is devoid of the power of judgment, and therefore unsuited for postal affairs, which require knowledge of an abstract and inductive character" We wonder what abstract and inductive knowledge is shown by the male functionary who gives you wrong information and bungles your postal arrangements? Men are just as likely to make mistakes in these things as are women. And, as to the inability of women to keep a secret, why a woman when she pleases can be as deep and as silent as a millpool. But lastly, it was conceded, "woman's voice is very useful in the telephone business." Ask the American, where would be the romance of the thing, if it were not for the distant "Hello!" and "Aren't you through yet?" of the "telephone gal?" In that great continent (we beg its pardon, Great Continent) where woman rules the roost, instances are not wanting of men having fallen in love with the voice of the young lady at the Central! Of course, woman's voice is very useful in this business: it is useful everywhere. The real objection to the employment of women is that it invariably lead to a cutting down of wages all round. A woman can, and will, work for much lower remuneration than a man Her husband or brother, therefore, must in the long run come down to her prices or be thrown out of work. It is therefore no economy to send a women out to earn her bread. Further, where father and mother both go out to work, the children must go to the wall, and it is the family life upon which rests the moral well-being of the State.

NATIONAL BANKS AND REGISTRATION.

The Bank of Japan met with a refusal, writes the vernacular press, when it applied for registration at the Law Court under whose jurisdiction it falls, on the ground that the expression "joint stock company" has not been affixed to its title in the application. The Court has declared that the application had in other respects been made in accordance with the provisions of the Commercial Code and the detailed regulations made for its practical execution, and, consequently, it saw no reason why those provisions could not be complied with in matters relating to the designation of the bank. In other words, the opinion held by the Court with reference to this question appears to be that it is absurd to comply with the provisions of the Code in one respect but not in another. Some such decision was anticipated from the outset by the Bank itself, and it had been previously resolved that in the event of registration being refused the question should be referred to the decision of a higher court. In pursuance of this resolution it is expected that an appeal to a superior tribunal will shortly be made, and that Messrs. Takahashi Suteroku and Kishimoto Tatsuo, of the Tokyo bar, will be engaged as counsel.

* * *

The *Jiji Shimpo* writes that the cost to the bank of adding the four characters which stand for Joint Stock Company, and of altering the bank's notes and other papers to bring them into harmony with this decision, would be about 600,000 *yen*, and pleads that even on that consideration alone, there is ample ground for the Bank's protest against the decision. The *Shogyo Shimpo* gives its opinions as follows:—We are curious to know what treatment is to be extended to the National Banks if they fail to be registered within the period specified in the Commercial Code and its accompanying detailed regulations. It is there provided that in case registration does not take place within six months, computed from the day on which the Code shall come into force, the managers of the firm so failing to be registered shall be liable to a fine not exceeding 50 *yen* nor less than 5 *yen*, and that its business certificate shall be suspended by order of the local Court On this point the *Shogyo Shimpo* is of opinion, that though the managers of a National Bank thus neglecting to be registered within the prescribed period may not escape the fine, yet in respect of the suspension of the business certificate there is the greatest possible difference between a bank and an ordinary commercial company. The reason for this contention is that the IXth Article of the Regulations for National Banks provides that the business of a National Bank may be carried on so long as the provisions enacted in these Regulations are observed. Even from the standpoint of practical convenience, and apart from any question of law, it is the last thing to be expected from the Government that it should suspend the business of National Banks and so throw into confusion the whole monetary system of the country. The only step which need be taken at this juncture is to add a clause either to the Commercial Code or to the Regulations for National Banks, stating that a National Bank need not affix the expression "Joint-stock Company" to its designation. The main cause of the present difficulty is that while, on one hand, National Banks are averse to affixing this title "Joint-stock Company" to their designations on various grounds, the Department of Justice insists that they shall do so simply because it is so provided in the Commercial Code. Our contemporary therefore concludes that the addition of such a clause would remove all such difficulties and offer a solution satisfactory to both parties. Those who have followed the Diet's debates as reported in these columns are aware that a Bill for adding a clause in the above sense has passed both Houses.

THE VERNACULAR PRESS ON THE PROROGATION OF THE DIET.

The *Mainichi Shimbun* (Progressionist) observes that the Cabinet's object in advising the Emperor to prorogue the Diet must have been either to cool the heat of the Opposition or to effect changes in the *personnel* of the Ministry. If the former be the Government's object, our

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

contemporary is persuaded that the measure adopted will prove entirely futile. Supposing Count Goto removed, the Diet's complaints on the subject of official discipline might be lessened, but so long as the Government refuses to give satisfaction to the Opposition about the *Chishima-Ravenna* case, about the Treaties, and about the Budget, a "fight *à l'outrance*, thinks the *Mainichi*, is inevitable between the Executive and the Legislature.

* * *

The *Yomiuri Shimbun* (philo-Progressionist) has no doubt that the strong attack which the Opposition had been expected to make upon the Cabinet with regard to the strict enforcement of the Treaties, and the *Chishima-Ravenna* case, compelled the Ministers to resort to prorogation. What are they going to do next? In our contemporary's opinion, they must either resign in a body or advise the Emperor to dissolve the Diet. Of these two measures, the Ministers are recommended to adopt the former. There is no prospect of any good resulting from a dissolution; while, on the other hand, the Government's conduct in respect of the *Chishima-Ravenna* case being plainly unjustifiable, the *Yomiuri* thinks that the Cabinet ought to resign even on that question a one.

* * *

The *Kokumin Shimbun* (philo-Progressionist) is inclined to believe that the prorogation was decided upon to give the Cabinet time to effect changes in its *personnel*. What course will the Ministers pursue after the expiration of the period of prorogation? The *Kokumin* does not think that they have any definite idea on that point.

* * *

The *Chū-ō Shimbun* (National Unionist) agrees with the above-mentioned paper in believing that the object of the prorogation is to effect changes in the Cabinet. Should a new Cabinet be formed to meet the Diet after the New Year's holidays, the *Chū-ō* thinks that the situation may probably be improved.

* * *

The *Kokkai* (friendly to the National Unionists) thinks that both the implacable attitude of the Opposition and the necessity for effecting changes in the Cabinet, conspired to bring about the prorogation of the Diet. Our contemporary is at one with the journals already quoted, in thinking that the measure will not be of any efficacy in pacifying the Diet.

* * *

The *Niroku Shimpo* (friendly to the anti-Mixed Residence movement) does not believe that any amount of changes in the *personnel* of the Cabinet will have the slightest effect upon the attitude of the Diet, so long as a radical change is not made in the Government's foreign policy. For, in our contemporary's opinion, the Diet only represents the sentiments of the people, who are thoroughly roused to revolt against the weak and pliable foreign policy of the *Meiji* Government during the past two decades and a half.

* * *

The *Nippon* (Independent) seems to believe that the Cabinet's designs may be sounded in the columns of the *Nichi Nichi* and the *Jiyu*. From the manner in which these two papers have of late been criticising the actions of the House of Representatives, the *Nippon* is induced to infer that the prorogation of the Diet may be intended by the Cabinet as a measure of punishment. At all events, the step must have been welcome to the Radicals, who were afraid of facing the questions about the strict enforcement of the Treaties and the *Chishima-Ravenna* case. The *Nippon*, however, thinks that the Government must have some other purpose in view in deciding upon the prorogation, but what that purpose may be our contemporary does not venture to say.

* * *

The *Jiyu Shimbun* (Radical) believes that the object of the Cabinet in proroguing the Diet was to call for the latter's reconsideration with regard to the strict enforcement of the Treaties. Should the Lower House persist in voting a Representation on that subject after the expiration of the period of prorogation, the Radical organ has no doubt that the Cabinet will not hesitate to advise the Emperor to order the dissolution of the Diet. Is it worth while to precipitate a dissolution on such a subject? This question is addressed not to the Cabinet but to the members of the Lower House. Our contemporary answers in the negative. The strict enforcement of the Treaties might not be bad in itself, but our contemporary refuses to attach such paramount importance to that question as some parties do. Of incomparably greater importance is the problem of Treaty Revision; if that be properly disposed of, there need be no occasion to make such a mighty fuss about the strict enforcement of the existing incomplete Treaties. The *Jiyu*, therefore, hopes that, instead of wasting energy in advocating such an absurd cause, the true lovers of the country will concentrate their attention upon the all-important question of Treaty Revision. "Has the House of Representatives," asks the *Jiyu*, "the courage to persist in its mad career in the face of a dissolution? For our own part, we have no such courage."

* * *

The *Nichi Nichi Shimbun* (Independent) is of opinion that the childish conduct of the Lower House, commencing with the Hoshi question, and culminating in the attempt made on Monday last to pass a Representation to the Government on the strict enforcement of the Treaties, brought upon it the order for prorogation. The reckless manner in which the House of Representatives has thus far conducted itself deserves, in our contemporary's opinion, a more decisive measure than prorogation, but, at all events, it would have been better policy for the Cabinet to let Mr. Abei finish his speech on the subject of the strict enforcement of the treaties, and suffer the House to remain in session until his arguments had been refuted either by the Premier or the Minister of Foreign Affairs. But to speak the truth, continues the *Nichi Nichi*, the prorogation will have no effect upon the attitude of the House, and consequently the Ministry ought to have advised the Emperor to order the dissolution of the Diet. From every point of view, the members of the present House of Representatives, says our contemporary, ought to be sent back to the country.

* * *

The *Jiji Shimpo* (Independent) writes in an interesting manner. Our contemporary has always been opposed to the temporizing measures affected by the present Cabinet, notably the measure for the re-assessment of the taxable value of land. One concession leads to a demand for another. The Opposition will never be satisfied until the reins of power shall have been wrested from the hands of the clan Government. This truth has been well illustrated by the doings of the Diet in the present session. Allusion is then made to the proposed sweeping reductions in the Budget, and to the noise that has been made about such subjects as official discipline, strict enforcement of the treaties, and the *Chishima* case. The present Opposition may, in the *Jiji's* opinion, be compared to the *Joi to* of the pre-Restoration days. The object aimed at is simply to embarrass those in power. The politicians in the Opposition are well aware that, were they in power, they would shrink from carrying out what they now press upon the Government so persistently. Thus it has been the Ito Cabinet's mistake to pursue a conciliatory policy towards these persons. The *Jiji* regrets that its repeated warnings against the dangers of such a course have not been duly attended to by those in power. Be that as it may, the House of Representatives having proceeded to extremes of indiscriminate attack upon the Government, it was a proper course for the latter to prorogue the Diet. On the one hand, our contemporary recommends the Opposition to be more reasonable in its attitude toward the Cabinet; while, on the other, the Government is strongly advised to give up the fatal policy of conciliation it has thus far followed with such unsatisfactory results, and adopt a new policy securing perfect unanimity of views among its members.

KOBE WATER-WORKS.

In view of the increasing impurity of the drinking water used by the inhabitants of Kobe, the construction of Water-works has become a question of pressing importance to the citizens of that port. The Government seems fully in favour of the scheme, and an annual subsidy of 60,000 *yen* for 5 years has been included in the Budget for the next year, which has been laid before the Diet. We are now informed by the *Nichi Nichi* that, in order to further the successful passing of the subsidy through the Diet, the citizens of Kobe have appointed a committee, who are already in the capital, to persuade the members of both Houses of the Diet to support the Government proposals about this Water-works. It will be remembered that the designs for these works were originally prepared by the late General Palmer, and were subsequently completed by Mr. Burton. The estimate of the cost of construction is 970,000 *yen*, and as the city is resolved to bear 670,000 *yen* of this sum, the aid asked from the Treasury amounts to only 300,000 *yen*. The Government has already granted a third of the cost of constructing the Water-works of Tokyo, Osaka, Nagasaki, and Hakodate, and the Kobe people therefore hope that there is no reason why the subsidy asked for should be refused to them alone.

GOVERNMENT SANCTION FOR THE FORMATION OF NEW COMPANIES.

The *Jiji* has been discussing the law now in force, making it necessary for a Company to obtain the sanction of the Minister of State for Agriculture and Commerce, and advocates its abolition. This provision, says our contemporary, is practically an innovation. It is not found in the Western Codes of Law, after which the Japanese Commercial Code was modelled, and was only inserted as an after-thought. It is, in a sense, a dead letter, because the sanction is invariably given. Our contemporary admits, however (and this we think is an important admission), that the Department as a rule points out any legal defects in the bye-laws of the proposed Company, and insists on their being rectified before granting its sanction. It argues, however, that this is not the business of the Agricultural Department, but of the Department of Justice. Further, an individual needs no license before opening a shop. Why should a Company require one? And lastly, says the *Jiji*, a great deal of precious time is lost at the initiation of a new Company by the delay involved in the technicalities of a Public Department. For all these reasons it pleads for an amendment of the Commercial Code in this respect.

THE VARIOUS POLITICAL PARTIES ON THE TREATY ENFORCEMENT QUESTION.

The Government's action in proroguing the Diet was quite unexpected by the general public. Even among officials of the higher ranks outside the Cabinet no anticipation of anything of the kind seems to have existed until the last moment. That is to be referred, of course, to the fact that the Government's final decision is understood not to have been taken until Mr. Abei Hankon's motion with respect to the strict enforcement of the letters of the Treaties actually came up for hearing in the Lower House. But it is plain that no doubt whatever exists in the minds of the various political parties as to the proximate cause of the Government's action. They all comprehend quite well that the Cabinet is resolved not to suffer the empire's foreign relations to be impaired by any rash displays in the Diet. Hence it has become necessary for them to consider what programme they will adopt on the re-assembly of the House, for it is certain that if Mr. Abei Hankon's Representation be again brought up and endorsed by a majority of the members, dissolution will follow. The vernacular press reports that meetings have been held at the headquarters of the various parties for the purpose of discussing this question. The *Jiyu-to*

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

members met on the 20th instant, and came to the conclusion that the subject of Mr. Abe's motion possesses no great importance. In their opinion the consummation of Treaty Revision, as urged in the Address to the Throne adopted by the House of Representatives last session, should be the paramount aim of all persons honestly solicitous for the national interests. The strict enforcement of the letter of the Treaties is not a matter so vital as to constitute a reason for risking the dissolution of the Diet or provoking a contest with the Government. Hence if Mr. Abe's motion be again introduced after the Diet re-assembles, the Radical Party, while not actively opposing it, will certainly vote against it.

* * *

The *Doshi* Club, which consists, as we have already explained, of men that have seceded from the *Jiyu-to* in consequence of the Hoshi Toru affair, is now a coterie of some importance. It numbers 27 followers in the House of Representatives, and by the defection of its members the *Jiyu-to* partisans in the House are reduced to 71. A considerable section of the Independent members, however, now range themselves on the side of the *Jiyu-to* in parliamentary divisions, so that the Liberal votes may be reckoned at about 100 in any matter of party significance. The *Doshi* Club also held a meeting on the 20th instant to consider its policy with regard to the Treaty-enforcement motion. In view of its former relations with the *Jiyu-to*, and also of the fact that its separation from the latter was not the result of any wide political difference, the public expects it to vote with the *Jiyu-to* as a general rule. But in this particular case there seems to be a marked difference of opinion between the original Party and its recalcitrant branch. Perhaps their separation is too recent to permit any immediate cooperation. At any rate the view attributed to the *Doshi* members is that, considering the combination now existing in the Lower House against the Government, dissolution has no terrors, and that, so soon as the Address to the Throne with reference to the *Chishima-Ravenna* affair is passed, they do not care how soon they are sent back to their constituencies. That would seem to indicate a resolve to support Mr. Abe's Representation, provided that its consideration be deferred until after the *Chishima-Ravenna* Address is presented.

* * *

The attitude of the *Dai Nippon Kyokai* (Great Japan Association) may easily be divined. This society had its origin in the anti-mixed residence sentiment, and of course, on an occasion like the present, it is resolved to stand unflinchingly to its guns. Dissolution or no dissolution, it will agitate for the introduction of Mr. Abe's Representation, and support it vehemently when introduced. Happily the Association commands only three votes in the Lower House, whatever may be its mischievous capacities outside.

* * *

The *Domei* Club is reported to have come to a similar resolution. It considers the question of the strict enforcement of the letter of the Treaties so vitally important from a national point of view, that it will adhere firmly to its purpose of supporting Mr. Abe's Representation to the Government, as well as the Address to the Throne on the *Chishima-Ravenna* question. The latter, we may observe *en passant*, is generally connected with the former by persons enumerating the bombs which the Opposition is preparing to explode for the Government's destruction, but in point of fact the House might amuse itself with a good many play-things of the nature of the *Chishima-Ravenna* controversy before it provoked any sentence of prorogation or dissolution. The real issue at stake is the *Reiko-Kengian*, or Representation for strict enforcement of the Treaties, together with its correlated projects of vexatious and offensive laws. It is against those measures that the Government has set its face, and will continue to set its face with the utmost rigour permitted by the Constitution. The *Domei* Club knows that, but its 25 members in the Lower House nevertheless seem bent upon forcing matters to a crisis.

* * *

The little coterie called *Seimu Chosa-jo* (Administrative-affairs-investigation office), with its following of 10 members in the Lower House, is declared to be working doggedly under the same banner as the *Domei* and the *Doshi* Clubs, and to be prepared for dissolution or anything else rather than abandon the Strict-enforcement Representation.

* * *

The *Kaishin-to, mirabile dictu*, is in the same camp. What on earth it has to do in such a gallery we can not conceive, except that its members are resolved to be on the crest of any wave threatening to swamp the Government. The 43 representatives of the *Kaishin-to* in the Lower House are all—with one or two exceptions—shrewd men, thoroughly versed in the true inwardness of the country's foreign policy. They know as well as possible that to insist on enforcing the strict letter of the Treaties is not at all calculated to promote the cause of Revision, and with that cause, under its most legitimate aspects, they have always hitherto been associated. Yet they are now standing in line with Mr. Abe's supporters, and since an appeal to the country is always regarded by them in the light of an opportunity to increase the number of their Representatives in the Lower House, the prospect of such a step on the Government's part does not at all deter them.

* * *

The ambiguous factor in the problem is the *Kokumin Kyokai*. This Party and the *Jiyu-to*, in their attitudes towards the Government, are compared by some political analysts to the two buckets of a well—when one descends the other ascends. In other words, whenever the *Jiyu-to* engages in a violent campaign against the Government, the *Kokumin Kyokai* shows a disposition to support the latter, and whenever the *Jiyu-to* lowers its arms, the *Kokumin Kyokai* takes the field vigorously. If this estimate be just, the followers of Viscount Shinagawa ought now to be in the same camp with the *Domei* Club and the Progressionists. But they are reported to be vacillating. Their 76 followers in the House are of many minds, some being in favour of supporting the Strict-enforcement Representation, and others being against it. No definite forecast can therefore be made of this Party's conduct when the Diet re-assembles. Upon its members, probably, the sentence of prorogation will have a more salutary effect than upon any others, for it is not to be supposed that the *Kokumin Kyokai* desires to appeal to the country, or that it can hope to find itself in a better position after the ordeal of another general election.

* * *

According to the above analysis, we have the following :—

PLEDGED TO SUPPORT THE STRICT-ENFORCEMENT REPRESENTATION.

	Members.
Doshi Club	27
Dai-Nippon Kyokai	3
Domei Club	25
Seimu Chosa-jo	10
Kaishin-to	43
Total	108

On the other side are 70 Radical members with a following of about 30 Independents, and the 77 undecided members of the *Kokumin Kyokai*. It is plain, therefore, that if the obnoxious Representation be pressed to a vote, the result cannot yet be predicted.

FIRST GENERAL MEETING OF THE COLONIZATION SOCIETY.

THE first general meeting of the Colonization Society was held on Sunday last at the Koyo Kan, Shiba. More than sixty members were present, among whom were Viscount Enomoto, President of the Society, Messrs. Hoshi Toru, Inouye Kakugoro, Tachikawa Umpei, Kato Heishiro, Ehara Soroku, Ando Taro, Sakuma Teiichi, Shiga Shigetaka, and Inagaki Manjiro. Viscount Enomoto delivered a speech on the present condition and prospects of the Society. Mr. Tsuneya Seifuku made a report on the history of the Society since its inauguration, after which Mr. Sakuma Teiichi made a brief speech relating to the investigation conducted by the Society with respect to the establishment of an Emigration Company. Owing to the resignation of Mr. Mayeda Masana, it became necessary to fill up the vacant chair of the Vice President. This business, however, was consigned, with the sanction of a large majority of those present, to the care of the President and Councillors of the Society. Certain amendments in the by-laws of the Society were then made, among which was one relating to the times of holding the general meeting of the Society. There will in future be only one general meeting—in the month of February. This part of the business done, Mr. Tsuneye again ascended the platform and informed the members of the facts which he had been able to collect bearing on the extension of maritime communication with Mexico and Australia, and of the results he had arrived at thus far in carrying these methods into practice. His speech was received with great applause. The regular meeting was then closed, after which a friendly meeting was held upstairs, during the course of which Mr. Magariki, Private Secretary to the Minister of Justice, and Mr. Koyanagi, lately returned from Hawaii, delivered brief speeches. The gist of the speech made by Viscount Enomoto as President of the Society was as follows :—The reports monthly issued by the Society have already amounted to 3,865 copies since the organization of the Society. They are chiefly filled up with communications, either public or private, which have been received from the officers of the Japanese Consulates stationed abroad, and from others staying abroad on their own private business. These communications must indeed be said to contain valuable information, not only for the business with which the Society is directly interested, but also for the future economical and political interests of the State. The Society should be thankful to its members abroad for having furnished it with such precious materials. How far the reports of the society and the diligence of its members have succeeded in influencing the people at large, may be inferred from the fact that although ten months have not yet elapsed since the inauguration of the Society, its list already contains more than six hundred members, while the letters that have been received by the Society asking for information about emigration are literally lying in a big heap on the desk in the Society's Office. Of the localities from which those questions come, the two Prefectures of Kochi and Kumamoto are found to be most earnest in their enquiries. On the other hand, the business undertaken by the Society appears to receive but cold looks from those who occupy important positions in the Government service, and this the Society regards with great regret. The attempt to establish a Japanese community abroad being something that has never yet been regularly undertaken, should be conducted with the greatest precaution and deliberation. The Society has entrusted a Special Committee with the task of carrying on investigations for the organization of a big emigration company. The result of the investigation, expected to be completed shortly, will be submitted for the deliberation of the members. The investigation is really related to the sending of Japanese people to Mexico, and it is hoped that the most trustworthy information on the subject will be received when Mr. Nemoto, now travelling in Mexico on the special business of the Society, shall return in February next. It is a fact well known to all interested in the subject, that there are about a million *cho* (2½ million acres) of land which the Mexican Government is intending to dispose of to foreigners desirous of emigrating to that Republic. Moreover, there are private companies also willing to part with the lands owned by them, and the Society has already been asked by a certain Company in Mexico to pur-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

chase 1,380 square miles of land owned by it on the sea coast at a price of 30,000 English pounds sterling. Such a large transaction cannot be undertaken by the Society, unless possessing of the organization of an emigration company furnished with sufficient funds. The purchase which the Society is at present intending to make is a piece of Government land, of about 20,000 *cho* (50,000 acres) in extent, which the Mexican Republic is willing, as a favour to the Japanese emigrants, to sell at a very cheap rate. The Society's purpose after having secured that land, is to turn it into what may be termed a model plantation. The most important point connected with emigration is maritime transportation. It is satisfactory to learn that the Government is reported as intending to introduce a Bill in the Diet for the extension of navigation. The thing which the Society is mostly interested about in this connection is to open regular services with Mexico and Australia. Investigations on this subject are already being carried on by several members of the Society, the results of which will, with the approbation of the Society, be hereafter submitted to the Government.

PROPOSED REGULAR SERVICES BETWEEN JAPAN AND MEXICO AND JAPAN AND AUSTRALIA

VISCOUNT ENOMOTO, in his capacity of President of the Emigration Society, has laid before the Communications Department an important document on this subject, based on investigations made by Mr. Tsuneya, one of the Directors of the Society and well known amongst his fellow-countrymen as a traveller. The vernacular papers state that according to this document a Government subsidy of from 180,000 to 320,000 *yen* at least is required in order to establish these two lines of steamers. Several new ships will also be required, there being only one suitable Japanese ship, the *Mike Maru*, which is already engaged on another line. It is estimated that not less than four new ships would be required for the Mexican, and three for the Australian service. The document further urges that no time should be lost in establishing the Mexican line, because the Japanese project is already in danger of competition from French and German Companies.

ALLEGED EMBEZZLEMENT BY THE OFFICERS OF THE ISHIKAWA-JIMA PRISON

THE vernacular papers note that one Sato Koichi, who was till lately confined in the Ishikawa-jima prison, has brought an action in the Tokyo Local Court against Mr. Tejima, chief-accountant of the prison, four of his subordinates, and two prisoners, on the ground that they embezzled rice and barley belonging to the prison. The document which the accuser has forwarded to the Chief Procurator of the Court, by whom it has been accepted, is reported by the papers as setting forth in detail a process of systematic embezzlement alleged to have been going on for years. The 8 *sho* measure used in the prison kitchen had its edges shaved down, and in order to provide against discovery thin pieces of bamboo were nailed on to the parts so planed down. By this process the accused managed to filch 3.3 *go* of rice out of every 8 *sho*. The success which the conspirators met with in their sinister dealing further excited their cupidity, and this ultimately led to the detection of their knavery. In June last, they took off the bamboo pieces and pared down the edges still more, so that they were able to filch half a *sho* out of every eight, more than 6 per cent. of the total. The prisoners now began to suspect that there was something wrong with their daily ration, and their suspicions were at last corroborated by the unguarded conversation of the accomplices in the kitchen who told their fellow prisoners how the edges of the measure had been pared down. This discovery is said to have caused great excitement among the prisoners. The plaintiff in the present action succeeded once in seizing the mutilated vessel, and concealing it with a view to future evidence, but it was unfortunately discovered by some of the gang and burned. The accuser then attempted to represent the case to the Chief Gaoler, but here also he was unsuccessful, having been interrupted by some of the accomplices. More than that, Sato was removed shortly after to a section of the prison where he was least likely to trouble the chief-accountant and his confederates. This systematic peculation was not confined to rice, but also took place with the barley which is used in the prison along with rice. The accuser complains that the one-*sho* measure used for barley was also similarly pared down, and that it really held only nine *go*, thus enabling these betrayers of public confidence to illegally appropriate a tithe of the measure. It is estimated in the document that, assuming that the embezzlement committed was at the rate of 3 *go* for every 8 *sho* of rice, and calculating the number of prisoners in the Ishikawa-jima Gaol at three thousand, about 27 *sho* must have been stolen daily for years by those officers. This at the rate of 8 *yen* per *koku*, would amount to 2.16 *yen* per day, or 64 80 *yen* per month. If we reckon the barley at 18 *sho* per diem, or about 27 *yen*, we shall see that the Government has been losing over 1,000 *yen* per annum through the unfaithfulness of its prison officials. It is said that several merchants acted in collusion with the confederates.

THE KOFU RAILWAY.

A DIFFICULTY has arisen, writes the *Mainichi*, between the Home Office and the Army Department with reference to the intended grant of land by the latter to the Kofu Railway Company. The Company at first intended extending its line from Shinjuku to Misaki-cho, Kanda, to take the route through Okubo and Yotsuya. In consequence, however, of advice received from a certain quarter, this route was changed for one through Sendagaya and the Aoyama parade-ground. The increase of construction expenses involved in this change is by no means small, but the chief consideration that weighed with the Company in choosing the new route, was a promise from the Army Department that were that route adopted, more than ten thousand *tsubo* of land within Aoyama Parade-ground would be granted gratuitously, while the cost of constructing a station there would also be defrayed, as the line would be of the utmost convenience to the Department. This free grant of land, however, was objected to by the Home Office; consequently the Army in lieu of granting the land in Aoyama, made an offer to lease its land in Misaki-cho to the Company rent-free for 30 years. This transaction was again objected to by the Home Office, which maintained that if that land was of no use to the Army, it should either be transferred to the Home Office or sold at a suitable price. The Company does not appear to be much concerned over this difficulty between the two Departments, for as it holds several documents from the military authorities promising the Company the free lease of the land, it intends to take legal proceedings against the War Office in the event of the promise being revoked.

THE "JIYU SHIMBUN" AND THE "KOKUMIN SHIMBUN."

A BITTER and painful controversy is going on between the *Jiyu* and the *Kokumin*. There was a time when the versatile and well-informed *Kokumin* was regarded as a true friend of the Radicals, but latterly its uncompromising attacks on Mr. Hoshi have led to an open rupture between it and the Radical organ, the *Jiyu*. A few days ago, the latter journal accused the former of an underhand plot against the Radical party. It has been, and still is, the practice with the *Kokumin* to affect a friendly attitude towards the "genuine" Radicals, strongly as it may be opposed to the "false." Radicals. The Radical organ now alleges that the *Kokumin's* true object in all this studied affectation of friendship for the so-called "genuine" Radicals, is to cause a disruption in the Radical Party in the interests of Count Okuma and his followers. The article containing that charge was the origin of the present controversy. We refrain from pronouncing any judgment on the merits of the case, but are constrained to observe that, whatever may have been the justice of its complaints, the *Jiyu* has completely marred its case by indulging in vulgar and disgraceful invectives, calling the *Kokumin* a "viper," a "mad dog," and so forth. It is a patent fact in Japanese journalism that the hot-tempered and honest Radicals are no match in controversy for the cool and astute Progressionists and their friends. We sincerely advise the leaders of the Radical party to put some restraint upon the vagaries of their avowed organs.

THE UNITED STATES GOVERNMENT AND HAWAII.

THE News Agency reports that the Japanese Representative in Washington has addressed to the Foreign Office in Tokyo the following telegram:—

The President of the United States instructed the United States Representative in Hawaii to employ all measures, short of recourse to military force, for the purpose of replacing the Queen of Hawaii on the Throne. The President caused, however, that two conditions should be prescribed as essential preliminaries to the return of the Queen to power: first, that amnesty should be granted to all engaged in the recent revolution; and secondly that the Queen should recognise all legitimate debts incurred by the Provisional Government. Her Majesty declined to comply with these conditions, and the President accordingly submitted the whole question to the Senate in a sense strongly hostile to the republican Government of Hawaii. The President however, has not as yet made any definite recommendation as to the future policy that ought to be pursued.

This message presents no inherent improbabilities. The President must have learned by this time that public opinion in the States is opposed to the restoration of Queen Lilinokulani, and must have resolved, in consequence, to assume a neutral attitude which will compromise neither his hitherto expressed views nor the interests of his nationals in Hawaii.

KOREAN AFFAIRS.

AN Osaka telegram dated the 21st inst. published in the *Tokyo Asahi*, states that intelligence has reached there to the effect that Mr. Otori, the Japanese Minister, has held a conference with the Foreign Representatives in Söul, and as a consequence negotiations were commenced on the 16th inst. pressing the Korean Government to withdraw the notification prohibiting the export of rice from Korea. The matter is likely to be satisfactorily settled, as the Peninsular Government is somewhat hampered with the accumulated stocks of rice. The Japanese merchants are preparing to hold a congratulatory banquet, being convinced that the negotiations will conclude in their favour. The message further states that Nan Teitetsu, who became Foreign Minister in April last, has resigned. The appointment of his successor will not take place until the rice trouble is settled, during which period Kim Ka-chim, Vice-Minister of Foreign Affairs, will act as Foreign Minister.

THE PROGRESSIONIST LECTURE MEETING OF SATURDAY LAST.

THE occurrences last Saturday at the abortive lecture meeting held by the Progressionists in the *Kinki-kan*, furnish an excellent subject of jest and ridicule to the Radical journals, the Progressionist organs; on the other hand, being in a white heat of indignation against the Radicals, for they suppose that the wild *soshi* of Saturday belong to that party. They call the Radicals enemies of liberty and enlightenment, and summon all who really love the country to crush such a mischievous gang of politicians before they endanger the peace and tranquillity of the State. The Progressionist papers also fancy that their Party has a real cause of complaint against the Police authorities, who are accused of wilful neglect of duty wherever the interests of the *Kaishin-to* are concerned. The *Mainichi Shimbun* goes the length of demanding the abolition of the Metropolitan Board of Police.

THE ANTI-MIXED-RESIDENCE AGITATORS DISTURBED.

YESTERDAY the anti-Mixed-Residence politicians, headed by Mr. Abe Hankon, assembled at the big tea-house called Nakamura-ro, near Ryogoku Bridge. There were over two hundred persons present, representatives of Three Cities

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPA GN

and Twenty Prefectures. Mr. Abei delivered a lecture, explaining his unflinching resolution to push the Strict-enforcement Representation and to agitate for the revision of the Treaties on a proper basis of equality. Two or three other addresses were delivered when the meeting was suddenly invaded by an army of over twenty constables, who, alleging that the proceedings were injurious to the public peace, ordered the meeting to disperse. In vain the hungry politicians urged that they should be given time to eat the tiffin prepared for them. The police were inexorable. Mr. Abei is not fortunate in his political essays.

REPRESENTATION ON THE STRICT ENFORCEMENT OF THE TREATIES.

THE following is the Representation introduced by Mr. Abei Hankon in the House of Representatives:—

The present Project of a Representation on the Strict Enforcement of the Treaties is hereby introduced in accordance with established regulations.

(Introducer)	ABEI IWANE.
(Supporters)	SASA TOMOPOSA, and thirty-two others.

REPRESENTATION ON THE STRICT ENFORCEMENT OF THE TREATIES.

Whereas it is considered that, in regard to the enforcement of the existing treaties, the Government has suffered the national rights of the Empire to be infringed, the House of Representatives herewith makes the present Representation to the Government, in the earnest hope that the Government may observe clear definitions of treaty rights and obligations and secure the strict enforcement of the treaty stipulations.

EXPLANATION OF THE REPRESENTATION ON THE STRICT ENFORCEMENT OF THE TREATIES.

Twenty years have elapsed since the date originally fixed for the revision of the existing foreign treaties, but they still remain unrevised. The existing treaties are injurious to the Sovereign rights of the Empire, and prejudicial to the interests of the country and the welfare of the people. Therefore their revision should not be delayed even for a single day. Even though their revision be effected, however, it is clear that it can be of no use, unless the revised treaties are rigidly enforced. It will thus be seen that it is always important to secure the strict enforcement of treaties. Unjust and improper beyond expression as the existing treaties are, that cannot be helped, so long as they remain in force. If, however, the scope of the treaty stipulations and the rights and obligations arising out of them be clearly defined and strictly enforced, it may yet be possible to maintain the dignity of the Empire and to secure the well-being of the people.

Taking the subject of jurisdiction, it is found that the privileges granted foreigners by treaties are as follow:—

1. In civil matters, the foreigner is permitted to be judged in a Consular Court of his own country, when he is sued by one of his own nationals or by a subject or citizen of any other foreign Power or by any Japanese subject.

2. In criminal matters, a foreigner committing an offence against a Japanese subject or other foreigners is to be tried in the Consular Court of his own country.

3. A foreigner violating treaty stipulations or trade and tariff regulations accompanying them is to be tried in the Consular Court of his own country.

The sovereignty of a country involves the exercise of supreme control throughout the whole extent of its territories, and over all persons residing within its borders without distinction of race. The existing treaties contain the above mentioned special provisions in respect of Consular Jurisdiction; but where no express concession has been made, it goes without saying that, according to the general principle just laid down, our sovereignty remains fully in force. In point of fact, however, it is noticed that the case is otherwise.

According to the existing treaties (that with Mexico excepted), foreigners are permitted to reside and trade at the open ports of the empire and to travel under certain limitations. They are not allowed to engage in manufacture, farming, mining, and so forth. In other words, although occupations other than trade proper but incidental to residence and trade, such as the keeping of hotels, and restaurants, medical practice, and so forth are necessarily permitted, no foreigner is warranted in engaging in manufacture, farming, fishing, mining, and so forth.

Thus, although foreigners are permitted to reside, trade, and travel, as well as to engage in such business as may be incidental to and inseparable from the privilege of residence and trade, persons in the enjoyment of these privileges must be subject to the ordinary administrative control of the Imperial Government, the right of taxation included.

No special provisions are made about police administration, and consequently, in so far as consists with treaty stipulations, the Imperial Government is authorized to exercise police control over foreigners.

Are violations of treaty stipulations properly dealt with? Is the police authority exercised? The actual state of things passes description. We will adduce a few practical instances and thus point out the urgent necessity of having the treaties strictly enforced.

CIVIL JURISDICTION.

Treaty stipulations on the subject of Civil Jurisdiction are as follow:—

All questions in regard to rights, whether of property, or of person, arising between Austro-Hungarian citizens residing in Japan, shall be subject to the jurisdiction of the Imperial and Royal authorities. In like manner the Japanese authorities shall not interfere in any question which may arise between Austro-Hungarian citizens and the subjects of any other Treaty Power.

If an Austro-Hungarian citizen has a complaint or grievance against a Japanese subject, the case shall be decided by the Japanese Authorities.

If, on the contrary, a Japanese has a complaint or a grievance against a citizen of the said Monarchy, the case shall be decided by the Imperial and Royal Authorities.

Should any Japanese subject fail to discharge debts incurred to an Austro-Hungarian citizen, or should be fraudulently abscond, the competent Japanese Authorities will do their utmost to bring him to justice, and to enforce recovery of the debts. And, should any Austro-Hungarian citizen fraudulently abscond or fail to discharge debts incurred by him to a Japanese subject, the Imperial and Royal Authorities will do their utmost to bring him to justice, and to enforce recovery of the debts.

Neither the Austro-Hungarian nor the Japanese Authorities shall be held responsible for the payment of any debts contracted by Austro-Hungarian or Japanese subjects.

Austro-Hungarian Treaty Art. V (This treaty was concluded by the *Heijo* Government, and of all the treaties, it is the most complete. The most favoured nation clause in the treaty is more explicitly worded than in other treaties. On these accounts the Austro-Hungarian treaty is always referred to as authority by all the Treaty Powers with the exception of Mexico, China, and Korea. This treaty therefore will be quoted in the present document).

From these stipulations, it will be noticed that, although a foreigner is permitted to be tried at the Consular Court of his own country when he is sued by a Japanese subject, no such privilege is granted him in case he is proceeded against by the Japanese Government. In that case, he must be tried in a Japanese Court of Law.

Let us see what the Government has done with respect to the *Chishima-Ravenna* affair. The Government declares that it has brought the case in its own name, but its counsel, in reply to a question what was meant by the Government, answered in the Consular Court that it meant His Imperial Japanese Majesty. When the defendants appealed to the British Supreme Court at Shanghai, the Government instructed its counsel to appear in that Court, and in the Judgment delivered there, occurs this passage:—"It might possibly be suggested that neither the Court for Japan nor this Court has any jurisdiction to try this case at all, being a case where the Emperor of Japan alleges that he has reason to complain of a British subject, and such a case does not seem to me to have been provided for specially in the Treaty, or the Orders in Council, or the Rules. But the plaintiff by coming to the Court admits that it has jurisdiction, and it is not denied by the defendants."

In reply to a question presented by the House of Representatives, Why did the Government submit to the jurisdiction of the British Supreme Court at Shanghai? the Government has answered that it "merely followed precedent." What an indignity! How is the Government going to clear itself of the humiliation it has stooped to? It has already been pointed out that where no specific provision is made in the treaties, the jurisdiction of the Japanese Courts of Law applies. Why, then, did not the Government institute the present case in a Court of the country, instead of taking such an undignified course? It is difficult to understand the motives of the Government. Evidently the responsibility must be borne by the Government for having adopted such a step.

It is an established rule that the Japanese language should be used in Japanese Courts of Law. But when foreigners appear in our Court as plaintiffs they are allowed to use their own national tongue instead of Japanese, and our Courts of Law are thus obliged to be provided with translators and interpreters. In the opposite case, where Japanese subjects bring a suit in a Consular Court, they are not allowed to use their own language. Again, the compulsory use of stamps on legal documents is a kind of tax as well as a necessary form of legal procedure. But foreigners are exempted from the use of such stamps when they institute a suit in a Japanese Court of Law. On the other hand, when merchandize is to be exported from Japan to the United States of America, it is not allowed to be landed unless a certificate of the United States Consul in Japan has been obtained on payment of fees. Such things may appear to be trifles, but they affect the dignity of the country. These examples suffice to show what kind of attitude is adopted by the Government.

CRIMINAL JURISDICTION.

Treaty provisions regarding Criminal Jurisdiction are as follow:—

"Austro-Hungarian citizens, who may commit any crime against Japanese subjects, or the subjects of any other nation, shall be brought before the Imperial and Royal Consular Officer, and punished according to the laws of their country.

"Japanese subjects who may commit any crime against Austro-Hungarian citizens, shall be brought before the Japanese Authorities and punished according to Japanese laws."—Austro-Hungarian Treaty. Art. VI.

According to these provisions, the foreigner is allowed to be tried in the Consular Court of his own country only when he is charged with ordinary criminal offences against Japanese subjects or any other foreigners. In other words, this privilege applies only to cases of the commission of offences against individual Japanese or individual foreigners. For crimes committed either against the Imperial family or the State, the foreigner must be tried in a Japanese Court according to Japanese law.

Now and then we hear of acts of disrespect to the Imperial Family on the part of foreigners, but fortunately such cases do not seem to reach limits calling for interference. This is to be ascribed to the exalted position held by the Imperial family. But in discussing the question of the strict enforcement of treaties, it has been thought advisable to draw the attention of the Authorities to this matter.

POLICE AUTHORITY.

The existing treaties contain no provision bearing upon police authority. But by means of conventions other than the treaties proper, such, for instance, as the Arrangements for Foreign Settlements, Land Regulations, Memorandums, and so forth, agreements have been made for the maintenance of a special police for foreign settlements, and for the appointment of foreign police officers, and such appointments have been actually made. But in no case has the police authority been ceded to Foreign States. The maintenance of special police for foreign settlements and the appointment of foreign police officers are unjustifiable measures, and still more blameworthy was the action of the Government in allowing the formation of the so-called municipal police in the settlements of Kobe and Osaka, thereby virtually handing over the police authority in those places to foreigners. In the following paragraph we proceed to describe the present condition of the exercise of police authority by the Government.

The administrative police is concerned with the execution of administrative measures, and so long as the administrative autonomy of the Government is not restricted by treaties no exception should be made in favour of foreigners in the exercise of the functions of administrative police. But according to the Instructions to Police Constables as to the Treatment of Foreigners, issued by the Minister of State for Home Affairs in 1885, the treatment of foreigners is made different from that of Japanese subjects. In Article XXXI. of the Instructions, it is provided that "When a foreigner attempts to cross in a carriage or on horseback a thoroughfare closed for carriages and horses, and refuses to turn back, he should be let go, after ascertaining his name and address; and the matter should be reported to the police office." That is tantamount to an admission that the Japanese Government has no right to exercise the power of administrative police over foreigners. For the moment the foreigner has passed the closed thoroughfare, he comes within the pale of judicial police and is no longer subject to administrative police. Why should not a foreigner be, in such a case, turned back by force, if he does not obey the injunctions of the police? To direct the police that the foreigner should in such cases be let go, is to spontaneously abandon the legitimate authority possessed by the Government, and to neglect that discharge of its duty. Such things, trifling as they seem, have important bearings upon the maintenance of the national rights. The case of George Rice, an American, who recently passed through a street in Yokohama closed for traffic, may be cited as an example of the evil results produced by the mistaken policy followed by the Government.

The power of administrative police is not exercised alike over the persons and the houses of foreigners. This is true, again, not only in the settlements but even in the mixed quarters at Kobe. It is an open secret that in these places foreigners hire Japanese women for immoral purposes, and invite the dregs of the Japanese com-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

munity to hold gambling places there. Our police officers have not done anything to correct these evils. The Government, then, is not free from the charge of neglecting its duty. The state of things at Kobe may be judged from the recent scandalous case there. Moreover, the power of our administrative police is not extended to our own nationals who may at the moment be in the houses of foreigners. It is a well-known fact that it is impossible even to effect the registration of Japanese living in the houses of foreigners. Does not this argue extreme neglect of duty on the part of the Government?

Coming next to the subject of judicial police, the arrest of criminals may be considered under different aspects, according to the place of the commission of the crime and according to whether it is a flagrant or non-flagrant offence. In case of a foreigner committing a flagrant offence in Japan, explanations are given in the Instructions to Police Constables (already alluded to) as to the Treatment of Foreigners, and from the very nature of the case, such an offender ought to be arrested by the police. But practically there have been instances where no arrests were made. In the case of a non-flagrant offence, a distinction must be observed between the different kinds of crime, and in some cases the offender ought certainly to be put under arrest. But in practice no case of such arrest has been known. In Kobe and Osaka, the existence of the so-called administrative police prevents the Japanese police authorities from exercising their rightful power. The same difficulty is experienced with regard to Japanese subjects taking refuge in the settlements at those places.

In the case of a foreigner coming to Japan after the commission of a crime abroad, he cannot be arrested unless through the process of extradition, and the matter comes entirely under the control of the Japanese Government. On this point, there is not much to be said, although this right of extradition was with difficulty guarded from the encroachment of the Spanish and British Consuls.

A practical example may be given of the treatment of foreigners by Japanese police. On August 5th, 1892, an Englishman, named Webster, struck with a stick a citizen of Niigata, Kazama Yoichiro by name, when the latter was passing along Ishizuye machi in that town, and the victim of the assault died on the 22nd of the same month. At the time the assault took place, a policeman was standing by, but he pretended not to notice the affair and passed on. When, however, he saw the unfortunate man bleeding profusely he went to his assistance, together with some private individuals of the neighbourhood, and enabled him to reach his house. Nevertheless, the constable still refrained from exercising his rightful authority, and when some by-standers, indignant at his inaction, reported the incident to the police office, they were simply told that, a foreigner being implicated, the matter could not be lightly treated. When the man died, it being known that his death had been caused by the injury received from the foreigner, the police authorities became alarmed, and caused an autopsy to be held on his body. The autopsy showed that death had been caused by the blows, and a criminal prosecution was instituted before the British Consul by the Public Prosecutor of the Local Court at Niigata. Meanwhile, how did the police treat the foreigner? Instead of confining him in the non-convict prison of Niigata, they allowed him to take lodgings at an ordinary Japanese hotel, instructing the proprietor to treat his guest with care and consideration. The man, on his part, increased in insolence, even openly complaining to the Prefectural Government of the food supplied him at the hotel. He also took walks in the streets, and offered violence to the citizens. Indeed, his insolence and rudeness while there passed the power of description. Despite these facts, newspapers daring to discuss the matter were prosecuted on a charge of insulting officials in the discharge of their duties.

This example will be sufficient to show how the power of judicial police is actually exercised over aliens, and how our police authorities discriminate between Japanese and foreigners. In a speech delivered to Local Governors at the Rokumei-kan, in October, 1894, Count Inouye, then Minister of State for Foreign Affairs, is reported to have told his listeners that, in view of the possible opening of the country to foreigners, they should pay especial attention to the conduct of administrative and police business, so that future dangers and troubles might be avoided. He is also said to have impressed upon them the importance of treating all foreigners with due consideration and courtesy. In view of this fact, it appears that for the above mentioned affair at Niigata the police authorities alone are not to blame.

OWNERSHIP OF LAND AND HOUSES.

Under the existing treaties, foreigners are allowed to rent land, build houses, and reside in the settlements laid out at each of the five open ports. But they are not permitted to own either land or houses outside the limits of these settlements. They were not even suffered to live outside those limits, until September, 1871, when diplomatic and consular officials of Foreign Powers were permitted to rent houses and live anywhere in the city of Tokyo. This permission was given only in consideration of temporary convenience and expediency. But a vulgar and mistaken opinion that to prohibit the residence of foreigners outside the settlements was not beneficial to the progress of civilization, gradually gained ground, and the prohibition was relaxed in favour of foreigners hired for teaching useful arts to the Japanese. Subsequently the same favour was extended to foreigners who came to Japan for purposes of study. Foreign boys and girls were allowed to attend school anywhere within the limits prescribed for the movements of foreigners. At first they were not allowed to be matriculated in dormitories outside the settlements, but afterward permission was given. The restrictions provided for in the treaties were thus gradually relaxed by our Government, until in the space of a few years the evil became so extensive that there really appeared to be no longer any restrictions whatever in force. Taking advantage of this state of things, foreigners, combining with some abandoned Japanese, easily devised pretexts for living outside the limits of the settlements under the false character of *employés* of those Japanese; while on the part of Japanese there were many who did not scruple to draw up false agreements in the hope of obtaining rents for their houses. Troubles having arisen out of this system of relaxation, the Government became aware of its mistake, and in November, 1877, it prohibited the residence of all foreigners outside the limits of the settlements, with the exception of those engaged for teaching arts or conducting experiments. But the evil, already firmly rooted, was encouraged by some short-sighted persons, and there being also a tendency to relaxation on the part of the Government, matters went from bad to worse.

The possession of land and the erection of houses by foreigners outside the limits of the settlements, is not only excluded from the privileges granted by the existing treaties, but is also prohibited by the law of the land. Imperial Proclamation No. 124 of April, 1872, runs as follows:—

It is hereby proclaimed throughout the country that no person shall be permitted either to sell or mortgage land to foreigners under any circumstances.

The following provision is found in Art. 11 of the Regulations for the Mortgage and Hypothecation of Lands, issued by Imperial Proclamation No. 18, January, 1873:—

Land or the title-deeds thereof shall in no case be permitted to be mortgaged or hypothecated to foreigners for the purpose of obtaining or borrowing money from them.

This it is seen that the transfer of land to foreigners is strictly forbidden by the express provisions of the law of the land. But foreigners are now suspected of owning land and houses not only in the five open ports, but in various other places throughout the country; and in some cases they almost form a village by themselves. Some of them even prohibit Japanese from entering their premises. Such a state of affairs is wholly contrary both to the treaties and to the law of the realm. Foreigners living at Karuizawa not only violate the laws of the country by owning land and houses, but they almost constitute an independent community indulging in all sorts of rudeness and arrogance. For instance, the following notice is found on a board erected at the gate of a villa reputed to belong to a certain foreigner:—

NOTICE.

1.—No Japanese is permitted to enter these premises except on business

2.—No injury to plants is permitted.

3.—Nobody is permitted to walk on the lawn.

These prohibitions shall be strictly observed.

What Japanese can help being moved to a strong feeling of indignation at the sight of such a notice? Is it not the height of rudeness and insolence on the part of foreigners to set up such a notice at a place like Karuizawa, where they live in open violation of the treaties as well as of the law of the land? In pre-Restoration days, notices were exhibited everywhere throughout the country for "the prohibition of the evil religion" These notices were considered by the Representatives of the Foreign Powers contrary to the friendship professed by the country toward those Powers, and a strong demand was made for their removal. But it is now foreigners themselves, living in tranquillity in Japan, that do not hesitate to set up boards prohibiting Japanese from entering their premises. Who is to be held responsible for such a state of affairs? We are forced to conclude that it has been brought about by our own Government's neglect to rigidly adhere to the treaty stipulations, thus encouraging foreigners to be presumptious and insolent. The fact that lands and houses are owned by foreigners is well known, and it may seem unnecessary to dwell upon it at any length. But in order to confirm our assertions, reference will be made to a few of the facts most widely talked about in the country.

On favourable sites at Negishi, Yokohama, there are a few foreign houses, inhabited by Mr. W. B Walter, head of Messrs. Jardine, Matheson and Co., and other foreigners. But these lands and houses are nominally in the ownership of Japanese.

A foreign Professor in the Imperial University owns several lots of land at Zushi. A house called "Hayama Kan," at Hayama, is also his property, though ownership is nominally vested in a person named Arai. The same foreigner has bought parcels of land adjoining the lot on which the above mentioned house stands, and has rented it to another foreigner, who is now building a house there.

Another foreigner, in the name of a Japanese, bought land on the beach in the same village, and erected there several houses, one of which was recently sold to the Japanese in question, while another was sold to a Marquis, this through the mediation of a high dignitary of State.

At Hachioji, Houmoku, in Kuragi District, there are two foreign houses, one of which is named "Yamato Kan." This Yamato Kan is occupied by a Frenchman, while in the other house lives a foreigner connected with Messrs. Jardine, Matheson and Co. These houses are really owned by the above named company. There are, besides, in the same locality, in foreign ownership, five patches of cultivated land, three lots of building ground, and nine tracts of foresta.

In Kobe and its vicinity, it is calculated that there are 64 plots of land in foreign ownership, 6 in Yatabe Gun, 7 in Akashi Gun, 3 in Arima Gun, 4 in the town of Himeji, 1 in Jinto Gun, 8 in Muko and Uhara Gun, and 4 in Kawanobe and Asago Gun; there being thus 97 plots of land in all in foreign ownership in the Prefecture of Hyogo. As to places in nominal ownership, they may be classified as follow:—60 in the names of concubines, 11 in those of Eurasian children, 4 in those of the relatives of concubines, 12 in those of *employés*, 4 in those of intimate Japanese, and 6 in those of Japanese Christians.

The numerous lots of land and houses in the possession of foreigners at Kanazawa in the Province of Shinano are registered in the names of *bantō*, concubines, cooks, *bettō*, and so forth.

At Toyama, a certain inhabitant recently sold a plot of land and a house to a stranger who is now actually living there.

In Goto, in the Prefecture of Nagasaki, the whole village of Hamaura is said to be in the possession of foreigners in the settlement of Nagasaki.

At Mayebashi, a plot of land, containing 1,367 ½ *tsubo*, with buildings on it, and extending from Kita-uragawacho to Shimmeicho, is stated to have fallen into the hands of a foreigner.

At Kofu, the ground and houses occupied by a female school at the western extremity of the town, as well as the land and buildings appropriated for a meeting place at Sakuracho, are reported to belong to foreign owners.

In the Province of Settsu, foreigners are believed to be the owners of nearly all the lands in the village of En-ya which lies between Suma and Maiko.

At Enoshima, in the Province of Sagami, a piece of ground, about a *cho* in extent, with buildings on it, is owned by a foreigner. So are also three houses standing on a sandy hill at Katase, opposite Enoshima, as well as a few pieces of land on the sea shore at Koshigoye and Kugenuma.

Besides those thus far enumerated, foreigners are reputed to possess in Niigata house lots, cultivated lands, and forests, with an aggregate extent of 1½ *cho*; while at Kamakura, they own 4 *tan* 9 *se* and 18 *bu* of house lots at Inamuraga-saki and Sakanoshita, a piece of grass land, containing 1 *tan* 3 *te* and 17 *bu* at Shimo-shirohara, Ichinotori, Zaimoduza, Midarebashi, and a house-lot of 2 *tan* 4 *se* and 4 *bu* Kurayashiki. These lands and houses are registered in the names of Japanese subjects.

These are only some instances of what must no doubt be true in every place throughout the country. With cunning people working in secret, there is of course no knowing what other acts of wrong they may not be guilty of. To this state of affairs may be ascribed the constant increase of diplomatic difficulties. Under the present circumstances, the revision of the Treaties must appear to foreigners a useless task, for they already enjoy all practical advantages without taking the trouble of revision. Our demand for revision is, therefore, always refused by foreigners on one pretext or another, and Japan is placed in a more and more disadvantageous position. Consequently, if we wish to have the existing unjust and unequal Treaties pro-

and preservation of game. On the broad questions of a close season and the restriction of game-pursuing privileges to holders of licenses, the new law and the old are practically at one. But in each alike the same unfortunate hiatus is observable: no provision is made against the sale of game birds and animals out of season. The mere fact of offering game in the market before the lawful season opens or after it closes constitutes clear evidence of illegal capture, and until the police are invested with power to supervise the markets in this sense it is almost hopeless to expect that any steps taken for the preservation of game will be effectual. So much had been written and said on this subject that the drafters of the new project of law ought to have remedied the defect. But apparently they were not sufficiently practical to do so. The first noteworthy change introduced by the new law as passed by the Peers is that an amateur sportsman will have to pay twenty *yen* for a license instead of ten. That of course hits the foreigner directly: his license will cost him twice as much as it has done hitherto. It may be supposed, at first sight, that so far as the text of the Law is concerned, no provision prevents foreigners from obtaining a professional license of Class B, which costs only one *yen*. Certainly the foreign resident does not fall under any of the categories enumerated in Art. VIII. as ineligible for professional licenses, though it might be difficult for a tea-taster or a silk-inspector to persuade the Japanese Authorities that he pursues game as an occupation. Art. XVI., however, settles the question inferentially, since it provides that any foreigner possessing an Amateur License may pursue game within the limits fixed by Treaty. It follows, of course, by implication that unless a foreigner holds an Amateur License he can not pursue game, and he is thus plainly precluded from holding a Professional License. This is the first essay of the Japanese Diet to legislate directly with regard to foreigners. The Law not only doubles the fee which foreigners have hitherto been required to pay for the privilege of pursuing game, but it also prescribes that among the four kinds of licenses now created, one alone shall be obtainable by foreigners. Further, and this point is even more interesting, Art. XVI.—which, we may note *en passant*, was inserted as an amendment at the recommendation of the Special Committee appointed to report upon the draft Law—provides that any foreigner pursuing game beyond Treaty Limits shall forfeit his license. It is not immediately apparent how this provision is to be enforced. If by sentence of a Japanese tribunal, then the Law marks a startlingly novel departure. If by sentence of a foreign tribunal, then the insertion of such a clause in a Japanese law is powerless to effect its purpose with regard to all foreign nationalities, until the process of re-enactment by the Foreign Representatives has been completed. We have often predicted that in the exercise of its legislative authority the Diet would soon discover incompatibility between the Constitution and the situation created by the Treaties. Our forecast begins to be verified.

A most notable change in the law is that all provisions relating to game preserves are absent. From the debate in the Peers we learn the reason of this omission, namely, that game preserves are regarded as a foreign institution and that the idea of devoting large tracts of land to purposes of sport is distasteful to the Japanese. That is not surprising. On the contrary, the adoption in its entirety of a system that has provoked so much hostile criticism and entailed so many abuses in Europe was scarcely to be expected of Japanese legislators. But, of course, without the legalization of preserves, there never can be anything like good sport in Japan. How long will it take, we wonder, for the upper classes in this empire to discover that the SOVEREIGN is not the only person entitled to the privilege of preserving game over large tracts of country. The new Law re-affirms the exclusive character of Imperial Preserves while omitting all the provisions in the existing Regulations that refer to private preserves. In this context it may interest our readers to know that the framers of the Law were not opposed to the principle of preserves. On the contrary, not only did they insert the Articles bearing on the subject in the present Regulations, but they even extended the maximum area of a private preserve from 3,750 acres to 12,500 acres. The House of Peers, however, at the instance of the Special Committee, excised all these Articles. But it must be confessed that the situation created by this Bill, in the event of its becoming law, is a little peculiar. The private right of property in game is recognised, since hunting is forbidden in fenced or enclosed private grounds without the consent of the owner or his agent. Presumably, therefore, a landowner may sell the privilege of pursuing game over his estate. But he is not entitled to let his estate to another for purposes of preserving. He must do the preserving himself. At the same time, while it is forbidden to rent land for the declared purpose of preserving, we do not see what is to prevent any one from renting a tract of land without assigning any purpose, and then surrounding it by a fence of some kind, when it immediately becomes a preserve. Folks in Europe are accustomed to say that an astute barrister can drive a coach and four through any law that ever was drafted. It seems to us that the legislators in the Japanese House of Peers have purposely built a highway for the process through their new Game Law.

IMPERIAL DIET.

FRIDAY, DECEMBER 15TH.

HOUSE OF PEERS.

The House did not sit, the Committees only assembling.

HOUSE OF REPRESENTATIVES.

The House met at 1.18 p.m., the Order of the Day being:—

1.—Second Reading of the Government Bill for amending the Tax Collecting Regulations.
2.—Second Reading of the Government Bill relating to the capital of the Military Arsenal.
3.—First Reading of the Government Bill, sent down from the Peers, relating to the Jurisdictional Limits of certain Law Courts.
4.—Appointment of a Special Committee to report upon the above.
5.—Report of the Special Committee on the Bill for amending the Law of Registration.
6. Report of the Special Committee on the Bill for the Protection of the Hokkaido Aborigines.
7.—Representation to the Government on the subject of Forests and Moors.
8.—First Reading of a Bill introduced by Mr. Matsuda Gengoro for Supplementing the Regulations for putting certain Parts of the Commercial Code into Operation.

The receipt was announced of a Bill introduced by Mr. Ando Kinka for encouraging the direct export of silk; a Bill relating to the Establishment of a Silk-conditioning Warehouse, introduced by Mr. Uwozumi Itsuji; and a Bill for augmenting the Special Ports of Export, introduced by Major-General Aoyama.

Mr. Kawashima Uichiro asked the President what step had been taken with regard to a motion introduced by Mr. Haseba Junko on the 12th instant. Mr. Haseba had moved that, in view of the importance of the Questions addressed to the Government by Dr. Hatoyama and others on the subject of the *Chishima-Ravenna* collision, the Ministers of State be invited to attend in their places at the time of replying. The motion could not be debated without changing the Order of the Day, and its discussion had consequently been deferred.

The Vice-President replied that the intention had been to bring on the motion at the close of the sitting, but as the House had been counted out, the thing had ended there.

Mr. Matsuda Gengoro asked leave to have the Order of the Day changed for the purpose of at once debating his Bill relating to the Commercial Code, which now stood at the end of the subjects for the day.

The House refused permission.

The Second Reading of the Government Bill for amending the Tax Collecting Regulations was then taken, but during its progress,

Mr. Konishi Jinnosuke asked whether the House would not be wanting in respect towards the Emperor if it proceeded with its debates before His Majesty had nominated a President from among the names submitted to him the previous day.

The Vice-President expressed the opinion that no such delay was necessary, and the House supported him.

The Bill for amending the Tax Collecting Regulations was then carried through its Second Reading, and the Third Reading was passed at once.

The Bill relating to the Capital of the Tokyo Military Arsenal was then passed through its Second and Third Readings.

Mr. Yoshikawa, Minister of State for Justice, explained the objects of the Bill relating to a Change of Jurisdictional Limits in certain Districts, and it was entrusted to a Special Committee nominated by the President.

The House then agreed, on the motion of Mr. Kurata Jungoro, to change the Order for the purpose of immediately debating the Bill relating to the Commercial Code.

Mr. Matsuda Gengoro, introducer of the Bill, said that the object of the Bill was to exempt from the operation of the Second Clause, Eighth Article, Joint Stock Companies established by Law. The House was doubtless aware that much inconvenience in the matter of registration had been caused to certain institutions, notably the Bank of Japan, because of the defective character of this Article of the Commercial Code. The few words which he proposed to add—namely, "Joint Stock Com-

CONCERT AT THE UYENO MUSIC HALL.

ANOTHER of the agreeable entertainments for which the public is indebted to the School of Music in Uyeno, was given on Sunday last before an unusually large audience, whose appreciation of the several performances was attested by hearty and earnest applause. The evidences of approval might perhaps have been still more emphatic if the listeners had known the difficult circumstances under which the concert was arranged and prepared. The system by which the School is regulated offers but small encouragement to the formation of a competent body of musicians. It has, apparently, no such purpose in view. The particular aim, we understand, is to educate individual students to a degree of ability that shall qualify them to act as teachers in other institutions; and when that point is reached, they are liable to be sent away at short notice, without regard to the loss which the little orchestra suffers from their departure. Extraordinary efforts are therefore necessary to maintain a steady rate of co-operative progress. It is only through the indefatigable exertions of their chief instructor that the young ladies and gentlemen at Uyeno are periodically enabled to unite in performances of such merit as to win the favour of the entire musical community, and to attract visitors from a distance, as well as the better part of the foreign residents of this city.

It was probably owing to recent deprivations that the violins were less prominent in last Sunday's programme than on previous occasions. The number of players on this instrument was materially reduced, and while those who appeared showed no diminution of the accustomed skill, the comparative lack of strength and volume was obvious. Some of the best pupils, fortunately, are still retained. Miss KODA, *facile principissa*, continues to take the lead, and among her companions are more than one whose claim to distinction has long been recognized. Everything that they did was well done, and it was largely the value of what they contributed to the entertainment that made it a truly enjoyable concert, instead of an ordinary school exhibition, after the conventional and perfunctory pattern. Since the luxury of orchestral production, on a broad and full scale, is denied to us who dwell in this land, we have reason to be grateful for such suggestive impressions as are conveyed by the intelligent artistic group under Mr. DITTRICH'S command No one—not even the most fastidious of critics—could listen without keen and vivid gratification to the themes selected from the works of SCHUMANN, SAINT-SAENS, and HANDEL; themes which were worthily interpreted, and which charmed the ear, each in its turn, with the spell of poetry, of romance, and of majestic power.

Concerning the specimens of Japanese music which were offered, it is needful to say only that they were played by experts of high repute, and were greeted with acclamation by the majority of the audience, to whose national instincts they appealed with irresistible force. Whatever may be said for or against the æsthetic properties of Japanese minstrelsy, there can be no doubt that those who labour to preserve these native growths of song perform a meritorious public service. In times to come, the melodies of the masses will, with the words to which they are wedded afford substantial aid, both direct and illustrative, to the recorders of the nation's real history;—not the writers who put forth mere compilations of political commentary, without colour or flavour, and who leave the inner life and core of the people untouched, but those who seek to lay bare the soul and spirit of the race. It is right that the music which influenced the past of Japan, and is cherished by the immediate present, should be kept intact and available for proper uses hereafter; but to exalt it to a fictitious ideal, or pretend that it is capable of "development" in any scientific sense, is the sheerest waste of time. The two examples that were given on Sunday supplied proof of its irredeemable crudeness, in a rather curious way. In each piece one note told the whole story. As a naturalist like Professor MITSUKURI, of the University, can theoretically reconstruct a fish from a fragment of bone, so an experienced musician may sometimes determine the character and the possibilities of a representative melody from a single tone. The concluding note, in both of these Japanese compositions, demonstrated their close affinity to a musical mode which, though once in vogue, has long since been discarded as not amenable to harmonic treatment. It was familiar to the ancient Greeks and continued to be practised in Europe until music began to be governed by fixed laws, when it was declared unfit to survive, and was no more known, except to archæological research. How it happens that the last notes of two typical Japanese tunes can serve to establish the virtual identity of their construction with that of an obsolete European form might easily be explained, but the process would be tedious to the general reader, while to adepts it would be superfluous. Precisely as the Doric mode passed out of existence, so will the style of music now current in this country, for it can be made suitable for harmonization only by radical alterations which must destroy its individuality and bring it into conformity with modern European principles. Music that defies harmony has no place in the domain of art, as all enlightened Japanese will discover before many years have gone by. When the union of sympathetic sounds, simultaneously delivered, comes to be understood here, a new world of beauty will be opened to the senses of the people. It will be seen that by such apparently simple devices as the addition of an underlying third, or sixth, the expression of a melody may be varied at pleasure, and the accents of tenderness, passion, or sorrow imparted to a strain which, if heard alone, might suggest scarcely any definite meaning. In the concert of last Sunday, a gay little violin arrangement of an *entr'acte* by ROGER was performed. The opening theme, taken separately, was quite insignificant, not to say puerile; yet by weaving beneath it a slight supporting thread, the composer succeeded in producing a very dainty and ingenious effect. This, however, is but a small indication of the value and importance of harmony, and represents one of the least of the services it renders. Its resources are, in truth, immeasurable. But it cannot co-exist with the Japanese music of to-day, and as it is indispensable to all music that deserves the name, Japan has no alternative but to take, sooner or later, what is called "a new departure." A nation that sets itself the task of emulating, in all directions, the intellectual achievements of Western civilization will hardly be content to lag behind forever in the cultivation of the highest art known to humanity.

A NEW GAME LAW.

IT will be fresh in our readers' recollection that the House of Representatives last session made an abortive attempt to repeal the Game Regulations enacted and promulgated a short time previously by the Government. The effort was accompanied by some bluster and provoked much controversy, but ended in nothing. A resolution was indeed placed on record by the House of Representatives to the effect that the Government's Regulations, being *ultra vires* and unconstitutional, had no binding effect. But the regulations continued in force all the same. The House's next step was to introduce a new project of Game Law, in which no reference whatever was made to the existing Regulations although the two were in many respects identical. In the Peers, this project underwhat ▮sent change necessitated a conference of the Houses, and the session closed ere an agreement could be elaborated. This session the Upper House has taken the initiative and passed a project of law of which we publish a translation elsewhere. The Peers, like the Representatives, appear to think that no direct notice need be taken of the Game Regulations already in force, from which we infer that the Upper House also entertains strong doubts as to the legality of the Government's procedure in issuing those Regulations. Without re-opening that hackneyed controversy, however, we proceed at once to notice the differences between the legislative ideas of the Peers and those of the Government with regard to the pursuit

stitution. But session after session the Opposition have endeavoured to violate this Prerogative, and in the present session they went so far as to reject the SOVEREIGN'S method of reducing salaries in order to be in a position to take the task unlawfully upon their own shoulders. Yet another Address was in course of preparation, and would certainly have been passed had not HIS MAJESTY interrupted the House's proceeding by proroguing it. This last Address referred to the *Chishima-Ravenna* law-suit. The grounds of complaint were that, in order to procure recognition of the Imperial Prerogatives, HIS MAJESTY'S name had been used by Counsel before a foreign legal tribunal, and that the Government had consented to answer an appeal made to a tribunal beyond the sea; the former complaint being based on romantic sentiment, and the latter directed against a custom which had received the sanction of thirty years' observance. HIS MAJESTY must have been a little surprised to find such antique solicitude for the sanctity of the Imperial name on the part of men whose actions contrasted so palpably with any sentiment of the kind, and a little perplexed to learn that his faithful House of Representatives, in their fifth session, had suddenly been thrown into a fever of excitement about a form of legal procedure pursued without protest for thirty years previously. The EMPEROR'S Minister's would have been wanting in solicitude for the Imperial dignity had they failed to advise HIS MAJESTY that some check should be imposed upon these repeated appeals to the THRONE about shadowy trifles, and these continued efforts to drag the SOVEREIGN down into the arena of party struggles. It is probable that they also urged a consideration palpable to everybody, namely, that the Opposition has no aim beyond embarrassing and discrediting the Administration, and that, in default of substantial charges against the Ministers of the CROWN, they are ready to trump up the most contemptible and irresponsible accusations. The prorogation of a Diet which has seriously shaken public confidence in the justice and self-respect of Japanese legislators, and has shown them to be so wanting in practical reverence for the THRONE, may be regarded as an inevitable measure.

THE REASON OF THE DIET'S PROROGATION.

IN an article published immediately after the prorogation of the Diet, we gave a brief summary of the various acts which, by their aggregate force, appeared to have necessitated an extreme step on the part of the Government. We now learn, however, that though the general course of procedure followed by the Opposition in the Lower House, from the passing of a vote of want of confidence in Mr. HOSHI TORU to the Resolution importuning the SOVEREIGN, undoubtedly created a situation which might have culminated at any moment in an unavoidable exercise of the powers reserved to the EMPEROR by the Constitution, the proximate cause of the prorogation was Mr. ABEI HANKON'S Representation to the Government with reference to strict enforcement of the text of Japan's Treaties with Foreign States. For some days it had been known that such a measure might be introduced in the Lower House, but the degree of support its promoters were likely to obtain remained uncertain, and did not, at all events, seem sufficient to encourage any speedy step on their part. The present, however, is not a time when politicians obey the dictates of logic and reason with much fidelity. Such is the mood of a considerable section of the Lower House that any proposition calculated to embarrass or discredit the Cabinet is pretty sure to enlist their approval whatever its bearings or consequences. In this absence of calm judgment and presence of strong political passion, Mr. ABEI HANKON and his colleagues found their opportunity, and on Tuesday they brought forward their Representation. It is a sufficiently uncompromising document as it stands, though we believe that some of its most injudicious utterances had to be sacrificed as the price of support from men less extreme in their views than the drafters of the original Representation. Moreover, its passage by the House, had such an unfortunate event occurred, would not have ended the mischief, but would only have preluded the introduction of two Bills, the text of which we have already published, providing means for the restraint and punishment of Japanese who might aid foreigners to enjoy privileges not specifically secured to them by Treaty. The Representation to the Government and the correlated projects of law would have created a situation most galling to foreigners, and would have involved such an employment of administrative and legal machinery as modern civilization does not sanction. The Government is determined that Japan's foreign relations shall not be disturbed by any procedure of the kind. Large latitude may be granted to the House of Representatives so long as its Resolutions and Representations are limited to domestic affairs, but when excursions are made into the region of foreign policy, and when the nation's friendship with Western States is imperilled by measures that have their origin in ignorance and owe their development to party passion, it becomes the duty of those in power to interfere resolutely. The political situation at present bears some resemblance to that which existed immediately before the Restoration. Attempts are made, in pursuit of ambitious ends, to produce factitious umbrage against foreigners, and to employ the Government's friendly attitude towards them as a means of discrediting the Ministers of the CROWN in the eyes of the nation. There is, of course, a radical difference of degree. No one now-a-days dreams of expelling foreigners or reverting to a state of national isolation. But a good many persons do believe that Japan must assert herself or be counted a spiritless, unpatriotic country, and that her only hope of inducing foreigners to release her from the national disabilities imposed by the Treaties, is to make the Treaty situation as unpleasant as possible for the foreign residents. It is a theory based on a totally false conception of the situation, but its mere error weighs little in comparison with the immense mischief it might work. By a long and patient exercise of hearty hospitality and goodwill Japan has effaced the prejudice against her that grew out of three centuries of isolation, and first among Oriental nations, has established her title to be treated as an equal by Occidental Powers. But her position is still very precarious. She has not yet obtained practical recognition of her efforts, and nothing would be easier than to re-create the distrust with which she was regarded twenty years ago. That is what would inevitably follow did the Diet adopt measures such as those advocated by the followers of Messrs. OI KENTARO, ABEI HANKON, and other agitators, who imagine that rough and brutal methods will serve to solve one of the most delicate and difficult problems ever presented for the consideration of diplomatists. Happily the Japanese Government has a thorough appreciation of the liberal attitude now taken by foreign States towards this Empire, and will never allow their friendship to be alienated by ill-considered and unwarranted displays of resentment, or by vexatious and abortive attempts to withdraw privileges the enjoyment of which by foreigners has inured chiefly to Japan's benefit and helped materially to win Western esteem and confidence. It may fairly be assumed that the *Meiji* statesmen are not less earnestly solicitous about the country's real interests than amateur politicians like Mr. ABEI HANKON and Mr. ARAI SHOGO, and that they will suffer no breach of the Treaties such as might tend to compromise the cause of Revision. But they are determined that the Diet shall not be betrayed by party passion into excesses offensive to Foreign Powers, and we confidently predict that if the House of Representatives, when it re-assembles, insists on proceeding with Mr. ABEI'S motion, which was interrupted by the order to prorogue, or, still worse, approves the motion, sentence of dissolution will be at once pronounced.

that the House, by the Resolution just passed, desired the Premier to resign, such was not the case, the House's intention being simply to express its wish that some action should be taken speedily. Possibly Mr. KAWASHIMA meant to say that the House did not desire Count ITO'S retirement, but that it would be satisfied if the Minister of Agriculture and Commerce was removed. But that explanation is inconsistent with the terms of the resolution in which "the Cabinet Ministers," and not any particular Minister, were desired to resign. We learn that Mr. KAWASHIMA'S explanation was afterwards a subject of strong complaint from the Opposition members.

PROROGATION OF THE IMPERIAL DIET.

ONCE more the Government has felt itself under the necessity of proroguing the Diet. The period on this occasion is ten days, but inasmuch as the Diet would have risen under any circumstances on the 24th instant for the New Year's recess, its session is actually shortened by only four days and a half. There will probably be a merely formal re-assembly on the 29th instant, after which the Houses will rise until the 8th or 9th of January. No expectation of such a measure seems to have existed among the members of the Lower House. It was only Tuesday morning that representatives of the various sections forming the present Opposition met in the Imperial Hotel for the purpose of discussing, among other things, the propriety of introducing a proposition that the House should suspend its sittings for one week or longer in order to await the SOVEREIGN'S answers to certain Addresses to the THRONE then in course of preparation or already presented. The decision arrived at was that no suspension of proceedings should take place until all the great guns which the Opposition was engaged in loading had been discharged at the Cabinet. Coming down to the House with this resolve fresh upon their records, the agitators had no sooner completed the portion of the Order of the Day relating to Government business, than they received the SOVEREIGN'S commands to prorogue for ten days.

The most noteworthy point about this step is that it has not been taken with reference to any special act on the part of the House of Representatives, but has been forced upon the Government by the general conduct of the House throughout the session. Briefly stated, the Opposition has been engaged ever since the present Cabinet came into power, in searching for some stick to beat the Government, and finding only the most microscopic twigs, has made itself ridiculous and brought Japanese parliamentary institutions into contempt, by endeavouring to construct a cudgel out of these altogether paltry materials. We do not suppose that the action of the House with regard to its President can be regarded as one of the factors directly responsible for the present issue. But unquestionably that extraordinary display of prejudice and passion must have taught the Government, as it taught every unconcerned observer, that political sentiment had carried the House beyond all considerations of justice or responsibility, and that the majority forming the Opposition could no longer be trusted to bring to the discharge of their legislative duties the essential qualities of reflection and impartiality. It will not, indeed, be any exaggeration to conclude that the Cabinet must have desired, as every friend of Japan desired, to impose an immediate check upon the proceedings of a House so careless of the country's reputation. Nevertheless the HOSHI incident cannot be connected directly with the present *dénouement*. We must look for the causes elsewhere, and they are easy to find This fifth session of the Diet has been distinguished above all others by the number of Addresses presented to the THRONE. In previous sessions the members seemed to be imbued with something like a due sense of the importance attaching to the gravest step authorized by the Constitution. This session, on the contrary, they have not hesitated to approach the SOVEREIGN on issues so paltry as to bealmost, if not altogether, farcical. Their first Address to the Throne with reference to their President was proper enough, considered independently of the shadowy grounds constituting the bases of their charges against Mr HOSHI. Having lost confidence in him, and being without competence to deprive him of his office, they naturally appealed to the power from which he held his commission. Strange and self-stultifying as was their subsequent conduct with regard to the Address, their action in presenting it would have been comprehensible enough had their reasons for withdrawing their confidence from Mr. HOSHI been capable of demonstration. But in the absence of anything worthy to be called reasons, their Address to the THRONE became simply an appeal for Imperial assistance towards the consummation of an act of political prejudice and injustice. Neither respect for the THRONE nor appreciation of parliamentary responsibility was discernible in such conduct. Even less defensible, if anything could be less defensible, was their second Address, on the subject of Official Discipline. The alleged pretext of the Address was that a Minister of State had associated with persons of inferior position and frequented places of vulgar entertainment. Even supposing that the accusation had been true, its employment as the basis of an Address to the THRONE impeaching the whole of the SOVEREIGN'S Ministers would have been ludicrous. But when it appeared that the persons of so-called inferior position were the leading merchants of the Capital, and that the places of vulgar entertainment were tea-houses at which members of the Diet themselves, and even of the nobility, do not scruple to meet in friendly converse, the Address became something very like an insult. Such a step could never have been taken by a body of responsible legislators had they not been blinded by political prejudice and forgetful of the respect due to the THRONE. They followed it by a measure equally foreign to the best traditions of Japanese loyalty. For when thirteen days had elapsed without a reply from the SOVEREIGN, they actually passed a resolution condemning the delay and declaring that an immediate reply ought to be given. This act admitted only one of two interpretations: either the Resolution was addressed directly to the SOVEREIGN, in which case it amounted to a parliamentary censure of HIS MAJESTY'S deliberation and a summons to reply speedily; or it was addressed to the Government, in which case it signified by implication that HIS MAJESTY'S answer as well as the time of making it were dictated by the Cabinet Ministers, not determined by the EMPEROR himself. Whichever interpretation be taken, we are bound to conclude that both alike were unappreciated by the House of Representatives, for certainly to whatever extremes of passion party strife might drive them, it is impossible to conceive the Representatives of the Japanese people openly reproving their EMPEROR'S want of precipitancy, or publicly pronouncing HIS MAJESTY a puppet in the hands of his Ministers. These acts constitute a sufficient indictment of the conduct of the majority now controlling the Lower House of the Legislature. But they do not represent the whole record. Another Address to the THRONE was passed informing HIS MAJESTY that the House declined to accept a yearly donation of three hundred thousand *yen* from the Privy Purse on account of naval ship-building. The EMPEROR'S announcement of this donation had been received by the nation with acclaim a few months previously, and had been welcomed by the House itself as a happy solution of the deadlock then existing between the Executive and the Legislature. Yet now a majority in the same House turned round, declared that their previous attitude of assent had been due to perplexity, and that, on mature deliberation, they really must decline to endorse the SOVEREIGN'S programme. The reason of this historically unprecedented step was, not reluctance to see the Imperial circumstances straitened in any way, but simply a desire to obtain a free hand for cutting down official salaries in the Budget. The House has not a shred of right to touch official salaries. Their determination and control belong explicitly to the Imperial Prerogatives reserved by the Con-

shipping facilit es He drives bargains for the marine transport of his goods, whereas his Japanese rival is tied down to fixed rates. That is not difficult to comprehend if we postulate a resolution on the part of a Japanese to ship solely by vessels flying his country's flag. But why should he be fettered by any such determination? Apparently not sentiment but want of practical shrewdness stands in his way. The Chinaman derives his third advantage from adroitness in evading customs duties, partly or wholly. Anyone who compares the conduct of Chinese custom-house officials towards Japai ese travellers with their conduct towards their own nationals, finds no difficulty in inferring the possibility of still wider and more effective discrimination. The Chinaman's personal baggage, his bundles and so forth, pass uninspected, whereas everything that the Japanese carries is subjected to searching scrutiny. How much unscrupulous advantage is taken of this liberality we do not pretend to say. Estimates differ. But it is very conceivable that official partiality may be elastic, and that douceurs said to be skilfully distributed by the Chinese may obtain even for their admittedly dutiable imports terms fatal to competitors not similarly aided. Probably the most serious obstacle in the way of Japanese success, however, arises from a cause very familiar, *mutatis mutandis*, to the foreign merchant in Japan. Just as the Japanese in this country combine to bring into a few hands the market for each staple of import, so the Chinese in Shanghai combine to close the market against the Japanese importer until he is compelled to accept their terms. It is not to be supposed that motives of patriotism sway them very strongly in business. But where they can obtain the same commodities on at least as good terms through agents of their own nationality as through Japanese agents, they naturally resort to the former, and when they not only satisfy sentiment but also reap practical advantages by combining to embarrass the Japanese, what can be more natural than that they should so combine? Here, then, are a good many reasons explanatory of the ill success that has attended the attempts of Japanese to conduct import operations in Shanghai Probably the analysis is far from being exhaustive. As it stands, however, it indicates distinctly larger business aptitude on the part of the Chinese, according to present standards of business aptitude.

THE HOUSE OF REPRESENTATIVES AND OFFICIAL DISCIPLINE.

TRUE to general expectation, the question of Official Discipline was again brought up for discussion in the House of Representatives on Monday. On similar occasions, the previous custom of the House had been to pass an urgency motion for changing the Order of the Day at the very commencement of the sitting. But the first Bills on Monday's Order being Government measures, it would have been necessary to apply for the Cabinet's concurrence before making any such change, and taught by recent experience, the House was astute enough to refrain from making an application that would have merely elicited refusal. It waited until the Government measures had been disposed of, when, of course, there was no obstacle to any change that the members might wish for. Thus four Government measures, all of minor importance, were hurried through with the greatest possible despatch in the short space of about forty minutes, and then the expected motion was introduced by Mr. KAWASHIMA JUN, a leading member of the *Domei* Club, who was so impatient to discharge the important duty entrusted to him by his confederates, the Progressionists and the National Unionists, that he proceeded to explain the object of the motion before the last Government Bill had been fully disposed of. The Order of the Day having then been duly changed with the unanimous consent of the House, Mr. KAWASHIMA ascended the rostrum to explain his motion. He is a well made, somewhat portly Satsuma man, with an abundance of hair on both face and head, and his age is a little over forty. Had he remained in office, he would now be at least a Vice-Minister of State. But, unable to conform with the views of his chief, Count MATSUKATA, then Minister of Finance, he threw up a promising official career shortly before the establishment of the Diet, and has since played the part of a free lance in the Opposition. He is not an orator, but on the present occasion he spoke well, his utterance being deliberate and clear. He proposed that the House should pass a resolution, to the effect that the Cabinet Ministers having taken no step in response to the Address to the THRONE on the subject of Official Discipline, the House now called for the speedy correction of that omission. Mr. HASHIMOTO KYUTARO, an insignificant member of the Progressionist Party, took the lead in supporting the motion. His matter-of-fact speech contained nothing worthy of notice, and the same may be said of the next speaker, Mr. NODE SHOZABURO, an equally obscure member of the *Doshi* Club, a political association composed of recent deserters from the Radical camp. Nobody spoke against the motion. It would, indeed, have been unless to do so in the present state of the House's feelings. When the question was put to the House, all the members, with a few exceptions, rose to signify assent. Among the exceptions were Mr. INOUYE KAKUGORO, and Mr. ABE KO, Director of the Shrines and Temples Bureau in the Home Office. It is singular that Mr. KURODA TSUNAHIKO, a Councillor of the Home Department, now on the Retired List, joined the supporters of the motion. If he thinks the Cabinet Ministers unworthy of confidence, he ought ere this to have removed his name from the official list. So soon as the motion had been passed, Mr. KONO HIRONAKA, of the Radical Party, moved that, pending the Cabinet's decision on the question of Official Discipline, the House should adjourn for a week. But the House declined to consider the proposal, chiefly, it is said, because the majority do not desire any delay until they have discharged their remaining shafts at the Government, namely, an Address to the THRONE with regard to the strict enforcement of the Treaties, and the *Chishima-Ravenna* collision. At this stage of the proceedings, the Premier, followed by a few of his colleagues, appeared and took his usual seat on the right of the President. He at once proceeded to the rostrum and spoke on the subject of Official Discipline. The occasion was suited to the style of oratory in which he excels, and his speech, albeit short, was delivered in such a determined and dignified manner that murmurs of admiration were heard in the Strangers' Gallery, and it was easy to see that the House felt the force of the speaker's words and the commanding character of his address. Respectful silence was preserved throughout, except on the part of Mr. SHIMIDZU BUNJIRO, who took care to disgrace himself as usual. It is also to be noticed that Mr. MOTODA HAJIME, usually a sober and well-balanced person, interrupted the Premier by remarking that he ought to have spoken before the passage of the Resolution. A translation of Count ITO'S speech being published elsewhere, we need not refer to it in detail here. Its substance may be stated in a few words. He told the House that the Ministers of State received their appointments directly from the EMPEROR and were in no way bound to resign at the Diet's bidding, and he took the opportunity to read an Address that he had presented to the EMPEROR, praying for HIS MAJESTY'S decision. The EMPEROR had not yet been pleased to give any decision, and the Premier was respectfully awaiting HIS MAJESTY'S pleasure. The Opposition papers will no doubt criticise Count ITO as having shirked responsibility by asking for the EMPEROR'S decision, but under the Japanese Constitution, such a course seems inevitable, seeing that, as the Count told the House, a Minister of State in Japan owes no responsibility to the Diet. We may observe here that Count YAMAGATA, having returned to the capital on Monday, will be consulted by the EMPEROR, and the Imperial decision, one way or the other, will be given in a few days. When the Premier's speech was concluded, Mr. KAWASHIMA again ascended the rostrum and remarked that, although the Minister President seemed impressed with the idea

MR. THEODORE WORES' PICTURES.

JAPAN has been fortunate of late years in receiving visits from several artists whose work has contributed immensely to familiarise folks in the West with the beauties of her scenery and the attractiveness of her manner of living. Of course there is no possibility of estimating, with any pretence to accuracy, the material benefit conferred on the country by these painters, but one thing is certain, namely, that the stream of tourists now annually visiting Japan's shores is among the most important factor in her economy. It is a veritable PACTOLUS. Millions of dollars are yearly brought by it to the country's coffers, and everything that tends to swell its volume is an emphatic gain. Looked at from this point of view, the beautiful pictures that men like PARSONS, EAST, DILLON, GAY, BLUM, WORES, VARLEY, and MEMPES have carried to Europe and America to delight the artistic sense and provoke the curiosity of people beyond the seas, should be regarded with gratitude by Japan. As invitations to tourists, they serve even more effectually than objects of virtu, for they convey a suggestion of things that every one may see for the mere looking, without either the knowledge of the connoisseur or the purse of the collector. Mr. THEODORE WORES was one of the first to turn his attention to the novelty and loveliness of Japanese scenery and the apparent quaintness of things Japanese. He came here several years ago, and settled down in Tokyo, with all the abandonment of a true student, to study every phase of his novel environment. The result was a series of pictures remarkably accurate as representations of domestic and street life. Living in a city, Mr. WORES naturally had his attention directed chiefly to figure subjects and interiors, a fact probably fortunate for him, since he thus came to study the Japanese type closely and acquaint himself with many details usually overlooked by tourist-painters. Some points in the pictures then painted by him provoked hostile criticism, but on the whole he made a decided success, and we are glad to remember that moral and material appreciation of his efforts was first evinced by the London public. An American artist seems to encounter some obstacles in winning the sympathy of his own countrymen. Whether not having yet acquired entire confidence in their own judgment, they await a foreign verdict before committing themselves, or whether they frankly prefer imported works of art to domestic, they certainly do not patronise the efforts of their nationals as readily as might be expected. At any rate, Mr. WORES seems to have found a clearer perception of his merits in London than in New York, and his experiences there encouraged him to pay Japan another visit which has been prolific of very admirable paintings. We say "prolific" advisedly, because, during a residence of only 15 months, Mr WORES has made about 130 pictures, some finished, others still requiring considerable work, but all sufficiently advanced to produce a most pleasing impression on those who visited them a few days ago, in response to the artist's invitation. Evidently Mr. WORES must have devoted himself to his easel with unflagging assiduity. He appears also to have worked systematically, following the effects of the four seasons wherever they were most likely to be displayed to advantage, and painting not only landscape and sea-scape, but also scenes from the life of the people as varied by the time of year. In many cases he has been most happy. Possibly his work is open to the criticism of occasional crudeness, but it is difficult to depend with certainty on an impression that may have been due entirely to the presence of unfinished pictures. Some of his studies of lotus blossoms, irises, and wistaria are admirable, and will be keenly appreciated in Europe and America. Moreover, the advantages of his previous study are very perceptible in the fidelity with which he depicts the Japanese type of face and figure, and in the greatly widened range of his choice of subjects A really charming effort is a study of two girls' figures lying on the mats in a Japanese room. This picture belongs to a series of small canvases excellently illustrating the pretty little peeps of scenery and road-side life that lend such a charm to travelling in Japan. But in none of his productions is the artist seen to better advantage than in the Lotus at Kamakura, the White Wistaria at Kameido, the Street Scenes at Ikao, the Iris at Horikiri, and Plums at Sugita. In all of these he is eminently satisfactory to those who appreciate the merit of a faithful story told upon canvas, and he ought to be in much request with men who desire to have upon their walls really sincere reproductions of the prettiest things Japan has to offer.

JAPANESE AND CHINESE IN TRADE.

COMPETITION between Japanese and Chinese merchants engaged in the import trade in Shanghai appears to give results unfavourable to the former. Many persons would have accepted that from the first as a foregone conclusion. The balance of foreign opinion in the East sways strongly to the view that the Chinaman is a much better man of business than his neighbour the Japanese. He seems to possess, in a marked degree, many of the qualities essential to commercial success. He is quick in forming decisions. He is not prone to sacrifice the substance of large gain in the present to the shadow of larger in the future. He has the courage to avert disaster by accepting definite and endurable loss. Above all, he knows the value of integrity and credit. None of these qualities appears to have been vouchsafed to the Japanese in an equal measure, and consequently, other things being equal, it might generally be assumed that the issue of any tradal competition between the Chinese and the Japanese would be favourable to the former. But no rational person can imagine that nature has really been partial in her equipment of the two races. If the Chinaman seems better qualified for the struggle, it is not because he was born with a better adapted mind, but because training, environment, and tradition have aided him. He does not live in a land where, until quite recently, to be a merchant was to be despised. For him to embrace trade as a career never involved any loss of self-respect, as it involved for a Japanese twenty-five years ago. In passing the threshold of a mercantile calling, he did not lose social caste, neither was his obligation lessened towards any of the canons dictated by respectability. It might be a difficult matter to trace accurately the practical effects of this difference between the attitudes of the Chinese and Japanese nations towards trade during past generations, but there is no difficulty in being sure that the general result must have been to make the Japanese merchant work on a lower level and adjust his methods to lower standards. That explanation, however, does not appear to apply to the competition between the two in Shanghai There the Chinaman gets the upper hand, but the reasons assigned for his success are not connected with any far-reaching questions of morality. On the contrary, they are very common-place reasons. They even go to indicate that victory is wrested from the Japanese by the exercise of qualities not entirely respectable or laudable. In the first place, it is alleged that even in the matter of purchasing Japanese produce in Japan for export to China, the Chinaman manages to get better terms than the Japanese. One can hardly conceive, at first sight, why that should be. On the contrary, it seems natural to suppose that dealing with his own countrymen in staples of their own production, the Japanese should be the more advantageously situated. But he says that he is not. He says that his business affairs are too well known; that he cannot conceal the extent of his wants, and that he is consequently debarred from resorting to a system of progressive purchase which sensibly reduces the general average of price. We do not pretend to be quite clear about the working of this factor, but the long and short of the matter is that a Chinese purchaser is said to make more capital out of Japanese producers' pliability than a Japanese purchaser does, which is a sufficiently curious allegation. In the second place, the Chinaman is supposed to obtain cheaper

Government, and he supported the position assumed by him by referring to the reply which he had made to the Minister of Foreign Affairs on the 23rd of the 8th month of the 3rd year of *Meiji* in connection with an affair already alluded to, as well as to the so-called Memorandum of the 2nd year of *Bunkyu*. With respect to the landing of the French officers, he recognized that they ought to have obtained the permission of the Japanese Government. Our Government, it is said finally acquiesced in the views maintained by the French Minister and cancelled its correspondence on the subject.

In the case mentioned in the foregoing paragraph, our Government is noticed to have rashly surrendered its rightful position in view of the demand of a foreign Representative, thereby leading to gradual encroachment of foreign Powers upon our national rights. Nothing could have been more regrettable than such conduct on the part of the Japanese Government. However, it may not yet be too late to recover the right thus surrendered by adhering to the just interpretation of treaty stipulations, and that is the responsibility falling upon the shoulders of the Government.

(TO BE CONTINUED.)

INTERRUPTED REUNIOUS.

THE season is not suitable for assemblies organized by politicians who advocate the strict enforcement of the letter of the treaties. On the evening of the 21st instant, reports the News Agency, about ten members of the *Seimu Chosa-jo* met at the Yaoya restaurant in Asakusa, to celebrate the fall of the year—rather a premature performance at present, one would think. By and by they were joined by Messrs. Abei Hankon, Komuchi Tomotsune, and a few others who had been attempting to hold a political meeting in the Nakamura-ro, but had been obliged by the police to abbreviate their programme before the dinner stage. These gentlemen had not long added themselves to the *Bonen-kai* in the Yao-kan, when an Inspector of Police arrived with a considerable following of constables, and sought an interview with Mr. Chiba, a member of the *Chosa-jo*. Having obtained admission, the Inspector watched the proceedings for a time, and then intimated that the party must disperse, as he considered it injurious to the public peace. Two of the convives, Messrs Komuchi and Tanaka—not the notorious Tanaka Shozo—were playing *go* with all the innocence imaginable. Being required to abandon the harmless pastime, these greatly aggrieved politicians endeavoured to obtain from the police an explanation of the interruption, but the inspector told them that he was not called upon to offer any explanations, the propriety of the course he had adopted being left by law to his own judgment. We shall probably hear loud complaints by and by about the arbitrary conduct of the police, and shall be asked to believe that the members of the *Seimu Chosa-jo* are the most guileless persons imaginable, never assembling at restaurants for any purpose more terrible than to eat a dinner or drink a glass of wine. However, every one is at liberty to believe what he pleases. For our own part, we can only wish for the advent of the day when the public peace can be secured in Japan without such measures as those described here.

THE REASSEMBLY OF THE DIET.

ACCORDING to present appearances the Representation relating to the Strict Enforcement of the Treaties will be again brought up for discussion in the Lower House on the 29th instant, and if passed, will be followed immediately by the Address to the Throne on the subject of the *Chishima-Ravenna* law-suit. It is stated that some members of the House of Peers are endeavouring to have the Representation debated in secret session, and that the Government advocates a similar course. The *Jiji Shimpo* writes strongly on the advisability of secrecy, but at the same time urges the Government not to attach too much importance to the measure, since, even if it be passed by the Lower House, it is sure to be rejected by the Upper. Apparently the *Jiji* is labouring under a false impression. A Representation to the Government does not follow the route prescribed for an ordinary Bill: if passed by either House, it goes to the Government at once in the name of that House, and is not submitted to the other House. Besides, the Government, as we understand, is not at all concerned about the ultimate fate of the Representation. By simply adopting none of the steps recommended in it, the whole thing becomes a dead letter. What the Ministers of the Crown desire to avoid is that foreign sympathy and friendship should be alienated by a display of hostile unreason on the part of the House of Representatives.

COUNT GOTO BEFORE THE EMPEROR

THE *Kokkai* professes to have become acquainted with the gist of the statement made to the Sovereign by Counts Goto and Kuroda when they visited the Palace in the sequel of the Address to the Throne on the subject of official discipline. We suspect that the *Kokkai* merely publishes a shrewd guess at what passed, for there are no apparent means of obtaining information about such a matter. At all events, the Minister of Agriculture and Commerce is represented by our contemporary as having identified himself and Mr. Saito Shuichiro with the charge contained in the Address that Ministers had frequented improper places and associated with improper persons, and that officials had received presents. His Excellency then explained that the accusation, so far as concerned the Ministers of the Crown, had no basis except in visits paid by him to his son-in-law Mr. Oye Taku, and Count Okuma's son in-law, Mr. Sagara, who had invited him to a restaurant to talk over Exchange matters. As for the question of presents, nothing had occurred except that the Vice-Minister, Mr. Saito Shuichiro, had accepted a gold watch openly given to him in token of appreciation of the trouble he had taken in collecting information and assisting in the comp iling of the Bourse Law.

A TIMELY WARNING.

THE *Jiji Shimpo*, with timely wisdom, reminds its readers that the duty of observing a treaty devolves equally upon both the signatories, and that if one side insists upon enforcing the strict letter of the agreement, the other side must be expected to do the same. Japan's treaties with foreign Powers, our contemporary goes on to say, were concluded at a time when she possessed practically no knowledge of foreign intercourse, and the consequence was that there were included in the treaties many provisions distinctly disadvantageous to Japan. If the Japanese, adopting the advice of their most recent agitators, decide to enforce the strict letter of the treaties against foreigners, they must be prepared to find that foreigners will adopt the same policy towards them, in which event the programme of Messrs. Abei Hankon, Oi Kentaro, and their followers might prove more injurious to the country originating it than to the countries against which it is directed.

ARREST OF MR. HIRANUMA SENZO.

THE well known Yokohama merchant, and still better known Yokohama usurer, Mr Hiranuma Senzo, has been arrested and thrown into prison on a charge of forging documents. The offence, we learn from the News Agency, was committed in connection with the Soma affair. When Nishigori, the original complainant in that case, was imprisoned, Mr. Hiranuma had some transactions with Judge Yamaguchi, and was arrested in their sequel. A great many people will rejoice over the fate that has overtaken this singular man, whose ruling passion was said to have been the destruction of the Japanese nobility.

HABUTAYE MERCHANTS AND THE ABOLITION OF EXPORT DUTIES.

WE learn from the *Jiyu* that much dissatisfaction is felt among the silk manufacturers of Fukui and Joshin, as well as among Yokohama export merchants, at the proposed total abolition of export duties, a measure which will, as they maintain, almost ruin some of the silk manufacturing industries of the country. At present, under the McKinley Tariff, no duty is laid upon raw silk imported into the United States, whilst a very heavy duty is laid upon the manufactured article. If the Japanese export duty be removed, the American silk manufacturers will reap the advantage. They will get their raw silk cheaper, and be consequently better able to undersell the Japanese manufacturers.

AN ECCENTRIC COLONIST.

THE *Yomiuri* tells us of a Mr. Wada Heibachi, of Tokushima-ken, who is likely to have a very poor time of it this winter. He started last summer with the intention of settling in Hokkaido, but on arriving at Hakodate persuaded the Captain of H.I.J.M.S. *Iwaki*, to take him on a surveying expedition to the Kuriles, and to leave him on an uninhabited island quite to the north of the Kuriles. Here he determined to settle, in spite of all expostulations. As he had only a few thin clothes and three sacks of cleaned rice, it is feared that he will fare very badly, in spite of his intention of subsisting mainly on seaweed and fish. The man-of-war's men built him a small hut before they left him for his winter's adventure.

THE WOOSUNG BAR.

THE *Tsukushi Maru*, outward bound, grounded on the Inner Bar at Woosung at about 5 a.m. on the 11th inst., and the *Tomsui* coming in slowly also took the Bar, but floated some time before noon. The *Tsukushi* was still ashore at 3 p.m. and was then broadside on the spit where the strong flood tide had swept her. She floated the next afternoon after a part of her cargo had been discharged, being assisted off by a tug. It was anticipated that she would reload her cargo and proceed at midnight.

FOOTBALL ON CHRISTMAS-DAY.

THERE will be a football match on Christmas-day, commencing at 3.30 sharp. Members desiring to take part are requested to communicate with Mr. Lias, No 71. The teams will be published this evening, but sufficient players have already notified their desire to take part in the game to ensure an excellent match. Tea and cake will be provided for the ladies.

SEAMEN'S CHRISTMAS DINNER.

WE are requested to say that the Annual Christmas Dinner to the seamen in port will be given on Tuesday, the 26th inst., and the Christmas ship entertainment on Saturday, the 30th inst., at the Seamen's Free Reading Rooms, No. 82, Settlement. All who may wish to assist by contributing to the entertainment fund are requested to communicate with the Seamen's Chaplain, at the Chaplaincy, No. 82-B.

STEAMSHIP ACCIDENT.

AN Osaka telegram which has reached the *Jiji Shimpo* states that the steamer *Tokwia Maru* went ashore off Kajima, in Genkai-nada, on the 17th inst. at 6 p.m. She was severely damaged, and the greater portion of her cargo was injured by water. The message further says that the *Urato Maru* sustained an accident to her engines while proceeding through Suo-nada.

A JAPANESE SCHOOL IN ITALY.

THE *Yomiuri Shimbun* says that a new school for the study of the Japanese language has been established in Venice, the building chosen for the purpose being in the vicinity of the Japanese Consulate. The name of the chief instructor is also given by our contemporary. In its Romanized form it reads like Gacinoni.

REVIVAL OF THE "CHOYA SHIMBUN."

MR. KAWAMURA JUN, former editor of the *Choya Shimbun*, which journal, as our readers doubtless remember, was discontinued some months ago, has now made arrangements to start another political journal under the title of *Shin-Choya Shimbun*, or the "new *Choya Shimbun*." We have no information as to the policy of the projected journal.

CHRISTMAS.

WE wish our readers the compliments of the season, and trust that next Christmas may see realized all the hopes remaining unsatisfied from the year now approaching its close.

Digitized by Google
UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

perly revised, it is absolutely necessary for the attainment of our object to put a stop to the various practices opposed to the treaties now in force.

It is in some respects pardonable, though not justifiable, for concubines, *banto*, and grooms in the employment of foreigners to suffer their names to be registered as nominal owners of lands and houses belonging to their masters. The matter assumes a different aspect in the case of respectable merchants and Government officials, who, it is reported, assist in the transfer of real property to foreigners or even consent to lend their names to foreigners for the performance of illegal acts. If such be really the case, it is a sincerely regrettable fact, for it proves that not only the ignorant people but officials and respectable merchants are now ready to sell their country in consideration of some pecuniary profit. The Government may probably plead that it is not responsible for the acts of the individual members of the community. But when men of this description continue to increase in number, where does the Government intend to lay the blame? If facts were closely investigated, it might possibly be easy to show that the evil is already in active operation.

TRADE IN THE INTERIOR.

By no stipulations in the existing Treaties are aliens allowed to engage in business in the interior. They may enter into contracts with people in the interior for commercial purposes; but in no case are they warranted in forming partnerships with our people in the interior and carrying on manufactures or business there. Through the neglect of the Government to rigidly enforce the Treaties, what was as first a small evil has gradually grown in dimensions, and now foreigners openly conduct business operations in the interior without exciting either the wonder or censure of the general public. Not only vulgar and shameless people but even persons of social standing, who usually go by the name of *shin-sho* (gentlemen merchants), are not ashamed to act as the tools of foreigners, and by fraudulent and unscrupulous means evade the laws of their country. So prevalent, indeed, has the evil become that men not only do not reproach themselves for violating the laws of their country, but are even shameless enough to ridicule as conservative and bigoted persons who know how to respect law and make distinctions between things domestic and things foreign. Such vile conduct is detested by every good and true subject of the Emperor; such conduct is only possible for men who set personal gain above the honour and reputation of their country. The evil no doubt is not of recent origin, but it must be pronounced the result of neglect of duty on the part of the Government. It is reported that in various towns of Kwan-to, Kwan sai, Chugoku, and Ou, stores have of late been opened for the sale of various foreign goods, such as toilet articles, iron ware, implements, petroleum, and so forth, by men formerly known to be entirely destitute of capital. Some of them men may have borrowed money from foreigners, but the majority are said to do business openly as the agents of foreign residents. Such a practice does not appear to be attended with any direct disadvantage, but it is none the less opposed to the enforcement of the treaties. The object of establishing stores in various centres of business in the interior under ambiguous names, is to use them, on the one hand, as the means of selling foreign goods in the interior and, on the other, as a means of buying Japanese manufactures and products. The existence of such stores, moreover, enables foreigners, whenever they think it desirable, to bring about changes in the market price of things to the great disadvantage of the Japanese merchants in the interior.

In Tokyo, foreigners recently competed with Japanese in offering tenders for supplying iron pipes for the Water works. There are also foreigners in the capital who openly possess business places outside the limits of the settlement. As to the establishment of agencies by foreigners for the purpose of making purchases, they are found mostly in localities, where silk and silk goods are produced, such, for instance, as the Provinces of Echizen, Owari, Shinano, Kozuke, and Iwashiro. Of the firms and merchants engaged in business in the interior, the most conspicuous are A. S. Rosenthal and Co., E. H. Tuska, and R. D. Robison.

As to the encroachment of foreigners in the field of manufactures, it is said that the Japan Brewery Company, No. 123, Bluff, Yokohama, is a branch of a large beer company with its head office at Hongkong. A well-known Japanese business man is on the Board of Directors of the above-mentioned company at Yokohama, while a certain newspaper in Tokyo presented a gold medal to the product of that Brewery. The company also obtained a medal at a National Exhibition. Besides the Brewery, mention may be made of the Yokohama Rigging Company, 161, Settlement; the Yokohama Engine and Iron Works, 159 Settlement; and the Yokohama Ice Works, 184, Bluff. Reference may also be made to Murata's watch factory, a soap factory at Kanagawa, a dye-house at Takashima-cho, soda works and a tea refinery in the Yokohama Settlements, Ikeda's Manganese mines in Tochigi and Gumma, Misawa's alcohol manufactory at Yokohama, and Hirama's spinning factory at Osaka. Examples of enterprises of these descriptions are in fact too numerous to be enumerated. Some years ago, the brewing of *saké* by foreigners was attempted at Nigata, Nagasaki, and Tokyo; and although the Government succeeded by a roundabout and troublesome process in stopping it, it must be noted, it was not attained by any exercise of the ordinary administrative authority of the Government. The Government might have thought that the general revision of treaties being possibly near at hand, it was better to deal leniently with these cases of the infraction of treaties. But it is in respect of such matters that the strict enforcement of treaties is of particular importance.

TAXATION.

There are no provisions in the treaties bearing upon the taxation of land leased to foreigners, but the matter is provided for in the agreements entered into between the Japanese Authorities and the foreign Consuls, and though the rates and method of taxation are in some respects open to criticism, the system cannot be changed. Apart from an arrangement with regard to land tax, there is no express provision in the treaties or in subsequent agreements tending to exempt foreigners from general taxation. Consequently, whether living within or without the settlements, foreigners ought to be subject, equally with Japanese subjects, to national and local taxation. Should any aliens fail to pay taxes, their property may justly be seized and the proceeds of its sale may be applied for the purpose, in accordance with the Law for Dealing with Failures in the Payment of Taxes.

* * * * * * * *

Let us now mention some well-known historical facts connected with the subject under consideration. In the 8th month of the 1st year of *Meiji*, Ito Shunsuke, Governor of Hyogo (present Minister President, Count Ito Hirobumi), by a memorandum signed by him conjointly with the Consuls of the United States and Holland, agreed to set apart a certain extent of land in Kobe outside the settlement for the mixed residence of both Japanese and foreigners. This was a singular measure and will be considered presently. Ito Shunsuke made a communication to the foreign Consuls that foreigners living within the above mentioned zone of mixed residence would be subject to taxation in the same manner as the Japanese. But instead of proceeding at once to the imposition of taxes upon foreigners, Ito took no steps in that direction until the 4th year of *Meiji*. In that year efforts were made to collect taxes from foreigners in the district in question, but these efforts met with opposition from the Ministers of England and other Treaty Powers. Since then repeated attempts were made, but they always proved unsuccessful on account of the stout objection of the Ministers. In 1885, the Governor of Hyogo applied to the Central Government for permission to levy local taxes and communal rates upon the foreigners in the district for mixed residence, but he was told that, as negotiations for the revision of the treaties were then going on, the matter should be let alone for the moment. In February or March, 1888, Count Okuma Shigenobu, Minister of State for Foreign Affairs, and Viscount Aoki Shuzo, Vice Minister of State for Foreign Affairs, entered into an agreement with reference to house taxes on the Bluff in Kobe with the Representatives of England, the United States of America, France, Russia, Germany, Italy, Austria, Holland, Denmark, Switzerland, Belgium, Spain, and Hawaii. The Government then instructed the Governor of Hyogo to levy house-taxes upon foreigners residing in the district in question, but with respect to failures to pay the tax, the Governor was ordered to bring the matter to the Consular Court, instead of dealing with such cases in accordance with the law of the land. The Governor of Osaka is said to have urged upon the Central Government the importance of imposing taxes, in the same manner as Japanese, upon those foreigners in the mixed quarters in Osaka, who are engaged in the sale of Japanese manufactures or in the making and sale of foreign clothes and trunks, and upon those engaged in the professions of hair-dressers, actors, wrestlers, and the like. The Government, however, is believed to have replied that, although it recognizes the right to impose such taxes, the present is not a proper time to assert that right.

Applications have also been made by the Governors of Nagasaki, Tokushima, Shizuoka, and Fukuoka for the imposition of local taxes upon foreigners, and the Government is reported to have at first given its approval. But with regard to the method of dealing with the cases of failures to pay those taxes, there arose two different opinions in the Government, one set of officials maintaining that, if there is a right to impose taxes upon foreigners, that right should be enforced under the laws of the country, while another class contended that by proceeding in that way, the Government would lay itself open to the charge that it thereby interfered with the property rights of foreigners and might thus bring upon it the protest of foreign Powers. In consequence of this diversity of opinion, the approval which had been given to the proposed measure is said to have been afterwards withdrawn by the Government in Tokyo.

Though a way has been opened for the imposition of taxes upon aliens living outside the limits of foreign settlements, no step has yet been taken to extend the operation to those residing with in these settlements; nothing has as yet been done to levy national taxes upon foreigners. In the question of stamp-duties on an American patent medicine, and also in that of the engagement of a certain Swiss in the tobacco trade without a license, the demands of the Japanese Government were with difficulty attained. But in dealing with questions of this kind, the Government is said to have seldom adopted a resolute and decisive attitude.

THE VISIT OF FOREIGN MEN-OF-WAR TO NON-TREATY PORTS

The existing treaties contain no stipulation bearing upon the visit of foreign war-vessels to ports not opened for foreign intercourse. But foreign war-vessels are now freely entering all ports and harbours in any part of the country. Especially the recent entrance of English men-of war into the port of Muroran was virtually an act of defiance to the national rights of the country. This state of things is no doubt the result of erroneous precedents in the past left unconnected under the fatal policy of systematically neglecting the enforcement of treaty stipulations. To state some historical facts:—In the 4th month of the 3rd year of *Meiji*, a French man-of-war, desiring to visit Saga in Hizen, gave notice to that effect to the Governor of Nagasaki, through the French Consul at that place. The Governor replied that no foreign war-vessel was permitted to enter a non treaty port without the special permission of the Government. The French Minister refused to recognize such right on the part of the Japanese Government, and after consulting with the officer in command of the war-vessel in question, caused it to proceed to Saga. On arriving at that place, the French officer asked the local authorities for permission to go ashore, but that permission was refused. Thereupon the French Minister addressed a note to the Minister of Foreign Affairs, the late Sawa Nobuyoshi, protesting against the action of the local authorities of Saga, taking for his authority the Memorandum of the 2nd year of *Bunkyu*; to which the Minister of Foreign Affairs answered that, it being stated in the said Memorandum that without sufficient reason no foreign war-vessel should enter any of the non treaty ports, the Japanese Government had the right to decide whether the reason assigned in a given case is sufficient or otherwise, and that, consequently, no foreign war-vessel was allowed to enter any non-treaty port without the permission of the Japanese Government. The French Minister again wrote the Minister of Foreign Affairs, maintaining that the right to decide on the sufficiency of reason for the visit of foreign war-vessels to non-treaty ports resided entirely with the foreign Representative concerned, and that, it being stated in the Memorandum in question that foreign war vessels should be free to visit any of the ports in Japan, it was not necessary to obtain the permission of the Japanese Government. The Japanese Government is said to have made no reply to this second protest of the French Representative. The Memorandum alluded to is not found in the *Yoyaku Isan* ("Treaties and Conventions concluded between the Empire of Japan and Foreign Nations"), and it is doubtful whether the French Minister rightly quoted the text. In the 7th month of the 9th year of *Meiji*, a French man-of-war entered the port of Yamada, in the Prefecture of Iwate, and her officers went ashore and made an excursion as far as a village named Miyafuru. The Japanese Government at once protested to the French Minister against the breach of treaty committed by the French war-vessel and her officers, requesting him to prevent the ship in question from repeating similar actions. In reply to this, the French Minister maintained that French war-vessels were entitled to enter any non-treaty port without the permission of the Japanese

panies established by law shall not be required to insert the words 'Joint Stock' for purposes of registration"—would correct the defect.

After a brief discussion the Bill was passed through all its Readings at once.

Mr. Haseba Junko now asked permission to introduce, as a matter of urgency, a motion that, in view of the importance of the Questions addressed to the Government by Dr. Hatoyama with reference to the lawsuit arising out of the *Chishima-Ravenna* collision, the Ministers of State, from the Minister President downwards, should be invited to attend in their places and answer the Questions verbally.

The House agreed to change the Order of the Day so as to debate the motion at once.

Mr. Haseba desired to add that the Cabinet Ministers should be invited to attend within three days from that time.

The House voted the motion without debate.

Mr. Asaka Katsutaka, Chairman of the Special Committee, reported that three Bills relating to the amendment of the Registration Law had been before the Committee, and that they had taken the Asaka Bill as a basis, making certain additions and alterations as suggested by the other Bills.

Mr. Asakura opposed the Bill for the reasons often previously advanced, namely, that the transfer of the function of registration from the Courts of Law to the District Headmen, was a retrogressive measure.

The House, without further debate, voted to carry the Bill to a Second Reading.

Mr. Kato Masanosuke, Chairman of the Special Committee, reported in favour of the Bill for protecting the Hokkaido Aborigines, with several amendments.

After a brief debate the House voted against the Second Reading of the Bill.

At this point the Vice-President announced that he had been summoned to the Palace, and the House must either elect a temporary President or take a recess. The latter course was pursued, and at a few minutes past 4 o'clock, the House having re-assembled, the Vice-President, Mr. Kusumoto Masataka, announced that he had been nominated President by the Emperor. He expressed his thanks to the House for the great honour it had done him in electing him, and begged that his want of proficiency would be overlooked. Mr. Sato Shozo, on behalf of the House, heartily congratulated the President, and said that the members were much gratified by the Sovereign's prompt nomination of the man upon whom their choice had fallen.

On the motion of Mr. Konishi, it was decided to suspend further proceedings until a Vice-President had been elected, and the House rose at 4.40 p.m.

SATURDAY, DECEMBER 16TH.

HOUSE OF PEERS.

The House met at 10.30 a.m., the Order of the Day being:—

1 and 2.—Applications for leave of absence.
3.—First Reading of the Bill sent up from the Lower House for abolishing the Export Duty on Cotton Yarns.
4.—Appointment of a Special Committee to report upon the same.
5.—First Reading of a Bill introduced by Mr. Murata Tamotsu with respect to the Fishing Industry.
6.—First Reading of a Bill introduced by Baron Watanabe Kyoshi on the subject of the City Government System.
7.—Petition relating to the Opening of a Port in Chishima during the Winter, and the laying of a Submarine Cable.
8.—Petition relating to the Amendment of the Pawnbrokers Regulations.
9.—Petition relating to Shonai River.
10.—Petition relating to a Change of Districts.

Mr. Watanabe, Minister of State for Finance, briefly stated that the object of the Bill for removing the Export Duty on Cotton Yarns was to encourage Japan's foreign trade, and asked the House to pass the Bill.

Baron Ozawa asked what amount of duty was involved.

Mr. Kato, Government Delegate, replied that the figure was small: 224 *yen* in 1890, 203 *yen* in 1891, 283 *yen* in 1892, and 2,127 *yen* for the first 10 months of the current year.

The Bill was entrusted to a Special Committee nominated by the President.

Mr. Watanabe Jinkichi asked to have the Order of the Day changed for the purpose of immediately debating the Bill sent up from the Lower House for amending the Second Clause of the Eighth Article of the Commercial Code. The House knew what inconvenience had already been caused by the ambiguous wording of this clause. It seemed to require that certain kinds of trading institutions, as specified, should include the words "Joint Stock Company" in their business appellation, and should register that appellation. The Bank of Japan had applied for registration in Tokyo, and had been refused on the ground that the words prescribed were not included in its appellation, whereas the Specie Bank and others had obtained registration in Yokohama under precisely similar circumstances and without including any such words. The House of course understood that to make a change in the appellation of a Bank, especially a note-issuing Bank, involved serious operations in correcting all the Bank's paper. It was obviously desirable to prevent anything of the kind, and expedition had to be used inasmuch as the Law allowed only six months for registration, and that period would elapse at the close of the current year.

The House agreed to change the Order, and the Bill was entrusted to a Special Committee with directions to report on it by the 19th inst.

Mr. Murata Tamotsu, introducing the Fisheries Bill, explained that owing to the want of proper control, this most important branch of Japanese industry was gradually declining. He gave figures to show how the export of the principal marine products was falling off, for example, the export of dried *awabi* had declined from 1,550,000 *yen* in 1890 to 1,100,000 in 1892, and that of *bêche de mer* from 890,000 *yen* in 1890 to 860,000 *yen* in 1892. The chief cause of the decline was that fishing was carried on without the smallest discrimination, young, undeveloped fish being taken just as freely as the old and full grown. (The speaker here produced some dried *awabi* from a parcel, and showed that they had been only a few weeks old when taken.) It was scarcely necessary to point out that such recklessness was suicidal, for not only were the various classes of fish exterminated, but the immense enhancement of value secured by merely letting them remain for a year or two to develop was lost to the country. Nearly all other kinds of industry had laws to protect them, but fishing, which meant so much to Japan, had remained entirely neglected by legislators.

Several questions having been asked, the Bill was finally entrusted to a Special Committee of 9 chosen by the Sections.

Mr. Yasuba Howa explained the Bill relating to City Government, which was a measure intended to be carried into effect after the abolition of the present special system for the Three Great Cities. A Bill sent up from the House of Representatives and now awaiting discussion by the Peers, provided simply for rescinding the provision of law that exempted Tokyo, Osaka, and Kyoto from the general scheme of municipal government. The Bill now presented was intended to provide a proper system after that rescission had taken place.

Several lengthy questions having been asked and answered, the Bill was entrusted to a Special Committee elected by the Sections.

The four Petitions standing next on the Order, having been recommended by Prince Tokugawa, Chairman of the Petitions Committee, were adopted for presentation to the Government, and the House rose at 2.35 p.m.

HOUSE OF REPRESENTATIVES.

The House met at 1.20 p.m., the Order of the Day being:—

1.—Election of a Vice-President.

The President announced the receipt of (1) a Bill for abolishing the Export Duty on Mining Products; and (2) an Address to the Throne with reference to the Subscription of 10 per cent. of their Salaries made by Officials for purposes of Military Defence.

The election of the Vice-President was then proceeded with, the result of the first ballot being:

	Votes
Mr. Abei Hankon	136
Mr. Kataoka Kenkichi	96
Mr. Suzuki Shoji	71
Mr. Kayetsu Ujifusa	66
Mr. Ando Kuka	64
Mr. Tsuda Mamichi	62
Mr. Kono Hironaka	42
Mr. Haseba Junko	35
Mr. Kawashima Jun	34
Mr. Shimada Saburo	27
Mr. Sasa Tomofusa	17
&c.	&c.

A second ballot was then taken to determine two other names besides that of Mr Abei, the result being:—

Mr. Kataoka Kenkichi	107
Mr. Ando Kuka	103
Mr. Suzuki Shoji	61
Mr. Kayetsu Ujifusa	26

The names of Messrs. Abei, Kataoka, and Ando were therefore submitted to the Emperor for His Majesty's nomination.

The President announced the receipt of a reply from the Government to the motion passed the preceding day to the effect that the House commissioned the President to invite the presence of all the Cabinet Ministers within three days for the purpose of answering the Questions propounded by Dr. Hatoyoma. The reply was that as the Ministers of State were entitled by law to attend in the House whenever they pleased, it was unnecessary for the House to take the trouble of inviting them on any particular occasion.—(Loud laughter throughout the House.)

The House rose at 3.08 p.m.

MONDAY, DECEMBER 18TH.

HOUSE OF PEERS.

The House met at 10.40 a.m., the Order of the Day being:—

1.—Bill for amending the Tax-collecting Regulations, sent up from the Lower House.
2.—Appointment of a Special Committee to report upon the same.
3.—Bill relating to the capital of the Tokyo Military Arsenal.
4.—Appointment of a Special Committee to report upon the same.
5.—Report of the Special Committee on the Bill for making an addition to the Commercial Code.

After an explanation from Mr. Tajiri, Vice-Minister of State for Finance, the Bill for amending the Tax-collecting Regulations was entrusted to a Special Committee nominated by the President, as was also the Bill relating to the capital of the Tokyo Military Arsenal.

Count Ohara Shigetomo, Chairman of the Special Committee; reported in favour of the Bill for making an addition to the Commercial Code, as sent up from the Lower House, with, however, a slight verbal amendment.

After some discussion, the amendment proposed by the Committee was rejected, and the Bill was carried through its Second and Third Readings as sent up from the Lower House.

The House rose at 12, noon.

HOUSE OF REPRESENTATIVES.

The House met at 1.50 p.m., the Order of the Day being:—

1.—Report of the Special Committee on the Bill for amending Imperial Ordinance No. 243 of the 22nd year of *Meiji*.
2.—Report of the Special Committee on the Bill for amending Law No. 4 of the 23rd year of *Meiji*.
3.—Report of the Special Committee on the Bill for amending the Treasury Notes Regulations.
4.—Report of the Special Committee on the Bill for amending the Banking Regulations.
5.—Report of the Special Committee on the Bill for amending the Bailiffs' Regulations.
6.—First Reading of the Bill for adding to the Law of Special Ports of Exports, introduced by Major-General Aoyama.
7.—Representation relating to Moors and Forests, introduced by Mr. Imai Isoichiro.
8.—Bill relating to the Preservation of Forests, introduced by Mr. Nakamura Yaroku.
9.—Law relating to a Special Financial System for the Capital of Forest Lands, introduced by Mr. Nakamura Yaroku.
10.—Petitions relating to the Establishment of an Agricultural Experiment Office, and the Control of Practitioners of Acupuncture.

The President announced the receipt of Replies from (1) the Minister of State for Home Affairs to Mr. Kato's Questions about the Control of Rivers, and (2) of the Minister of State for Communications to the Question by Mr. Otsubo Rishin with reference to a steamer service to the Goto Islands. The former was to the effect that the Government was fully alive to the importance of undertaking thorough

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

works for the control of rivers, but that the nature of the investigations necessary before forming any comprehensive plan was such that the Government did not yet find itself in a position to make any definite statement of policy. The second reply was that the company whose steamers had been in the habit of calling at the Goto Islands had found it more expedient to increase the number of their voyages elsewhere, and consequently had ceased to make their boats touch at the Gotos, but inasmuch as the subsidy granted to the Company did not depend upon the particular voyages made by their boats, it had not been changed.

The President also announced the receipt of a Government Bill for including Mororan in the Special Ports of Export; also a Bill for allowing vessels to enter, load, and discharge cargo at Nahako in the Riukiu Islands; also a Bill for allowing ships engaged in trade with Saghalien to enter, load, and discharge cargo at Otaru; also, a Question from Mr. Shimizu Bunjiro with reference to Exchanges; also, an Address to the Throne introduced by Mr. Suzuki Manjuro on the subject of Lieut.-General Baron Ozawa's removal from the service; also, a Bill from Mr. Suzuki Manjuro relating to Home-brewed *Saké*.

Mr. Shimizu Bunjiro, explaining his Question with reference to the policy pursued by the Government in granting licenses to Exchanges, made a long, rambling speech, in which he charged the Ministers and Vice-Ministers of State, especially Count Goto and Mr. Saito Shuichiro, with receiving entertainments and presents from persons desiring to establish exchanges; claimed that even the services of the wives of Exchange-promoters were made use of to cajole the wives of officials; and in offensive terms called upon the Ministers of State not to hoodwink the House, but to come forward personally and give a frank explanation of their policy. During the course of his speech he was frequently interrupted by bursts of laughter from the House.

Mr. Ando Kiuka, on behalf of the Special Committee, reported in favour of the first two Bills on the Order of the Day, the object of both being to diminish the burden of tax-payers by a slight but important change in the places where taxes are payable, and by authorizing banks to become direct recipients of payments on account of taxes.

The two Bills were carried through their Second and Third Readings.

Mr. Sato Shozo, Chairman of the Special Committee, reported in favour of the Bill for amending the Treasury Notes Regulations, and it was carried through its Second and Third Readings.

Mr. Kozaka Zennosuke, Chairman of the Special Committee, reported in favour of the Bill for amending the Banking Regulations. The object of the Bill was to rescind the clause forbidding Banks to lend to one person or to one company a sum greater than one-tenth of their capital, and to change the banking hours so that they should be from 9 a.m. to 3 p.m. instead of from 10 a.m to 4 p.m., as at present, with the proviso that the time might be increased according to the demands of business

After a brief discussion, the House voted to carry the Bill to a Second Reading, and passed it through the Second and Third Readings.

Mr. Kawashima Jun asked leave to introduce an Urgency Motion, in order that the House might pass a resolution calling upon the Government to adopt without further delay some decisive action with reference to the Address to the Throne on the subject of Official Discipline.

The House granted leave to change the Order of the Day, and Mr. Kawashima explained that the Address to the Throne had been passed on the 4th instant, yet the Government had taken no notice of it up to the present. If the charges preferred against the Cabinet Ministers admitted of rebuttal, they ought to be at once rebutted. If not, the Government should be under no doubt how to proceed. At all events, unless proper notice were taken of the matter, the House would be compelled to decline to pass the Budget or any Government Bills. He therefore moved a resolution that: "Whereas, on the 4th instant, the House had passed an Address to the Throne declaring that the Government's prestige had fallen to the ground, that it had become necessary to trouble the Imperia. hearing, and that the hearts of the people had become alienated, nevertheless the Government up to the present time had adopted no decisive course with regard to the Address, therefore now this House declares that some course should be adopted without delay."

Mr. Hashimoto Kiutaro supported the motion. He urged that an Address to the Throne was an affair of too great importance to be treated with neglect such as the Government had shown, and that the Cabinet Ministers, being personally charged with improper conduct, should not lose a day in coming forward either to defend themselves or to accept the responsibility.

The House voted the Resolution without debate.

Mr. Kono Hironaka asked to have the Order of the Day changed for the purpose of introducing an urgency motion to the effect that the House, in view of the Resolution just passed, should suspend its sittings for a week.

The House, by a vote of 131 to 119, refused permission to introduce the motion as a matter of urgency.

His Excellency Count Ito, Minister President of State, then addressed the House as follows:—

GENTLEMEN,—On the 4th instant, you introduced an urgency motion and passed an Address to the Throne on the subject of Official Discipline. You did not take the trouble to put any question to us on the subject. But the event is already of the past. There is no use now to make any complaint on that score. As matters stand, you have approached the Throne on the subject of Official Discipline, declaring that the Government's dignity has been impaired and that the Cabinet's credit has been lowered. The introducer of the motion further stated that the responsibility must be borne by the Minister President of State. I do not think it necessary to discuss the question of responsibility here. Now, while your views are actually before His Imperial Majesty, you have again passed a resolution to day, calling upon the Ministers to take some prompt step in connection with the Address. Let me inform you that on the 5th instant, that is to say, the day following that on which you voted the Address to the Throne, I waited on His Majesty and presented an Address which, with His Majesty's permission, I now propose to read to you.—(Cries of "Hear, hear!) The Premier then read the following document:—

"May it please Your August Majesty:—The undersigned, Your Majesty's humble servant, respectfully submits the present Address to Your Majesty. The undersigned, incompetent as he is, by Your Majesty's gracious favour, is charged with the grave responsibility of presiding over the Cabinet. It is his earnest wish by day and by night, to be worthy, in some small degree, of Your Majesty's unbounded favour by putting forth his utmost strength. The House of Representatives has presented to Your Majesty an Address relating to the relaxation of Official Discipline. The undersigned is exceedingly pained to find that, through his incapacity, Your Majesty's attention has been disturbed in respect of matters which he is charged with the duty of controlling. The undersigned herewith respectfully asks to take the responsibility upon himself and humbly prays for Your Majesty's decision.

(Signed) ITO HIROBUMI,
Minister President of State."

Do you still say that no step has been taken on the matter by the Cabinet? I must state to you distinctly that, since I am charged with the grave responsibilities of the State by the pleasure of His Majesty the Emperor, I cannot hastily desert my post in obedience to your resolution. I have simply to act in accordance with the Imperial decision, which has not yet been given, and for which I am respectfully waiting.

Mr. Suzuki Manjuro wished to ask the Minister of State for Education about what had passed at the Budget Committee's session when Dr. Hasegawa had spoken of the Department of Education as useless and mischievous, but the President ruled him out of order,

Mr. Kawashima Jun declared that the Resolution passed by the House had not been in any sense intended as pressing for a reply from the Throne, but had merely called on the Government to act constitutionally.

The Order of the Day was then resumed, and the Bill for amending the Bailiffs' Regulations was passed through its Second and Third Readings.

Major-General Aoyama, introducing the Bill for adding Mororan to the Special Ports of Export, explained that it was the only good port on the southern coast of Yezo, and that the railways projected for the first Construction Period would make it the converging point of a large carrying trade.

After a few questions and some discussion, in the course of which it was objected that Mororan being a military depôt, its conversion into a trading port of export by the effect of law would be a violation of the Imperial Prerogative, the closure was put and carried, and the Bill was carried to a Second Reading, but the House declined to proceed with the Reading at once.

The Representation urging the Government to take thorough steps for the protection of forests was entrusted to a Special Committee of 9 nominated by the President, and the same course was pursued with respect to Mr. Nakamura Yaroku's two Bills with reference to forests.

The two Petitions standing last on the Order were then adopted for presentation to the Government, and the House rose at 5.15 p.m.

TUESDAY, DECEMBER 19TH.

HOUSE OF PEERS.

The House did not meet, the Committees alone assembling.

HOUSE OF REPRESENTATIVES.

The House met at 1.15 p.m., the Order of the Day being:—

1.—Supplementary Budget for the 26th year of *Meiji*.
2.—Report of the Special Committee on the Bill for granting aid from the Treasury for purposes of Technical Education.
3.—First Reading of a Bill sent down from the Peers with reference to the Period of Probation for Judicial Officials.
4.—Appointment of a Special Committee to report upon the same.
5.—First Reading of a Government Bill for promoting Navigation.
6.—Appointment of a Special Committee to report upon the same.
7.—First Reading of a Project of Game Law, sent down from the Peers.
8.—Appointment of a Special Committee to report upon the same.
9.—First Reading of a Bill introduced by Mr. Kozaka Zennosuke for amending the Savings Bank Regulations.
10.—Second Reading of the Bill for amending the Law of Registration.
11.—Report of the Special Committee on the Newspaper Bill.

The President announced the receipt of (1) a Reply from the Government to Mr. Ugai Ikujiro's Question on the subject of the Sodo Sect; (2) a Question from Messrs. Suzuki Shoji, Misaki Kamenosuke and others on the subject of Treaty Revision; and (3) a Bill introduced by Dr. Hatoyama Kazuo for abolishing the Tax on Confectionery.

Mr. Suzuki Shoji, explaining the Question on Treaty Revision, referred to the Questions addressed to the Government in previous sessions and the Replies elicited. In each case assurances had been given that every possible effort was being made to solve the great problem, but as yet no solution seemed in sight. It became, therefore, most desirable to have a clear *exposé* of the Government's policy and of the degree of progress hitherto made towards its realization.

Mr. Ishida Kannosuke, Chairman of the Budget Committee, reported in favour of the Supplementary Budget. The sum involved was 843,721.437 *yen*, and the Government had been compelled to ask for it in consequence of the extraordinary fall that had taken place in the gold price of silver.

Mr. Nakano Buyei moved to defer the discussion of this Budget for two days, as the amount in question was large, and many items of expenditure were concerned.

The Minister of State for Finance objected to any postponement. The time for making the payments referred to in the Supplementary

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPA GN

Budget was close at hand, and the Government had been obliged to introduce the Bill as a matter of urgency. He trusted that the House would discuss it at once.

The House rejected Mr. Nakano's motion for postponement, and passed the Supplementary Budget item by item without discussion.

Mr. Murayama Ryohei, on behalf of the Special Committee, reported in favour of the Bill for granting Aid from the Treasury for purposes of Technical Education, a few trifling amendments being, however, suggested by the Committee. In reply to a question, he said that the Committee had debated the fact of aid being limited to public schools and withheld from private, but the Government Delegate had informed them that private schools specially sanctioned would also be eligible for aid.

Mr. Amakasu Fumiye moved that as the funds to meet the expenditures required for the purposes of this Bill must be considered in connection with the Budget, further discussion of the Bill be deferred until the House had debated the Budget.

The President, in putting the motion to the House, elicited a universal burst of laughter by formulating, not Mr. Amakasu's words but his motive, namely, "that the discussion of the Bill be deferred until the question of Re-assessment of the Taxable Value of Land had been disposed of."

The House, by a vote of 99 to 96, adopted the motion.

The Minister of State for Justice explained the Bill relating to the Period of Probation of Judicial Officials, giving the same reasons as those already adduced by him in the Upper House. After a few questions the Bill was entrusted to a Special Committee nominated by the President.

Mr. Suzuki, Government Delegate, introducing the Bill for promoting navigation, said that although the navigation along the coasts had received considerable development, that to foreign countries was still in its infancy, and seemed unlikely to grow unless some measures such as the Bill contemplated were taken.

The Bill was entrusted to a Special Committee nominated by the President, and the same course was adopted with regard to the Game Law Bill.

Mr. Abei Hankon sought the permission of the House to change the Order of the Day for the purpose of introducing a Representation to the Government with reference to the Strict Enforcement of the Treaties.

The House consented, and Mr. Abei was proceeding to explain the Representation when the President announced the receipt of an Imperial Message ordering the Prorogation of the Imperial Diet for a period of ten days, namely, from the 19th to the 28th instant.

The House rose at 3 p.m.

CORRESPONDENCE.

[Our readers must distinctly understand that we are in no sense responsible for the sentiments or opinions of our correspondents, for the accuracy of their assertions, or for the deductions they may choose to draw therefrom.]

A CORRECTION.

To the Editor of the "Japan Mail."

Sir,—Allow me to call your attention to a slight error in the report given in yesterday's *Mail* (13th inst.) of the proceedings in the House of Representatives on the previous day.

Mr. Tanaka Shozo is reported to have interrupted Mr. Tatekawa Umpei's speech with the words, "Hold your tongue, No. 300." Now, when I read this, I naturally imagined that it was in accordance with the usual procedure of the Japanese Parliament, in which the members are addressed by numbers chosen by lot at the commencement of the first session, and not styled, as with us, "honourable members" for the places they represent. Commenting this morning upon this incident to some Japanese friends, I ventured to suggest the original of the remark, and was rather surprised to find my rendering, "*Sambyaku-ban damare*," was as completely wrong as it could be. I then learnt that what Mr. Tanaka actually said was, "*Sambyaku daigen, nani wo iu ka?*" By these words a studied insult was conveyed. For *daigennin* is a word for lawyer, now as a rule replaced by the word *bengoshi*. With *sambyaku* the word *mon* is understood, *i.e.* the tenth part of a *sen*. Three hundred *mon* equal three *sen* at the present day, and to call a lawyer in good practice a "pettifogging attorney" whose advice is not worth more than three *sen* a day is as insulting to the Japanese ear as to call a consulting physician a *yabu-isha*.

I am, Sir, yours, &c., Q.E.D.

December 14th, 1893

[We are much obliged for the correction. Our stenographic report gave only the words "*Sambyaku damare*." Evidently "Q. E. D.'s" version is correct.—Ed. *J.M.*]

INTOLERANCE AND BAD TASTE.

To the Editor of the "Japan Mail."

Sir,—In reading the reports of the Parliament of Religions, two notes of discord in the general harmony struck my attention.

The first was the advocacy of polygomy by Muhammad Webb, ex-U.S. Consul, who has embraced Islam, embracing at the same time probably a plurality of wives. He was hissed. The other was a reiterated charge of "falsehood" against Christianity, by Rev. H. Doki, a member of the Buddhist delegation from Japan. After enumerating the benefits conferred on Japan by Buddhism, he went on to say:—"It is a pity to see some *false* and obstinate religionists trying to introduce some *false* religion into our country. We Buddhists welcome any who are earnest after the *truth*, but can we keep silent to see the *falsehood* disturbing the peace and nationality of our country?"—(*Japan Weekly Mail*, November 18th.)

He was not hissed; but the use of such language before an audience consisting chiefly of Christians was, to say the least, hardly in keeping with the good manners characteristic of the Japanese people. While admitting the claim put forward by the speaker that Buddhism has conferred many benefits on Japan, the Christians who listened to him are not prepared to acknowledge that Buddhism possesses a monopoly of "*truth*." In their estimation one of its greatest merits is that of having prepared the way for a religion of greater spiritual power—one whose renewing energy Japan must feel before she attains the last stage in her upward progress.

W. A. P. M.

Peking, December 3rd, 1893.

JAPANESE CHARACTERISTICS.

To the Editor of the "Japan Mail."

Sir,—I was once told by a Japanese that the Japanese people, even the educated and intelligent classes, had no true appreciation of the meaning of law and legal rights. "They favour law," he said, "so long as it favours their side; but they override it, as soon as it stands in their way." I have also heard it stated (this time by a foreigner) that the Japanese do not know really how to trust each other, that their suspicions are awake, that they do not believe each other. These generalizations I have always treated, hitherto—as so many other generalizations concerning the Japanese—as half-truths, not any more applicable to them than to any other people.

But the recent developments in the Lower House of Parliament have been of a character to undermine even the staunchest faith. Hoshi Toru has been a man known to political life for many years. His career has been a long one, filled with distinguished services to the Liberal cause in Japan. His ability and his devotion cannot be denied even by his enemies. Nor can they deny that he filled the chair of President most admirably, always impartial, dignified and resolute. Even the bitterest enemies of parliamentary government in Japan usually became silent when Hoshi Toru's name was mentioned. It was felt that he adorned his position, and would have adorned a similar position in any civilized country.

A year or more ago this man was admired by all the Liberal parties. All the newspapers thought the choice of the Liberals for President of the Lower House was irreproachable. There was practically but one voice. But for an action, or actions, that so far as I can understand (and also so far as a few independent and capable Japanese understood) would be held innocent in any Western country—on a trumped up charge—Hoshi Toru is fairly hooted out of Parliament. He is treated like a criminal, and the vast majority seem to have taken a positive delight in adding a parting kick to this eminent man. The law is twisted to suit the tastes of a majority. Indeed, the original charge is wholly laid aside, and the only charge on which he is expelled is that he did, what he clearly had a right to do, viz., resumed his chair at the end of a week's suspension. This is the sense of law and sense of gratitude of the vast majority of the Lower House. I confess the whole proceeding is sufficient to stagger one's faith in the Japanese. "The Japanese wish to have all the advantages, but none of the disadvantages of laws," said my Japanese friend. Is not the treatment of Hoshi Toru an illustration of this? If law is worth anything it must be good at a crisis. All the Japanese members of parliament want is to override a law by a sufficient majority. All the need, to show a plentiful lack of gratitude to a distinguished man, is a trumped-up charge against him.

December 16th, 1893. T. F. L.

YOKOHAMA SAILING CLUB.

To the Editor of the "Japan Mail."

Sir,—It is to you we fly when we have a question which the proper parties ought to be able to answer and can't—or won't. The "proper person" in this case is the "Yokohama Sailing Club—and the "daily question" is why does not the Committee settle up with the Prize winners of last summer, or give them some reason for the peculiar state of affairs. Many of us have won prizes (?) and have purchased trophies and called them "Won by yacht 'So-so,' May, or June, or July, 1893;" and for these we have paid out of our own pockets in hopes that the Committee, as in olden times was always their custom, would send along the equivalent before very long. Not a single Club Prize has been allotted yet, and we certainly would like to know the reason why.

I am, yours truly, BREEZE.

Yokohama, December 23rd, 1893

THE JAPANESE EXHIBIT AT THE WORLD'S FAIR (No. V.)

(From our own Correspondent.)

FINE ARTS.

Chicago, November 6th.

To treat satisfactorily and justly the subject of Japanese Art at the World's Fair, would require several columns. Little, moreover, remains to be written on this topic for the readers of the *Mail*, whose editor, *facile princeps*, has already lengthily and critically discussed the subject. It is left to me, without much knowledge of æsthetics, merely to record the impressions made on this side of the Pacific by the numerous and excellent specimens of Japanese art on exhibition at the World's Fair.

The manifestations of the Japanese artistic instinct were by no means confined to the exhibits in the Art Galley. It may be true that the latter alone, from the strict and scientific standards of Japanese æstheticism, deserved to be classed under "fine arts." But the public in general, with perhaps less philosophy, but more feeling or sentiment, have found in all the Japanese exhibits evidences of taste and art. A writer in the *Nation* says of the exhibit in the Transportation Building:—"Even the Japanese show, by comparative illustrations of their ancient and modern work, that we may hope that the accuracy and strength of European and American engineering may yet be combined with the exquisite taste and finish of the Orient." The visitors to the World's Columbian Exposition have learned, what visitors and residents in Japan so quickly learn, that in everything Japanese everywhere "art reigns supreme." In the department of pure manufactures Japan has been accorded first place, and in that of artistic manufactures has been placed second, if to any country, only to Germany.

It is unnecessary, perhaps, to single out the most striking and attractive articles of the exhibit, almost every item of which elicited sincere and deserved encomiums. At the same time it was, of course, difficult for the uninitiated to comprehend the mysteries of Japanese art, as the following witnesseth:—"The Japanese and the Russian sections of the department of fine arts of the Exposition are now open to the public. Each is exceedingly interesting, and nothing could be much more striking than the contrast between the art of the Russian north and the Japanese south. While each is interesting, from them little can be learned which will serve to advance art knowledge. The latter especially belongs more to the realm of curios, one is prone to think, than to that of picture painting."

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

More appreciative, however, was the *Tribune* art critic in the following characterization.—"In the Oriental exhibits that wonderfully artistic nation, Japan, takes the lead, and its exhibits have been the centre of popular attraction, whether in carving, painting, embroideries that rival the finest effects of the brush, or in bronzes that challenge those of Russia for artistic skill. Had Japan sent only the twelve falcons its exhibit would have been one of the notable features of the gallery." To drop "from the sublime to the ridiculous," from the artistic to the practical, it may just be noted, that "Japan reports its greatest sales in porcelains and cloisonné. Boston has been the most liberal purchaser. Chicago has made a few judicious selections." I hope to be able later to state what disposal shall have been made of the most prominent articles.

"HOÔDEN."

The triune structure called *Hoôden* (Phœnix Hall) is Japan's permanent exhibit, and has won universal admiration; it is acknowledged to be one of the greatest "wonders" of the wonderful exposition. Its curious "architecture, decorations, furniture, and reliques have attracted much attention:" its corridors have been crowded with visitors eager to inspect the quaint and beautiful rooms with the various articles of exhibit.

"AS OTHERS SEE."

In order to obtain various expert criticisms upon the Japanese exhibit, I sent out twenty four circular letters to Exposition officials and Editors of Chicago dailies, and requested from each the favour of a brief opinion of the Japanese and their exhibits (in each department). Mayor Harrison, chosen also to represent *The Times*, could not have received my letter till the day before he was assassinated, and, as no response has come, evidently had laid it aside temporarily, now permanently. From eleven I have thus far had answers, and hope to receive from others later; but do not expect to get replies from all. Here follow the essential portions of each letter.—

FROM THE EDITOR OF THE "NEWS RECORD."

"The Japanese exhibit, as a whole, is magnificent, almost perfect in its way, and has won golden opinions. The *Hoôden* is especially marvelous. The Japanese have come nearer than any other foreign country, except Germany, to making a well-rounded display in every department of the Exposition.

"C. H. DENNIS."

FROM THE EDITOR OF THE "HERALD."

"I regret very much to say that I have had no opportunity to look over the Japanese exhibits at the World's Fair. My visits to the Fair have been made late in the afternoon or on Sundays, and at these times the Japanese exhibits have been closed. From all I have heard, the exhibit is one of the greatest at the Exposition; it has been instructive to America, and I believe that it will prove extremely valuable to Japan. The falcons exhibited by Mr. Tadamasa Hayashi in the Art Building I have seen a number of times, and each time my respect for the thoroughness and patience of the Japanese has increased.

"I wish that I could write something more comprehensive to you. I am in a measure responsible for any mention which the exhibits have received in the columns of the *Herald*, inasmuch as I have given instructions that considerable space should be devoted to the most interesting features of the Exposition, and one of the most important and instructive has been the exhibit from Japan.

"JAS. W. SCOTT."

FROM THE PRESIDENT OF THE WORLD'S CONGRESS AUXILIARY.

"As I have been able to pay only a few hurried visits to the wonderful Exposition, I am not qualified to speak of the Japanese exhibit, except to say, in a general way, that I think it very fine and highly creditable. I am, however, in a position to add, that the Japanese participation in the World's Congresses of 1893 was of such a character as to command the attention and respect, and in many cases the warm admiration, of those who had the pleasure of listening to the representatives of Japan, in the wonderful Parliament of Religions, the Real Estate Congress, and on other occasions.

"CHARLES C. BONNEY."

FROM THE DIRECTOR OF WORKS.

"I take pleasure in saying, that I heartily join in the general admiration of the Japanese exhibit at the World's Columbian Exposition. It is an appropriate representation of the trade, skill, and ability of the people of that wonderful nation.

"D. H. BURNHAM."

FROM THE CHIEF OF THE DEPARTMENT OF MINES AND MINING.

"Considering the size of the country, I can truthfully state that no other foreign exhibitor in the Mining Building has installed a more attractive and comprehensive mining and mineral exhibit than has Japan. The method of arranging the exhibit was exceedingly neat and appropriate; the minerals shown seem to be representative of Japan's resources in this line, and, from their very uniqueness, as in the case of the beautiful crystals of Stibnite, attract unusual attention. The maps exhibited by the Imperial Geological Survey in their completeness and accuracy were, indeed, a surprise to even scientific men of my acquaintance, who had not earned of the wonderful development science has reached in Japan. It is a most interesting and varied exhibit all through, and contributed very largely to the success which the mining exhibit met, from both a scientific and popular standpoint.

"F. J. V. SKIFF."

FROM THE CHIEF OF THE FISHERIES DEPARTMENT.

"The exhibit of fish and fisheries made by Japan is deserving of the highest commendation, not only for its diversity and magnitude, but because of the systematic and scientific arrangement of collections. I deem it but just to say, that in the preparation and installation of its fishery display, Japan is excelled by none, and equalled by few foreign countries. Indeed, in all my experience with fishery exhibits, extending over a period of thirteen years, I have never seen higher intelligence displayed in working out a systematic illustration of fishery industries.

"If I was less pressed with a multiplicity of demands upon my time, it would afford me great pleasure to speak in detail of the exhibit made by Japan in my Department. I hope to do justice, however, in my official report, and trust that the few words I have written may suffice for your present purpose, and that, at least, it will convey to you, and to readers of the journal for which you write some idea of the appreciation which I feel for the part taken by Japan in this Exposition, and for the interest and intelligence displayed by its people: and particularly for the officials who have been charged with the responsibility of collecting and installing exhibits sent here.

"J. W. COLLINS."

FROM THE CHIEF OF THE DEPARTMENT OF ELECTRICITY.

"It gives me much pleasure to answer your letter, as the Japanese exhibit has been one of the most attractive in our section of the Exposition, and I am glad of an opportunity to express my pleasure and to thank the people of Japan for the interest they have taken in our section. I desire also to congratulate the Japanese people in having overcome some of the gravest obstacles with which the electrical people of our country have had to contend. The exhibit of electrical earthquake instruments is a demonstration that the people of Japan are *en rapport* with the latest developments in electrical science made in our western country; and shows that to mechanical execution as well as in the mystery of electrical details the Japanese people are thoroughly abreast of the times. The finish of the Seismograph apparatus is exceedingly clever, and the principles involved are based upon approved science. Thanking the people of Japan again through you for their very clever and interesting exhibit, ...

"J. P. BARRETT."

FROM THE CHIEF OF THE LIBERAL ARTS DEPARTMENT.

"The exhibits made by the Japanese at this Exposition have been in all respects superb. Those in the department of liberal arts have been specially interesting. In all respects they have rivalled the exhibits of the foremost nations.

"SELIM H. PEABODY."

FROM THE CHIEF OF THE DEPARTMENT OF PUBLICITY AND PROMOTION.

"The exhibit of Japan at the World's Columbian Exposition is in very many respects not excelled by that of any other country. Its excellence, variety and comprehensiveness have been the subject of general remark by officials of the Exposition and all others qualified to express an opinion. Personally, I have been very much impressed by the thoroughness with which the Japanese Commissioners have done their work. An instance of this thoroughness which occurs to my mind was the preparation of matter for the Japanese section of the Official Catalogue, Japan was almost the only country supplying a complete and legible list of its exhibits in time for publication at the opening of the Exposition, and I had great pleasure in emphasizing this fact in my official report to the Director-General.

"M. P. HANDY"

FROM THE CHIEF OF THE TRANSPORTATION DEPARTMENT.

"I take great pleasure in stating that the Japanese exhibit in the Department of Transportation Exhibits consists of naval models and engineering models and drawings. It was carefully prepared, well installed, and attracted great attention from the public in general, as well as from those interested more particularly in these subjects.

"WILLARD A. SMITH."

FROM THE CHIEF OF THE DEPARTMENT OF MANUFACTURES.

"I have the highest appreciation of the gentlemen sent here to represent the Japanese Government; and Mr. Tejima, and his secretary, Mr. Yamabe, together with their associate commissioners, with whom I have had much official and social intercourse, will retain a permanent and pleasant place in my memory. Of the Japanese exhibit, I can only say that it compares favourably in every respect with the magnificent exhibits of the great European nations. The exhibit as a whole attracted its share of attention from visitors to the great Exposition; and it affords me great pleasure, in parting, to bear testimony to the high character, zeal, and energy of the distinguished representatives of Japan sent here, and the very high esteem in which they are held by all co-labourers with me in the great Department of Manufactures.

"JAMES ALLISON."

If these gentlemen have written their opinions with sincerity, and have not attempted to flatter, (and I have not the slightest occasion to suspect either insincerity or flattery), Japan has abundant reason to be proud of her exhibits, whether things or persons. And I may add, *without exaggeration*, that the Japanese at the Fair have been greatly admired for their urbanity and unvarying courtesy.

LETTER FROM CHICAGO.

(FROM OUR OWN CORRESPONDENT)

Chicago, November 25th.

The Christmas number of *Short Stories* contains a Japanese story by Mrs. McNeil Scott, "who lived in the Satsuma valley and is therefore well qualified to write of Japan."

Mr. N. W. McIvor, the new U.S. Consul-General at Kanagawa, is a comparatively young man. He was graduated in 1882 from Trinity College, Hartford, Conn.; then spent two years in the study of law at Harvard University; and since 1884 has been a practicing attorney at Cedar Rapids, Iowa.

During the World's Fair the truth of the following clipping was several times proven:—

Young Poodlekins. "Watch that Japanese fellow bow and smile when I speak to him. Hello, Jappy! How! There did you see him? Isn't a Jap a peculiar creature anyhow?"

Mrs Quick: "Yes, I have noticed it. One peculiarity about a Japanese is that he is always a gentleman."

It is reported from San Francisco, that the Chinese have been ordered by the Six Companies to register in compliance with the amended requirements of the Geary Law.

Hawaiian affairs continue to be the chief subject of public interest and discussion. Since my last letter two steamers have arrived from Honolulu, and bring news of no change in the state of affairs there up to the 16th instant. U.S. Minister Willis has been officially received, and has exchanged formal greetings with the authorities of the Provisional Government, but has not yet publicly accomplished anything in the way of the restoration of the Queen, if that be his purpose. All advices from Honolulu seem to agree that the Provisional Government will not give up without a struggle, and that Minister Willis, if he heeds American public opinion, will scarcely use force.

Commissioner Blount's report, at least in its essential portions, has been made public, and has naturally aroused a lively debate. Ex-Minister Stevens and Hawaiian Minister Thurston have both made public statements, denying the trustworthiness of his testimony and impeaching the truth of his statements and inferences. The whole matter just now seems to be a fearful muddle.

Blount's report contains one passage which is of direct interest in Japan. It says:—

On the evening of the day when the flag was hauled down, the American Minister called on me with a Walter G. Smith who, he said, desired to make an important communication to me, and whom he knew to be very intelligent and reliable. Thereupon Mr. Smith, with intense gravity, informed me that he knew beyond doubt that it had been arranged between the Queen and the Japanese Commissioner that if the American flag and troops were removed the troops from the Japanese man-of-war *Naniwa* would land and reinstate the Queen. Mr. Smith was the editor of the Hawaiian *Star*, established by the Annexation Club for the purpose of advocating annexation.

The American Minister expressed his belief in the statement of Mr. Smith, and urged the importance of the American troops remaining on shore until I could communicate with you and you could have the opportunity to communicate with the Japanese Government and obtain from it assurances that Japanese troops would not be landed to enforce any policy on the Government or people of the Hawaiian Islands. I was not impressed much with these statements.

When the Japanese Commissioner learned that the presence of the Japanese man-of-war was giving currency to suggestions that his Government intended to interfere with domestic affairs here, he wrote to his Government asking that his vessel be ordered away, which was done. He expressed to me his deep regret that any one should charge that the emperor of Japan, having so many reasons to value the friendship of the Govern-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

ment of the United States, would consent to offend that Government by interfering in the political conflicts in these lands, to which it was averse. In the light of subsequent events I trust the correctness of my action will be the more fully justified.

Advices from Washington also state that "a full understanding between the United States and Japan now exists, and that the two Governments are co-operating to secure the restoration of the Queen without bloodshed."

From Madrid comes the news, received from Brazil, that Admiral Mello has proclaimed the restoration of the Empire in the name of the Count d'Eu's eldest son, who is eighteen years of age.

Great interest has been excited here in behalf of ten Russian convicts, who escaped from Saghalien in a small Japanese sampan, and afterwards reached San Francisco in whaling vessels. Through doubt concerning their right of asylum, they were confined for a time in prison at San Francisco; but they have finally been decided by Secretary Carlisle to be "political offenders," and have been released.

The U.S Supreme Court (only two Justices dissenting) has handed down a decision by which the term "high seas" has been applied to the "unenclosed waters of the Great Lakes."

The triple screw cruiser *Columbia* on its official trial trip made an average speed of 22.81 knots per hour; and has thus earned for its builders a premium of $350,000, as the contract called for only 21 knots.

The first snow of the season fell in this city on the 21st inst., and brought with it severe weather which has continued to date.

Springfield, Mass., was visited on the 22nd inst. by a million dollar fire in the business portion; and the next day Detroit, Mich., suffered from an $800,000 fire, in which several lives were lost.

Rev. Dr. C. F. Deems, of New York City, died on the 17th inst.

Hon. Jeremiah M. Rusk passed away on the 21st inst. after a painful illness. Day before yesday simple ceremonies were held in his home at Viroqua, Wis.; and then his body lay in state in the Methodist Church of that place. Yesterday the public funeral took place; it was honoured with the presence of ex-President Harrison, ex-Attorney-General Miller, and many prominent Wisconsin men.

"Jerry Rusk," as he was familiarly called, was first a stage driver and hotel-keeper; then he went to the Wisconsin Legislature. His service here was interrupted by the Civil War, in which he served faithfully and rose to the rank of Brevet-Brigadier-General of Volunteers. After two terms as bank comptroller of Wisconsin, he had three terms in the House of Representatives. He declined two appointments (Chargé d'Affaires for Paraguay and Uruguay, and Chief of Bureau of Printing and Engraving), and then was three times elected Governor of Wisconsin. In 1886 he distinguished himself by the firmness with which he "put down" the Anarchists in Milwaukee. His last service was as Secretary of Agriculture.

There is great suffering at Hurley and other points in Northern Wisconsin and Michigan among the miners of the Gogebic range. Five thousand miners are out of work; so that twenty thousand persons are suffering and will suffer this winter. Governor Pick has appealed for aid.

On the 18th inst. all employés of the Lehigh Valley Road went out on strike; and since then no freight has been moved on that road, and passenger trains are not regular.

The epidemic of cranks and lunatics is continuing. A crazy woman in this city made a vain attempt to kill Rev. Dr. P. S. Henson, of the First Baptist Church; and a crank in New York City was one day rushing about, crying out, "Down with the rich," and shooting in at the windows of Delmonico's restaurant.

The thirty-eighth annual game dinner at the Grand Pacific Hotel of this city, the other day, was a celebration of the fiftieth anniversary of John B. Drake as a hotel landlord. It is said that, on account of the annually increasing scarcity and expense of game, these dinners will hereafter be discontinued.

It is expected that the new Tariff Bill will be completed by Monday (27th), after which the Republican members of the Ways and Means Committee will have 10 days in which to prepare a minority report. This bill is quite radical, and has been framed on the basis of revenue instead of protection. The free list will include "nearly all raw and crude materials which enter into manufactures," such as "wools, hair of the camel and goat, bituminous coal, iron ore, lumber, salt, silver bearing lead ore, flax, hemp, jute, and a large number of chemicals." The duties will be greatly reduced on chinaware, bottles, glass ware, plate glass, steel rails, pig iron, bar iron, cutlery, block tin, wooden manufactures, textile fabrics (silk, woollen, and cotton goods), and many agricultural products. The question of sugar is not yet settled, though the bounty will probably be abolished. The tax on whiskey will be increased; possibly a duty levied on sugar; and an income tax may be established. Many of these changes will, of course, be vigorously opposed in Congress.

It seems now quite certain that the main Exposition buildings, at least those around the Court of Honour, will be saved. By contract they may stand till May 1, 1895, and by force of public opinion will probably be made permanent structures. The South Park Commissioners say that they will take no action at present concerning the disposal of the buildings, but will wait for public opinion to settle the question.

With some of the buildings preserved, and many of the exhibits given to the Columbian Museum, Chicago bids fair to have the World's Fair always! Among recent donations to the Museum are included the gates and show-cases of the Japanese Manufactures Exhibit, the entire Japanese Forestry Exhibit, the Lady's Boudoir (on authority of Princess Mori), the great Ward natural science collection, all the Siamese exhibit except a collection of woman's work, $50,000 in World's Fair Stock from the Illinois Central Railway, and the promise of some fine specimens of Japanese art. The Japanese are certainly very generous to the Museum.

The Chicago *Herald* the other morning contained an article showing that the foreign exhibitors at the Fair had made large sales and "big money" on their exhibits, and that too in spite of the "hard times." The Italians head the list, with the Germans and French next, and the English, Austrians, Spanish, Russians, and Japanese come in the third row. "The cheerful Japanese go home with bursting pockets." "The Japanese disposed of nearly all their fine pottery, ivory carvings, and other artistic displays in Manufactures Hall." From the reports, however, of the Japanese themselves, they were much disappointed in their sales. And I am inclined to think, that this seeming failure to dispose of their goods rests partly upon the excessively large number of exhibits, and, growing out of that, partly on the crowded and disorderly condition of the Section. They ought not to have expected to sell such a multitudinous number of articles, and, comparatively speaking, they really did well.

R. G. Dun and Co.'s report this morning says that the revival of industries is slow, money is still accumulating, and general trade is picking up.

I append one more answer, recently received, to my request for an opinion on the Japanese exhibit at the World's Fair. It comes

FROM THE EDITOR OF THE "CHICAGO TRIBUNE."

"I regret to say that by reason of ill-health I was unable to make a satisfactory examination of the interesting Japanese exhibits, and therefore could not write an expert criticism thereof. The impression produced on my mind of what Japanese art I did see, was, that it was very beautiful, unique, and original, and I confess I felt greatly pleased, and I may say delighted, thereat. In art and taste and æsthethics the Japanese people are the French of the Orient. They certainly possess love and appreciation of the beautiful in art and nature to a remarkable and indeed prëeminent degree. "JOSEPH MEDILL."

GAME LAW.

CHAPTER I.—HUNTING IMPLEMENTS AND METHOD OF HUNTING.

Art. I.—The term "hunting" used in the present law, means to capture birds or animals by the agency of fire arms, nets of any kind, falcons, ropes or poles armed with bird lime, or ropes, or traps (*hago*).

The exact nature of the implements mentioned in the foregoing clause shall be determined by the Minister of State for Agriculture and Commerce.

Art. II.—To capture birds or animals by the agency of explosives, gun traps, or dangerous gyns or pit-falls, shall not be lawful.

With respect to any hunting implement or method of hunting not enumerated in the foregoing clauses, local Governors may enact regulations for control and superintendence, by permission of the Minister of State for Agriculture and Commerce.

Art. III.—Before sunrise, after sunset, in a street, or within range of any thickly populated locality, or place where a crowd is assembled, or of any building, ship, or train, hunting is interdicted.

Art. IV.—In the following places no hunting shall be allowed:—

1. Imperial Preserves.
2. Places where notifications prohibiting hunting are posted.
3. National and Prefectural Roads.
4. Public parks.
5. Grounds reserved for Shrines and Temples.
6. Cemeteries.
7. Private grounds, fenced, or enclosed, or in which any agricultural product is cultivated. Provided that this prohibition shall not apply if permission of the owner or superintendent of such land shall have been obtained.

Art. V.—Local Governors may, in accordance with an application of a landowner, or for any other reasons which they deem sufficient, issue a notification prohibiting the pursuit of game.

CHAPTER II.—HUNTING LICENSES.

Art. VI.—Any persons desiring to pursue game must obtain a hunting license by applying to the Local Governor. Provided that the pursuit of game within fenced or enclosed private grounds without the use of fire-arms shall be exempted from this provision.

Any person against whom the penal provisions of Art. XXI. have been enforced, shall not be competent to apply for a license before a period of one year has elapsed.

Art. VII.—Hunting licenses shall be divided into two kinds; namely, licenses for professional, and licenses for amateur, pursuers of game. Each of these kinds shall be subdivided into classes A. and B.

A license for professional pursuers of game shall be granted to any person who makes hunting an occupation; and a license for an amateur pursuer of game, to any person who hunts for pleasure.

Licenses of class A. shall be granted to any person who pursues game without fire-arms, and those of class B. to any person who employs fire arms.

Art. VIII.—The following shall not be competent to receive a license for the professional pursuit of game:—

1. Any official of or above the rank of *hannin*, or any persons entitled to receive the treatment of such an official.

Those who are not in receipt of salaries shall be excepted.

2. Any person who pays income tax.
3. Any person who pays more than 15 *yen* of Land-tax.
4. Any member of a family the head of which pays more than 15 *yen* of income tax.

Art. IX.—The following fees shall be paid for licenses according to the kind:—

Professional license	Class A. *yen*	0.50
	Class B *yen*	1.00
Amateur license	Class A. *yen*	10.00
	Class B. *yen*	20.00

Art. X.—The period covered by a license of class A. shall be one full year, from the 15th day of the 10th month (October 15th); and that for a license of class B. shall be from the 15th day of the 10th month to the 15th day of the 4th month of the following year.

Local Governors shall have competence, subject to the sanction of the Minister of State for Agriculture and Commerce, to shorten the foregoing period by 30 days at most.

Art. XI.—A license can be used only by the person to whom it is granted.

Art. XII.—A pursuer of game must carry his license with him when he goes out in pursuit of game.

Police gendarmes, forestry officials, or Headmen of *shi, cho,* and *son* are competent to call for the production of a license.

In the above cases, no pursuer of game can refuse to produce his license for inspection.

Art. XIII.—If a license is lost, the fact must be notified to the Police Station of the district, and to the office where the license was originally obtained.

When a license is lost or destroyed, its holder may apply for a new license. In such case a fee of 25 *sen* shall be paid.

Art. XIV.—No person under 16 years of age shall receive a license of class B.

Art. XV.—Within 30 days after the expiration of the period covered by a license it shall be returned to the office where it was originally received.

Art. XVI. Any foreigner who has obtained an Amateur License may pursue game within the limits fixed by Treaty, but in the event of his pursuing game beyond those limits, his license shall thenceforth become invalid.

CHAPTER III.—PROTECTION OF BIRDS AND ANIMALS.

Art. XVII.—It shall be unlawful to capture birds and animals the protection of which is deemed essential. The kinds of such birds and animals, and the duration of the period of protection, shall be determined by the Minister of State for Agriculture and Commerce, according to the condition of the locality.

Art. XVIII.—It is prohibited to take or sell the eggs or young of the birds and animals, the capture of which is forbidden under the provisions of the preceding Article.

Art. XIX.—Even in the case of birds and

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

animals enumerated in Arts. XXIV. and XXV., should it be considered that their removal or capture is conducive to the protection of wild cocoons, or to the pursuit of scientific research, or to other purposes, the local Governor shall have competence to sanction such removal or capture.

If it be considered necessary to remove or capture noxious birds or beasts, the Local Governor may grant a permit for the purpose.

CHAPTER IV.—PUNISHMENTS.

Art. XX.—Any person who pursues game in contravention of Art. VI., Clause 1, or who obtains a license of class B. in violation of the provisions of Art. XIV., shall be subject to a fine of not less than 3 *yen* and not more than 30 *yen*. When a professional license is obtained in violation of the provisions of Art. VIII., a fine of not less than 7 *yen* and not more than 70 *yen* shall be imposed.

Art XXI.—Any person who violates the provisions of Art. II., Clause 1 of Art. III., or of Art. IV., Clauses 1 to 6; shall be subject to a fine of not less than 5 *yen* and not more than 50 *yen*.

The license of a person fined under the foregoing Articles shall thereafter become invalid.

Art. XXII.—Any person who violates the provisions of Art IV., Clause 7; Art. XII., Clause 3; Art. XVII., Clause 1; or Art. XVIII., shall be subject to a fine of not less than 2 *yen* and not more than 20 *yen*. Provided that, with respect to violations of Art. IV. Clause 7, the penalty shall not be imposed unless the landowner or the person who has charge of the land takes legal proceedings.

Art. XXIII.—Any person who violates Art. XII., Clause 1; Art. XIII. Clause 1; or Art. XV., shall be subject to a fine of not less than 1 *yen* and not more than 1.95 *yen*.

ADDITIONAL ARTICLE.

Art. XXIV.—The present Law shall go into force from the 16th day of the 4th month of the 24th year of *Meiji* (April 16th, 1894)

"THE ANCIENT MARINER" AT THE PUBLIC HALL.

Some of the best traditions of the Yokohama Choral Society were revived in the concert given by the members on Wednesday evening in the Public Hall. The house was well-filled and seated before the concert commenced, while success attended the efforts of all concerned. Barnett, to our way of thinking, never fully grasped the spirit of Coleridge's mystical Rime, many of its subtler meanings eluding him altogether. The Cantata is therefore rather unequal, in parts disappointing by a meagre tawdriness, while charming in others by unexpected bursts of purest music worthily attained. But with all its trifling faults the work is a brilliant attempt at placing the almost perfect words within an appropriate and noble setting. Allowance must always be made for the handicap placed upon a composer who chooses such a theme as "The Rime of the Ancient Mariner" for his pen. The sweet cadences of the harmoniously blended words have long since gained for themselves an individuality which only a genius, greatly daring, could hope to disturb; and fortunately or unfortunately Barnett has not succeeded in immortalising his music at the expense of the poem.

The opening chorus on Wednesday evening went very well, but this cannot be said of all the others, some dragging noticeably. The Bridal Chorus was carried through with good effect, the nervousness apparent at the beginning having worn off. To Mr. Fenton (tenor) fell the introduction and the earlier Airs, and he acquitted himself well. His voice is of fairly high register, but needs training and developing ere it can successively tackle the difficulties of the Public Hall platform. With an increase of confidence, Mr. Fenton's vocal career should prove a very bright one. Mrs. W. W. Campbell was in excellent voice, and her rendering of "The fair breeze blew," was exceedingly delightful. Mrs Campbell also took the part of the "First Voice," and here again she charmed her audience by the dainty tenderness of expression thrown into every line. The contralto parts were in the capable hands of Miss Webb, and the cultured vocalist deserved the warm applause accorded her throughout the evening, and Mr. Goldman was equally successful in doing justice to the heavy share allotted to him. He had a tendency at times to lapse into an operatic mode of interpretation, but these were slight errors of judgment which did not mar the general effect of his evening's performance. The recitative, "And now this spell was snapt," was perhaps one of his best efforts. Mr. Fenton shone to advantage in the following Air, "The harbour bay was clear as glass," and the audience fully appreciated the delicate handling of the subject. The soprano and alto chorus, "This seraph-band," is among the happiest in the book, and was given faultlessly. The concluding quartett and chorus was a great success, the parts being well-balanced with no tendency to slur the sharply contrasted quatrains.

Much credit is due to the President, Mr. Griffin, for the able manner in which he kept the chorus together under his *baton*; it was an arduous task adroitly carried to completion. Mr. Keil presided at the organ, and Miss Moulton at the pianoforte, and they made most efficient accompanists. The *flauto obligato* of Mr. Lafaye de Micheaux were exceedingly clever.

The second part of the programme consisted of five numbers. Miss A. Mendelson gave Chopin's difficult "Fantasie-Impromptu," and was recalled. She bowed her thanks, and was then presented with a handsome basket of flowers. Miss Bloxham's rendering of Schumann's "Er, der Herrlichste von Allen," was another of those delightful vocal treats with which this accomplished young lady always favours us whenever she appears before a Yokohama concert audience. She was enthusiastically recalled, but the lateness of the hour made an encore impossible. Mr. Ramseger's violin solo was De Beriot's "Air varié" and, as usual, proved a marvellous exhibition of his powers. Wolfram's Ester-Gesang, from "Tannhauser," was sung with good effect by Mr. Seel; and the concert concluded with a Trio—pianoforte and violins—in G Major (Bach), by Mrs. Poole, Mr. Ramseger, and Master Poole.

PURCHASING POWER OF SILVER IN THE EAST.

One of the most interesting essays compiled in recent years by a Consular official is Mr. Consul Jamieson's "Report on the General Position which China occupies with regard to the Silver Question." The first half of the report is devoted to an attempt to determine the outgoings and incomings of silver in China's case during the last 23 years, but this question is complicated by so many factors that a conclusive result is very difficult to reach, and when reached possesses no marked value. But the problem analysed in the second part of the essay—namely, the purchasing power of silver—is of very great interest, and Mr. Jamieson's investigations and conclusions come most opportunely. We have often maintained that the purchasing power of silver has not appreciably diminished in the Orient, as must have been the case had the value of the white metal really depreciated owing to over-production, according to the claim so often advanced by monometalists. We have even published tables showing that an ounce of silver will to-day buy virtually as large a quantity of commodities in the East as it bought twenty years ago. But it has not been in our power to attempt any analysis so exhaustive and accurate as that now made by Mr. Jamieson. We reproduce it, persuaded that our readers will find it as full of interest and instruction as we have:—

I now come to the second of the questions I proposed to discuss, viz., the endeavour to ascertain whether the prices of commodities in China have altered during the last 20 years; in other words, whether the purchasing power of silver has varied with the varying exchange.

To illustrate this I have compiled three tables of the prices of commodities, which are hereto appended and marked A, B, and C.

The first, Table A, comprises articles which are exclusively or principally both produced and consumed in China.

The second, Table B, comprises articles produced in China, but destined for the most part for foreign consumption.

The third, Table C, comprises articles produced abroad but consumed in China.

The prices given in Table A are compiled from Customs values, and are, as far as possible, the prices at the ports of production. The prices in Tables B and C are compiled either from Customs values or from Chamber of Commerce price lists and other contemporaneous market reports. All three tables are, I believe, as accurate as the nature of the case will allow. At all events, they represent beyond dispute the general tendency of prices, spread over a series of years.

An examination of those tables will, I think, establish the following conclusions:—

1. As regards articles which are both produced and consumed in China, silver prices have on the whole tended to decline. There is a moderate rise in a few articles, principally food stuffs, but all over there is a decline of about 9 per cent.

2. As regards articles of native origin exported to foreign countries the silver price has not advanced with the fall in exchange. Prices, on the whole, are almost exactly on the level of the years 1870 to 1874.

3. As regards articles of foreign manufacture or production imported for sale in China the average price in silver has declined very considerably.

Chinese can now obtain their supplies at a less cost even in silver than they could 20 years ago by some 26 per cent.

In other words, the purchasing power of silver has not declined in respect to any of the classes of commodities, and has even considerably increased in respect of the first and last classes.

The purchasing power of gold, on the other hand—that is its local market value—has steadily advanced with every successive fall in the rates of exchange on London, till now 4*s.* will purchase what formerly required 6*s.* 6*d.*, or £60 will now do what used to require £100. This is best illustrated by putting the gold and silver prices side by side as follows:—

The several quantities of commodities enumerated in the tables could have been bought as below. Those in Table A could have been bought:—

Year.	Amount. Currency. H. Taels.	Sterling. £ s.
In 1873	81.56	26 10
1892	74.27	16 12

TABLE B.

Year.	Amount. Currency. H. Taels.	Sterling. £ s.
In 1873	375'06	121 17
1892	381 21	83 0

TABLE C.

Year.	Amount. Currency. H. Taels.	Sterling. £ s.
In 1873	43.69	14 0
1892	29.96	6 10

As regards Table A, the result arrived at will not appear surprising. The only way, it would seem, in which foreign trade or the fluctuations of foreign exchanges can affect internal prices, *i.e.*, prices of articles which are not in demand for foreign trade, is by drawing away or bringing in one or other of the precious metals. If the result of foreign trade is to cause a flow of silver into or out of the country the value or the purchasing power of silver will tend to fall or rise as the case may be, and so with gold. But, as we have seen, there has been no great addition to the stock of silver in China during the period under review, and consequently we ought not to expect a general rise in prices. The fluctuations which we find in the prices of commodities in Table A can, indeed, be shown to coincide closely with the greater or less supply of silver. From 1870 to 1880 there was a continuous favourable balance of trade, indicating a flow of silver into China.

Accordingly we find there is during this period a tendency of prices to advance. From 1880 onwards there has been no silver coming to China, and as without this extraneous supply stock in the country is insufficient to meet the growing wants of commerce, the price of commodities tends to fall.

As regards Table B, the conclusions to be drawn from that are more perplexing.

Given an equilibrium of prices at any time between a silver using and gold-using country, say, between China and England, any subsequent fall in the gold price of silver must, it would seem, have in respect to exports from China one or other of three results. It must either raise to the Chinese producer, or it must lower the price to the English consumer, or the difference must remain as profit in the pockets of the middlemen.

The last alternative is of course excluded as a permanent result. The immediate effect of a fall is no doubt to enable the merchant to realize a better profit on merchandise at the time in transit, but competition quickly puts an end to this. As between the other two alternatives one would be disposed to say *a priori* that the larger market would rule and that the gold price would tend to remain steady, leaving the adjustment to be made at the other side. In that case the silver price in China must rise.

But it does not appear to be so. It is, I believe, a well known fact in the commercial world, that it is always much easier to lower prices than to raise them. If you can afford to go down a ½*d.* a bargain is much more easily struck than if you are bound to stand out for a rise of a ½*d.* It would seem then to be a general rule that adjustments following on a fall of exchange are always made along the line of least resistance, and that therefore it is not the China price that rises, but the London price that falls. Merchants operating on the usual principles find it easier to buy Asiatic produce at the old prices and sell it in London at a concession, than to stand out for old prices at home, in order to be able to pay more to the producer.

The experience of the last 20 years shows that with every fall in the gold price of silver there has invariably been a simultaneous lowering in the gold price of commodities in Europe. This has

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

variously been ascribed to the scarcity of gold or to the greater strain thrown upon existing stocks by its extended use, or to a reduction in the cost of production, but may it not be ascribed principally or entirely to the competition of the produce of silver-using countries? If it is a fact that there has been no general rise in the silver price of produce in India and China and other silver-using countries, or a less rise than the fall in silver should produce, then the gold price of such produce when imported into Europe must necessarily have fallen with the fall in exchange.

From this point of view it is really silver that rules the world; it is the purchasing power of the cheaper metal that determines the price all over. Just as in a bi-metallic country the cheaper metal will drive out the dearer towards her monometallic neighbours, so, as between countries of different standards, will the prices prevailing in the country of the cheaper metal drag down prices all over to their own level. And reasoning forward from the experience of the past, it would not, perhaps, be too rash to conclude that prices of commodities in Europe, so far as these can be drawn in any fair quantity from silver-using countries, must continue to decline with every further fall in silver.

In regard to the third matter of inquiry which I proposed to discuss, viz., how far the fall in silver has stimulated exports from China, an answer has in effect been supplied by the foregoing remarks. There has been a stimulus, but not such a stimulus as might have been expected. The stimulus has been a readiness on the part of foreign merchants to buy native produce of all sorts at current quotations, but not the stimulus which comes from offering higher prices.

Such as it is, however, it has developed the exports very considerably, especially within the last few years. In 1872 the exports of China stood in value approximately as follows:—

Articles.	Value. H. Taels.
Silk and silk products	26,000,000
Tea, all kinds	38,000,000
Miscellaneous	7,000,000

In 1892 the figures were:—

Articles.	Value. H. Taels.
Silk and silk products	38,292,000
Tea, all kinds	25,983,000
Miscellaneous	38,308,000

The following table indicates in some detail the particular lines in which the general exports from China have developed. The prices of these articles will be found in Tables A and B.

Articles.	Value, 1872. H. Taels.	1880. H. Taels.	1892. H. Taels.
Silk, raw	23,762,000	23,227,000	27,736,000
Silk, waste	293,000	947,000	2,603,000
Silk, piece-goods	2,138,000	3,422,000	6,900,000
Tea, black and green	37,304,000	33,493,000	23,476,000
Tea, brick	785,000	2,132,000	2,503,000
Peas and beans	246,000	160,000	1,187,000
Cotton, raw (for Japan)	394,000	180,000	5,089,000
Hides	17,000	253,000	495,000
Straw braid	84,000	1,227,000	2,056,000
Wool	14,600	30 000	1,545 000
Skins and rugs	5,200	152,000	1,315,000
Paper	260,000	512,000	1,572,000
Matting	438,000	533,000	1,292,000
Sugar, brown	618,000	2,452,000	1,609,000
Tobacco	137,000	168,000	1,074,000

Tea has always figured so prominently as one of the products of China that it could not be omitted from any list of exports, but the causes operating of late years to affect both its price and the volume of the export have been so exceptional that it ought not, perhaps, to be included in a table from which it is sought to draw general conclusions. As will be seen, both the price and the quantity have fallen off very much, owing, of course, to the Indian competition. If tea, *i.e.*, black tea, to which alone these remarks apply, were excluded from Table B, the figures then would indicate a small general rise of prices

The price of raw silk has shown a tendency to decline, but it has lately recovered, and now stands at about the level of 1873. The average value of China manufactured silk has advanced slightly, and the export has more than trebled.

The prices of straw braid and wool have advanced some 15 per cent., with a large increase of export; but, on the other hand, the price of raw cotton, the export of which has grown more than that of anything else, has been steady, and the prices of tobacco, paper, and sugar, all of which show a large growth of export, have all gone down. It may, however, be remarked that these are not exports to Europe, but to silver-using countries such as Japan, Singapore, &c, and so ought rather to be classed with domestic trade.

It is thus difficult to formulate any general rule as to a relation between prices and volume of export, but it may be said that on the whole, leaving tea out of account, there has been a small advance in silver prices of articles sent to gold-using countries, and to this extent there has been a direct stimulus to exports. There seems every reason to expect that this tendency will be greatly enhanced in the near future, in view of the recent action of the Indian Government in fixing the value of the rupee in gold, which will probably have the double effect of still further depreciating silver and of limiting the silver using area whence produce can be drawn for the European markets Whenever silver falls below the normal line of 1s 4*d.* for the rupee, Indian produce will, it would seem, be unable to compete on the old terms with that of China. The area of cheaper produce being thus narrowed, it is probable that the price in London will not continue to fall or will not fall so much, and that will necessarily mean enhanced prices in China and an increased export.

It unfortunately happens that, outside of tea and silk, China does not produce many articles that are of universal demand. Her one great industry is agriculture to supply her own wants. The export of rice, wheat, and cereals of all kinds, except peas and beans, is absolutely forbidden. If this were otherwise, it is probable that the exports of China might grow very fast, but as things are, I do not look for any very rapid expansion.

It follows, therefore, that it is impossible to expect that China will, under present circumstances, become a great consumer of silver.

The conditions of the last few years which have made China an absolute exporter of silver are doubtless abnormal. Under ordinary circumstances China ought to be an importer, but of course she cannot get silver unless she gives value for it in some form or other. Her power of absorbing silver is measured by the difference between the value of her exports and imports, and unless the former outvalue the latter, there is nothing left for her to receive. I see no reason to suppose that China will, until things are greatly altered, take the place of India as an absorber of silver.

But the undeveloped capacities of the country are enormous, and if the Government would only allow merchants a free hand in the matter of railways and manufactures, the trade of China might soon outrival that of India. There is probably no country in the world where capital is so much wanted, and where it could be used with greater benefit both to the borrower and the lender.

The amount of silver in the country is, I believe, surprisingly small. Here in Shanghai, which is the commercial metropolis, the stock at any given time, whether in foreign or native hands, seldom exceeds 3,000,000 taels, and is often much less.

At Soochow and Hangchow, and other large inland centres, the estimate is usually much less than that, and in the country at large, and even in populous towns and villages, silver is rarely seen at all. Interest is high—running from 5 per cent. to 12 per cent.—and that not on account of insecurity, but because the borrower can use the capital to such advantage as to make it worth his while to pay it.

Viewing the situation from the Chinaman's point of view he finds that his tael or ounce of silver is just as valuable to him as it ever was. He can buy the same amount of all the ordinary necessaries of life for the same money as formerly, and of foreign articles he can buy a great deal more. If he has things to sell to the foreigner, he can usually get rather a better price than he used to get, and he finds the foreigner mostly ready to buy, always excepting tea. His wages, rent, and taxes have remained unaltered, as has also the price of land. He can get the same interest on his spare capital if he has any.

The only thing greatly changed is the price which foreigners are willing to pay for gold, and their strong desire to get it. Formerly the price of gold was 15 ounces to 16 ounces weight of silver for one of gold, and there was not much demand for it. Now there is a universal desire to get it and send it out of the country at prices which have gradually risen from 16 taels to 18 taels, 20 taels, 24 taels, and even 30 taels for 1 tael's weight of gold.

Reverting to the questions which I proposed to myself at the outset of this paper, the conclusions may be thus summarised:—

1. China has not been within the memory of the present generation, a great absorber of silver. From 1870 to 1880 she did take off about £3,000,000 per annum, but since 1880 this process has ceased, and there has even been of late years a slight export.

2. (*a*) The fall in the gold price of silver appears to have produced no effect on the general level of prices of articles produced and consumed in China.

(*b*) As regards articles produced in China and commonly exported to gold-using countries there is a slight tendency to a general rise. This will probably be enhanced in the near future.

3. The fall in the price of silver has stimulated exports by making it possible for foreign merchants to purchase and export at a profit a large variety of miscellaneous articles which formerly would have yielded no return at all. The value of such miscellaneous articles has quadrupled within the last ten years. Tea has declined very largely both in volume and price, but for this there are no special reasons. Raw silk of best quality has increased somewhat in volume, but not in price. There has been a great increase in the quantity of waste and refuse silk exported, but the price has somewhat declined.

A continued growth in the exports of China is to be expected, but under present conditions it cannot attain to great dimensions. As the capability of China to absorb silver depends upon the excess of her exports over her imports, there is no reason to expect that China will, within the next few years at all events, take much silver off the European market.

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, December 16.

All the European Chambers are considering what measures can be taken against bomb throwing.

The Princess of Wales is suffering from an attack of influenza.

Lord George Hamilton has given notice of a motion declaring that the interests of the country demand that large additions be made to the strength of the Navy, and demanding a statement of the intentions of the Government before Christmas. The debate is fixed for Tuesday next, when Mr. Gladstone has decided to move an amendment that the House relies upon Her Majesty's Ministers to submit a definite programme in due time.

Lord Herschell's Committee are considering Hongkong's proposal to legalise the Japanese *yen* in the Crown Colony.

London, December 17.

The Princess of Wales is improving.

Serious riots by socialists have broken out simultaneously in Rome, Genoa, and Naples. The military were called out to restore order, but failed, as, notwithstanding that they fired on the mob, the riots still continue.

London, December 20.

Lord George Hamilton's motion that the interests of the country demand that large additions be made to the strength of the Navy, and demanding from the Government a statement of its intentions before Christmas, was made last night in the House of Commons and rejected, on an amendment by Mr. Gladstone, which was adopted unanimously, that the House relies upon Her Majesty's Ministers to submit a definite programme in due time.

Signor Crispi, in a speech, appealed for the concord of Parliament and the Government until such time as the fortunes of Italy may be restored. The present crisis, he said, was the gravest that had ever yet occurred in the country, and Parliament must, therefore, make some sacrifices.

["SPECIAL" TELEGRAMS TO "JAPAN MAIL."]

Nagasaki, December 18.

A telegram to the *N. C. Daily News*, dated at Hankow on the 14th inst., states that Mr. Carl Bock had come to terms in regard to reparation by the Chinese Government for the late murder of missionaries, the basis of the settlement being the cutting off of two heads and the payment of forty thousands dollars.

[FROM THE "HONGKONG DAILY PRESS."]

Paris, December 2.

The Cabinet will to-morrow make its declaration. It will be firm and clear.

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

(From the "North China Daily News".)

London, December 11.

During a sitting of the French Chamber of Deputies on Saturday a bomb filled with slugs was thrown from the public gallery and exploded in the air, scattering slugs in every part of the Chamber. Eighty persons were injured, including about fifteen Deputies, but fortunately nobody was killed. The doors were immediately closed and everyone in the gallery searched The corridors were for the time being converted into a hospital. The Chamber continued its sitting at the instance of President Dupuy, who displayed admirable coolness amidst the panic. The perpretrator of the outrage was arrested and confessed his guilt. He proves to be a notorious Anarchist and his intention was to aim at the President of the Chamber.

London, December 12.

When the House of Commons assembled on Monday Sir Wm. Harcourt, in the absence of the Premier, expressed the sympathy of the British Government and of the House of Commons with the French Chamber of Deputies as to the diabolical outrage which had been perpetrated, and their horror of the crime. Mr. Balfour, leader of the Opposition, warmly endorsed the utterances of the Chancellor of the Exchequer.

In the Chamber of Deputies on Monday M. Casimir-Périer, the Premier, moved to introduce Bills to punish the Press for inciting to or praising outrages; for increasing the strength of the Police; and for punishing the possessors of explosives.

The Press Bill was immediately read a first time by the Chamber, notwithstanding the opposition of the Socialist members.

London, December 14.

At a crowded and representative meeting held in the City under the presidency of Sir A. Rollit, resolutions were adopted urging that immediate steps should be taken to increase the Navy, so as to guarantee the security of the Empire and its commerce.

December 15.

A despatch from Buluwayo, dated the 8th of December, states that a detachment of Major Forbes' patrol crossed the Shangani river and overtook Lobengula when the latter was in ambush. The detachment returned towards their camp fighting the Matabele, but in the meanwhile the river had risen, preventing Major Forbes from sending reinforcements. Anxiety is felt for the small force thus cut off.

During a debate in the Commons on the Indian Loan Bill, to extend the borrowing powers of the Secretary of State for India, Sir J. Lubbock and Mr. Samuel Montagu strongly urged that a duty should be imposed on silver imported into India.

Mr. Gladstone announced that the House of Commons would adjourn on the 22nd instant for the Christmas holidays, and reassemble on the 27th idem. Sir J. Dorington, Conservative Member for Tewkesbury, thereupon moved to adjourn the House as a protest against the prolonged session and the general conduct of business. The Premier, in reply, declared that the Government were determined to proceed with the Parish Councils Bill and would adhere to their programme. A heated debate ensued, but eventually Sir J. Dorington's motion was rejected by a majority of fifty

Lord Kimberley stated in the House of Lords that it would be necessary to pass the Indian Loan Bill before Christmas.

December 16.

The latest advices from Bulwayo state that Captain Wilson, commanding the detachment which crossed the Shangani river is holding his own against a large force of Matabele.

Mr Sydney Buxton, Parliamentary Secretary to the Colonial Office, has informed the House of Commons that the idea of the coinage of the British dollar is not favoured by the Straits Settlements or Hongkong. Lord Herschell's committee, he added, are considering Hongkong's proposal to legalise the *yen*.

The Employers' Liability Bill has passed through all its stages in the House of Lords.

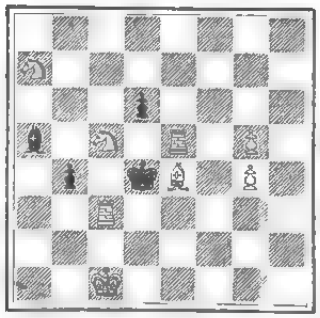
Problem No. 102.

By H. Von Gottschalk.

Black.



White.

White to play and mate in three moves.

Local affairs keep on the even tenor of their way. The match between the Yokohama Chess Club and the Tokyo Chess Club will probably be played in January.

We hope to publish both the Nagasaki-Yokohama correspondence games in our next issue.

We take the following from a Canadian exchange, and, are delighted to find the veteran in such good form. Mr. Short has reason to be a proud man after scoring a win against the Champion.

Mr. William Steinitz, chess champion of the world, arrived in Montreal on the morning of the 12th November. He is a native of Prague, in Bohemia, but early in life he left that place for Vienna to complete his education There he got frequent opportunities for making progress in the game of chess. In 1862 he came to London and started on that career which has since made his name a household word in the chess world. He remained in England for twenty years, and proceeded from victory to victory. In 1866 he defeated the renowned Anderssen and became the chess king of England, and has since vanquished every opponent, including such players as Blackburn, Zukertort, and Tschigorin. He will remain in Montreal two weeks, giving exhibitions of simultaneous and blindfold play, and all who are not members of the Club can buy admission tickets at the Chess Club rooms any afternoon or evening. Ladies are admitted free and are cordially invited to be present.

Mr. Steinitz first appearance in Montral, as a player, took place in the rooms of the Montreal Chess Club, 55, University street, when he played two single-handed games, one with Mr. Bemrose and the other with Mr. D. C. Robertson, both of which were won by the champion. In the evening he played at the same place simultaneous games with Messrs. R. Short, T. Holmes-Orr, H. A Thompson, W. B. Stobb, M. Yule, J. Pelletier, J. J. Dean, W. Hall, T. Bunmore, J. D. Cameron, F. Marshall, C. R. Cumberland, A. M Perkins, D. C. Robertson, T R. Davies, W. B. Evans.

Following is the score of the game played at the Montreal Chess Club with Mr. Bemrose:—

White. J Bemrose.	Black. W. Steinitz.

Per French steamer *Yarra*, for Shanghai viâ Kobe:—Raw Silk for Europe, 713 bales; Waste Silk for Europe, 164 bales. Treasure for Shanghai, $23,500; for London, $24,000.

Per Japanese steamer *Kobe Maru*, for Shanghai and ports:—Treasure, $93,800.00.

Per British steamer *Verona*, for Hongkong viâ ports:—Silk, 566 bales; Waste Silk, 71 bales.

REPORTS.

The Japanese steamer *Nagato Maru*, Captain R. Pender, reports:—Left Otaru the 12th December at 4.10 p.m.; had moderate S.E. winds; then strong westerly gale with heavy sea and thick snow to Hakodate, arrived the 13th at 12.30 p.m. and left the 15th at 8 a.m.; had N.E. winds with thick snow to Kuro-saki; thence strong N.W. winds and clear weather to Oginohama, arrived the 16th at 6.30 a.m. and left the same day at 1.15 p.m.; had moderate to fresh westerly winds and fine, clear weather to arrival at Yokohama the 17th December, at 1.15 p.m.

The Japanese steamer *Kumamoto Maru*, Captain Olsen, reports:—Left Hamanaka the 12th December at 4.30 a.m.; had gentle breeze and fine weather, wind increased to strong W.N.W. gale with heavy sea during the night, and at 8 a.m. on the 13th off Cape Yerimo turned back to Shoya for shelter, in company with steamer *Serio Maru*; on the 14th at 7 a.m. left anchorage, but on rounding Cape Yerimo found no improvement in weather and returned to Shoya; on the 15th proceeded to Yokohama at 10 a.m. weather dull and overcast and a light N.W. breeze; at noon wind shifted to N.E. and blew fresh with snow until 6 p.m.; thence shifted suddenly to N.W. increasing rapidly to strong gale, with very high sea and thick snow and hail squalls, vessel shipping water, labouring and straining heavily until 8 p.m. when oil bags were tried with good effect. Weather began to moderate at daylight; on the 16th met the American schooner *Anaconda*, bound north, 20 miles N.N.E. of Kinkasan; passed Kinkasan the 16th at noon fresh N.W. winds, fine weather, and moderate sea; Inuboye the 17th at 4 a.m. gentle N.W. winds, fine weather, and moderate westerly swell; Noshima Lighthouse at noon with similar wind and weather. Arrived at Yokohama the same day at 4.30 p.m.

The Japanese steamer *Yamashiro Maru*, Captain Young, reports:—Left Kobe the 16th December at 3 p.m.; had moderate westerly winds and fine weather throughout the passage. Arrived at Yokohama the 17th December at 9 p.m.

The Japanese steamer *Sendai Maru*, Captain T. Sakai, reports:—Left Kobe the 18th December at noon; had gentle to moderate south-westerly breeze and fine weather; after passing round Oshima, moderate northerly breeze and clear sky throughout the passage. Arrived at Yokohama the 19th December at 7.15 p.m.

The British steamer *Belgic*, Captain Walker, reports:—Left San Francisco the 30th November; had fine weather with moderate sea and winds up

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

to the 16th December; thence to port strong to moderate N.W. winds and head seas. Arrived at Yokohama the 19th December at 2.12 a.m. Time, 17 days, 17 hours, 8 minutes.

The Japanese steamer *Fushiki Maru*, Captain Wilson, reports:—Left Misumi the 17th December at 7 a.m.; had moderate N.E. winds with fine, clear weather to Moji, arrived there at 7.40 a.m. on the 18th. Left again the same day at 1.30 p.m., for Yokohama viâ Bungo Channel; experienced gentle N.E. winds with continuing fine weather; passed Omai-saki the 20th at 6.20 a.m.; thence to port moderate N.N.W. winds with overcast and dull weather. Arrived at Yokohama the same day at 4.45 p.m.

The Japanese steamer *Wakanoura Maru*, Captain Thompson, reports:—Left Otaru the 16th December at 4.43 p.m.; had fresh winds and squally, with snow and high N.W. sea to Shirakami; thence moderate winds and fine weather to Hakodate, arrived the 17th at 11.25 a.m. Left the 18th at 2.35 p.m.; had fresh to strong north-westerly winds and fine weather to arrival at Ogimohama the 19th at 1.30 p.m. Left the same day at 6.34 p.m.; had light winds and fine weather to Inuboye; thence light winds and dull, gloomy weather to arrival at Yokohama the 20th December at 8.25 p.m.

The Japanese steamer *Takasago Maru*, Captain Nirei, reports:—Left Kobe the 19th December at 10.30 a.m.; had fine, hazy weather and light easterly airs. Arrived at Shiotsu at 2 p.m. and left again at 11.30 p.m.; had fine weather and moderate easterly breeze; passed Kashino Lighthouse the 20th at 6.50 a.m. weather set in cloudy with light rain; made Omai-saki at 7.40 p.m. the same day; thence to port fine, clear weather and moderate westerly breeze. Arrived at Yokohama the 21st December at 7 a.m.

The Japanese steamer *Hiogo Maru*, Captain E. S. Barstow, reports:—Left Manila the 6th December, Hongkong the 12th, Amoy the 14th, and Kobe the 21st; had very strong N.E. monsoons and high seas from Manila to 100 miles north of Formosa; thence fine, clear weather, moderate winds and seas, thick fog from Kanon-saki.

The Japanese steamer *Saikio Maru*, Captain G. W. Conner, reports:—Left Shanghai the 16th December at 6.30 a.m.; had light to strong N.E. winds, and fine, clear weather to arrival at Nagasaki the 17th at 10 p.m. Left again the 18th at 5 p.m.; had light variable winds with hazy weather to arrival at Shimonoseki the 19th at 1 p.m. Left again the same day at 5 p.m.; had moderate northerly winds and fine, clear weather through the Inland Sea and arrival at Kobe the 20th at 1 p.m. Left Kobe the 21st at noon; had light northerly winds and clear weather to Rock Island; thence light variable winds with hazy weather. Arrived at Yokohama the 22nd December at 3.30 p.m.

LATEST COMMERCIAL.

IMPORTS.

The Import Trade has been far from lively during the past week, but in some departments there are signs of a slight improvement. Single Yarns are again in the field, and owing to demand being brisk holders ask higher figures for 16/24's. Doubles, however, are very quiet. Grey Shirtings of the heavier weights have started to move, and show a slight increase in value. In Fancies, there is some little enquiry for Velvets, Mousselines, and Flannels, but would-be buyers do not seem willing to pay current rates. Other lines are dull, but prices are firm.

METALS

Nothing new to report in this market. Holders continue very firm in spite of the scarcity of buyers, and owing to small stocks some kinds of Iron show a slight rise

	PER PICUL.	
Flat Bars, ½ inch	$3 90	to 4 10
Flat Bars, ¼ inch	4 10	to 4 20
Round and square up to ¾ inch	3.30	to 3 40
Iron Plates, assorted	3 35	to 3.45
Sheet Iron	4 55	to 4 70
Galvanized Iron sheets	9 00	to 9 20
Wire Nails, assorted	5 40	to 5 75
Tin Plates, per box.....	6 00	to 6.20
Pig Iron, No 1	1.50	to 1.55

KEROSENE.

The late heavy arrivals have had a weakening effect upon this market, and as buyers seem satisfied for the present, there is but a small business doing. Quotations remain unchanged, but show a declining tendency.

Chester	$1.85	to 1.87½
Comet	1.82½	to 1.85
Devoe	—	
Russian Anchor	1.80	to 1 85
Russian Moon	1.77½	to 1.80

SUGAR.

Demand has been moderate for Browns, and a fair amount of business has been transacted. China grades are a shade harder, but others remain firm at last week's quotations. Whites continue to enjoy a well-sustained enquiry, and close firm.

	PER PICUL.	
Brown Takao	$4 40	to 4.50
Brown Manila	5.15	to 5.25
Brown Dartong	4.00	to 4 10
Brown Canton	4 10	to 4 45
White Java and Penang	6.90	to 7 00
White Refined	7.50	to 9 10

EXPORTS.

RAW SILK

Our last issue was of the 15th instant, since which date settlements on this market amount to 926 piculs, divided thus: *Hanks*, 16 piculs; *Filatures*, 703 piculs; *Re-reels*, 121 piculs; *Kakeda*, 86 piculs. Direct shipments have been 207 bales, making the total export for the week 1,150 piculs

The demand has increased slightly, and considerable business has been done, principally for Europe. At the close, prices are distinctly higher all round, and holders seem to feel confidence in their position; at the same time, we are bound to admit that consumers do not seem very eager to book their supplies ahead, and we think that the business doing is mostly a transfer of stock to the other side so as to have it there in readiness for manufacturers' daily requirements.

Exchange has remained on an even keel, although slightly hardening in tone in sympathy with higher rates of silver wired out from London.

Arrivals continue on a fair scale, and the stock is practically unchanged from last week; but it is fair to suppose that from now onwards supplies will fall off as the up-country filatures will close, as usual, during the winter months. Some districts are already well covered with snow and the country people predict a hard winter.

There have been two shipping opportunities since we last wrote, the steamer *Gaelic*, 17th inst., taking 1,028 bales for the New York trade, and the French mail steamer *Yarra*, same date, carrying 713 bales for Europe. These departures make the present export figures 23,092 piculs, against 33,099 piculs last year and 29,731 piculs at the same date in 1891.

Hanks.—The stock is insignificant, and it is very hard work to fill the few small orders which come to hand. Prices are unchanged, with a tendency to higher rates, say $5 or so in sellers' favour.

Filatures.—There has been a fair daily business in these, better prices being secured. In full sizes good *Shinshu* are booked at $750, while Extras are now held for $790. Ordinary *Shinshu* marks have brought $730, and we doubt if *Tokosha* could be obtained at $720. In fine sizes, best No. 1 have reached $790, and other grades have hardened in proportion.

Reels.—These are well held, and quotations for best kinds must be advanced $10, although little has been done in them. The principal business has been in good medium *Joshu*, prices ranging from $650 to $670. *Bushu* have been taken at from $620 to $640, according to quality; but the trade in this department generally has not been large, holders being too firm in their demands.

Kakeda.—A small business, holders asking higher prices, and to some extent stopping the trade. We give the improved quotations in our list below, but at these prices business hangs fire for the moment.

In other sorts nothing done.

WASTE SILK

There has been more doing in this branch, settlements for the week reaching 974 piculs, divided thus; *Noshi*, 430 piculs; *Kibiso*, 544 piculs. No direct shipments this week.

The last two or three days have seen a considerable revival in the demand, and some 2,000 piculs are said to be in course of settlement, of which we hope to give the particulars in our next. Holders are very firm, and have succeeded in getting $5 advance upon the very best grades of *Noshi* and *Kibiso*. Still the trade is by no means general, consumers failing to take hold with any vigour at present.

Arrivals have been slightly less than sales, and

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

the stock shows some little reduction upon last week's figures.

There have been three shipping opportunities since we last wrote, the French Mail and the *Glenogle* taking both Waste and Cocoons for Europe, while the Canal steamer *Huntshire*, which left on the 20th instant, took about 40 bales of *Pierced Cocoons* for the New York trade. These departures make the present export figures 12,032 piculs, against 21,347 piculs last year, and 16,391 piculs at the same date in 1891.

Pierced Cocoons.—The season is practically closed and all quotations withdrawn. The remaining stock consists of *Nafiko* and other *Waste* or spent *Cocoons*, which are no longer a feature in our market.

Noshi.—Considerable enquiry has led to some purchases, and an advance of $5 has been paid upon the highest grade of *Filature* and *Oshu* sorts. Not very much done in *Joshu*, holders showing a desire to keep back their best quality in the hope of better prices later on.

Kibiso.—A fair amount of trade has been done, principally in *Filatures*, the better classes of which have hardened in sympathy with good *Noshi*.

In other sorts, no business.

Offices—Bishopsgate House, London, E.C.

"MONEY AND TRADE" is a fearless critic and exposer of all shams, frauds, and swindles

"MONEY AND TRADE" is THE JOURNAL for Investors, Speculators, Manufacturers, and Traders.

"MONEY AND TRADE" is a thoroughly up-to-date Weekly Record of all Monetary, Trading, and Business Matters. Bankers, Manufacturers, Merchants Storekeepers, and Wholesale Buyers all over the world say it is indispensable

"MONEY AND TRADE" is *not* subsidised by any financial association, clique, or syndicate, but is absolutely free, independent, and honest.

BALANCE SHEETS of Assurance, Banking, Shipping, Trading, Manufacturing, and Trust Companies are fearlessly and impartially criticised in "MONEY AND TRADE."

"MONEY AND TRADE" enjoys a very large circulation, not only in Great Britain and Ireland, but also in all Foreign markets where English goods are sold; and, as it goes *direct into the hands of the wholesale and retail buyers*, it offers unique advantages to advertisers.

THE MONTHLY FOREIGN AND COLONIAL EDITION is published on the last Wednesday in each month, and is forwarded direct to the Foreign Agents and Correspondents of all the leading English Merchants, and to all the large Wholesale Buyers and Storekeepers in the Colonies, India, China, Japan, South America, and other countries.

Established a Quarter of a Century

A DELIGHTFUL MOUNTAIN RESORT.

THE most delightful Mountain Resort in the Hakone District is the KAIKATEI, at KOWAKI-DANI, which is admitted by the Medical Faculty of Tokyo and Yokohama to be the Sunniest, Breeziest, and most healthful spot accessible to Foreigners in the Hakone District, standing alone and delightfully situated upon the mountain side, free from every suspicion of bad drainage and malaria, with a cool and constant breeze in the hot summer weather, and a view not to be equalled in the neighbourhood for variety and extent.

The BATHS are filled with a constant and never-failing supply from the HOT MINERAL SPRINGS just above the Hotel, the medicinal virtues of which are too well-known to need recapitulation. It is sufficient to say that whereas Visitors find many of the hot springs enervating, those at Kowaki-dani are distinctly invigorating.

One of the features of the Kaikatei is the detached Suites of Apartments, where perfect quiet and privacy can be secured. This arrangement for invalids and convalescents from the Tropics is a great desideratum, as being entirely removed from the Dining Room, Billiard Room, Bar, and Baths, while all are connected by covered passages.

To a Liberal Table are added an excellent *Cuisine* and good attendance, supplemented by a large variety of Wines, Spirits, and Malt Liquors of the very best kinds.

For the amusement of Guests, a fine English Billiard Table, by Burroughs and Watts, has been added to the Establishment, as well as Archery, Quoits, and other Games, and Ponies for riding over the hills and a Yacht for sailing on Hakone Lake can be hired.

Visitors to Kowaki-dani who bring a rod with them will be shown the haunts of the speckled Trout, a nice stream of several miles in length being within easy walking distance of the Hotel; Hakone Lake is also well stocked with a variety of fish, including salmon, and the Fishing is FREE; while Entomologists will find rare and valuable specimens in the surrounding hills, and the Flora of the district is extremely interesting to the Botanist.

Apartments may be secured by Letter or Telegram, and Special arrangements made for the conveyance of Visitors and Baggage from the Tramway Terminus at Yumoto, by addressing

Y. HOSHINO,

KAIKATEI, KOWAKI-DANI,
HAKONE.

THE GREATEST WONDERS OF MODERN TIME.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

MR. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a tea-spoonful of Ointment was worth a fowl and any quantity of peas—and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

Contractors to the British Admiralty, Foreign Governments, Leading Steamship Companies, & Yacht Owners in all parts of the World.

STEAM LAUNCHES & YACHTS

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel
2. First-class Workmanship
3. Moderate Prices.
4. Greatest obtainable power for weight and acesp accupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 40 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c, &c. We supply sets of Machinery separately. We are also sole makers of the

KINGDON PATENT LIGHT PORTABLE ENGINE

Stock sizes, 1½ to 6 H.P. Burns less fuel, and gives *three times the power*, weight for weight, of any other engine Awarded First Prize by Royal Agricultural Society England, 1890, in competition open to all makers.

YOKOHAMA: SATURDAY, DEC. 30TH, 1893

SUMMARY OF NEWS.

MR. SUGIMURA, a Secretary in the Japanese Legation in Korea, has been recalled.

THE Yokohama Victoria Public School easily defeated the representatives of the Tokyo schools at football on Saturday last.

DURING the week the Italian Language Society and the Japan Economical Society have held meetings at the Imperial Hotel.

VERY bad weather was experienced in the Hokkaido during Christmas-day. The storm was preceded by a slight earthquake shock

THE *Admiral Korniloff* and the *Zabiaka*, of the Russian Asiatic Squadron, have left Yokohama for Kobe, after a two months' visit.

A SUGGESTION comes from Hongkong for a meeting of cricket elevens from China and Japan, at Hongkong, during the Chinese New Year holidays.

MR. A. D. JONES, U.S. Consul General to Shanghai, died on 9th December, on the voyage between Yokohama and San Francisco. He had gone home on sick leave.

MR. CONSUL-GENERAL TILLOTSON was presented at the American Consulate on Saturday last, with a gold repeater-watch, chain, and diamond locket, as a parting souvenir of his stay in Yokohama.

CHRISTMAS-DAY was duly observed on Monday. Special services were held in the churches, while a football match took place during the afternoon. The weather was bright and sunshiny, with a frost at sundown.

MR. YAMAGUCHI, a Judge of the Tokyo Local Court, who has been under arrest for some time in connection with the case of Nishigori Gosei, is now in a state of mental disorder. He is receiving medical treatment.

THE New Year review of troops of the Tokyo garrison takes place at the Aoyama Parade Ground on the 8th of January next, in the presence of H.I.M. the Emperor, who will leave the Palace at 9.30 a.m.

MR MUTSU, Minister for Foreign Affairs, delivered a strong speech in the Diet on Friday last, stating the Government's position in regard to Foreign Affairs and its determination to carry out its policy of opening the country.

THE fine weather that has prevailed for several weeks was broken on Wednesday by a fall of snow, which lasted for several hours of the forenoon. A thaw quickly set in and very little snow remained by evening, except in sheltered places.

MR. HOSHI TORU was heartily received by his electors in the First Division of Tochigi Prefecture the other day. His campaign prospects are bright. Troops of *soshi* have invaded the district, having been hired by both parties in the contest.

THE resignation of Mr. Saito Shuichiro, Vice-Minister of Agriculture and Commerce, will, it is said, be accepted in a day or two, and the names of Messrs. Komatsubara, Governor of Shizuoka, and Asada, Governor of Nagano, are mentioned as candidates for the post.

A WEEKLY magazine, called the *Travellers' Gazette*, printed in Japanese and English, appeared for the first time in the capital on Christmas Day. It has caused much amusement through its queer specimens of "English as she is Japanned."

A FIRE of shavings and old paint in the basement of No. 26, on Christmas-day afternoon, gave rise to an alarm of fire. Happily there was no occasion for the services of the Fire Brigade, as the smouldering embers of the little blaze had died out by the time the firemen reached the spot.

AN Imperial Message from the Throne dealing with the present political situation, was given by the Emperor to his Ministers of State on Sunday. The Ministers of State are exhorted to maintain discipline among their official staffs, while the Lower House is told that no interference with the Emperor's prerogative regarding the appointment or dismissal of Ministers will be allowed. The Message concludes with a reference to foreign affairs.

NOTWITHSTANDING the Imperial Message of Sunday last, and the further prorogation of the House of Representatives for another fourteen days, there is every prospect of further disturbance in the Lower House, upon the resembly of the Diet. Some of the more rabid members of the Opposition are seeking to present an Address to the Throne, complaining of the Privy Council's attitude toward the Lower House in the Memorial which the former body presented to the Throne.

As an indication of the state of public opinion, at least among the more youthful and reckless of the Opposition politicians, the *Jiyu* prints a paragraph to the effect that rumour has it that Mr. Okamura Terubiko is receiving many threatening letters from *soshi*, who allege that he was bribed by the P. and O. Company to the extent of *yen* 50 000 to lose every case which he brings against them on behalf of the Government or other Japanese plaintiffs.

THE villagers of Furuhama-mura, Kuwana District, Miye Prefecture, hit upon a novel plan to detect some thieves. They have suffered from many robberies of late, but nobody was ever arrested. Suspicions, however, fell on three persons. To decide the matter, a ballot was taken, and as a result the three men were found to be mentioned on all the ballots. They were consequently examined and then confessed to the crimes.

THE United States Government is sending a large fleet to Rio de Janeiro, it is supposed with the intention of preventing the restoration of the monarchy by the insurgents; the Italians have had an engagement near Massowah with 10,000 Dervishes, upon whom they inflicted a heavy loss, the Italian force losing four officers and one hundred men; the Pamirs negotiations in St. Petersburg are proceeding slowly, China having many objections to urge against the further advance of Russia; the session of the House of Commons has been prolonged till the 20th of January, the session is exhausting both members and the officials of the House, and *The Times* says the Government is riding for a fall; Sir Philip H. M. Currie, K.C.B., is the new British Ambassador to Constantinople; the frontier commission for the Siamese buffer-state has been formed; the House of Commons has rejected the Lords' "contracting-out," amendment to the Employers' Liability Bill; the question of the Duke of Edinburgh's annuities has come up in the House of Commons, the Duke having retained the £10,000 marriage annuity, and renounced the £15,000 annuity voted him by the country as a member of the Royal family; the Sultan of Morocco has promised to surrender his authority over the Kabyle tribes who were the agressors at Melilla, and has agreed to pay an indemnity and arrange a neutral zone; it is believed that France meditates sending an expedition to Madagascar against the organised marauding bands that have been attacking outposts; Mr. Rhodes has telegraphed that the Matabele have been completely subdued; the Premiers of Australia have unanimously resolved to invite the Duke of York and his wife to visit the Colonies next year.

THE usual condition of the Import trade at this period of the year has come about, and all branches are more or less at a standstill, Yarns, Piece-goods, and Woollens being scarcely looked at, with Metals, Kerosene, and Sugar in very similar case. As New Year's Day occurs next week the state of the various markets may be accurately foretold, and very little business will be done during the next interval. Holders of various imports are not pressing sales, as stocks in the interior are not large, and buyers must shortly come into the market from various directions, and though transactions have scarcely been sufficient during the past week to make quotations, rates are fully maintained and likely to continue so. The Silk trade in the early part of the week appeared to be assuming large dimensions, but, prices being further advanced, a check came, and the total settlements—including nearly 200 piculs direct shipment—amount to but little over 1,000 piculs. These purchases have made no impression on the stock, arrivals keeping up the quantity on offer. The demand for Waste Silk has revived, and some of the heavy transactions referred to last week as pending were put through, but buying was in few hands. Quotations are unaltered, and arrivals keep up the stock of export fibre, though on the whole it has been reduced by nearly 1,000 piculs, but this is on account of large parcels of low grade being taken for Japanese spinners in the interior. Nothing to report in the Tea trade. Exchange has further declined, and closes with a downward tendency.

THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK

The Diet has again been prorogued for a fortnight. The situation remains undecided. The prevailing impression is that the only outcome will be dissolution of the House of Representatives. Meanwhile, wider credence is given to a report that a definite understanding exists between the National Unionists and the Progressionists. The persistency with which the papers representing the two parties call up in the Cabinet Ministers to resign is taken as a confirmation of the report. We give in the following paragraph *resumés* of the principal articles on the situation.

* * *

The *Hochi Shimbun* (Progressionist) is of opinion that the principal cause of the continued collision between the Executive and the Legislature lies in the former's obstinate adhesion to the doctrine of *chōsen naikaku* (Cabinet independent of all parties). Unless that benighted fancy be given up our contemporary believes that it will be absolutely impossible for the Government to conduct the administration in harmony with the Diet. Moreover, in practice, each successive Cabinet since the establishment of the Diet has tried to obtain a majority in the House of Representatives by allying itself with some of the parties having strength there. But no Cabinet has dared openly to acknowledge such an alliance. Had they publicly expounded the principle of party Government, the clan statesmen might have been able to collect about themselves a large following. Even now it is not too late for them to form their own party. Those in power are advised to leave office and set themselves about the task of forming a party. They are assured that in two or three years' time they would be able to return to office with their position strengthened a hundred-fold.

* * *

The *Yomiuri Shimbun* (Philo-Progressionist) writes in a similar strain. The present Cabinet is recommended to see whether it can secure a majority in the House of Representatives by openly allying itself with some of the parties, and failing in such attempt, is advised to hand over the reins of Government to the politicians of the Opposition.

* * *

The *Chu-o Shimbun* (National Unionist organ), as already noticed in these columns, goes so far as to advise Count Ito to recommend Count Okuma to the Emperor as his successor. Our contemporary thinks, with the rest of the Opposition journals, that the present Ministry has no right to remain in office after the House of Representatives has clearly indicated want of confidence in it. The National Unionist organ seems to have become reconciled to the doctrine of party Government which has hitherto been the object of its strongest denunciation.

* * *

The *Nioku Shimpo* also, which, though not belonging to any of the parties concerned, is understood to be friendly to a section of the Opposition, contends that the time has come to look for the formation of a Cabinet composed of non-clan statesmen. Mere replacement of one clan Cabinet by another has no effect upon the general position between the Executive and the Legislature. Such temporizing measures will not prove more effectual to prolong the life of the clan Government than frequent changes in the Ministers of the Tokugawa Court were able to delay the fall of that Government. It is, therefore, high time, in the *Nioku's*" opinion, to call new men into power and inaugurate anew epoch in the political history of the country.

* * *

The *Nichi Nichi Shimbun* has an interesting article on this question. Our contemporary is convinced that the first duty of the present Cabinet is to remain in office at least until proper successors shall have been found. In the present condition of things, there is no statesman possessing qualifications sufficient to justify his being entrusted with the conduct of the Administration. Counts Yamagata and Matsukata are equally unwilling to form a Ministry. Count Okuma and Count Itagaki are advocates of Party Government, but neither of them possess a sufficient following to undertake the organisation of a Cabinet. Count Kuroda, Count Saigo, and Count Oyama are fit to occupy the position of Premier, but they are members of the present Cabinet, and their appointment in the place of Count Ito would not change the character of the Ministry in the least degree. Hence Count Ito and his colleagues are bound to stay in their places and complete the great work begun at the Restoration. Some persons profess to be disappointed with the present Cabinet, but if they really believe that the statesmen now in office cannot do much to rescue the country from the present unfortunate position, they ought to be aware that what exceeds the capacity of the present Ministry would be much more in excess of that of any other Ministry. It is the bounden duty of the present Cabinet Ministers not the leave office until there shall have grown up a group of statesmen fitted in ability and confidence to succeed them in the direction of public affairs.

* * *

In proportion as the report of alliance between the Progressionists and the National Unionists is more widely circulated, the *Kaishin-to* organs grow more vehement in holding up the Radical Party to public ridicule by accusing it of a secret combination with the Cabinet. The Party's opposition to strict enforcement of the treaties is regarded as a conclusive sign of its identification with the Government.

* * *

The question of strict enforcement of the treaties has occupied a prominent position in the columns of the vernacular press during the week. The papers now under the ban of suspension, the *Nippon*, the *Nioku Shimpo*, and the *Chu-o Shimbun*, have been most conspicuous for their zeal in the discussion of this question. But there is nothing worthy of notice in their articles, for they dispense with calm reasoning and adopt the easier method of appealing to the prejudices of the ignorant masses. It is well that they have been suspended at the present moment. But their editors are understood to promise their readers that, so soon as the ban is removed, they will resume their advocacy of the cause of treaty enforcement with redoubled energy and directness.

* * *

Of the Progressionist organs, the *Mainichi Shimbun* explains its Party's position in regard to this question, while the *Hochi Shimbun* gives expression to apprehensions entertained by some members of the Party about the probable consequences of an appeal to the country on such a subject. The former journal writes:—"There are some persons who think that the principles of strict enforcement of the treaties is incompatible with the avowed foreign policy of the Progressionist Party. They are, however, gravely mistaken. Our Party is in favour of mixed residence, and advocates the speedy settlement of the question of Treaty Revision. But a mistaken notion has been suggested by the fact that the Representation on the strict enforcement of the treaties has been introduced by a section of politicians opposed to the immediate opening of the interior for mixed residence. Whatever difference of opinion may exist on the subject of mixed residence between that section and our Party, the ideas of both happen to coincide on the question of treaty enforcement. Indeed the necessity of rigidly carrying out the treaty stipulations was openly admitted at the grand meeting of the Progressionist Party. In order to revise the treaties and recover the sovereign rights of the Empire, it is important to withhold from foreigners all privileges and facilities not legitimately granted them by the treaties, so that foreign nations themselves may be induced to come and ask the Japanese Government for revision * * * * When Count Okuma was Minister of Foreign Affairs, he even risked his life for the attainment of the object of Treaty Revision, but at the same time he did not fail to exert all his endeavours for the enforcement of the treaties. Will any body still dare to maintain that the principle of treaty enforcement is incompatible with the foreign policy of the *Kaishin-to*? * * * * This is moreover, a national question, and there is no reason why it should not be supported because it has been introduced into the Diet by opponents of the immediate opening of the country for mixed residence."

* * *

The *Hochi* admits that strict enforcement of the treaties is a matter of vital importance, and that it has always been advocated by the Progressionist party. However, great caution is needed in handling this question, for its discussion, unless properly regulated, may become a means of reviving the old *jō-i* (exclusion of barbarians) spirit. Our contemporary earnestly advises advocates of the doctrine to take care lest they mislead the ignorant classes by propagating one-sided and bigotted opinions and appealing to the prejudices of the people. The *Hochi* fears that, should the Diet be dissolved on this question, the general elections would become a fight between reason and prejudice. Expressions like "traitor," "betrayer of the people," "disloyal," "slaves of Europeans," and so forth, would be watch-words throughout the country. It is well for the Diet to demand strict enforcement of the treaties, but the *Hochi* does not think it right or wise on the Government's part to order dissolution on this question. In our contemporary's opinion, there are already men imbued with more or less of the *jō-i* spirit, and an appeal to the country on such an issue would at once fan the smouldering fire into an active blaze all over the country. In such a case, the *Hochi* proposes to hold the Cabinet responsible for the whole affair.

* * *

The Radical organ, the *Jiyu Shimbun*, was at first ambiguous on this subject, as noticed in our last weekly summary. During the present week, however, it has definitely announced that its Party is opposed to the Representation on the Strict Enforcement of the Treaties. Our contemporary does not hesitate to state that the vigour with which this question has been raised is the outcome simply of a desire to win popularity. Now that the House of Representatives has positively declared its wish for a speedy revision of the treaties, the *Jiyu* thinks it absurd to make such a fuss about evils which will vanish as soon as the question of revision shall have been satisfactorily settled. That it will be satisfactorily settled in the near future, the Radical organ does not doubt. The evils complained of certainly exist, but so long as the present imperfect treaties and their accompaniment, the system of foreign settlements, remain in force, it will be impossible to correct many of those evils. A great party like the *Jiyu-ha*, says our contemporary, has no time to waste in the advocacy of such a silly course of action.

* * *

Independent papers like the *Jiji Shimpo* and the *Nichi Nichi Shimbun* are of course opposed to the agitation for strict enforcement of the treaties. Their opinions having been noticed already, we will refer in the present summary to a very sensible series of articles in another independent paper, the *Kokkai*. Alluding to the explanatory document attached to the Representation on strict enforcement of the treaties, our contemporary observes that many of the steps proposed in it are either impracticable or useless, while in some places the arguments employed are of a character likely to be rejected as savouring of the *jō-i* spirit. For instance, the *Kokkai* does not think that there is any necessity to interfere with the ownership of lands and houses so long as there is no direct evidence of violation of the law, while it is equally absurd to complain of the opening of stores or the starting of enterprises with capital borrowed from foreigners. However, our contemporary is of opinion that the administrative authority as well the Government's right of imposing taxes should be rigidly extended to the foreign settlements. At the same time, it insists that all possible facilities of trade should be given to foreigners, in so far as such

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

facilities do not interfere with the sovereign rights of the Empire.

* * *

Count Goto continues to be the object of journalistic criticisms. He is called by various ugly names It is, however, unnecessary to refer to these comments, as they are merely repetitions of what has already been reproduced in these columns.

* * *

The Imperial Message and the Memorial of the Privy Council on the subject of official discipline, have, of course, attracted much attention. Journalistic remarks on this question have already been noticed separately.

EDITORIAL NOTES.

THE SITUATION.

THE following note appeared in the *Nichi Nichi Shimbun* of Sunday last:—"There is no sense in the report that a collision has taken place between Count Ito and Count Yamagata. Count Ito asked permission to take upon himself the whole responsibility of the situation, and Count Yamagata has been summoned back by the Emperor. On what grounds could a collision take place between them? Some people deny that Count Yamagata has declared himself opposed to the resignation of any Minister in obedience to the wish of the Diet. He may not have made such a declaration explicitly on the present occasion, but there is no doubt that the opinion held by him has always been of that nature. The report about Mr. Mutsu's resignation has no foundation. We saw him discoursing in high spirits with the Foreign Representatives on his latest reception day, as well as at a dinner given by Mr. Sannomiya. He is not likely to resign until after he shall have done his utmost for the revision of the Treaties. As to Count Saigo, he is known to have rejected the advice of Viscount Shinagawa and some of the National Unionists to resign, so that there is no reason to expect his departure from office. Yesterday he was seen coming home from the Naval Department in his usual composed manner. Count Goto presented an Address to the Emperor on the day when the House of Representatives addressed the Throne with reference to official discipline; and is now awaiting His Majesty's pleasure. However, so far as his ill-health permits him, he is attending to his official duties in the usual manner. Count Ito's industry is greater than ever. He seems to be resolved to go on his own way in spite of any difficulties, however great. He will not give up the fight of his own accord without some very special reason. The National Unionists seem to be particularly afraid of a dissolution Their organ is taking much pains to impress upon the Government the unwisdom of such a step at the present moment. It is also saying good things of Mr. Mutsu, as though it had not previously treated him in the light of one of the bitterest enemies of its Party. The National Unionists have evidently been outwitted by the recent tendency of the Government to pursue a strong foreign policy. There will not be a change of Cabinet, but some step will be taken with regard to the Lower House's Address to the Throne on the subject of official discipline. At the same time, a decisive policy will be adopted towards the Diet. The question of strict enforcement of the treaties alone may suffice for a dissolution. Besides, the Budget and several other problems on which an appeal may be made to the country await discussion. What is needed is decision on the part of the Cabinet. The Ministers of the Crown need not care much about the results of a general election, in so far as their position is affected. But it is certain that a dissolution will at least serve to eliminate a section of the allied Opposition, namely the National Unionists. When the present Cabinet was formed, Count Goto did not know till he received his appointment whether he was to remain in office or not. It is scarcely necessary to deny that, such being the case, the Premier made no secret promise to the present Minister of Agriculture and Commerce. Count Ito is not the man to make such promises. His ideas about resignation may be gathered from the way in which he left the Cabinet in 1888 and the Privy Council in 1889."

THE GOVERNMENT'S INTENTIONS.

THE *Jiji Shimpo* undertakes to interpret the Government's ideas about the prorogation and possible dissolution of the Diet. In the event of dissolution, the Cabinet, says our contemporary, anticipates that by devoting about a hundred thousand *yen* to electioneering purposes, a Government following of 130 can be secured in the Lower House. A campaign such as that organized by the Matsukata Cabinet could never be contemplated by Count Ito and statesmen of his kind: there is nothing for it but to spend some money. How the spending should be done, the *Jiji* does not say: it leaves that to its reader's imagination. But it furnishes an easily grasped clue by adding that the same sum, if judiciously laid out, would secure an equally favourable result for the Government without any dissolution. It seems to us that the *Jiji's* analysis is incomplete. An addition should have been made that the Ito Cabinet is not likely to devote either money or administrative authority to the task of securing a majority in the Lower House, since according to Count Ito's often declared and consistently observed principle, the Ministers of the Crown hold office by the *fiat* of the Emperor, not by the mandate of any political party.

THE PROGRESSIONISTS AND THE NATIONAL UNIONISTS.

ACCORDING to the *Jiyu Shimbun*, it appears that a secret alliance between the Progressionists and the National Unionists already existed at the commencement of the present session of the Diet. In the Radical organ's opinion, the Hoshi drama was simply a device invented by the crafty politicians of the *Kaishin-to* to cement their newly formed friendship with the *Kokumin Kyokai*. While that question was on the *tapis*, Messrs. Shimada Saburo and Ozaki Yukio of the Progressionist Party are said to have held a conference with Viscount Shinagawa, and a few days ago Messrs. Ozaki Yukio and Inukai Ki are reported to have met Count Yamagata. As to the particulars of these meetings, our contemporary declares complete ignorance. But judging from the way in which the two parties are now united in an indiscriminate attack upon the Cabinet, the *Jiyu* does not think it at all difficult to guess the nature of the secret compact existing between them. We (*Japan Mail*) do not vouch for the truth of the statements make by our Tokyo contemporary, but it may be noticed that an alliance between the *Kaishin-to* and the *Kokumin Kyokai* does not now look so improbable as it did a month ago.

LOCAL ASSEMBLIES.

SOME of the Local Assemblies seem to be imitating the disorder of the House of Representatives. For instance, in the Ishikawa Ken Local Assembly, there has been a very lively scene over the qualifications of its Chairman. The supporters of the Chairman triumphed, whereupon the anti-chairman party retired in dudgeon from the Assembly and refused to take any further part in its deliberations. Both parties now appealed to Tokyo, the Governor also sending his report. The Home Office decided against the Chairman, whereupon the Opposition, without waiting for the Governor's announcement, immediately rushed off to the Assembly and tried to expel the Chairman. The Chairman and his friends, however, stuck to their posts and handed the intruders over to the Police. The Governor, in the meantime, steadily refused to see any members of the anti-Chairman party. They had acted without waiting for his initiative, and now he refused to do anything So the matter has been once more referred to Tokyo, where it will in all probability come before the Diet.

THE RAILWAY COUNCIL

AN Investigation Committee of the Railway Council makes the following report on the points submitted to it by the Minister of State for Communications:—As to any regulation of the amount of capital to be invested in railway enterprises, political interference would probably do more harm than good; something, however, might be done by inducing capitalists to invest in such intended lines as may be considered safest by competent authorities. To prevent the establishment of numerous petty railway companies, a locality might be divided into sections, the lines running through any given section to belong to one company. As this would be a work of time, the utmost that can be done at present is to induce the smaller companies to amalgamate. As to the standard of profit that should accrue from railway enterprises, it is impossible to draw any hard-and-fast line, varying as conditions do according to the locality. Finally, no proposed line should be sanctioned until compared with those already established with a view to ascertaining whether it is likely to prove profitable.

THE BUSINESS TAX ON THE MANAGERS OF BANKS AND COMPANIES.

ACCORDING to the revised regulations of the Chamber of Commerce, the managers of Banks and Joint Stock Companies have, as some of our readers will probably remember, been made eligible for all the privileges of the Chambers. The Tokyo-Fu authorities are consequently of the opinion that they should pay the tax paid by other business men, and a notification to this effect was issued by the Governor of Tokyo in 1892.—(No 23) Against this notification a protest was made by the managers, on the ground that as they were not merchants, but merely agents conducting business on behalf of their employers, they were exempt from the tax. The matter was brought before the Tokyo Local Court some time ago in an action by Mr Shioda Heigoro, of the Mitsu Bishi Co., and Mr. Uchida Kosaku, of the Nippon Yusen Kwaisha, against the Headmen of the Kanda and Koishikawa Wards. This Court gave a decision against the plaintiffs, but on an appeal to the Administrative Court the judgment was reversed on the 17th instant. The managers therefore have won the day. It is expected that Notification No. 23 will be withdrawn very shortly, and in cases where the tax has been paid, the amount will be refunded on application being made to the municipal office.

REPRESENTATION ON THE STRICT ENFORCEMENT OF THE TREATIES.

THE following is the continuation of the Representation introduced by Mr. Abei Hankon in the House of Representatives concluded from Saturday:—

The history of the establishment of Quarantine Regulations contains a fact which has important bearings upon the national rights of the country, namely, that the Japanese Government is not competent to enforce against foreigners measures of its own framed for preventing the spread of infectious diseases, the control in this matter being only indirectly exercised through the goodwill of the Representatives of the Treaty Powers. Practically our Regulations are in operation over foreigners, but our Government has no power to directly enforce such Regulations, and in so far the national rights of the country must be said to have suffered. This regrettable state of affairs has been brought about principally through want of resolution on the part of our Government, and through its habitual tendency to be indulgent to foreigners and to regard with indifference important matters of diplomacy. In the following paragraphs, we cite some of the salient facts connected with this part of our subject:—

In the 8th month of the 6th year of *Meiji*, cholera being prevalent in Shanghai, our Government consulted with the different foreign Ministers and enacted a set of Quarantine Regulations, in which it was provided that the foreign Consuls were to be admitted into the Sanitary Committee. But there was, fortunately, no occasion for carrying out these Regulations.

In the 10th year of *Meiji*, cholera broke out in Kyushu, and finally reached Yokohama. There being various objections to the Quarantine Regulations of the 6th year of *Meiji*, they could not be put into operation, and a new set of Regulations was drawn up and submitted to the different foreign Representatives, who at once sent back the document to the Government with various proposals for amendment. The Japanese Government then appointed a Committee to re-cast the Regulations, which, having been thus amended, were at once

Digitized by Google Original from JN VERSITY OF ILLINOIS AT JRBANA CHAMPAIGN

approved by the Ministers of the United States and Russia, the French Minister, however, suggesting further alterations. The English Minister alone took a different position, and asserted his right of interfering with the legislative authority of Japan, alleging that the proposed Regulations could not be applied to the ships and subjects of his country without his consent. The Japanese Government traversed his arguments, declaring that Japan, as a point of sovereignty, possessed the right to enact such Regulations as she might consider of public benefit, and that the right of final approval and amendment could never be delegated to foreign Governments. The English Minister firmly adhered to his original position, and while time was being wasted in discussion, the disease spread as far as Nagasaki. Thereupon the Government drew up provisional Regulations to be applied to ships, Japanese and foreign, navigating between Nagasaki and Yokohama, and submitted them to the foreign Ministers for approval. The Italian Minister signified his consent, inasmuch as the matter, in his opinion, was of urgent importance, but the French Minister having again raised objections, the Regulations were not carried out in the case of foreign ships generally.

In the 12th year of *Meiji*, the same disease again broke out in the South-west, and speedily extended to Kobe and Osaka. The Government enacted provisionary Regulations and ordered all ships arriving from the infected districts to enter the port of Nagatura and there lie at anchor for a certain period of time. In the 7th month of the same year, the Government promulgated the Quarantine Regulations, and simultaneously copies of these Regulations were sent to the foreign Ministers, desiring them to take the necessary steps for their application to foreigners in the different settlements, in accordance with a process hitherto considered convenient under similar circumstances. The United States Minister immediately gave his consent, but the Ministers of Germany and France proposed amendments, while the English Minister not only objected to these Regulations, but drew up a special set of rules and published them for observance by his nationals. The Japanese Government protested against this step on the part of the British Representative, but the latter replied that, only English laws being recognized in English Courts of law, the Quarantine Regulations must be converted into English law in order to have binding force on British subjects. To this our Government is said to have made no reply.

Thus, even in the case of Regulations equally important to both Japanese and foreigners, the Foreign Ministers are cautious not to establish a precedent prejudicial to their interests. At present our Quarantine Regulations are practically in operation against foreigners, but the foreign Representatives still continue to refuse to acknowledge Japan's exclusive right of legislation. They either publish these Regulations over their own signatures, or go through the formality of re-enacting them. In either case their object is to assert the privilege they have once obtained. On the other hand, the policy followed by the Japanese Government is quite the reverse of that pursued by the Representatives of the Treaty Powers. It is customary with our Government to take a lenient view of each case, and make concessions to Western Powers. A strange and abnormal policy, truly!

LICENSES FOR THE PURSUIT OF GAME.

The existing treaties contain no provision granting to foreigners the privilege of pursuing game. But the demands of the foreigners being persistent, the Government found itself unable to withhold from them that privilege. As foreigners enjoy the privilege entirely through Japan's good-will, they ought to observe the provisions of Japanese law relating to the pursuit of game. But such is their presumptuousness that even in this matter they have interfered with the national rights of Japan. A brief historical account of the question is given below.

In the 10th month of the 1st year of *Man-yen* (1860), an Englishman, named Moss, wounded a Japanese official while hunting in the Prefecture of Kanagawa. The Tokugawa Government caused the Englishman to be deported, after exacting from him an indemnity of 1,000 dollars. In the 12th month of the 3rd year of *Meiji*, Game Regulations applicable to foreigners were enacted after the views of the various foreign Ministers had been consulted. In the 1st month of the 6th year of *Meiji*, Game Regulations were proclaimed throughout the country by Imperial Ordinance No 25, and our Government drew up new provisionary Regulations applicable to foreigners, and intimated to the foreign Ministers that any foreigner not conforming with the Regulations would not be permitted to pursue game. But the foreign Representatives refused their consent to the new Regulations, which consequently fell through. In the following year, a fresh draft of Regulations was compiled and presented to the Foreign Ministers for approval. There being in that draft a clause providing that infractions of the Regulations were to be tried in the Consular Courts but that whatever fines might be collected should be paid to the Japanese Government, the Foreign Ministers replied that, unless they received instructions from their respective Governments, they were unable to give any definite answer to such a proposal. The Japanese Government allowed them until the 6th month of the following year to obtain definite instructions from home. At that date, the British Minister, in his capacity of *Doyen* of the *Corps Diplomatique*, proposed that the clause relating to the payment of fines to the Japanese Government should be omitted altogether. This proposal was positively refused by our Government, and in the 9th month of the same year it informed the Representatives of the various foreign Powers that, unless the original draft were adopted in its entirety, the privilege of pursuing game would not be granted to foreigners. The negotiations on this question were subsequently revived again and again, but the attempt did not succeed in bringing foreigners under the operation of our Game Regulations. In the 9th year of *Meiji*, the Ministers of the different Treaty Powers drew up a draft of Special Regulations under their joint signatures, and our Government, in consultation with them, finally adopted the following provisions:—

"1.—Any foreigner desiring to pursue game must pay 10 *yen* for a license good for the whole season, or 5 *yen* for one good for half of the season."

"2.—Any foreigner violating the specifications written on the license, shall be liable to the payment of 10 *yen*, indemnity to the Japanese Government on the institution of a Civil Case against him by the said Government."

"3.—In case a foreigner engages in the pursuit of game without a license, he shall be punished according to the law of his native country on a complaint being lodged in the Consular Court by the Japanese Government."

The British Minister, taking these provisions as a basis, enacted Regulations for punishing persons who pursued game without a license, on the 2nd of the 1st month of the 10th year of *Meiji*, and British subjects became subject to these Regulations. The rules now in force on this matter among foreigners generally may be regarded as a conditional agreement between the Japanese Government and foreign sportsmen, and do not at all partake of the character of the country's administrative regulations.

The Game Regulations issued last year have been pronounced unconstitutional by the House of Representatives, and it is, consequently, unnecessary to speak at any length about them. In short, it is to be noticed that on the question of the pursuit of game, the national rights of the country have suffered much injury.

TRAVEL

According to the express stipulations of the treaties, foreigners' privilege of travel is limited to fixed regions surrounding the respective settlements. Only Ministers and Consuls were originally allowed to pass beyond these limits, and even Ministers and Consuls were to be accompanied by Japanese officials. We may well imagine the inconvenience which would be felt by foreigners, were the treaty stipulation on this subject enforced strictly. But, so long as the present unsatisfactory system of dividing judicial powers between Japan and foreign States is maintained, such restrictions upon foreigners must be considered as necessary conditions of that system. Foreigners, however, are always complaining of the inconvenience of the system and trying to have the restrictions removed by the Japanese Government. Our Government, on its part, is very often misled by considerations of a temporary nature into relaxing these essential conditions of the imperfect system now in force. Thus the present abuses in respect of travel in the interior are to be ascribed to the readiness of our Government to relax the original restrictions of the treaties in compliance with the demand of foreign Powers. In the following paragraphs allusion will be made to the more important of the facts generally known in connection with this part of the subject.

In the 4th month of the 2nd year of *Meiji*, a foreign medical practitioner in Nagasaki asked permission to visit a hot-spring outside treaty limits for the benefit of his health. The permission was granted. But the Government made it a rule not to grant such a favour, unless in cases of sickness, shipwreck, employment by Japanese, prosecution of scientific studies, surveying, and so forth; and even the Ministers of the Treaty Powers were not allowed to go into the interior without first obtaining the permission of the Government. In the 10th month of the 3rd year of *Meiji*, permission was given to foreigners to visit freely temples and shrines in Tokyo, the limits of free movement for foreigners in Tokyo being marked on the east by the Sumi-Tone river; on the north by a line extending from Kuricho, through Senju, and along the upper part of the Sumida-gawa, to Takakura; on the south, to Hinowatari on the Tamagawa; and on the west by the Tamagawa from Hinowatari to its mouth at Kawasaki. A notice was at the same time issued to people residing within this circle, instructing them to offer no obstructions to the passage of foreigners. In the 7th month of the 6th year of *Meiji*, the Ministers of the various Treaty Powers addressed to the Government a joint note asking for the abolition of the treaty limits and the grant of liberty to travel in the interior. At that time Ambassador Iwakura was in Europe instructed to open negotiations for the revision of the treaties, and the Japanese Government declined to give any definite answer to the note of the Foreign Ministers until the return of the Ambassador. In the middle of the 9th month of the same year, the Ambassador returned to Japan, and his return was followed by a renewal of the Foreign Ministers' request that their nationals be permitted to travel and trade freely in the interior, the joint note being on this occasion accompanied by a draft of regulations on the subject. Negotiations were subsequently opened between the Japanese Government Foreign Representatives, but the latter's request and the was not granted.

Nevertheless, while, on the one hand, rejecting the demand of the foreign Ministers, the Japanese Government, on the other, effectually relaxed the restrictions on travel in the interior by establishing, in the 6th month of the 7th year of *Meiji*, Rules giving permission to foreigners to travel in the Interior. By these Rules, it was fixed that passports might be issued by the Foreign Office to such foreigners as might apply for leave to travel in the interior either in the discharge of official duties, or for the benefit of their health, or on account of shipwreck. Foreigners in the service of the Japanese Government had, previous to the above mentioned date, been provided with passports for travel in the interior for approved reasons, but the privilege had been abused by them so much that their passports were withdrawn on the enactment of the Rules above alluded to. The Government, at the same time, sent officials to Nikko, Ikao, Hakone, Atami, and other places to see if the foreigners staying there were properly provided with passports. Out of sixty three foreigners stopping at those places, six were not provided with passports, and they were at once sent back to Tokyo. Thus for a time the restrictions upon travel were apparently maintained with a firm hand. Foreign Ministers, however, were not satisfied with that state of things and repeatedly applied for the privilege of travel in the interior for their nationals. The Foreign Minister, the late Count Terajima, rejected these applications on the ground that the existence of Consular Jurisdiction made it impossible for the Japanese Government to properly control foreigners in the interior. In the 5th month of the same year some alterations were introduced in the Rules mentioned above, but the system of passports was not given up. In the 11th month of the same year, permission was accorded to foreigners to put up in hotels within the treaty limits, and those suffering from sickness were allowed to stay even at private houses. These were fresh relaxations of the treaty restrictions upon the privilege of travel. In the 8th month of the 9th year of *Meiji*, foreigners were permitted to visit Kyoto for purposes of scientific research or for the benefit of their health. Formerly no foreigner, except Ministers, had been allowed to enter Kyoto. When the railway was extended further, applications were made by foreigners for permission to go there, and an Exhibition being then held in the city, the Government temporarily relaxed the restriction, and the favour then granted has not since been withdrawn. At that time foreigners were not permitted to extend their journey beyond the limits of the city, except to Nara, and to Lake Biwa as far as Hikone on the east, Kusatsu on the South, and Shiwotsu and Chikubu jima on the north. In the 9th month of the 11th year of *Meiji*, permission was granted to foreigners suffering from sickness to take lodgings at private houses in the interior. This permission, it is said, was given in consequence of inconvenience actually experienced under the former system. In the 11th month of the 12th year, in response to complaints by foreigners at Nagasaki, the treaty limits, which had been co-extensive with the district under the direct control of the *Bugyo*, were extended to ten *ri* in every direction from the settlement.

The opening of the country being an essential feature of the national policy, the closing of the interior to foreign travel is not in itself a praiseworthy thing. But it must be borne in mind that an attitude of indulgence and generosity on our part, if not reciprocated by a similar attitude on the part of foreign Powers, only leads to increased trampling upon treaty stipulations, and to increased difficulty in recovering for Japan her national rights. An ever-growing number of foreigners now openly

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

occupy houses of their own under the pretext of scientific research or ill health, at Nikko, Kamakura, Suma, and other resorts noted for beauty of scenery. In short, the treaty restrictions on the travel of foreigners in the interior are now in danger of losing all effect. In the 21st year of *Meiji*, the Minister of Foreign Affairs, Count Okuma, did something to correct the prevailing evil, to restrain the issue of passports, and to let foreigners understand that the grant of passports entirely depends upon the goodwill of the Japanese Government, and is in no sense a right which foreigners are entitled to demand. But the Government has not pursued a fixed policy on the matter, and the present unsatisfactory state of affairs has resulted. The Government's responsibility is not a light one.

MODE OF DEALING WITH POACHING SHIPS.

The right to engage in fishing has not been given to foreigners under the existing treaties. But foreigners yearly come with fishing vessels into Yokohama and other ports to obtain supplies of provisions and other necessary articles, and there are also some foreigners in Yokohama who find capital for these fishing vessels. Yokohama and some other ports seem to be regarded by foreigners as stations for these fishing schooners. When the vessels return loaded with the proceeds of their operations, they transfer their catch to other ships in the port without paying anything in the form of either import or export duties. It is not easy to ascertain the value of the skins transhipped in this way. How many millions of *yen* they are worth, those well conversant with such things in Yokohama will no doubt be able to calculate for themselves.

It is reported that these vessels ply their trade sometimes off the coasts of Iga and Kishu. But most of them go to the seas off the coasts of the Provinces of Ou and Cishima (Kurile Islands). When they detect the approach of a Japanese war vessel, they get out of her sight and thus escape being caught in the territorial waters of Japan. When they occasionally enter any of the ports on the coasts of Kishu or the Ou Provinces, the Local Authorities are afraid of meddling with them, lest some trouble may result, and so these vessels are suffered to come and go unmolested. At present, therefore, poaching is openly practised in Japanese waters. If the Government intends to excuse itself on the pretext of want of proof, there is no help for it. But is it right for the Government to look with indifference upon the evil of open poaching, the existence of which is perceived by the people in general?

THE CONTROL OF CHURCHES.

Liberty of religious worship is guaranteed to Japanese subjects by the Constitution within the limits of law. Foreigners also enjoy the same privilege in virtue of an express treaty provision. Thus in respect of freedom of worship, there ought to be no distinction between Japanese and foreigners. But, while the original religions of Japan and the shrines and temples are governed by certain regulations under the supervision of the Shrines and Temples Bureau, these regulations are not extended to the churches of the foreign religion. The relative merits of the Japanese and foreign religions need not be discussed here. But of late there have been numerous instances of believers in the foreign religion giving offence to the national feelings of the people by casting vilifying reflections upon the established ceremonies of the Empire. It is needless to say that proper control ought to be exercised over Churches belonging to foreign religions.

ADMINISTRATIVE REGULATIONS.

Administrative regulations which may be applied to foreigners, such, for instance, as Railway Regulations, Kerosene Regulations, Regulations relating to the Import of Opium for Medical Use, Regulations about Lost Articles, and so forth, have not yet been carried out in the case of foreigners, on the pretext that necessary arrangements have not been effected with the Representatives of the Treaty Powers. The Regulations about the certificates of Pilots for Vessels of Foreign Construction are in force among foreigners, but it must be observed that these Regulations were enacted in consultation with the Foreign Ministers. It is provided that foreign pilots, who possess certificates, in accordance with Art. 13 of the Regulations, may, in the pursuit of their calling, go ashore land at any place in the Empire and proceed thence by land to the place of their original departure. But there is no provision to punish them in case they violate any of the articles. Such Regulations are almost dead letters.

Another instance of the relaxation of administrative control over foreigners is furnished by the case of foreign newspapers published in the settlements. When such newspapers publish anything contrary to the Newspaper Regulations and prejudicial to public tranquillity, the paper may be suspended, just as in the case of a journal in the interior, or its editor may even be ordered to leave the Empire, as is often done in foreign countries. Some years ago an Englishman named Black, published a Japanese paper entitled *Nisshin Shimpishi*, in Tokyo, and when his paper began to disseminate ideas injurious to public tranquillity, the Government had to take him into its service in order to induce him discontinue his journal. A present it is not likely that anybody will publish a Japanese paper outside the control of the laws of the country. The foreign newspapers published in the settlements are still exempted from the purview of our Newspaper Regulations. Consequently, while diplomatic secrets are freely published in the foreign papers of the settlements, their insertion in a Japanese paper is instantly punished with the ban of suspension. Instances of this kind originated in the 19th year of *Meiji* when Count Inouye, Minister of Foreign Affairs, held conferences for the revision of the treaties. Not only in regard to diplomatic secrets, but in all other matters, exemption is enjoyed by the papers published in the settlements. In foreign countries, foreign journalists have not infrequently been ordered out of the country, as was the case in Italy in the 22nd year of *Meiji*. Why may not Japan follow the example of Italy?

Another instance of administrative laxity is supplied by the Regulations for Gunpowder. The infraction of such provisions, whether by Japanese or by foreigners, ought to be punished in extreme cases by suspending or prohibiting the offender from engaging in the trade. But the Regulations have, so far as we know, never been applied by the Government to foreigners. Instances of this nature are, in fact, too numerous to be mentioned.

There is, however, another case which calls for mention. In the 21st year of *Meiji*, the Government leased to an Englishman a portion of State land at Kawasaki, Kobe. The lessee in turn rented the land to the Yokohama Engine and Iron Works, who constructed a pier into the harbour. The Government thereupon, by its administrative authority, caused the pier to be taken away. This case well shows that, if the Government is resolute enough, it can easily bring foreigners under its administrative control.

To sum up, the existing treaties not only interfere with the Sovereign rights of the Empire, but also impair the well being of the people. Our country differs greatly from the nations with which it has treaties, in matters of customs and manners, language and literature, religion and other things. It is, consequently, necessary that the Government should rigidly maintain the rights and obligations provided for in the treaties. It should leave foreigners in the enjoyment of the privileges guaranteed to them by express stipulation; but in respect of privileges not expressly granted by the treaties, the Government should positively refuse their enjoyment to foreigners. And in case treaty stipulations are infringed by foreigners, the Government should deal with them under the authority of the Sovereign rights of the Empire. The national policy of the Empire is to open the country, not to close its doors, and it is His Majesty's especial pleasure to show benevolence to people coming from afar. Foreigners must, therefore, be treated with kindness and humanity within the limits prescribed by the treaties and the law. But is it a proper method for the assertion of the national rights and the promotion of the people's welfare, to leave foreigners free to trespass beyond the limits even of the unjust and unfair treaties now in force? It is of most urgent necessity to sweep away the various evils thus far described, and to make foreigners appreciate not only the boundless benevolence, but also the awe-inspiring power of His Majesty the Emperor, that the country's prestige may be maintained abroad, and the people's spirit may be roused and stimulated at home. It is customary for the Government to evade responsibility by pleading the necessary consequences of a previous course of events. But such a plea cannot be allowed in respect of a question like the present, which possesses vital bearings upon the recovery of the national prestige. It is, consequently, our earnest wish that the present Representation may receive the serious attention of the Government.

THE EMPEROR AND THE PRIVY COUNCIL ON OFFICIAL DISCIPLINE.

It is announced in the *Official Gazette* that, at 10 a.m. on Sunday last, the Emperor was pleased to summon to his presence all the Ministers of State and address to them the following words:—

"We have read the Address which the House of Representatives presented to Us on the 4th of the present month, as well as the memorials submitted to Us by Count Ito Hirobumi, Our Minister President of State, and Count Goto Shojiro, Our Minister of State for Agriculture and Commerce.

"It is needless to tell you that the functionaries of the Department of State for Agriculture and Commerce ought to be cautious and discreet in their contact with the people. It is our pleasure that the Minister of that Department of State should use his endeavours to maintain strict discipline among its subordinates.

"As to the appointment and dismissal of Our Ministers of State, it rests entirely with Our pleasure, and no interference can be allowed on the part of any one else.

"The condition of things in the outside world urgently calls for greater progress on the part of Our country. At a critical juncture like the present, it would be a source of exceeding regret to Us should anything be suffered to impede the course of Our enlightened and progressive policy. It is, therefore, Our wish that you should spare no exertion to assist Us in the fulfillment of Our Mission."

His Majesty was at the same time pleased to hand to his Ministers the following memorial presented to the Throne by the President of the Privy Council:—

"May it please Your August Majesty—Your Majesty's humble servant, Count Yamagata Aritomo, President of the Privy Council, by a resolution of the Privy Council, respectfully submits the present Memorial.

"The House of Representatives, in its Address to the Throne of the 4th of the present month, declares that official discipline has been suffered to relax, and that the credit of the Cabinet Ministers has consequently been impaired. Thinking that the Address principally referred to his official conduct, Count Goto Shojiro, Minister of State for Agriculture and Commerce, presented to Your Majesty a memorial explaining his conduct, and awaits some announcement of Your Majesty's pleasure. Count Ito Hirobumi, Minister President of State, also presented to Your Majesty a memorial praying to be allowed to take upon himself the responsibility of failing to exercise proper control for the maintenance of official discipline. Your Majesty having graciously designed to consult the views of Your Majesty's humble servant and of the other members of the Privy Council it devolves upon them respectfully to disclose their unreserved opinions.

Passing in review the course of action adopted by the House of Representatives for the presentation of its Address on the present subject, it seems to Your Majesty's humble servant and to the other members of the Privy Council, that instead of either putting any question to the Government concerning the facts alleged about relaxation of official discipline, or submitting any complaints to the Cabinet Ministers, the House suddenly changed the Order of the Day, and proceeded to discuss the Address as a matter of urgency, passing it almost without debate, giving no time to the Cabinet Ministers to defend themselves, and at once presenting the document to Your Majesty. A few days afterwards, the Imperial pleasure not having yet been intimated, the House of Representatives adopted a resolution directly calling upon the Cabinet Ministers to take proper steps under the circumstances. Inasmuch as the Ministers of State are held responsible for the conduct of administrative affairs, a direct appeal to the Throne should not be made unless on a matter of the gravest importance and in the most deliberate manner. Therefore, Your Majesty's humble servant and the other members of the Privy Council cannot approve the conduct of the House of Representatives when it hastily laid the matter before Your Majesty, without taking the trouble to ascertain the facts by addressing questions to, and holding converse with, the Ministers of State. The statements offered in his memorial by the Minister of State for Agriculture and Commerce are more complete in respects of facts than the Address presented by the House of Representatives. Nevertheless, according to what Your Majesty's humble servant and the other members of the Privy Council have been able to learn from independent sources, it seems undeniable that the conduct of certain functionaries of the Department of State for Agriculture and Commerce is open to doubt and suspicion, a fact further indicated by evidence given in open Court before the Tokyo Local Court. The duties with which the officials of that Department of State are charged bring them into specially close contact with the people in general, and connect them intimately with the business concerns of merchants and manufactures in particular. It is necessary for these officials to be well acquainted with the people of the above classes, but their acquaintance ought not to be suffered to become too familiar and unrestrained. It is, therefore, the firm belief of Your humble servant and the other members of the Privy Council that a special duty devolves upon

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

the head of that Department always to exercise a strict control over the officials under him so that discipline may be rigidly maintained.

"The appointment and the dismissal of the Ministers of State belong entirely to Your Majesty's Prerogatives, and allows not outside interference. The House of Representatives does not evidently mean to attempt any such interference by its recent Address. Neither shall Your Majesty's humble servant and the members of the Privy Council presume to offer any remark on this subject. It rests entirely with Your Majesty to decide as to the responsibility, misconduct, or competence of Your Majesty's servants. At a juncture like the present, when, as Your Majesty pointed out in the Rescript of the 10th of February last, matters of the highest importance demanded attention both at home and abroad, and when it is important for Your Majesty to be able to trust Your Majesty's Ministers so as to enable them to assist in the fulfillment of Your Majesty's mission, it seems extremely unwise to remove any of the pillars of the State for any trifling occurrence.

Dated the 23rd day of the 12th month of the 26th year of *Meiji*.

THE VERNACULAR PRESS ON THE EMPEROR'S MESSAGE AND ON THE PRIVY COUNCIL'S MEMORIAL WITH REFERENCE TO OFFICIAL DISCIPLINE.

THE *Mainichi Shimbun* (Progressionist) refrains from saying anything about the Imperial Message to the Ministers of State on the subject of official discipline, for to do so, it thinks, would be an act of disrespect to His Majesty. But with regard to the Memorial presented by the Privy Council to the Emperor, our contemporary is of course constrained to offer some criticisms. The *Mainichi* seems to be of opinion that the Privy Council has not been fair to the House of Representatives. The first argument advanced in support of that contention is that the Privy Council censures the Lower House for having taken no step to ascertain the views of the Cabinet, whereas, in point of fact, the Cabinet has never shown itself willing to give satisfactory answers to questions put to it by the House of Representatives: even when it has designed to answer such questions, its answers have never been to the point. Consequently it was the Cabinet's habitual want of courtesy which, in the Progressionist organ's opinion, compelled the House of Representatives to dispense with a procedure that would otherwise have been gladly adopted. The other point of complaint is that the Privy Council advised the Emperor that the matter alluded to in the Lower House's Address is not of sufficient importance to require any change of *personnel* in the Ministers of State. Our contemporary of course contends that the conduct of the Minister of State for Agriculture and Commerce richly desires deprivation of official position. The *Mainichi*, therefore, fears that the Privy Council will become an object of resentment.

* * *

The *Hochi Shimbun* (Progressionist) observes that the Minister and other officials of the Department of Agriculture and Commerce ought to feel humbled before the Imperial words of Sunday last. Now that the fact of a relaxation of official discipline has been undeniably established, the Ministers of State, says the *Hochi*, should know how to proceed under the circumstances. Concerning the Memorial of the Privy Council, our contemporary writes in a similar strain to the Journal quoted above. The House of Representatives, its says, did not think it necessary to put any questions to the Cabinet Ministers, because the general facts of the case were so well known; debate did not take place because nobody was opposed to the proposed measure; and converse with Ministers was avoided, not because there was any unwillingness to adopt that course, but, on the contrary, because the Cabinet made it inconvenient. Our contemporary regrets also that the Privy Council did not offer some suggestions as to the disposal of the Minister and other officials of the Department of Agriculture and Commerce, in accordance with the old principle of the Imperial Government in Japan that the Sovereign makes the wishes of the people his own wish.

* * *

The *Kokumin Shimbun* (philo-Progressionist) censures the Cabinet Ministers for having, by their mistaken conduct, caused such profound anxiety to His Majesty the Emperor. Our contemporary, like most other Opposition papers, assumes with regard to this question the same attitude as it assumed towards the Hoshi affair. It is taken for granted by these journals that the House of Representatives can do no wrong, and on the strength of that convenient assumption they bitterly denounce every one possessing sufficient courage or sense of justice to call in question any step taken by the majority in the House.

* * *

The *Niroku Shimpo* (friendly to the anti-Mixed Residence movement) outdoes all the other journals of the Opposition in its virulent denunciation of the Privy Council. It contends, first, that the Council's Memorial to the Throne purposely misstates facts, because it alleges that the House of Representatives gave the Ministers no time to defend themselves, whereas Mr. Motoda's speech on the subject was sufficiently long to afford them such an opportunity if they had been willing to avail themselves of it; secondly, that the Privy Council grossly slanders the House of Representatives by implying that that House was actuated by malicious motives in hastily passing the Address on official discipline; thirdly that the Council wilfully ignores the true object of the House, because, while the latter's principal idea was to have Count Goto removed from his present post, nothing is said in the Memorial about his misconduct, the Councillors merely confining themselves to reflections upon his subordinates; fourthly, that the Council shows disloyalty to the Emperor, because it does not offer any advice to His Majesty as to whether Count Goto's alleged misconduct deserves loss of office or not; and fifthly, that the Council deserves strong censure for having taken no notice of the fact that the people's hearts are becoming daily more and more alienated from the Government, and for having failed to point out that one of the principal causes of such a state of things is the relaxation of discipline in the Government.

* * *

The *Nippon* (nominally Independent but always anti-official) has nothing to say on the Imperial Message. But as to the principle that the Ministers of State are appointed or dismissed at the absolute pleasure of the Sovereign, our contemporary remarks that that principle holds theoretically good not only in Japan but in every other monarchial country. In practice however, the Ministers of State have no business to remain in office when they have forfeited the confidence of the Legislature. The House of Representatives having declared its want of confidence in the Cabinet, it will be impossible for the latter to work in harmony with the former Under the circumstances, only two courses are open to the Cabinet, either to resign in a body, or to dissolve the Diet.

* * *

The *Kokkai* (Independent) observes that the memorial presented to the Emperor by the Privy Council is impartial both to the Cabinet and to the House of Representatives. Our contemporary is heartily disgusted with the cowardly conduct of the House of Representatives in passing the Address on the subject of official discipline without giving due notice to the Government. On the other hand, the Privy Council is praised for its fairness in confirming the charge that laxness of discipline exists in the Department of Agriculture and Commerce. As to the Minister of that Department, the *Kokkai* recommends him to resign, for he has been the cause of great commotion in the Lower House, culminating in an Address to the Throne.

* * *

The *Yiji Shimpo* (Independent) approves in full the Memorial of the Privy Council. Our contemporary believes that the House of Representatives deserves severe condemnation for having hastily approached the Throne on a subject the facts of which it had not fully ascertained. Should such a palpable abuse of the right of presenting Addresses to the Throne be repeated by the House of Representatives, the *Yiji* urges the Government to advise the Emperor to dissolve the Diet. As to the enlightened and progressive policy mentioned in the Imperial Message, the *Yiji* opines that allusion is principally made to the foreign affairs of the country, and observes that the Imperial pleasure having thus been announced on this subject clearly and definitely, the House of Representatives had better reflect carefully before committing itself on the question of the strict enforcement of the treaties.

* * *

The *Nichi Nichi Shimbun* (Independent) affirms that all sober persons agree with the Privy Council in censuring the haste and precipitancy with which the House of Representatives passed its Address on the subject of official discipline. "How," says our contemporary, "the Premier and the Minister of Agriculture and Commerce will act under the circumstances, we do not know. But it is not to be denied that Count Goto's responsibility to correct the laxness of discipline among his subordinates has been made clear by the Imperial words of Sunday last." The *Nichi Nichi* does not think it likely that any group of statesmen other than those now in power would be more competent to deal with the present important juncture, and therefore deems it unwise to effect changes in the *personnel* of the Cabinet on account of trifling matters. With regard to the Sovereign's "enlightened and progressive policy," our contemporary offers the same interpretation as the *Yiji*, and calls upon the Ministers of State to be prepared to overcome whatever hardships and difficulties may stand in the way of consummating the Imperial commands on the subject of the country's foreign policy.

FORGERY OF RAILWAY SHARE CERTIFICATES.

RUMOURS have for some time been rife on the Tokyo Stock Exchange to the effect that there were some forged share certificates of the Hokkaido Colliery Railway Company upon the market. The forgery has recently been detected. On the 19th inst. a man named Inouye Taro arranged with a broker named Tsuda for a loan of 6,000 *yen* on the security of some of the Company's shares. On his going to the broker's office to complete the transaction Mr. Tsuda's clerk at once noticed that there was something wrong about the shares certificates. The shares were in five-share notes, whereas the Company issued 100 shares, 50 share, 10 share and one-share notes only. Farther investigation showed that there something wrong about the President's signature, and that the gentlemen in whose name the shares purported to be made out, had never owned a single share in the Company. Information was immediately sent to the Tokyo Office of the Railway Company, and to the Kyobashi Police Office, and in a few minutes Mr. Inouye who was waiting at the broker's office for the dollars to be brought from the Bank, found himself in the clutches of the Law.

THE RE ASSEMBLY OF THE HOUSE OF REPRESENTATIVES.

IT was at first understood that the meeting of the House of Representatives on the 29th inst. would be only formal, and that the discussion of the treaty enforcement question and the *Chishima Kan* affair would be deferred until the re-assembly of the House after the New Year's recess. Some even predicted that a quorum might not be secured on Friday next, for members were leaving the capital on a visit to their homes. But it is now reported that the bulk of the Opposition mean to do real business on the 29th On Sunday last delegates of the *Kokumin Kyokai*, the *Kaishin-to*, the *Domei* Club, the *Doshi* Club, the *Dai Nippon Kyokai*, and the *Seimu Chosajo*, held a conference at the Tokyo Hotel. There were present Messrs. Abei Iwane, Kamuchi Tomotsune, Minoura Katsuudo, Nakamura Yaroku, Shiba Shiro, Kawashima Jun, Sasa Tomofusa, Motoda Hajime, Kudo Kokan, and a few others. The delegates of the *Kaishin-to*, the *Kokumin Kyokai*, the *Dai Nippon Kyokai*, and the *Sei-*

mu Chosajo were in favour of a purely formal re-assembly on the 29th, but those of the *Domei* Club and the *Doshi* Club, insisted on proceeding with the discussion of the treaty-enforcement question. Failing to agree on that occasion, the delegates held another meeting on Monday, when they resolved to adopt the course recommended by the delegates of the *Domei* and *Doshi* Clubs. Animated discussions took place between the delegates of the *Kaishin-to* and those of the *Kokumin Kyokai* on the question as to which should be considered first, the *Chishima* affair or the treaty-enforcement question. The *Kaishin-to* delegates claimed priority for the former. But the latter being already on the Order for Friday next, it was finally agreed that it should be disposed of as quickly as possible, and that the *Chishima* affair should then be at once proceeded with. The parties represented at this conference are said to have telegraphed to such of the members as are on visit to their families in the country to come up at once.

* * *

As to the Radicals, they are said to be opposed to bringing about the dissolution of the Diet on the questions of the treaties and the *Chishima* affair, preferring to attack the Government on the Budget.

FRANCE AND SIAM.

FRANCE has sent out for service in the Gulf of Siam, says the *Daily Press*, a gunboat of sufficiently light draft to ascend the Meinam, but so strongly armed as to be able to give a good account of herself if necessary. She is named the *Siyx*, and at last advice was daily expected at Saigon. From the *Avenir du Tonkin* we learn that she carries in her bows a b g gun of 27 centimetres, which is as large as those carried by big ironclads, and her light draft, 3½ metres, will permit her to ascend rivers which are impracticable to the larger men-of-war. According to our contemporary, the English at Port Said on seeing this formidable vessel immediately divined her destination and were "unable to conceal their discontent." During her voyage from Algiers to Port Said she encountered very bad weather and rolled fearfully, owing to her light draft the water washing over her continually, and the officers had their clothing and their cabin effects completely ruined. For four days she was unable to make any headway, and the voyage between the port named was twelve days and a half.

NEW BROOMS.

THE seceders from the Radical Party having organized themselves into a little association called the *Doshi* (fellow-thinkers) Club, are naturally very anxious to make their influence felt, and by zeal to compensate for their numerical weakness. Hence they out-Herod Herod in their resolve to push the *Chishima-Ravenna* affair to the bitter end. Whatever the *Jiyu-to* may do; whatever other factions may do, the *Doshi* Club consider the *Chishima Ravenna* case of such importance to the Throne and the nation alike that they are said to be resolved to exert every energy for the presentation and passage of an Address to the Throne on the subject. It is to be wished for their own sakes that they could discover something more substantial wherewith to frame an indictment against the Government. There is certainly much academical interest in the question of a Japanese plaintiff being required to assume the character of respondent in a British Court of Appeal beyond the seas, but to employ such a question as a basis for impeaching the Ministers of the Crown betrays extraordinary lack of the sense of proportion and propriety. The conclusion formed by the foreign public in viewing these proceedings is, not that the Japanese Government has committed any serious error, but that the Opposition are entirely without solid grounds of complaint against the Government.

THE SUNG-PU AFFAIR.

IT is difficult to repress a smile when we read that Consul-General Bock, upon whose head such mountains of extravagant abuse were heaped, a short time ago, in connection with the Sung pu massacre, is now declared to have "fought a brave battle for nearly three weeks with an old man who won't budge an inch for a Consul General, not even with all the Ministers and the Tsung-li Yamên at his back." It is another illustration of journalistic methods in the East. Displays of hysterical patriotism at the expense of an official are always in order. Then, when it is found that the maligned official knows how to do his duty and does it, his sometime slanderers escape the charge of injustice by alleging that their criticisms exercised a salutary effect. Mr. Bock has obtained from the Viceroy terms that ought to satisfy the friends and fellow-nationals of the unfortunate men murdered at Sang-pu—a life for a life, a substantial indemnity, and certain minor conditions. We do not perceive that any credit is given to the Chinese Authorities for this settlement. Yet, without goodwill on their side, and a desire to do justice, such an arrangement could scarcely have been made.

CUSTOMS RETURNS.

THE following is a summary of the Customs Returns for November, showing the foreign trade of the empire for the month :—

	1892. SILVER YEN.	1893. SILVER YEN.
Exports	8,543,690 690	8,987,347,370
Imports	6,800,436,930	8,252,398 550
Total exports and imports		17,239,745,920

A NE'ER-DO WELL.

YOKOHAMA residents have not yet, we imagine, forgotten the beach-comber C. G. Graham, who was deported for the community's good after he had "bilked" several of the hotels and stores both in Yokohama and Tokyo. He had led a similiar life in Shanghai, and was "passed-on" first to Kobe and then up here. He had an intimate acquaintance with the U.S. Consular gaols while in the Far East, but was apparently an incorrigible. In San Francisco he appears to have taken to his usual mode of life, loafing about from one boarding-house to another, till he was finally reduced to living in a disused garret. Several months ago a dynamite explosion occurred in a sailor's boarding house in San Francisco—curiously enough next to Graham's garret—and loss of life occurred. A reward of some $3,000 was offered, but nearly a month elapsed before any information reached the police. Then Graham put in an appearance and swore to a certain man as having been seen by him entering the wrecked boarding house shortly before the explosion. The police, however, are chary at believing his statement and have sent over here for their informer's record. Graham will doubtless be surprised at the "black calendar" which the United States Consular records here will furnish.

POLITICAL NEWS.

THE delegates of the six political factions, the *Kaishin-to*, the *Kokumin Kyokai*, the *Domei* Club, the *Seimu Chosajo*, and the *Dai Nippon Kyokai*, held another meeting at the Tokyo Hotel on Tuesday last. The subject of conference was an Address to the Throne which is to be introduced in the Lower House on the 29th instant. The Address is said to criticise the Cabinet's conduct about the *Chishima* affair on three points; namely, first, that the Emperor's name was employed in the court as plaintiff; secondly, that the institution of the case in the British Consular Court was a voluntary surrender of the country's sovereign rights, because the treaty does not provide for the delegation of Japan's judicial authority in the case of the Government suing British subjects; and thirdly, that a further surrender of the Empire's judicial right was made when the Government recognized the authority of the British Court of Appeal at Shanghai, which is not mentioned in the treaties. The first and the last points at once obtained the approval of the meeting, but a long animated controversy is reported to have taken place with respect to the second point, between the delegates of the *Doshi* Club and the *Kaishin-to*, on the one side, and those of the *Kokumin Kyokai* and the *Dai Nippon Kyokai*, on the other. The two former supported the draft Address on this point, but the two latter maintained that, if the British Consular Court's jurisdiction over cases instituted by the Japanese Government against British subjects be denied, it may become impossible to obtain any hope of remedy in respect of such cases. Proceeding in the same spirit, it should not have been difficult for the delegates of the *Doshi* Club and the *Kaishin-to* to perceive the absurdity of the two other points as well. But their minds are heated too much to reason calmly. The controversy, it is said, lasted for hours, and the result is not yet known.

* * *

Some Opposition members of the Lower House are reported to be highly indignant at the Privy Council's so-called presumption in pronouncing as rash and inconsiderate their conduct in passing the Address to the Throne on the subject of official discipline. Mr. Haseba Junko and others of the *Doshi* Club are agitating to introduce a motion for another Address to the Emperor denouncing the Privy Council's recent memorial as unfair to the House of Representatives. The matter will no doubt form the subject of discussion at another conference of the delegates of the six factions alluded to in the preceding paragraph. But it is believed that Mr. Haseba's project will not find favour with the majority of these delegates.

* * *

The Progressionists are believed to be not a little uneasy about the consequences of a dissolution of the Diet on the subject of strict enforcement of treaties. They justly fear that in that event the general election will be a fight between progressive principles and anti-foreign prejudices, and that a contest over such an issue may, in the present mood of the people, be productive of disastrous consequences. The *Kaishin to* organs, especially the *Hochi Shimbun*, are pointing out the possible dangers of dissolution on such grounds, and are recommending the Opposition to reserve its attack

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

upon the Cabinet until the Budget comes up for discussion. This is excellent advice, but we fail to see the good of telling people to do one thing and all the while heartily cōoperating with them to do another thing. If the Progressionists be sensible enough to follow their own advice, the dreaded disaster might probably be averted, for the Radicals, the *Gishu-Gumi*, and others—perhaps a little over 100 strong—are understood to be of the same way of thinking as the more sensible of the Progressionists. But the very idea of voting with the Radicals may possibly induce the *Kaishin-to* to act contrary to their better judgment.

* * *

The *Domei* Club has issued a manifesto. There is nothing remarkable in it. It is an explanation of the course which the faction has thus far pursued in the present session of the Diet—its disapproval of the reforms introduced by the Government, its opposition to the Government's foreign policy, its conduct on the Hoshi affair, its views on the subject of official discipline, its eager advocacy of strict enforcement of the treaties, its disapproval of the Cabinet's action about the *Chishima* affair, and so forth. The document concludes with the following words:—"The evils of clan Government are growing more than ever, while the blight of personal considerations (*jōjitsu*) is the prevailing curse of political parties. We hope, however, that a crisis of political regeneration will present itself before the coming of spring. Should such be the case, it is our earnest wish that we, together with our sympathizers, may play an important part in the coming drama of politics. We hope for the sake of our dear country that such an opportunity may arrive as speedily as possible." It is scarcely necessary to observe that allusion is here made to the possibility of the dissolution of the Diet.

THE "NIPPON" AND THE "NIROKU SHIMPO."

THE *Nippon* and the *Niroku Shimpo*, the twin metropolitan papers which vie with each other in hysterical zeal about the question of strict enforcement of the treaties, have been simultaneously suspended on the ground that their issues of Tuesday last contained matter prejudicial to the peace and tranquillity of the realm. The punishment, in our opinion, was richly deserved by both papers. The *Niroku Shimpo's* offence evidently culminated in its extravagant article on the Privy Council, charging that exalted body with neglect of duty and disloyalty to the Sovereign. The gist of the article was noticed in these columns on Wednesday, and it is not necessary to repeat it here. It must, however, be observed that our resumé gives no idea of the insolence and perversity by which every line in the original is disfigured. The acme of our young contemporary's silliness is attained when towards the close of its article, it raises its voice in the following strain:—"The Privy Council in the Memorial to the Throne takes no account whatever of the effect which it [the continued occupation of an official post by the Minister of Agriculture and Commerce] will have upon the attitude of the people towards the Government and the Imperial family . . . . the result will be that the people's hearts will be alienated from the Imperial House, that the Government will be regarded as a den of corruption and monstrosities, and that the Imperial House may possibly be entirely isolated. . . . . How foolish and ignorant are the old members of the Privy Council! High up in the sky, we descry a crane, soaring solitary and scarcely visible through a mass of cloud and mist! Who can look at it without shedding tears and breathing a deep sigh?"

* * *

The *Nippon* is hardly less virulent in its attack upon the Government. Who is it, asks our contemporary, that impedes the course of the Empire's enlightened and progressive policy? It is the Government itself. For the Government, by a weak and cowardly foreign policy, has suffered the country's prestige abroad to be seriously impaired, while at home it has proved itself entirely incapable of exercising legitimate authority over foreigners. On the other hand, the people and the Diet are declared to be really in favour of an enlightened and progressive policy, because they are now endeavouring to the best of their ability to remove the stains upon the Empire's sovereign rights. The *Nippon* makes copious allusion to the treaty enforcement question and the *Chishima* affair, and the whole tone of its article, or rather articles—for there are two—is to excite a strong popular prejudice against the Cabinet on the subject of foreign policy,—a course which may be regarded as an open defiance of the warning plainly expressed in the Message addressed by His Majesty to his Ministers on Sunday last.

COUNT ITO ON THE RE-ASSESSMENT OF THE TAXABLE VALUE OF LAND.

AT a recent meeting of the Special Committee in the House of Peers on the Bill for the Special Re-assessment of the Taxable of Land, the Minister President of State delivered the following speech:—

Gentlemen—I wish to say a few words about the reason why the Government has introduced the Bill now engaging your attention. I will confine myself to some general statements, leaving all particulars to the Minister of State for Finance. I do not think that the question of re-assessment is one of vital importance to the country, but it is attended by a history which makes its carrying out a matter of necessity. And it must also be admitted that the reform is desired by the people. As to the manner in which the taxable value of land was originally assessed, there seems to have been more or less inequality between the different localities. This was perhaps unavoidable because the work of assessment was not carried out simultaneously throughout the country. At first the Government had no definite idea as to the extent to which the revenue of the State would be affected by the results of assessment. As the operation progressed, it was found necessary to follow more and stringent rules in the method pursued, and in that way inequalities resulted between different localities. The fault was no doubt unavoidable in view of the financial condition of the Government in those days. Recognising the existence of these inequalities, the Government undertook special re-assessment of the taxable value of land, previous to the opening of the Diet, thereby lowering the value by an aggregate sum of about 3 million *yen*. Perhaps that re-assessment may have served to induce the people to desire a larger measure. In the first session of the Diet, however, the majority did not seem to be in favour of re-assessment. In those days, if I remember rightly, the question of reducing the rate of the land tax engrossed attention. The Cabinet of that time seems to have tried to draw public attention to the question of re-assessment, and being thus encouraged by those in power, the inhabitants of localities where the taxable value of land had been originally assessed more highly than elsewhere, began to entertain hopes of re-assessment. From the petitions presented on the subject last year, I notice that in certain localities the land has certainly been assessed too highly. Of course it will not be possible to carry out the work of re-assessment in a perfectly equitable manner, but it goes without saying that, as inequalities are removed one after another, the tendency will be to approach more and more to a satisfactory state of things. The steady rise in the price of rice during recent years has given much relief to the farmers, and consequently there seems to be little necessity for the reduction of the rate of the land tax. But the question of re-assessment is quite another thing, for the ground of complaints on that subject is inequality in the valuation of land, and consequently in the incidence of taxation. There may be other reasons for undertaking the work of re-assessment, but I do not regard them as very serious. Different opinions are of course entertained on this subject by different persons. It is a fact that the work of special re-assessment has been undertaken several times since the original valuation. I am even persuaded to think that, had the Diet not been in existence, the Government might now be actually carrying out another special re-assessment. It may in truth be concluded that this important work has been delayed by the appearance of serious conflicting views in the Diet. At all events, my opinion, as I have already told you, is that it is only proper to carry out the reform at once. Last year, there being no possibility of obtaining, by means of administrative economies, a surplus sufficient for the purpose, the Government had to propose an increase in the Income Tax and in the tax on *Saké*. The House of Representatives passed the Bill for re-assessment, but refused to approve the Bills for increasing those two taxes, and the Peers, in turn, rejected the re-assessment Bill. Under such circumstances the Government was of course powerless to take any practical step last year, but this year I hope that the Bill will be approved in your House, since there are now independent funds available for the purpose. It is an extremely undesirable thing to suffer a question of this nature permanently to impair the relations between the Government and the people, and in view of that some persons may ask, why not carry out at the same time the reduction of the land tax and the transfer of the prison expenses to the charge of the Treasury? These measures may also be desirable. But in my opinion neither of them possesses the same urgent claim for early settlement as the question of re-assessment, for the latter is concerned with inequalities in the burdens of people in different localities. It being thus impossible, in the present state of the finance, to carry out these three measures simultaneously, I have selected out of them, the one which seems to me to be the most urgent and important. However, it must be stated beforehand that, even if passed by your House, the present Bill would not be sanctioned by His Majesty, unless the Budget should come into existence. For the present Bill possesses bearings upon the Revenue and Expenditure of the State, and its carrying out would therefore involve the carrying out of part of the Budget. There seems to be an impression in certain quarters that the Government is not in favour of re-assessment, but that it has introduced the present Bill merely as a device to put the people in good humour, hoping all the while that it will be rejected by the House of Peers. I need not say that such is not the case. I am sincerely desirous of its passage through your House. Nothing could be farther from the Government's intention than to shift its responsibility on to your shoulders. Several of you now present may differ from me on the financial aspect of the question. Of course I must not be understood to be desirous of forcing my views upon you; my only wish is to lay my ideas before you in a clear and impartial light. Such being the case, you are at liberty to make public whatever I have thus far said on the subject; there ought to be no secrecy about it. One word more and I have done. Under the present régime it is impossible to carry on the administration unless there is harmony between the Government and the Diet. In order to obtain such harmony, it will be necessary for both sides to make compromises, unless such compromises are clearly against the interest of the country. As I said at the outset, the Government does not consider re-assessment to be a measure of vital importance, but since it is so eagerly desired by the people and since, also, it is attended by a peculiar history, we have thought it incumbent upon us as well as necessary to carry it out, so that, on the one hand, the existing inequalities in the valuation of land may be rectified, while, on the other, a way may be opened for harmony between the Government and the people.

JOURNALISTIC ENTERPRISE.

ABOUT two years ago—we do not pretend to be quite accurate as to dates—a clever variety of journalistic enterprise had its origin in this Settlement. Newspapers were started frankly in the shape of advertising sheets, and distributed gratis among the communities of Yokohama and Tokyo. Little by little items of news and other editorial matters were added, and when it was judged that the public had come to regard these modest sheets as established institutions, and to rate them above mere advertisements, regular charges began to be made. It was a courageous plan, and possibly some measure of success was attained, though there were always the strongest reasons to be sceptical as to the rewards obtainable in the field of Yokohama Journalism. We observe that a similar departure has now been made in Tokyo. A little journal called *The Travellers Gazette*, has been published, the first number dating from Christmas Day. Probably it is issued in the interests of the guider, now an important and flourishing body. Ostensibly its purpose is to furnish information to tourists visiting Japan. But we might reasonably expect that if the latter aim were really paramount, some attempt would have been made to furnish substantial indications in the first number, whereas, with the exception of a few advertisements, the paper contains nothing whatever in the shape of information. But it does contain

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

something else so very entertaining that if the proprietors can only maintain the vein in which they have started there is no reason why they should not achieve marked success. As an example of the kind of literary fare to which we allude, we quote the opening paragraph of an article entitled "The condition closing the New Year":—

We Japanese are in a great congratulation for the New Year which is approaching, and have their hands full which an observation hardly rendered before travellers. However the market which is kept at the end of every year, at each street shops are kept open all night selling New Year's decorations which deeply attract the attention most of visitors. On the 31st of this month shop-keepers go out collecting what is due them all the day and all night till the dawn of the next day, even at lonely places the shops are busily engaged, the galloping of the shop-keepers holding lanterns in their hands; business men shouldering sacks of money on their back, this condition is beyond discription While policemen and gendarmes are protecting and watching any accidents which might occure, this will surely excite the curiosity of travellers

The Japanese will never fail for lack of assurance. The ground that angels fear to tread has no terrors for them. They are masters of the art of mangling English into such a supremely funny mess that professional wit is not in it. The *Travellers Gazette* will achieve one thing at any rate: it will bring much ridicule on Japanese pretensions.

THE NATIONAL UNIONISTS.

The National Unionists appear to be recovering their moral equilibrium. For a time they were carried away by a wave of blind hostility to the Government, but now, if we may credit the *Kokkai*, they are beginning to substitute reason for recklessness. They are reputed to have set their faces against a proposition emanating from the *Doshi* Club that another Addressshould be presented to the Throne protesting against the Memorial compiled by the Privy Council in response to the Emperor's mandate. The members of the *Doshi* Club are greatly incensed against the Privy Council because the grey-headed statesmen of which it is composed censured the rash precipitancy that disgraced the procedure of the House of Representatives in connection with the Official-Discipline Address. In their wrath they would actually go the length of informing the Sovereign that the advice which His Majesty sought at the hands of his duly constituted advisers, and which he virtually adopted in the Rescript of the 26th instant, was wilfully unfair and purposely inaccurate. The *Kokumin Kyokai* decline to follow the members of the *Doshi* Club in any such extravagance. Doubtless the seceders from the *Jiyu-to*, who have formed themselves into the *Doshi* Club, would not shrink from claiming that the Privy Council also should be responsible to the House of Representatives, and should hold office by the latter's mandate. It seems to us that nothing more fortunate could have happened to the *Jiyu-to* than the secession of these reckless agitators. While they remained in the Party, they acted like the tadpole's tail, swaying all the councils of the *Jiyu-to* to its discredit. Now that they stand alone, their true complexion will begin to be understood by the public.

THE BUDGET.

When the friction between the Cabinet and the House of Representatives became so intense last session as to necessitate an appeal to the Throne, and when the Emperor issued his celebrated Rescript ordering administrative reform and calling upon the whole body of officials to follow his munificent example by subscribing ten per cent. of their income for Naval purposes, the Lower House appointed a Committee to confer with the Government as to the nature of the reforms which the latter intended to introduce in compliance with the Sovereign's general direction. The Committee propounded a number of questions to the Ministers of State, asking them, among other things, whether they purposed making any reduction in official salaries. To that Count Ito replied emphatically in the negative, and explained that such economies as he intended to effect would be limited to reducing the staff of officials. These questions and answers were duly recorded, and the programme then announced by the Cabinet Ministers, was accepted, first by the Committee and subsequently by the House, as a proper and satisfactory basis of reform. Nothing could have been more clearly enunciated or distinctly understood than the fact that the projected scheme of reform was not to include any reduction of official salaries. The Budget Committee, however, in preparing its report upon the Budget now awaiting discussion by the House of Representatives, has behaved as though the events of last session had no historical existence, and has subjected the salaries of all officials to sweeping reductions on a sliding scale. Obviously there is here a palpable breach of good faith. The passing of the Budget last session was the result of a compromise between the Government and the Opposition The latter agreed to grant supplies and to vote the appropriations on account of official salaries, provided that the former carried out a scheme of administrative reform from which all reduction of salaries was to be excluded. Yet the Budget Committee now recommends that official salaries should be treated just as though no understanding whatever had been elaborated last session. These circumstances are said to be appreciated by the National Unionists, and it is anticipated that if the Budget comes up for discussion, they will vote against the proposal to reduce official salaries, which, for the rest, is an absolutely unconstitutional step on the part of the House.

THE SUSPENSION OF THE "CHU-O SHIMBUN."

The *Chu-o Shimbun*, the National Unionist organ, has followed the example of the *Nippon* and the *Niroku Shimpo*, its worthy coadjutors in the cause of the strict enforcement of the treaties. In its issue of Wednesday, it bitterly assailed the Government, accusing the Ministers of disloyalty to the Sovereign and of neglect of duty. Equally virulent were its criticisms upon the Government's foreign policy, which it denounced as being weak and pusillanimous. In short, it faithfully followed in the footsteps of its companions, whose fate it now deservedly shares, sentence of suspension having been pronounced against it.

* * *

En passant, we may notice another significant article on Count Ito published in the same issue of the *Chu-o*. In it our contemporary advises the Premier to resign, and for a successor he is told to recommend Count Okuma. This is curious on the part of a newspaper supposed to represent the military element among the *Meiji* statesmen. Does the *Chu-o Shimbun* really intend to advocate party Government? If so, it must have made in the past few weeks a complete *volte face* of political opinion. Surely nothing could be stranger than that the organ of a party formed under the direct protection of a so-called clan Ministry, and still guided by a prominent statesmen, should now openly advocate such a course? Such, however, is plainly the attitude of the *Chu-o Shimbun*, for towards the close of its article it ridicules "the silliness of statesmen who attach importance to the distinction between an 'Imperialist Cabinet' and a 'Party Cabinet.'" Another obvious inference which may be drawn from this article is that the National Unionists are not averse to the formation of a Coalition Cabinet with the Progressionists. Political campaigns certainly produce strange alliances. The National Unionists have been the target of the Progressionists' attack ever since the present House of Representatives came into existence, yet now they are content to turn and lick the hand that chastised them. As for the Progressionists, their cleverness is admirable. With their little following of 43 members they have virtually directed the House of Representatives from the outset. They organized and led the first campaign against the Government on the subject of the Budget. They conceived and induced the Opposition to carry out a programme of pure obstruction. They kindled and fanned into a conflagration the fire about official interference in elections. They took the *Jiyu-to* under their banner and directed the operations of the alliance. They started the attack upon Mr. Hoshi Toru and plunged the House into all the extravagances perpetrated by it in connection with that monstrous piece of injustice. They devised the appeal to the Throne on the subject of official discipline. And finally, deserted by their friends, the *Jiyu-to*, they calmly took as substitutes their enemies, the National Unionists, and so successfully manipulated the latter that the National Unionist organ has now snapped its fingers in the face of all its most cherished opinions, and, for the sake of pushing the Progressionists into power, has come out as the advocate of a system to oppose which is the *raison d'être* of itself and the *Kokumin Kyokai* namely, party government. Never were more adroit puppet-pullers than the *Kaishin-to*; never more docile puppets than the members of the present House of Representatives.

COUNT GOTO'S INSTRUCTIONS TO THE OFFICIALS OF THE DEPARTMENT OF AGRICULTURE AND COMMERCE

The following, according to the *Nichi Nichi Shimbun*, is the document of instructions addressed by Count Goto, Minister of State for Agriculture and Commerce, to the officials in that Department:—

All the functions of this Department belong to the class of administrative duties the object of which is to develop the country's wealth and resources. It follows, therefore, that the officials of the Department must associate largely with men engaged in the practice of agriculture, manufacturing, and trade. Their behaviour in such association must be of the most open character, and while observing the dictates of courtesy and helpfulness they must be careful to preserve official discipline and on no account to cultivate intimacies hurtful to the public good. As Minister of the Department I have always impressed upon its officials the expediency of observing the above principles and I am now profoundly pained to find that the subject has been specially alluded to in an Imperial Message. That fact should inspire the officials of the Department with a deep sense of responsibility. It is my intention henceforth to enforce these principles with increased rigour and not to pardon any infraction of them. Subordinate officials are hereby called upon to give full heed to the purpose of these instructions and to bring to the discharge of their duties an earnest resolve to avoid all errors.

THE ORIENTAL SOCIETY.

Mr. Inagaki Manjiro has been lecturing to a distinguished audience at a meeting of the Oriental Society, Count Soyejima, Viscount Matsudaira, Baron Ozawa, Mr. Suyehiro and other well-known men being among his hearers. He expounded a great many theories which we need not recount here, the majority of them being quite outside the pale of practical politics. But two of his propositions are interesting because they are evidently acquiring vogue in Japan. One is that the Government's suit against the Peninsular and Oriental Company ought to be abandoned and the loss involved in the sinking of the *Chishima* quietly borne. The other, that a set of regulations for the control of navigation in the Inland Sea ought to be compiled and strictly enforced by the Japanese Government. As to the former point, it is by no means new. When the advisability of instituting a suit for damages originally came upon the *tapis*, a strong opinion in the contrary sense was expressed by some Japanese in high places, but the romantic ground of their objections did not commend themselves to practical folks, and we greatly doubt whether Mr. Inagaki Manjiro's case would bear a similar test. With regard to his second point, it is evident that he and other publicists of his class are excited about the judgment delivered by Her Majesty's Supreme Court in Shanghai to the effect that the Inland Sea is not territorial water. But surely these precipitate patriots should be able to understand that the British Government's view of an international question does not depend on the decision of a Judge in a Court of law. Nothing is less likely than that Her Majesty's Privy Council will support the verdict delivered by the Shanghai tribunal in respect of the Inland Sea. It was a verdict disfigured by flagrant historical blunders, to say nothing of its inconsistency with principles which Her

Majesty's Ministers might be expected to endorse. Instead of allowing themselves to be prematurely excited about the judgment of a Shanghai Court, Mr. Inagaki Manjuro and the members of the Oriental Society would do well to wait until the British Privy Council's views are declared. Should those views be confirmatory of the Shanghai decision, then will be the time for Japan to take diplomatic action. Mr. Inagaki and his fellow-thinkers are very solicitous, as we understand, about their country's sovereign rights and her dignity. Have they considered how much her dignity would be compromised were she to hastily accept the verdict of a foreign law court as a basis for international action?

THE "CHISHIMA-RAVENNA" AFFAIR.

One is really constrained to admire the faculty displayed by the Japanese for making mountains out of molehills. Little by little the leaders of the Opposition in the Lower House have succeeded in talking themselves into the belief that the *Chishima-Ravenna* law-suit is a proper subject to constitute the basis of an impeachment of the Cabinet. On the 28th inst. delegates from the six political sections forming the Opposition met in the Imperial Hotel and consulted about the drafting of an Address to the Throne on that topic. They drew up an indictment of five counts, the first three of which were in the nature of an impeachment, the other two in the nature of advice. Nothing appears too trivial now-a-days to serve as material for an Address to the Throne. Nothing too petty to be used for impeaching the Cabinet. The conduct of the Opposition in the Lower House is a huge farce from first to last.

KOREAN NEWS.

Later intelligence from Sōul gives further particulars concerning the rice question in Korea. On the 8th instant Mr Otori held a conference with the Representatives of the other countries, at which it was agreed that united action should be taken on the subject. Before opening negotiations with the Korean Foreign Minister for the withdrawal of the edict prohibiting the export of rice, the Japanese Minister is said to have interviewed several influential members of the Government and ascertained their opinions on the matter.

* * *

Considerable excitement is reported to have been caused among the Japanese in Sōul by an announcement that the agency for the Nimsen branch of the 1st National Bank had received orders from head-quarters to stop all business from the 15th instant, and wind up the establishment altogether by the end of the present month. The agency in question is the only banking medium for the Japanese residents in Sōul, so that their excitement at the news is natural enough. It appears that a recent notification issued by the Minister of Finance in Tokyo requires all banks to place their agencies on the same footing as branch offices and since that involves greatly increased expense and trouble to the banks, the latter have concluded to abolish many of their agencies. Such is the case with the First National Bank and its agency in Sōul. The Japanese Chamber of Commerce in the Korean capital at once held a general meeting, and presented a memorandum to the Japanese Consul, asking him to call the home Government's attention to the importance of allowing a special arrangement in the case of a settlement like that in Sōul. At the same time, a note was addressed to the Osaka Chamber of Commerce, soliciting the latter's assistance and advice in the matter.

* * *

An increasing number of young "patriots" are said to be landing at Korean ports by every steamer from Japan. These persons are reported to be causing no small annoyance to the Japanese merchants in Korea by lecturing them on the Eastern Question. Unless subjected to a timely check, these *soshi*, for they seem to be neither more nor less, may cause more serious mischief than merely pestering men of business.

* * *

The Japanese Consul in Sōul recently issued a proclamation to his nationals warning persons travelling in the interior on business against any rudeness to Koreans. Some instances of the kind, he states, have reached his ears, and he tells his countrymen that such conduct on their part may lead to very unpleasant consequences by wounding the feelings, not only of the Korean people, but also of the local authorities. He warns them that such conduct will be dealt with in accordance with a provision of law which empowers Japanese Consuls to prohibit the residence within their districts in Korea of Japanese judged guilty of conduct prejudicial to the peace and good order of the locality.

* * *

The transfer of Mr. Sugimura, Japanese Consul at Sōul, to the post of Secretary of Legation, is said to be a matter of general regret to the Japanese residents of the Korean capital. Mr. Sugimura's intimate acquaintance with Korean affairs and customs, and his conscientious devotion to his official duties seem to have earned the esteem and gratitude of his nationals.

* * *

The customary Tribute Ambassadors to China are understood to be now on their way by land to the Chinese capital. Li Seiro is the Ambassador, and the Vice-Ambassador is Li Chôei.

* * *

The Korean King is said to have issued a Rescript on the 10th instant relating to the urgent necessity of giving aid to the famine-stricken people of Keisho-do. The King authorizes the employment of 10,000 *koku* of rice and 100 000 *ryo* of money from the famine fund. The issue of this Rescript is regarded by some people as an indication that the Korean Court is not likely to give a favourable answer to the Japanese Minister's demand for the withdrawa of the prohibition of the export of rice.

* * *

Still later intelligence received by telegram reports that the alternative resolutions arrived at by the Korean Government at a conference held in consequence of a demand preferred jointly by the Foreign Representatives for the withdrawal of the prohibition of the export of rice, were as follow:—

(1.) The Government has resolved, with reference to the demand for the removal of the edict prohibiting the export of rice, that the most important duty devolving upon Ministers of State is to exercise compassionate protection over the people of the country in their need, and that no occasion exists to pay attention to demands preferred by foreigners constituting only a small section of the community

(2.) It is the duty of administrators to exert every effort for the purpose of strengthening friendly relations and affording facilities for the pursuit of profitable business. In views of this duty, inspectors shall be despatched to the agricultural districts in order to make further investigations for determining whether the state of the crops is as represented by foreigners

These two resolutions were to be submitted to the King for His Majesty to decide which should be adopted. It was expected that the decision would be in favour of the second. Such a method of preferring Ministerial advice to a King seems peculiar.

A RADICAL LECTURE MEETING

On Wednesday last the Radical party held a very successful lecture meeting at the Kinki-kan, Kanda, Tokyo. Its success was all the more remarkable in contrast with the laughable spectacle presented by a similar lecture meeting recently held at the same place by the Progressionist party. Among the speakers on Wednesday were Count Itagaki, Mr. Kono Hironaka, Mr. Matsuda Masahisa and some other prominent members of the Party. The spacious hall was filled to overflowing by an eager and orderly audience, computed by some authorities to have been nearly three thousand strong. At 1 p.m., the meeting was opened by Mr. Ishizaka Juhei, *kanji* of the Party, who informed the audience that the present gathering had been organized for the purpose of announcing the political programme of the Radical Party. Mr. Tatsuno Shuichiro was the first speaker, his subject being "The Conduct of the Progressionists." He strongly criticised the actions of that Party in the present session of the Diet, especially with reference to its cordial coöperation with its bitterest enemy, the *Kokumin Kyokai*, and to the part played by it in the Hoshi drama. He was followed by Mr. Tanaka Kendo, who dealt with the question of the strict enforcement of treaties. He was not in principle opposed to strict enforcement, but practically he entertained no doubt that the result of the present agitation on this question would be simply to excite the anti-foreign prejudices of the conservatives. Alluding to the subject of Treaty Revision, he observed that the delay in the attainment of Japan's object in this direction, though principally caused by conservative obstinacy, must be in part ascribed to the erroneous administrative policy pursued by the present Premier, whom he called "a German Minister of State" (*Doitsu Daijin*). He had also much to say against the *Kaishin-to*, the *Kokumin Kyokai*, and the *Domei* Club. The third speaker was Mr. Ebara Soroku, and his subject, "The Present Condition of Our Party." He indignantly denied all the mischievous rumours which are now circulated about his Party, calling them mere fabrications of small-minded politicians bent upon the destruction of the Radical Party. Like the previous speakers, he spared no pains to attack the Progessionists, who, he declared, had already surrendered to the National Unionists. The next speaker was Mr. Saito Keiji, who took the Budget as his object. He explained the conduct of the Budget Committee. The Committee has decided to grant in the department of Expenditure a sum of money larger by 6,000 000 *yen* than the corresponding amount recommended in the report of the last year's Committee. This circumstance has been held up by the *Kaishin-to* and others as a sign that the Radicals, who form the majority of the Budget Committee, have abandoned their policy of opposition to the Government. Mr. Saito refuted this argument, and observed that the Committee had proposed reductions in salaries, office expenses, and so forth, exceeding by 2,000,000 *yen* the similar reductions recommended by last year's Committee. With reference to the donations given by the Emperor and the contributions made by the official class for Naval purposes, Mr. Saito stated that the Committee's idea was to ask the Sovereign to discontinue his donations as well as to stop the contributions by officials. Mr. Tatekawa Umpei next ascended the platform. He addressed the audience on the *Chishima* affair. At the outset he criticised the Lower House's indiscretion in the exercise of its Power of presenting Addresses to the Emperor. He recounted the principal facts connected with this case, and refuted the arguments advanced on the subject by Mr. Yamada and Dr. Hatoyama. He failed to discover any impropriety in instituting the suit in the British Consular Court, but he could not approve the Government's allowing its counsel to use His Majesty's name in the course of proceedings. He was followed by Mr. Misaki Kamenosuke, who spoke on "Treaty Revision and Strict Enforcement of the Treaties." He dwelt on the imperfections of the existing treaties, and alluding to the recent Imperial Message to the Cabinet Ministers, calling upon them to take resolute steps for the revision of the treaties. He blamed the Government for having pursued a weak and vacillating foreign policy in the past. Then turning to the subject of enforcement of the treaties, he declared that in importance this question could not be compared with the question of Treaty Revision. Next appeared on the platform Mr Matsuda Masahisa, who discussed the question of "Carrying out Representative Government." He stated that a representative system of Government can not be said to have actually come into existence until a system of responsible Cabinets—namely, Cabinets responsible to the Diet—have become an accomplished fact. Proceeding on this assumption, he could not but disapprove the conduct of

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

each of the Ministries that had held power since the establishment of the Diet. Concerning the present Cabinet, he pronounced it as irresponsible as its predecessors In conclusion he regretted to say that the Diet in the present session had also by it blind action shown itself as irresponsible as the Government. The next speaker on the programme, Mr. Kono Hironaka, then appeared on the platform, but it was evident that he was still far from having recovered from the illness which at one time caused grave apprehensions. He expressed his regret that the state of his health prevented him from the pleasure of addressing the audience. The last speaker, Count Itagaki, was received with loud cheers from every corner of the hall. He discoursed on "The spirit of the Radical Party," recalling the history of the hardships and difficulties undergone by the Party in pre-constitution days. "Our party," said the venerable leader, "was in those days the object of merciless persecution by a despotic clan Government, and the various hardships endured by the members, sacrifice of lives, loss of property, starvation of families, and what not, are past my power of description. All this while the members of the Government were basking in ease and luxury. Sentiments of resentment against them pierced our very bones, and have not yet been wholly forgotten by us. However, now that a Constitution has been granted by our gracious Sovereign, it is our intention to fight with the Government within the limits of law and the Constitution. The Government advocates nationalism while we are committed to individualism. They are aristocratic, while we are devoted to the people. They are for the centralization of political powers, while we are in favour of the increase of local autonomy. Such are the principal points of difference between the Government and our Party." As to the policy pursued by the Radicals, the Count stated that efforts must be turned in the direction of the reduction of public expenses, lessening the burdens of the people, equalization of taxes, encouragement of private enterprises, reform of the local Government system so as to give greater autonomy to local communes, increase of war-vessels, completion of the country's defences, and encouragement of navigation and trade. Alluding to the reforms introduced in the Administration, the Radical leader declared himself dissatisfied with such temporizing measures. He thought that attention should be chiefly directed to the Budget question; and deeply regretted that the House of Representatives had thus far wasted its precious time and energy on the Hoshi affair and the questions of Official Discipline and treaty enforcement—questions only useful for winning popularty. He strongly censured the parties chiefly responsible for such a state of things. Rather than join in such an absurd course of action and gain popularity, the Radical Party, said the Count, was content to do its duty and endure unpopularity. Then, speaking of himself, he said:—"As you can see from my very countenance, I am poor. Whenever I am possessed of money, I am deceived by other people, and when my followers increase, they too, are wrested from me by cunning persons. I like poverty—well that may be a little exaggerated, but at any rate habit has made me rejoice under adversities My body has been tempered and hardened during eighteen years of struggle with a despotic Government. The remainder of my life is consecrated to the service of my country, and I will not desert my position in politics until death carries me away." In conclusion, the Count alluded in a sarcastic strain to the silly things said about his party by its numerous enemies.

THE SUNG-PU MASSACRE.

Mr. Carl Bock, Swedish Consul-General in China, returned to Shanghai from Hankow on the 17th instant, having carried his negotiations with the Viceroy to an issue which shows how gross was the injustice done to him by the Shanghai local press at the time of the Sung-pu massacre. It is generally a foregone conclusion that any European or American official who fails to flourish swords and bayonets in the faces of the Chinese at the outset of every negotiation, becomes a target for local journalistic abuse, varying in violence according to the importance of the incident that formed the subject of negotiation. If Mr. Carl Bock had been the most incompetent, pusillanimous, and unpatriotic Consul that ever received an exequatur, he could not have been more mercilessly criticised than he was by the Shanghai press, yet it now appears that he is an official of resolution, resource, and ability. The arrangement made by him with the Chinese includes re-establishment of the mission at Sung-pu, a measure of doubtful wisdom, but important on account of its moral effect. It is probable that the re-establishment will be delayed owing to the difficulty of getting a competent man to occupy the post, but the fact remains that the permission has been secured, to the surprise of many persons who predicted confidently that the Viceroy would never agree to anything of the kind. It is said that H.E. Chang raised strong objections, and that Mr. Bock was obliged to play a very high game. At the close of an interview, during which the Viceroy had more than once lost his temper, Mr. Bock held out the possibility of carrying the case to Peking, and observed, "I offer you sugar, but if the case goes to Peking it will be salt in an open wound." To which H.E. Chang, with marks of anger, replied, "I like sugar, but I can also take salt." Chang himself did, in point of fact, refer the matter to Peking behind Mr. Bock's back, and the Tsung-li Yamên induced the foreign Representatives to telegraph to the Consul-General advising him to make a comparatively unfavourable arrangement. But Mr. Bock, having from home a free hand to settle the affair according to his own judgment, would not budge, and finally the Viceroy gave way. The monetary indemnity, though in itself insignificant, is a larger sum than Gardener obtained after the Wusueh trouble, and shows that China recognises her guilt. With regard to the murderers, Mr. Bock believes that the right men have been caught and will be executed, but at any rate the plan proposed in some quarters, namely, a tribunal of investigation with a foreigner on the bench, would have been a futile pageant. Mr. Bock's nationals are said to be well satisfied with the result of the negotiation. They hold justly that he showed great ability in accomplishing so much without a fleet at his back, with the fault of the missionaries in refusing to take warning, and with the improper detention of the victims' servants to answer for.

THE GOVERNMENT'S POSITION.

A foreshadowing of the kind of indictment that will be preferred against the Government should it dissolve the Diet, is afforded by an article in the *Chiuo Shimbun* (*Kokumin Kyokai* organ). The writer professes profound astonishment at the notion that any body of Japanese statesmen could induce themselves to stand opposed to the nation on a question such as the strict enforcement of the treaties. He also adroitly introduces the *Chishima-Ravenna* affair, and tries to create an impression that apprehension as to the result of an inquiry into the latter has at least as much to do with the Government's attitude towards the Diet as a conviction of the necessity of preserving the country's foreign relations against injurious legislation. The truth is that the National Unionists whom the *Chiuo Shimbun* represents, are exceedingly perturbed at the prospect of the Diet's dissolution. They know that a general election signifies the almost inevitable loss of many of their seats, and they consequently seek to dissuade or intimidate the Government against any step of the kind.

THE OCEAN TELEPHONE POSSIBLE

Prof. Silvanus. P. Thompson is one of those who believe that ocean telephony is not only possible, but that the means of attaining it are within our grasp. Telephone cables for the deep sea will, however, require to be made on a different plan from the existing telegraph cables; that is to say, a single conductor of stranded copper insulated and surrounded by an iron sheathing that comes between the outgoing wire and the water which serves as the return part of the circuit. The going and return wires will have to lie side by side within the sheathing. Moreover, the whole circuit will probably have to be broken up into sections which are capable of acting upon each other by mutual induction—*Globe*.

YOKOHAMA LITERARY SOCIETY.

Some very interesting items were included in Friday evening's programme of the Yokohama Literary Society, the chief being a selection for five violins and piano by Pleyel, which was given by Dr. Munro, Messrs. Fenton, Staniland, Mendelson, Crane, and Griffin. It was very nicely executed, and will well bear an early repetition. Mrs. Rice recited a pretty New Year Ode, the original composition of a lady member of the Society. Mr. Fenton sang "Beauty's Eyes," with violin obligato by Mr. Crane; while Mr. MacArthur gave a reading from "Tam O'Shanter." The opening overture to the second half, as also the first overture of the evening, was by the President and his accomplished daughter. Mrs. Smedley read, in her usual graceful style, a highly dramatic version of the big Yokohama bank robbery which startled the community by its daring originality in the middle seventies, and which had such a tragic *finale* in Habeda Bay. The magazine writer had taken a general license to put back the dates somewhat, disguise the names of the principals, and mix-up the nationalities, while at the same time adding some imaginative touches of his own, still the story was easily recognised by the old residents present. Mr. Clarence Griffin having given a recitation, the programme concluded with a trio, Haydn in C. Major, for violin, 'cello and piano, Messrs. Munro, Crane and Fenton.

TWO FALSE REPORTS.

We observe that two false reports are circulated by the local English press in Japan and China. The first is that the *Japan Mail* has changed hands, a purchaser having been found for it in China; the second, that the house of the editor of the *Japan Mail* is guarded by detectives. Both statements are absolutely baseless. The *Japan Mail* has not been sold to any one. It is not for sale, and has not been for sale at any time during the past thirteen years. The house of the editor of the *Japan Mail* is not guarded by detectives. It never has been guarded by policemen in any form, nor has there ever been talk of such a measure in responsible quarters or any occasion whatever for it.

CANADIAN PACIFIC AHEAD.

The Canadian Pacific Railway Co. have received the highest award at the World's Fair for their standard passenger train and locomotive. It reads as follows:—"For excellence of design and construction of a handsome transcontinental passenger train having special features of merit in its Colonist's sleeping cars." "Locomotive. For general excellence of workmanship and design, specially of the steel cab lined with wood, and manner in which main frames cylinder saddle are braced." They have also received an award on the model of their Japan and China steamers

COLLISION.

A rather serious collision took place in the Shanghai river, opposite the Bund, about a quarter to nine o'clock on the morning of Dec. 20th The French mail steamer *Salasie*, Captain Paul, was going down from her moorings, opposite the M.M office, to Woosung, and the China Navigation Co.'s steamer *Soochow* Captain Neil Martin, was coming up, light, on the right side, with a strong flood tide. The mail steamer had just had some slight trouble to clear a cargo boat, and had very little room to manœuvre in, having to keep in to the Shanghai side, and while she was endeavouring to answer her port helm, when nearly opposite the end of the Nanking Road, the *Soochow*, which had just let go her anchor, struck the *Salasie* between her fore and main masts, on the starboard side, causing her to heel over to

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

port. The accident was witnessed by a large number of people on shore and in the shipping, and caused a good deal of excitement. When the ships cleared each other it could be seen that the *Soochow's* stem was badly twisted. The *Salasie* was also seriously damaged, several plates being bulged in, all well above water, however. Her upper works were untouched. She proceeded on her way down river, and a survey was afterwards made to ascertain the extent of her injuries, when it was found that some plates had been broken and bent, necessitating the replacing of at least five or six. The *Soochow* was even more seriously damaged and her repairs will occupy several days. It is estimated that the damage will take at least Tls. 10,000 to repair.—*Mercury*

* * *

The settlement of the collision between the *Salasie* and *Soochow* has been submitted to arbitration. The Assessors are Capt. Maufet, of the French gunboat *Comète*, and Lieut V. Maud, of H.M.S. *Caroline*, with Commander Impey of the U.S.S. *Monocacy* as umpire. The enquiry was held on board the *Monocacy* on December 22nd, but had not concluded when the mail left Shanghai.

TWO COLLECTIONS OF CHINESE PORCELAIN.

American amateurs are destined, it would seem, to have an exceptional opportunity early next year of acquiring some fine specimens of Chinese porcelain. The well known collections of Mr. A. J. How, of Shanghai, and of the late Mr. W. H. Forbes, of Tientsin, are to be offered for sale at one of the art galleries in New York, probably about the month of April. Each of these collections contains many beautiful and rare examples of wares now not procurable in China without great difficulty and paying very high prices. They are especially rich in fine grades of blue and white, including a number of grand "Hawthorns," in *Lang yao (sang de-bœuf)*, in "grains-of-rice" porcelains, in *Famille Verte*, and in monochromes. The collections were put together during some two decades of residence in China. They are free from any of the spurious or inferior specimens that usually figure in assemblages of wares brought under the auctioneer's hammer, and we imagine that the amateurs of the United States will not be slow to appreciate their value. Everything fine in the way of objects of art gravitates to America now. Plenty of gold and no lack of readiness to spend it for the acquisition of choice specimens constitute a force of attraction that nothing can resist.

A GRIEVANCE.

One of the members of the Hyogo City Assembly has presented to that body a *gravamen* in which he brings before the notice of the members the fact that there are several Japanese merchants trading in the part of the city opened for mixed residence, who avoid the payment of the business tax by using the services of some foreigner in whose name they carry on their business. In order to prevent any such abuse in the future, it is intended to tax all business houses in the Mixed Residence District, whether the proprietors be Japanese or foreigners. Foreigners who object to pay the tax can always remove their business into the Concession. This seems a practical suggestion, and will we hope save the Japanese Government from being defrauded. We get our information from the *Mainichi Shimbun*.

DEATH OF THE U.S. CONSUL TO SHANGHAI.

A telegram was received on the 28th ult., at the United States Consulate-General at Shanghai, from the State Department, announcing the death at sea on the 9th inst., between Yokohama and San Francisco, of Mr. A. D. Jones, U.S. Consul General at Shanghai, who left Shanghai for his home in the States on the 25th of November. Mr. Jones, says the *N.-C. Daily News*, was seriously ill when he left, having been more or less in bad health ever since his arrival at Shanghai on the 1st of August last, but it was hoped that a trip home would restore him to health. The hope has proved baseless. He was only thirty-six years of age. The flags of all the Consulates and men-of-war were half-masted as soon as the news became public.

THE EMPEROR AND THE THREE PREMIERS

The *Kokkai* says that on the 25th instant His Majesty the Emperor summoned to his presence the three Counts who have occupied the post of Minister President, Count Ito, Count Kuroda and Count Yamagata, and conversed with them for fully two hours with reference to the policy which they intended to pursue towards the Diet. His Majesty is said to have been entirely satisfied with their representations. On leaving the Palace the three Counts repaired to the Cabinet, and there arranged the exact details of the measures to be adopted *vis-à vis* the House of Representatives. Their programme was communicated to the various Cabinet Ministers the next day and approved by them.

ELECTRIC RAILWAYS.

The News Agency says that a fever for electric railways is becoming epidemic. Projects for building several such lines are now on the *tapis*. The following are tabulated:—*Tokyo Denki Tetsudo, Tokyo Densha Tetsudo, Keihin* (Tokyo-Yokohama) *Denki Tetsudo, Tokyo Basha Tetsudo, Osaka Denki Tetsudo, Osaka Densha Tetsudo, Settsu Denki Tetsudo, Osaka Koka* (overhead) *Denki Tetsudo, Kobe Denki Tetsudo, Arima Denki Tetsudo, Yoro* (Mino) *Denki Tetsudo, Izuso* (Izu-Sagami) *Denki Tetsudo, Oita Denki Tetsudo, Bushu Denki Tetsudo, Odawara Basha Tetsudo, Ibaraki Denki Tetsudo, Saitama Denki Tetsudo, Nagoya Denki Tetsudo, Kyoto Denki Tetsudo*, making 19 projects in all

BALL AT THE RUSSIAN LEGATION

On the evening of the 26th instant a most delightful ball was given at the Russian Legation in Tokyo. The arrangements were perfect, and the presence of a large number of officers from the Russian Squadron imparted to the affair more than usual verve. Dancing was kept up until half-past four in the morning, the hospitality of Mr. Hitrovo proving so irresistable that even at such an hour the guests separated with difficulty and regret. Many of the Imperial Princes and Princesses and all the Ministers of State were present.

ADMIRALTY CONTRACTS.

The Admiralty have contracted for the building of thirteen torpedo-boat destroyers with the following firms:—J. & G. Thomson, Limited, Clydebank, 3; Palmer's Shipbuilding Company, Jarrow, 3; Hannah, Donald & Wilson, Paisley, 2; Doxford & Sons, Sunderland, 2; White, of Cowes, 3. These vessels are to have a speed of 27 knots. The total contract will amount to about half a million sterling, and tenders are now being asked for the 14,000-ton cruiser which is proposed to be built by private contract.

STORM IN HOKKAIDO.

A telegram despatched from Otaru on the 26th inst. at 1.55 p.m., and received by the *Asahi Shimbun*, states that bad weather has prevailed there for some time. A slight shock of earthquake was felt on the morning of the 24th, and this was followed by violent winds and heavy rains. The storm raged most severely on Monday morning. Railway communication between Otaru and Sapporo was interrupted, and much damage was done in Otaru. Some thirty dwellings were overthrown at Iwanai, in Shiribeshi Province.

BOARDING HOUSE FOR BOYS IN TSUKIJI.

The school in Tsukiji which was started some years ago by Miss MacRae, and has already been found to supply a very real need, has, hitherto been only a day school with no boarding house attached. Mr. G. J. H. Schurr, who for many years has had experience in scholastic work, is now prepared to meet this further want, and has opened a boarding house for boys at No. 12, Tsukiji. Parents living at a distance from Tokyo, and desiring for their sons the education offered at Miss MacRae's school, will be glad to have their attention drawn to Mr. Schurr's advertisement in another column.

GOING FORWARD

The *Free Press* notes that Captain Bayley, P. & O. agent at Colombo, has just returned to Ceylon. The most important item of news he brings out is that the P. & O. Company are building a new 19 knot steamer called the *Caledonia*, which is for the Australian line, and which will be ready in six months' time. It will be 1,000 tons larger than the *Australia*. He does not think it likely that the P. & O's China fleet will be bettered in the near future, notwithstanding Mr. Henniker Heaton's recent denunciations.

THE "AURORA."

The schooner *Aurora*, (43·41 gross tonnage) whose master has figured prominently in the British Court for some time in regard to the question of paying-off his men, was sold at auction by Mr. John Hall, on Friday, through instructions from H.B.M.'s Court. The bidding started at $1,000, and slowly rose to $3 600, at which figure the vessel was knocked down to Mr. J. Johnstone for a local shipping firm.

THE SOMA CASE.

The magisterial examination of Nishigori, the man who preferred such sweeping accusations against the chief retainers of the Soma Family, has now been concluded, the result being that Nishigori and Goto Shimpei are remanded for trial on a charge of perjury; Okano, Yamada, and Koyama for aiding and abetting them; Yamaguchi and Watanabe for receiving bribes, Hoashi for fraud, and Hiranuma and Kato for bearing false witness.

OPENING OF THE PORT OF MORORAN

In spite of some opposition to the scheme the Government have the intention to lay before the Parliament a Bill for the opening of Mororan for special foreign trade. Unless this is passed the Hokkaido Colliery Railway Company will be unable to fulfil the contracts for coal they have received from America, Hawaii, and Hongkong. If the Bill becomes law, they hope to get a very considerable increase of business.

THE PORTUGUESE MINISTRY.

The *Official Gazette* prints a telegram despatched by the Japanese Minister in France and received at the Foreign Department on the 24th inst., stating that the Portuguese Minister of Foreign Affairs has been appointed Minister of Finance, his previous position being given to Senhor Aronca

BIG FIRE IN ISHIKAWA PREFECTURE.

A telegram from Kanazawa received by the *Asahi Shimbun* states that a destructive fire occurred at Terai-mura, Nomi District, on the morning of the 24th inst. One hundred and forty-four houses and seven telegraph posts were burnt. No loss of life has been reported.

THE "STRATHDON."

The *Strathdon*, recently reported on fire in the Suez Canal, is said to have had her No. 2 hold, stokehold, and engine-room full of water. The steam pumps were got to work, and 80 per cent. of the cargo was either burnt or under water the bridge, deck houses, and deck being burnt amidships

THE DAI NIPPON KYOKAI DISSOLVED.

The *Nichi Nichi Shimbun* says that the authorities ordered the dissolution of the *Dai Nippon Kyokai*, organized by opponents of Mixed Residence, on the 29th inst in accordance with the 30th Article of the Public Meeting and Political Association Regulations.

FIRES IN SHANGHAI

Shanghai experienced two fires quite recently. One broke out in a bakery outside the small south gate of the city, and damage to the amount of $5 000 was done. The other started in a row of buildings in Hongkew and destroyed eight houses.

THE EMPEROR, THE DIET, AND THE PRIVY COUNCIL

EXPERIENCE had led the public to anticipate that the EMPEROR'S reply to the House of Representatives' Address on the subject of Official Discipline, would not be altogether favourable to either of the parties concerned. Absolute impartiality is the SOVEREIGN'S first attribute in judging between his subjects. Whatever topic is carried for decision to the first of the THRONE, the EMPEROR maintains an attitude of unbiassed justice. The House of Representatives, during the present session, has betrayed marked forgetfulness of Japanese traditions. It has shown itself curiously lacking in the sense of reverence towards the THRONE that has always been regarded as a dominant trait of Japanese character. Approaching the SOVEREIGN on the most petty subjects, it has sought to make HIS MAJESTY a Judge of appeal between itself and the Cabinet. If grave issues were in question, if the House were dealing with materials at all sufficient to constitute an impeachment of the Ministers of the CROWN, there might be some excuse for reference to the THRONE. But when the points to be determined are the propriety of a Minister's dining with merchants, or of a Vice-Minister's receiving a gold-watch in public presentation, or of a judicial precedent being followed after thirty years of unquestioned observance, or of the SOVEREIGN'S name being used in a Court of Law, as are the names of all Western monarchs—when such trivialities as these alone are at stake, the House of Representatives' constant appeals to the THRONE amount to an attempt to drag the SOVEREIGN down into the arena of political bickerings, and to divest HIS MAJESTY of the respect and reverence hitherto accorded to him by every one of his subjects. We entertain no doubt that many loyal Japanese have watched these frivolous proceedings with strong indignation, and that dissolution of the Diet on the declared ground of the Lower House's failure to appreciate its responsibility towards the THRONE, would have been a thoroughly popular measure with a large section of the nation. But HIS MAJESTY'S present Ministers must naturally hesitate long before having recourse to such a step They doubtless argue that the less heedful the House's action towards the EMPEROR, the more solicitous should HIS MAJESTY'S trusted Statesmen be to thrust back the waves of political dissension from the foot of the THRONE. This conviction, we may fairly assume, led them also to counsel rigid absence of partiality in the SOVEREIGN'S reply to the Address, though it did not restrain, and need not have restrained, the Privy Council from expressing, in terms singularly strong and unequivocal for such a document, emphatic disapproval of the House's irresponsible levity. Neither side is awarded a complete victory by the EMPEROR, The House of Representatives is distinctly reminded that the SOVEREIGN recognises no right in any of his subjects to interfere with the exercise of the Imperial Prerogative of appointing and removing officials, and is informed by implication that the charges preferred by it have no validity as an impeachment of Ministers of State. On the other hand, the language used by the Privy Council and its apparent endorsement by the SOVEREIGN lead the public to infer that some laxity has been found to exist in the Department of Agriculture and Commerce, and to that extent the action of the House of Representatives receives justification. We must confess that these things do not interpret themselves as clearly as might be desired. If the conduct of a Department of State is sufficiently deserving of censure to call for direct comment in an Imperial Rescript, then surely it may also be held to have warranted some step on the part of the House of Representatives. As the matter stands, the public is apparently invited to conclude that whereas official discipline does not attain an altogether high standard, it is yet not low enough to demand strong measures of reform. The course of events will perhaps unriddle this perplexity, but at present it looks like a compromise between expediency and justice

Of wider importance and interest is the declaration contained in the third paragraph of the Rescript, namely that the appointment and removal of Ministers of State depend entirely upon the SOVEREIGN'S pleasure, and that no interference with the exercise of that Prerogative will be tolerated. In these significant words the House of Representatives receives from the EMPEROR an unequivocal intimation that its continued attempts to make Ministerial tenure of office depend upon a Parliamentary vote are a direct invasion of the Prerogatives of the CROWN That fact, indeed, has always been considered a fundamental principle of the Japanese Constitution, but we are by no means certain that the text of the Constitution will bear so rigid a rendering. The words "The Ministers of State give advice to the EMPEROR and are responsible for it," do not forbid the interpretation that a portion, at any rate, of the responsibility might ultimately have been held to exist towards the Diet, had the House of Representatives shown itself worthy of such a trust. But the House of Representatives, as at present inspired, has demonstrated its complete unfitness to be invested with the function of selecting and commissioning the country's administrators, and the SOVEREIGN, having that conviction forced upon him by practical experience, now publicly proclaims for the Constitution a definition fatal to the pretensions which the House has been attempting to set up.

It will be observed that the Rescript travels beyond the immediate subject that elicited it, and refers to the topic at present occupying so prominent a place in the nation's attention, namely, the country's foreign relations. HIS MAJESTY'S conveys to the Diet and to the public an intimation, not to be misunderstood, that the intention of the CROWN is to continue the amicable and progressive policy hitherto pursued, and that every obstruction of such a policy must be counted hostile to the EMPEROR'S purpose. The advocates of enforcing the strict letter of the treaties, thereby imposing fresh and irksome barriers on liberty of intercourse and commerce, as well as the opponents of mixed residence who would maintain in Japan a state of isolation inconsistent with the universally recognised principles of civilization, receive in this Rescript a warning that ought to induce serious reflection.

INDUSTRIAL ENTERPRISE IN CHINA.

THE Chinese seem very resolutely bent upon starting manufacturing industries. If, they argue, Japan can find her account in spinning cotton yarns and exporting them to China, then assuredly China should be able to spin them for herself, seeing that labour is at least as cheap in China as it is in Japan, that the necessary materials are procurable with equal ease in either country, and that all the conditions of manufacture are apparently similar. Hence projects are on foot to establish two factories, in addition to rebuilding the big affair recently destroyed by fire in the environs of Shanghai. These schemes, however, are understood to be official affairs. Chinese officialdom seems determined to reserve for itself whatever profits may be expected to accrue from the country's first manufacturing efforts. Whether there will be any profits at all under the circumstances, is open to doubt. The individual Chinaman is a most capable sort of person. As a labourer he has high qualities, and it is impossible to withhold admiration from the dogged courage and perseverence that he carries into the sordid, grinding struggle for existence in his own country. But perhaps because from generation to generation he has been compelled to fight so relentlessly for his own hand, he appears to have lost some of the qualities essential to successful combination. Sacrifices in the interests of the common good do not enter into his creed, and if he sees any way of enriching himself at the expense of his associates, no delicate considerations deter him There are no evident reasons why he should depart from this rule in starting cotton factories, especially under official organization, and since Japan's experience has shown how little margin of

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

profit offers in competition with Manchester, one is disposed to be sceptical about the result of China's essay. Meanwhile, this resolution of her officials to preserve to themselves such an important branch of enterprise, will increase the umbrage already engendered by her refusal to allow foreigners to engage in manufactures or to import machinery. Whether the letter of the treaties bears her out in this attitude may be a debateable question, but that it is an illiberal attitude must be frankly conceded. Are there, however, any genuine grounds for regretting her resolve? We are inclined to answer in the negative from an English point of view. It can not conduce to the interests of British manufactures that factories should be established in China to supply the Chinese with articles now sent to them from Great Britain or her dependencies. Some set-off would be furnished did the machinery come from British firms, but the probability is that the great bulk of it would be procured from America, and that American experts would be engaged to run the factories. Where Great Britain would find her account in such a state of affairs we do not clearly see. If any Englishman raises his voice against China's interpretation of the treates and insists that she is conventionally bound to permit the organization of manufacturing industries and the import of machinery by foreigners, he must either have studied the subject immaturely, or be a slave to the old-fashioned policy of claiming everything merely on the principle that everything ought to be claimed where an Occidental is the claimant and an Oriental the defendant. So far as concerns the principle of foreigners to engage in such work in China, it is difficult to perceive how any question can be seriously raised in view of the right already established by practice and prescription. In point of fact foreigners do carry on numerous manufacturing industries in China, and have carried them on for quite a number of years. As long ago as 1859 a silk filature was established by Messrs. JARDINE, MATHESON & Company, and though its operation was abandoned after a time, it has now a strong successor in the Shanghai Silk Filature, Limited. Then we have a Japanese Company successfully carrying on cotton-ginning work in Pootung, and the list of running concerns includes paper-making, ship-building, match manufacturing, sulphuric acid making, beer brewing, and ærated water manufacturing. In some of these cases steps may have been taken to "square" officialdom, but with such a volume of industrial enterprise in unchecked existence, it is surely idle to argue that the treaties can now be construed in a sense hostile to the enjoyment of manufacturing privileges by foreigners. We cannot be surprised that some critics should accuse Chinese officialdom of seeking to secure a selfish monopoly by setting up impossible distinctions between cotton-spinning mills and other forms of industrial enterprise. At the same time, while stoutly maintaining the unreason of such an attitude at this eleventh hour, we really do not see that Englishmen are interested in opposing the practical consequences of this Chinese contention.

ACTORS IN JAPAN.

THERE is probably no country in the world where actors enjoy such a large feminine regard as they do in Japan. It is a strange fact, for certainly they possess very few of the attributes generally supposed to attract the fair sex. In the West nothing is commoner than the development of an absorbing attachment on the part of a man for some beautiful queen of the stage. But in such cases the object of love has all the external qualities that render a woman lovable, and has moreover educated the art of displaying them to the best effect We hear too of women falling in love with actors who to a handsome person add impressive power of displaying passion and pathos, or who possess, what appeals even more strongly to the fair sex, a grand voice. All such displays of affection are easily understood. But apart from histrionic skill, which they undoubtedly possess in a very high degree, Japanese actors do not seem to be the owners of any titles to female attention Physique they have none and their complexion is purely artificial. Perpetual confinement indoors and constant painting of their faces give them ultimately a pasty white appearance which an inexperienced girl may mistake for refinement. But closer acquaintance, disclosing as it must the sickly complexion, rickety physique, and wholly unmasculine *ensemble* of the Japanese actor, ought to dispel the delusion. It does not, however. On the contrary, the standard of beauty is to this day taken from some famous actor's "get up" in a particular character. It is true that no gentleman can aspire to a higher type than that reached by HIRAI GOMPACHI, nor can any girl hope to be fairer than ONO-NO-KOMACHI or TERUTE-HIME. But the lapse of centuries has robbed these historical characters of their living power of appeal. Their time-dimmed impression fades in comparison with the winning graces displayed by the youngster FUKUSUKE in his impersonification of *Tora*, or with the noble gallantry of KIKUGORO'S knightly bearing in the part of *Yosaburo*. The fact appears to be that in Japan the actor's tricks of deception constitute a perpetual transformation. The figure he cuts in a particular rôle continues to be associated with him even after he has resumed the homely mien, insignificant bearing, and perhaps small-pox pitted features with which nature has dowered him for every-day use. A high tribute to his acting is certainly conveyed by this persistence of impression, and he deserves it. There is further to be noted the circumstance that Japanese actors, instead of waiting until a general meed of applause is accorded to them, seek to anticipate public favour through the medium of personal patronage, and it has thus become a kind of fashion with theatre-goers to associate themselves with the rising fortunes of this or that *débutant*. Such a relation may easily develop very delicate phases where a lady is the patroness. In Tokyo, happily, this demoralizing element is gradually being eliminated, and to his great credit it must be recorded that the celebrated actor ICHIKAWA DANJURO, now King of the Japanese stage, is the principal reformer. Against DANJURO'S private life no whisper of scandal has ever been directed, and not infrequently we hear of a pupil of his being expelled because of some loose conduct at which another master would have winked. The press, too, unintentionally exercises a wholesome influence, for contemptible and degraded as is the purpose of the petty journals that pander to the vicious tastes of their readers by relating the scandals of the green-room and the assignation house, there can be no question that the publicity they give to such matters constitutes a strong check. It is alleged, however, that the reform has not yet extended beyond Tokyo, and that in Osaka, where the drama evokes much stronger enthusiasm, girls of good position not infrequently visit actors at the latter's private residences. Worse still is the case in country districts. There actors find it a lucrative branch of their trade to cultivate questionable relations with young ladies whose families are in easy circumstances. The liberality of the deluded victim while the liaison lasts and the blackmail ultimately extorted to bring it to a termination, add materially to the scanty gains obtainable on the stage. In Tokyo such proceedings are said to be now confined to actors of secondary rank and girls of easy virtue. There are evident reasons why these two classes should come together, chief among them being the fact that such actors were themselves, for the most part, born out of honest wedlock, and that their wives, if they have any, are usually of the dancing-girl or prostitute profession. Hence a species of affinity exists and is practically recognised. Both sides play their own game, the girls aspiring to become the wives of the actors, the latter seeking to eke out their scanty income by contributions from their fair admirers. Probably much of the mischief is attributable to the palpably insufficient remuneration of the actors. Recently the tendency of the times has been in the direction of increasing their honoraria, but in pre-*Meiji* days an actor of the first rank could not hope to obtain more than 500 *yen* annually under a contract of six performances a year. Shortly after the Restoration, a sum of 400 *yen* paid to the

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

late BANDO HIKOSABURO and to SHIKAN for a performance lasting 42 days, was considered something quite out of the common. But men's ideas grew with the era. About 1883, the manager of the Shintomi Theatre did not hesitate to pay 1,000 *yen* to DANJURO, 700 *yen* each to KIKUGORO and the late SOJURO, and 800 *yen* to SADANJI for one course of acting, and when the now famous Kabuki-za in Tokyo was opened, four years ago, DANJURO'S services were engaged at 2,000 *yen* each for four performances of about 33 days each, annually. But DANJURO is *facile princeps* among Japanese actors. His honoraria have gone on steadily increasing, and the relation in which he stands to his contemporaries, as well as the sums earned by the stars of the stage to-day may be gathered from the following table, which shows the amounts actually paid by the lessee of the Kabuki Theatre at the fall of last year:—

DANJURO	5,200 *yen*.
KIKUGORO (including the pay of his two adopted sons).	1,500 *yen*
FUKUSUKE	1,000 *yen*.
SHUCHO (this amount is comparatively small in consequence of Shucho having been engaged simultaneously elsewhere.)	400 *yen*
MATSUSUKE	400 *yen*.

Below this the rates gradually fall as low as 40 or even 6 *yen* annually for assistants and supernumeraries. KIKUGORO'S position relatively to DANJURO cannot fairly be deduced from the above table, as the former did not happen to play in leading parts last year. DANJURO'S eminence does not depend solely on his wonderful histrionic skill. He owes a good deal to the prestige of his family, which has given leading actors to Japan generation after generation, to his wide and accurate knowledge of historical affairs, both public and private, and to his high moral character. Yet his career has been one of struggle. Even now he cannot be counted opulent, and despite his persistent desire to raise the status of his profession, he does not consider it incompatible with his dignity to receive a present of money when he visits a private house. Impecunious in all countries, actors in Japan are eminently so, and their difficulties are greatly enhanced by the traditional necessity under which they labour of making even their private lives a kind of spectacular display. They generally spend far more than they can afford and whenever public occasions offer the spirit of their profession requires that they should utilize them in the most conspicuous manner. Two years ago, KIKUGORO made his entrance into Osaka surrounded by paraphernalia of a gorgeous description, the cushion upon which he was seated in his *Kago* having cost alone several hundreds of *yen*. Pushed, on the one hand, by the professional urgency of parade and display, and confronted, on the other, by the slenderest resources, it is not surprising that Japanese actors should often resort to immoral means of replenishing their purses. The great majority of them have yet to learn that they can never attain a high place in public esteem until they prescribe for themselves and apply to their private lives a standard of morality very different from that now adopted.

THE HOUSE OF REPRESENTATIVES ON FRIDAY.

ITS sentence of prorogation having expired on Thursday, the House of Representatives re-assembled on Friday. As usual on similar important occasions, the Strangers' Galleries were entirely filled long before the proceedings commenced. It was also noticeable that the members took their seats more quickly than usual. The attendance was better than expected, there being more than 250 members in their seats. Before proceeding with the Order of the Day, the President announced the appointment of Mr. ABEI IWANE to the post of Vice-President. Mr. ABEI thanked the House for having recommended him for the important position to which the EMPEROR had been pleased to nominate him. He hails from one of the provinces in the North-East, and is a Conservative in politics, being a leading member of a small faction called the *Seimu Chosajo*, which enjoys considerable popularity on account of its devotion to the cause of anti-Mixed Residence. Mr. ABEI is an old man, probably several years past sixty, honest and straightforward but narrow-minded—a good type of the Japanese country gentleman. It is a singular sign of the times that a man so completely identified with the anti-Mixed Residence movement, and who was the introducer of the Representation on the subject of treaty enforcement, should have been selected by the House as a candidate for the Vice-Presidentship. A new member from Yamagata, Mr. HOSHINO, was then introduced, and received by the House with loud clapping of hands. Then followed the usual reading by the Chief Secretary of various reports and answers of the Government to questions propounded by the members. Among the latter documents was the Naval Minister's reply to questions on the *Chishima* affair. It was perhaps the fullest and most elaborate reply ever offered by the Government. Its length may be judged from the fact that the reading occupied nearly forty minutes. Nevertheless, the importance of the subject and the clear and logical style of the document secured for it an attentive hearing. While the Chief Secretary was engaged with this document, the seats reserved for the Ministers of State were occupied by Count ITO, Mr. MUTSU, Count INOUYE, Count OYAMA, Mr. WATANABE, and Mr. YOSHIKAWA, in the order named. So soon as the Chief Secretary had completed his laborious task, members sprang to their feet, asking leave to speak. But they were too late. The Minister of Foreign Affairs, having been able to catch the President's ear before them, was already on his way to the rostrum. His Excellency had hardly spoken two minutes when he was rudely interrupted by Mr. TSUNODA SHIMPEI, a well-known and conspicuously quarrelsome member of the *Kaishin-to*. The President asked him to be seated, but paying no regard and growing more heated and angry at each attempt to stop him, Mr. TSUNODA shouted out that, though Ministers of State had liberty to speak whenever they pleased, they had no right to interrupt a member for the purpose, which Mr. MUTSU was in effect doing, since Mr. ABEI HANKON really had the floor, the House having been prorogued on the 19th instant before Mr. ABEI'S speech was concluded. Mr. TSUNODA spoke with great energy and, we may add, eloquence, all the while vehemently striking the table with the "Standing Orders of the House," which he held rolled up in his right hand. So impetuous was the torrent of his wrathful protest, that the President could not for a time put in a single word. The Progressionist's point of order was instantly taken up by several members, the most noisy among them being, as might have been expected, Mr. SHIMIZU BUNJIRO. Great disorder prevailed for a time. Mr. INOUYE KAKUGORO and others advised the President to order Mr. TSUNODA out of the hall, and as the confusion increased, Mr. TSUNODA repeatedly defying the Presidential authority he was finally ordered to withdraw from the Chamber This he declined to do, and two serjeants and a Secretary of the House proceeded to execute the President's order. They gradually forced the angry member out of the House, he vehemently shouting all the while, enraged and contumacious objections. Order having been restored, the Minister of Foreign Affairs proceeded with his speech. He spoke with admirable self-possession and command of language, but the House was not in a mood to listen to any Minister calmly, and his speech was repeatedly interrupted by cries of "No! No!" and other hostile remarks. When he ceased speaking, several members sought permission to put questions to him, but the Minister nonchalantly left the House, evidently resolved to submit to no baiting. At this stage an Imperial Message was laid on the President's table. It was immediately supposed to be an order for dissolution, but its reading by the President speedily dispelled that notion, and the members learned that their sitting was again prorogued until January 11th. Under any circumstances the House would have risen until the 8th proximo, so the session is shortened by three days only. Usually an Imperial Message is listened to by the members in a perfectly quiet and re-

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

spectful manner, but on the present occasion we are constrained to say that they were too excited to preserve a decorous attitude. The speech of the Minister of State for Foreign Affairs and the order of prorogation immediately following it, sharply define the issue between the Government and the Opposition, and remove all doubt as to the true cause of the former's action in twice proroguing the Diet. We shall publish a full translation of this most important speech in our next issue.

IMPERIAL DIET.

FRIDAY, DECEMBER 29TH.

HOUSE OF PEERS.

The House did not sit, the Committees alone coming together.

HOUSE OF REPRESENTATIVES.

The House met at 1.15 p.m., the Order of the Day being :—

1.—Representation relating to Strict Enforcement of the Treaties.
2.—Bill, introduced by Mr. Kozaka Zennosuke, for amending the Savings Bank Regulations.
3.—Second Reading of the Bill for amending the Law of Registration.
4.—Report of the Special Committee on the Newspaper Regulations Bill.

Mr. Abei Iwane, referring to his nomination by the Emperor on the 20th instant to the post of Vice-President, thanked the House for the honour it had done him in electing him to such an important position. He was well aware of his own unfitness to discharge the functions entrusted to him, but he intended to exert himself to the utmost of his ability, and he hoped with the indulgent assistance of the House to succeed in performing his duty.

The President announced the receipt of

1.—A Reply from the Minister of State for the Navy to the Questions addressed to the Government by Dr Hatoyama and others, on the subject of the *Chishima-Ravenna* Law-suit.
2.—A Reply from the Minister of State for Home Affairs to the Questions addressed to the Government by Mr. Yumoto Yoshinori and others on the subject of Riverine Control.
3.—A Reply from the Minister of State for Agriculture and Commerce to the Questions addressed to the Government by Mr. Shimura Bunjiro on the subject of Licenses to Exchanges.

The Reply with regard to the *Chishima-Ravenna* Law-suit was read.

During the reading, Their Excellencies the Minister President, the Ministers of State for Foreign Affairs, Home Affairs, War, Finance, and Education entered the House and took their seats on the Dais. On the completion of the reading, cries of "President," "President," rose from various parts of the House. Meanwhile H.E. Mr. Mutsu, Minister of State for Foreign Affairs, ascended the rostrum, and commenced to Address the House when,

Mr. Tsunoda Shimpei rose to a point of order. Speaking in a loud voice and with much vehemence, he asked whether the President was acquainted with the Law of the Houses. The 33rd Article of that Law provided that, when either House met after the termination of a period of prorogation, the debate of the last meeting should be continued. When the prorogation of the House was ordered on the 19th inst., Mr. Abei Hankon had been in the act of addressing the House. He claimed that, according to the Law, Mr. Abei was in possession of the rostrum, and no Minister of State had a right to drive him from it. It was true that Ministers of State were entitled to address the House at any time, but that privilege did not extend to interrupting the speech of a member. The Minister of Foreign Affairs should not be permitted to address the House until Mr. Abei's speech, commenced on the 19th inst., was concluded.—(Cries of "No, no," and "Hear, hear).

The President attempted to deliver a ruling, but Mr. Tsunoda continued to argue that the Minister was out of Order.

The President—Permit me to speak, please.

Mr. Tsunoda—Rights are created by law They cannot exist without law.

At this point Mr. Shimizu Bunjiro and others began to call "President," "President," and the House fell into a state of much confusion. Some members asked whether the President could not restore order, and Mr. Inouye Kakugoro urged the President to expel any members who refused to desist from interrupting the proceedings.

The President, to Mr. Tsunoda—If you are resolved not to obey me, I must resort to decisive measures.

Mr. Tsunoda—You can not do so. I am exercising my lawful right of speech.

The President—Resume your seat, Mr. Tsunoda.

Mr. Tsunoda—Instead of ordering me to take my seat, you had better observe the law.

The President—The House not having yet proceeded to the first item on the Order of the Day, the Minister of State for Foreign Affairs is within his right in addressing the House.

Mr. Tsunoda—My opinion differs from yours, Mr. President, and as it is a question of interpreting the law, I ask that it be submitted to the House

The House again fell at this stage into a state of great confusion, some members calling out that Mr Tsunoda should be expelled, and others accusing the President of violating the law.

The President—Mr. Tsunoda, will you not abide by my ruling? I shall proceed to other measures.

Mr. Tsunoda—If you can resort to any other measures, do so.

The President—Then I order you to leave the House.

Mr. Tsunoda, with evidence of violent rage—I decline to leave the House. I refuse to obey an illegal ruling.

The President ordered the Sergeants to remove Mr. Tsunoda, who, during the process, struggled vehemently and abused the President, calling out that he had been bribed by the Government, that he disregarded the law that he ought to read the rules, and so forth.

The Minister of State for Foreign Affairs, who had been standing in the rostrum during this disturbance, now resumed his speech :—

(The speech is too long to reproduce in full to-day and too important to epitomise.)

On the conclusion of the speech several members rose to address questions to the Minister, but Mr. Mutsu gathered up his papers and left the House in a leisurely manner, taking no notice of any one.

Mr. Suzuki Manjiro asked leave to speak, and ascending the rostrum, made a show of repeatedly rinsing the water-glass that had been used by the Minister of State for Foreign Affairs. Having concluded this process, he said : "I wanted to put some queries to the Minister of State for Foreign Affairs, but as he has left the House, I have no further business here."

The President at this stage announced the receipt of an Imperial Rescript ordering the prorogation of the House for 14 days, from the 29th of December to the 11th of January.

The House rose at 2.45 p.m.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

The paper in the Christian press which is probably most deserving of attention is one by Rev. Y. Mashino in the *Rikugo Zasshi*, on "The Right Time for a Turning in the Movement of the New Theology." It is understood that our monthly article on the religious press is distinctively what it purports to be, a summary. Yet, to make it this adequately, would be to fill, and more than fill, an entire issue of the *Japan Mail*. As summarizer we are consequently forced to select, from the great mass of periodical literature laid upon our table, a comparatively small amount of material. In doing this we follow a definite principle of selection. Our rule is to give attention chiefly to discussions which bear upon religion in its national relations, and which affect particularly the principles of theology and ethics. Ordinary events of religious progress, questions of denominational interest chiefly, and the like, we are compelled to omit from our record. Our work as summarizer therefore becomes, in a measure, that of a reviewer, and however impartial we may endeavour to be in doing this work, our review takes shape to a greater or less extent, through our personal judgment. Mr. Mashino's article, we have selected from the Christian press of the month as the one of leading value or significance. It deals with an influence which, all can see, is moving deeply in the development of Christianity in Japan. The tendency of the writer's thought is in a high degree cautious and conservative concerning the changes he sees following the influence of which he writes. Since the appearance of the "New Theology" in Japanese Christianity, says Mr. Mashino, Christians have been segregated into three groups. Among these, a group which we will call the Progressionists may be noted, composed of those who are intellectually cultured, and who are well acquainted with the tendencies of religious thought in Western Christendom. These people have become dissatisfied with the old theology, and have gladly welcomed the incoming of the "New Theology." It may be said in passing that Mr. Mashino is a recent graduate of the Andover Theological Seminary in the United States, and that the Andover School is known as the head-quarters of the "New Orthodoxy," or the "Liberal Orthodoxy," in America; this new theology emphasizing a belief that man's eternal state is not fixed at death, showing hospitality too to rational views concerning the interpretation of the Sacred Scriptures, and in a word, in large measure sympathizing with those who regard theology as a progressive study. A second group of Christians, says our writer, is composed of Conservatives. These, in Japan, are chiefly the foreign missionaries. It is from the missionaries especially that the "New Theology" has met with opposition. They have been cool towards the movement, and have antagonized it. Of course the missionaries cannot be called either obstinate or superstitious. Their action on the Noyes question,—now a solved problem,—proves that things are in a degree progressive. But at the same time, it is to be said that during the last few years of the inworking of the "New Theology" the foreign missionaries have stood against it. Then there remains a third group, the large body of Christians, moderate and practical, neither foes nor friends, yet of the new movement, unexcitedly observant, the constituency upon whose suffrages at last the future of the "New Theology" depends. That future is full of hope if these persons favour it, otherwise it is clouded. When the new movement was started, a great disturbance was made. Now the waves of the storm have subsided. Already this gain is secured, that the cry "heretic!" is no longer sounded by the conservatives. Practically the "New Theology" has made its place sure. All tolerate it, although there are many who do not accept it. This much is achieved : it is not heresy. The goal of perfect victory may be far off, but the way to it is open. Now is the time for farther advance. So also it is time for decided change in our movement. A four-fold change is imperative at the present opportunity. The "New Theology" should become constructive. Once it was of necessity seemingly destructive. It had to clear a way. This is done. In America and in England construction now has the lead. Then, second, denials must be replaced by affirmations. Rejection of the traditions of Christendom should give way to an earnest apprehension of the essence of Christianity, and its presentation and emphasis as the needed inspiration of mankind. In the third place, the "New Theology" must so progress as to be in harmony with, and helpful to, a vital faith. The accusation has often been made that the new thought does not comport with faith and that it is inimical to piety. The accusation must not stand. And lastly, this new force must separate itself from those who are stupid (*sic*). It had its origin in aspiration after the truth. It has no rightful fellowship with any who are lax in observing a rigid, moral, and social code. Often the liberal thought seems to be destructive of gravity and seriousness of life, and to promote self-indulgence. This must not be its

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

characteristic. The strictest morality and a deep gravity of decorum should accompany the new thought. Now is the time for the "new theology" to have this four-fold effect. If it does not make such use of its present opportunity, it will surely gradually lose the confidence now bestowed upon it. We must get the allegiance of the great middle body of cautious practical Christians. Even now with many there is some disappointment felt over the practical bearing of the new thought. But it will not do to suppose that the Progressionists] are only iconoclastic and sceptical. Really they are aspiring after truth, spiritual life, and vital faith. In this direction many of the liberals surpass their fellow believers of the more accepted faiths. In fact, when all is said, the soundest, wholesomest tendency in the thought of the modern world is just this which has appeared in the "New Theology." If the Christian Church desires to be in harmony with the world movements now in progress; if the Church wishes to do somewhat to help and to save the mankind of to-day, it must accept the "New Theology." Among us of Japan, the proclamation by which we Christians are to take place as leaders is not a cry for the revival of traditional theology and the suppression of the new. We are to be in the front only by the power of truth which is suited to the wants of the present world.

* * *

An editorial in the *Kirisutokyo Shimbun*, taking as a text a report of an address by Mr. Soyeda of the Imperial Treasury, delivered recently before the Political Science Association, composed of leading scholars and statesmen, deals with the "Problems before the Christian Churches." Mr. Soyeda is represented as having said that religion is necessary to the welfare of the State. The report further ran, that Buddhism has lost the respect of the people, and that Christianity, if it would but divest itself of its foreign and sectarian character, might become the religion of the empire. In the Buddhist *Nonin Shimpo*, however, we note a denial by Mr. Soyeda of this statement that he predicted failure for Buddhism and success for Christianity. He claims to have said that a thorough reformation of Buddhism is needed. If that cannot be secured, said he, then a Japanized Christianity ought to be accepted. Political argument! At any rate, continues the *Kumiai* organ, Mr. Soyeda set forth religion as a necessity for the State. The higher public opinion is thus in favour of religion. Prof. Inouye's lecture was the last struggle of religious nationalism. "The night is past and the day is at hand." But what shall we do with the problems now before our churches, the problems, namely, of 1, The New Theology. 2, Church Independence. 3, Sectarianism? These are the Alps between us and our Italy. Many tell us that the "New Theology" has been overcome, that only young and fickle pastors were responsible for the trouble. Not so. The "New Theology" is not so easily done away with. For ten years past religious leaders have had doubts in their breasts as to the traditional faiths. Unitarianism and Liberalism have been only proximate causes of the difficulty. The problem is here because it must be solved. Until solved it will confront us. It can not be laughed away. To cry "Peace! Peace!" is to ignore the truth. The questions also of Independence and Sectarianism are not needless. Since the establishment of the Yokohama Kaigan Church, in *Meiji* 5th, these perplexing questions have troubled us. The proposed union of the *Kumiai* and the Presbyterian Churches failed on their account. These questions are to the Christian Church what the problem of Treaty Revision is to the State. They cannot be neglected, and they must not be ignored by short-sighted men. The writer then appeals to the missionaries to stop expanding their own denominations. It is now thirty-five years since the first missions were established, and twenty-one years since the first Church was organized. The Church has reached manhood. For the sake of Japanese Christianity let the missionaries remember this. In what they are doing, are they really showing their sympathy with the needs and for the welfare of Japan? Have they the brave courage of former times? Do they understand the present condition of Church affairs? If, now, Japan is beginning to show a deep sympathy with Christianity, if the wished-for opportunity of the Churches is coming, the missions should not waste even one day. "I may be rude," ends the writer, "but my readers should pardon me, for my heart is full" *Gokyo*, the Methodist organ, criticizes the above article in the following strain:—Mr. Soyeda is but a utilitarian politician. The *Kirisutokyo Shimbun* looks upon his address as a sign of promise, and likens it to the nightingale's song in the spring time. "Indeed! a Utilitarian Christianity! "Christianity does not exist for the sake of the State or Utilitarianism. It was brought into the world to fill the deepest want of the human soul. The three problems may exist, but the *Kirisutokyo Shimbun* gave them being. Their originator should be the first to solve them. Has he a solution? *Gokyo* thinks that the theological problem is passing away despite the opinion of the *Kumiai* writer. If not, when shall it be solved? Let the responsible persons render an account. The *Kirisutokyo Shimbun* is like a weather prognosticator. We do not want him. We need the farmer who in *Mino* and *Kasa* goes ahead in spite of the rain. We say that the theological problem is becoming a thing of the past. It is no longer a matter for the churches to be troubled over. Let them serve God and God's Son and remand this problem to the scholars whose work it is to care for it. The object of religion, says the editor of *Gokyo* in another article, is not national welfare, but the reaching of the eternal and unchangeable source of this changing life. God, truth, the absolute in life. Christianity is this power in conscious life. This life appeared in the Jewish Scriptures, but that was not Christianity as a whole. The Sun is not fire, but is a kind of fire. The spirit of God moves throughout the world and has been present in the world from the very beginning. Christianity is this divine power. If this power shows itself among heathen peoples, then Christianity is there. The religions of mankind are one. The same spirit is among them in different forms. Idolaters worship not wood and stone, but the power in the wood and stone. Even pessimists show by their teachings that they have faith in true happiness. Pantheists cannot explain self-consciousness or the origin of sin, and they grieve over their failure. The same spirit is everywhere. The power of Christianity is felt by all mankind. Missionaries should aim to lead mankind to the Great Universal Life. The *Fukuin Shimpo*, like *Gokyo*, puts the responsibility for the existence of the three great problems of the Churches before spoken-of upon the *Kiristokyo Shimbun*, and complains that when the churches are about to forget these troublesome matters, the *Kumiai* organ brings them into memory afresh. *Gokyo*, we notice, is not wholly satisfied with the Young Men's Christian Association movement in Japan. While the chief object of the Association is to lead unbelieving young men to a true religious faith, that object is often injured by attempts to regulate and direct the Churches on the part of the Associations. Then, when the Churches do not follow the suggestions of the Associations, the disappointed young men often disturb them, and destroy their peace. The writer pleads with the leaders of the young men's organizations to let the Churches alone and not to become partizans of any sect or special interest in religion. Another *Gokyo* writer thinks that for Japan, both an Isaiah and a Jeremiah are the need of the times. According to the *Kirisutokyo Shimbun*, the troubles arising in the Japanese Churches from the obtrusiveness of the Young Men's Association members, is owing to the fact that, while in America women and the older men control the churches, keeping young men in the background, here young men form the working bodies of the churches and are at the same time the leaders of the Associations. They are thus engaged in a two-fold work. For this reason too the Associations are not very successful. If the young men could devote themselves to the destruction of Sectarianism they would do well. The rivalry of the sects is one of our great evils. The hope of the Churches lies not in complexity, but in harmony and unity. The Evangelical Alliance works in this direction, but it is small and it meets at intervals of years only. In the Y.M.C.A. are representatives of all the Churches, they could do excellent work in removing narrowness and bigotry. Young men are rich in spirit and are easily touched by what is good and beautiful. Again, in all great towns where there are several churches, the Associations should promote union work as far as possible. The Associations also should minister to the higher and broader self-culture of their members. But let their meetings always remain free from political discussions, and from theological controversy. Moreover, let no yoke of narrowness be placed upon growing thought. And if, in addition, the work of the Associations be so arranged as not to intrude upon the secular duties of the members or to over-burden them, there is no reason why these organizations should not render most helpful aid to the country.

* * *

Among many minor notices of the Christian press we read that an interesting biography of Paul Sawayama, a man much like the devoted Nishima, has lately been written by Mr. Naruse Jugo. Mr. Sawayama's sphere of labour was in Osaka, where he established Christian institutions, self-supporting from the start. A notable seminary for girls was his great achievement. A letter from the sessions of the American Board at Worcester, Massachusetts, rejoices over the triumph of liberal principles there, in the maintenance of Mr. Noyes in his position in Japan. A Church in Akita has announced to the American Board its financial independence henceforward. An interesting conference of the prison chaplains in the Hokkaido has lately been held. Answers to fourteen special inquiries from the Chief of the Prisons were given. The chaplains declared their teaching to be chiefly ethical. They discussed, among other things, the length of terms of imprisonment, literature for prisoners, causes of crime, and the characters and dispositions of the criminals. The Chief of the Prisons thanked the chaplains for their counsel. In Shizuoka Ken, at Shimada, a Christian congregation has lately fared ill at the hands of Buddhists and *soshi*. A meeting of about seven hundred persons was stopped, blows were struck, stones thrown, and cries of "kill!" were raised. The riot was quelled, but the next day an anti-Christian meeting was held. At an Episcopal Conference a proposition to introduce the Apocrypha into the Scripture readings was voted down by a large majority, although the proposition was favoured by both the American and English bishops. The condition of the *Eta* is again the theme of an earnest plea. Society, under the lead of ancient religion, has committed a great crime in ostracizing this unfortunate class of the people, says Mr. Imai. Now, it is the religion which has come through Christ which should atone for this crime. But as yet, only a few of Christ's professed disciples are willing to reach out a helping hand. Churches have been opened where *Eta* might enter, but, with their coming, Christians have gone away. One Church, for this reason, was deserted, people declaring it polluted and the preacher and gospel made unclean. At present some Churches have been organized and are supported for the use solely of these people, outcast under the old social order. The long ordained Buddhist antagonism to flesh eating is given as the cause of the degradation of the Japanese meat and skin dealers, the *Eta*.

* * *

In the Greek Church *Seikyo Shimpo*, there is a commendatory notice of an address by Rev. J. T. Yokoi, at the Hongo Congregational Church. Mr. Yokoi says that the Greek Church has been much misunderstood and wronged in Japan. It is not a Russian agent, he declares. It is not formidable to this

Digitized by Google Original from UNIVERSITY OF ILLINOIS AT URBANA CHAMPAIGN

country's welfare. It is independent of the State and can exist under any nationality. There is no reason to suspect it, because Russian money maintains it. English money maintains the English Church. The Emperor's picture has never been insulted at Sunagadai. Nicolai is a hero. There are in Japan eight hundred Protestant missionaries, ninety-two Catholic propagandists, and but three representatives of the Greek Church. Where is the danger to come from! The Greek Church was the first to use the Japanese in its work. All its employés now are of our own people. It is not here to accomplish the will of Peter the Great. We need not fear the religion of Russia; Russian State power we may dread. The Roman Catholic Church has its fearful Pope. Behind the Pope are the Jesuits vowed to sacrifice all liberty to the Sovereign of the Church. The editor of the Greek Church organ tempers his praise by claiming that Mr. Yokoi's statements concerning the excess of theological speculation and devotion to ecclesiastical ceremonies said to mark the Greek church are not quite justified. Believe us, we are devoted to true Christian faith, and are not wanting in warm sympathies and high ethical aspiration."

* * *

Among the month's Liberal Christian periodicals *Shinri* has failed to reach us. A number of very interesting articles, however, in *Shukyo* and *Jiyu Kirisuto-kyo*, lie before us. We have space only to notice some remarks in both these magazines *apropos* the address at Chicago of Mr. Kozaki, president of the Doshisha. The Universalist organ observes that Mr. Kozaki's address is interesting as showing the theological position of Japanese Christians. It differs evidently from that of orthodox Christians. But, in thus differing, are not both the orthodox missionaries and the Japanese Churches in false positions? Missionaries give financial and moral aid to unorthodox adherents. Both parties work in opposite directions. The former attack Universalists, and yet they assist Japanese who are going in the direction of liberalism. On the other hand, there is the unexplained fact that Japanese Christians accept the aid which the missionaries offer them. How curious it is to attack theologically, and yet to ask help financially. Mr. Kozaki said that Japanese Christians are diligently propagating a liberal theology. Yet they do not sympathize with others who teach the same liberal thought. In mathematics it is an axiom that things which are equal to the same thing are equal to each other. Then there is another interesting question, If Japanese Christians sympathize with neither Orthodoxy nor Liberalism, with what do they sympathize? Here is the worst kind of sectarianism. Mr. Kozaki said that those who call themselves Liberals are often narrow. So it would seem! Mr. Kozaki said also that liberals are negative. In this respect only does Mr. Kozaki seem to share orthodox opinion. For the sake of truth, we hope Mr. Kozaki will show that he has a more positive theology than ours. In all we say, however, we are not Mr. Kozaki's enemy. Our only prayer is that the truth may stand. *Shukyo* has a good table of contents relating to questions on the principles of rational religion, ethics, and social order, but we must pass these by, glancing only at a rather trenchant notice of the remark made by Mr. Kozaki at Chicago, that "Japanese Christians are liberals but are neither Universalists nor Unitarians." Of course, says *Shukyo*, at this disclaimer all orthodox believers rejoiced, yet we are much happier than they, and for good reason. Although Mr. Kozaki says he is not of us, his words are certainly ours. He and his friends are really Unitarian in principle and in object. They work for as we work for, they seek as we seek, they proclaim as we proclaim, rational thought.

* * *

We can not treat satisfactorily the current Buddhist press. We find in *Bukkyo* leading articles on Japanese Buddhist Poetry, on The Sankya Philosophy, and a History of Popular Buddhism. In *Dento* is an instalment of the History of Buddhist Sects. The Coming of the Second Buddha, First Spiritual Principles, the Religious Ideas of the Loo Chooans, and the new Era in Buddhism. The *Nonin Shimpo*, among other things, tells of continued dissension in the Sodo Sect, of Dead Religionists, and of the Jodo Hawaiian Mission. It pleads for a National Policy concerning Christianity, reports the Hindoo Dhamapara's speech at Nagoya, gives a Baron's View of Religion and has something to say of present political questions. *Keratcho* has an interesting Review of Buddhism in Meiji 26th, and publishes the First Declaration of the Hawaii Missionary Association. The *Hoono* of the common classes and the *Nichi no Tomo*, a magazine for women, together with many other journals in the interests of one or another form of the ancient faiths are before us and are worthy of attention, but for the present we must forego the pleasure of putting their contents upon record. In all these magazines there are many pleasant echoes of the World's Religious Parliaments. The *Kokkyo*, is quite a noticeable publication. It has the large view of Buddhism as a world movement. It is conducted by young men, is published at Kumamoto, and is under the stimulus of the ideal of a union of the two great Buddhist divisions of the North and the South, through which the faith may be made ready to conquer the world. In a late number the *Kokkyo* has an extended and quite a discriminating review of the writings of the free thinking Buddhist, Mr. Nakanishi Gyuro, whose name has at times been prominent in these summaries. Showing at the outset how much under the influence of the character of Christ Mr. Nakanishi is, the writer goes on to give his author's views of Buddhism as a decaying influence. Mr. Nakanishi wishes Buddhism well, but declares that in Japan it has no converting power now. He queries, "Is this fact due to the absence of truth, or to lack of faith on the part of the people, or to the indifference and ignorance of the priests who teach." For hundreds of years Buddhism, for some reason, has been impotent. It is like the religion of the ancient Egyptians, bound by priestcraft and popular superstition. Symbols to those who know are idols to the ignorant. It is also aristocratic in its organization, democratic in its following. To these views of Mr. Nakanishi *Kokkyo* assents. Also, Mr. Nakanishi says that the faith of the Japanese in Buddhism is marked by their ancient national ancestor worship, a faith contrary to true Buddhism. Popular Buddhism is filled with this worship. This may be so, says *Kokkyo*. But, comments the reviewer, once Mr. Nakanishi's great plea was for the preservation of national characteristics. Who was it that was largely instrumental in poisoning Japanese Buddhism with this excessive nationalism? Who also was it that dealt with Buddhism mainly as a philosophy, and with Sakya Muni as a philosopher? Why, just Mr. Nakanishi himself, who was named in the *Japan Mail* the Kanamori Tsurin of our Buddhism. He wrote reviews of European philosophy, of Bruno, Spinoza, Descartes, Conzin, Leibnitz, Fichte, Schelling, Kant, Hegel, Schopenhauer, Hartmann, Hamilton, Mansel, Spencer, and at times sought to present these thinkers by illegitimate arguments as pantheists, and thus to give colour to Buddhism as a philosophy. Buddhism, pure Buddhism, says *Kokkyo* is destined to be the means of universal salvation in the coming centuries. Looked at from the width of the world it is the flower of progress, it bears the banner of universal love. Viewed from Japan it appears as the well-beloved son of the national life, and is filled with the soul of patriotism. True Buddhism will harmonize all the conflicts which may arise between our nationalist aspirations and the civilization of the West. We must give an equivalent for what we receive. For the incoming civilization we must return the enlightenment of the Buddha. But we need not follow *Kokkyo* farther. It welcomes Mr. Nakanishi in his present mood, but finds him responsible for many of the difficulties now besetting the nation's popular faith. *Bukkyo* tells of a Russian traveller who has found in Thibet several temples in which there are traditions and apparent records of the life of a Buddhist monk named Ise, who two thousand years ago went to Syria, taught there, and was there put to death. The coming of Mr. Dhamapara of India to Japan, on his way back from Chicago, has given much encouragement to his fellow believers here. Missionary enterprises among the Brahmans are proposed by him. The way can be opened by a subscription of 50,000 *yen* to purchase and restore the original shrine of Sakya Muni, now in possession of the Brahmans, he says. It is found that *Daijo* as well as *Shojo* is taught in Ceylon. And, in this visit, the opportunity brightens to harmonize the North and the South of the great faith. We note also a growing missionary activity among Buddhists. The Shinshiu sect has fifty missionaries now in Hokkaido, sixty-nine preaching stations there, and two out-ports in the Kuriles. This sect has sent agents to Loo Choo also. The Rinzai Shiu has a delegate there to superintend temples. The Nichiren sect has foreign missions in Korea and in China. Jodo has a mission in Hawaii. In *Dento* there is the claim that a new era for Buddhism was opened at Chicago. *Daijo* (the greater Vehicle) there shone into the world. Hereafter, therefore, the light of justice, mercy and love will be seen in the West. *Nonin Shimpo* declared that any one who wishes to understand Buddhism clearly must read the *Meikyo Shinshi*, *Kyoto Shimpo* and the *Union Shimpo*. We learn also that a movement is being made to institute an official regulation of Christianity. Christianity has been neglected hitherto on the part of the government, because of its insignificance. Some say that nothing can be done because liberty of belief has been secured by the 28th Article of the Constitution. But this Article refers only to the acts of the Government. Parliament however can act freely. If Christianity is injuring the State, laws against it can be passed. That is the privilege of the people. A national policy concerning Christianity is needed. We must, however, rest our pen at a notice of *Kwatcho's* Review of Buddhism during the year now closing. The writer is satisfied. The progress of Christianity has been checked, he believes, and Buddhism has gone forward. The relation of the people's faith to the past, to present society, to literature and the arts has been made clear. In philosophy and ethics have had a growing attraction for young students. Many politicians and statesmen have entered its household of faith. Mr. Kozaki, a Christian leader, has said that the problem of the relation of foreign missionaries to Japanese Christianity is one of greatest difficulty for the future. From this admission we can see how greatly the attitude of society towards Christianity has changed. Moreover, looking from without inward we see most promising events. Missionaries of Buddhism have gone to Korea, to Siberia, Thibet, Honolulu, and to India. At Chicago our representatives displayed the essence of Buddhism in the very centre of Christianity. This summary, however, should not close without a few words concerning the "First Proclamation of the Hawaiian Mission Association," just issued. In Hawaii, it reads, is now a second Japan. One fourth of the population there is of this country. Their religious condition deserves pity. Here the people are protected by priests and Government. There as aliens our people are environed by vice and temptation. Crime among them is increasing. How can we bear to see this fate befall our brethren? We must go to soothe and to save them. Of course, Christians are there, but their religion is neither good, nor is it adapted to our people. Some foreigners there have put our countrymen in danger. They have threatened them with Cross and Bible under authority. For this reason this association has been formed. We seek to send our missionaries to Hawaii, to give our people religious rest and to purify their morals. If our venture is successful, then a way will open for us to go on to San Francisco, to Canada, to Mexico, to Australia. Shiba Park, No. 21, Tokyo, is the office of this large movement of the Buddhists of Japan.

CORRESPONDENCE.

THE PRESENT AGITATION.

To the Editor of the "Japan Mail."

Sir,—The agitation over the strict enforcement of the treaties, now so widespread over Japan, and that has reached such proportions that a working majority of the Lower House of Parliament has resorted to the experiment of arraigning the Government because of its laches in not curtailing the privilege now enjoyed by foreigners that are not specifically granted by the treaty, calls for more than a passing comment. What the agitators' ultimate aim may be, is to the foreigner inexplicable. It may be that an inherent hate of the "grey-eyed, red-haired barbarian" is at the bottom of the movement, or it may be a ruse to embarrass the Ministry now in control of the Government, or it may be a mistaken phase of genuine patriotism, evolved from a fancied danger that Japanese interests are threatened. I will not consider the two first suppositions, but plainly state my convictions regarding the connection of Japanese interests and mixed residence. When Perry made the first treaty with Japan, the whole civilized world was wild with joy. The Christian world hailed the event as the realization of prophesy: "That a nation should be born in a day." It was in no spirit of conquest that Japan was introduced into the family of nations. The better instincts of humanity were present at the inception of the endeavour to bring Japan in to concord with the world she had for nearly three centuries avoided. There was no thought of oppression, or one-sided advantage, entertained by the American people when Perry was commissioned to open negotiations with Japan; interests of a wider and deeper import than national aggrandisement were the impelling forces that moved the American Government to essay the attempt of opening Japan to friendly intercourse with the Occidental world. The many complex demands of the civilization of the west, were to be advantaged; the Japanese brought into unison with the elevating forces that had produced and fashioned the splendid achievements of Occidental nations in the realms of art, science, and commerce. Humanitarian in its inception, the Perry expedition was one of the grand efforts of the century in favour of the highest and best interests of mankind. The present condition of the Empire attests the sublime purposes and grand results of Perry's visit. Buried in her seclusion, enwrapt in her supposed superiority over the, to her, barbarian world, Japan had practically remained stationary; the lapse of two centuries and a half had not witnessed any advance in any direction, other than in adding a polish to her ceremonious civilization; of all that moves the world she was ignorant. A change came over the spirit of her dream—she hastened to divest herself of her feudalism; the men who had held their lives at the disposal of their lords learned the inalienable rights of manhood, rapid advance was made in civil liberty; the mechanic, the artizan, the farmer and the day-labourer were endowed with the rights and immunities of a wider life and a larger liberty. Now it is pertinent to enquire what agencies were the factors in the rapid development of things, social and material, as they are found to-day. It is to the presence of the now objectionable foreigner that the present prosperity of matters Japanese is indebted. It cannot be possible that the arch agitators in the matter of mixed residence would, if it were possible, relegate Japan to her seclusion and feudalism. They cannot but be aware that the rights and liberties they now enjoy are the outgrowth of Occidental intercourse. It may appear to them that the Japanese have of themselves shaped their present environments, if so, they must be lamentably ignorant of cause and effect. It is due to the presence of the foreigner in their midst; to the examples he has afforded in their regard for law and the rights of their compeers; to the administration of law and equal justice in the so much contemned Consular Courts; to the business method and commercial integrity of the mercantile class; the ennobling influences of the high standard of honour entertained by every Westerner worthy of the appellation of a gentleman or lady; to the educational endeavours of the many teachers who have put forth their best efforts for the development of the Japanese mind; to the fraternization of the cosmopolitan sojourner visiting the country to look upon its wondrous beauty—without the far-reaching influences of commerce no country is prosperous. It is the foreigner who has developed so far, the yet infantile commerce of Japan; the foreigner has come from all quarters of the earth seeking out what commodities he could find to bear away with him in exchange for his dollars. The growth of Japanese commerce is the direct result of foreign enterprise; if it had been left to the genius of the Japanese trader to foster the commerce of Japan it would not now demand the multitude of magnificent steamers whose keels plow the world's seas for its accommodation. There is not an enterprise in Japan of a character in any way calculated to improve the estate and position of the labourer, artizan, and mechanic, that does not directly owe its larger development to foreign influence engendered by foreigners resident here. This is but one view of the picture. The antagonists of mixed residence urge that the foreigner be confined to the open ports, and that in the interests of treaty revision; the most absurd of all propositions. The fewer antagonisms engendered between the foreigners and the people of Japan, the sooner will treaty revision be assured, every act that tends to make a residence in Japan irksome and disagreeable to the foreigner will only harden him and his people against any proposition to place himself under Japanese jurisdiction.

The foreign merchants in the open ports are a positive benefit to the best interests of Japanese commerce, they are the prime factors of the prosperity of Japanese enterprise in the marts of trade; they employ labour; they disburse money for wages; their presence necessitates the employment of every grade of labour known to the Japanese. Yokohama has grown from an insignificant fishing hamlet to her present proportions, solely because of the presence of the foreigner; had the Treaties placed him elsewhere, the old fishing hamlet would be all that would mark the site of the now populous city. Wherever foreigners are allowed to domicile themselves in any numbers there is marked improvement in the surroundings. Take for instance the much complained of residence of foreigners at Negishi. All the money expended in buildings, in preparing the site for occupation, went into the pockets of Japanese, the retinue of servants employed is Japanese, the land purchased was bought by them at high rates, they hold their tenure under precarious conditions—conditions which they would not consent to endure was there only a money value to be placed upon occupancy. It is not to accumulate dollars but to conserve health. The price of land in the vicinity of Negishi some five years ago was about two dollars per *tsubo*, in expectancy of treaty revision at that time granting mixed residence, which is now in the market for sixty cents per *tsubo*. The cry against foreigners living outside the treaty limits is of the dog in the manager character. The Japanese do not occupy the hills and bluffs of Negishi, so there is no deprivation experienced by one of them. There are many eligible sites for elegant residences on the bluffs of Negishi, not one of which is utilized by Japanese. It will be well for the people of Japan to remember that chickens come home to roost. The venomous attack their representatives make upon the privileges now so sparingly accorded the foreigner may provoke reprisal. The United States does not admit contract labourers from any country; it excludes entirely Chinese labourers. The blatant members of the Lower House of Parliament may give pretext to an element in the United States to demand the exclusion of all Japanese labourers as well as Chinese. There is now a sentiment that needs but little nursing to ensure the same condition for Japanese residents that the Chinese have to submit to. The Parliament has been prorogued for ten days; it would be most fortunate for Japan if it could be stamped out for the next twenty years. Fanatical patriotism is as baleful as deliberate treason. Inexperienced legislators may bring any government to the verge of disaster, covering themselves and their people with contempt and shame. It is very much easier to destroy a reputation than it is to improve it. A mistake may be as fatal as a crime. Japan, guided by the trusted and honoured advisers of His Majesty, has gained well-earned laurels; it would be piteous, now that the goal is so nearly won, if the mouthings of an implacable set of pessimists should induce the conviction that the time had not arrived when foreigners could be safely placed under Japanese jurisdiction. Japanese prosperity is bounded by the goodwill of Occidential nations; a give and take policy is the winning one. In the interests of humanity, every foreigner in Japan can but ardently desire a rapid fulfillment of the promise of her high destiny as one of the leading nations of the earth. Foreigners living at Negishi, Karuizawa, or any other point outside of strict treaty limits, will not delay the consummation of the highest aspirations of any ardent well-wisher of Japan by a single hour; at least, that is the judgment of

Yours respectfully,

X.

Yokohama, December 26th, 1893.

PRESENTATION TO MR. CONSUL-GENERAL TILLOTSON.

A pleasing function took place on Saturday afternoon, the occasion being the public presentation to Mr. W. D. Tillotson, United States Consul-General in this port, of a handsome gold repeater-watch with heavy gold chain and diamond locket, a parting souvenir from his many friends in Yokohama. The Court-room was crowded by the time the affair was arranged to take place, among the company assembled being most of the leading American residents, U.S. Naval officers now in harbour, and many Englishmen. The presentation was made by Mr. N. F. Smith in the following speech.

Mr. N. F. Smith said—Occasions like the present always give rise to mingled feelings of sadness and pleasure—sadness when we realize that they but portend the departure from our midst of friends that we have learned to look upon with kindly regard and esteem. The value of their presence is enhanced by the fact, that as a comparatively small and cosmopolitan community, we appreciate all the more friendships formed here, and feel more dependent upon the social intercourse and good-fellowship that these afford us, than if we had at our disposal the masses to choose from at home. And when the time arrives to wish a true and tried friend Godspeed to his native land, we are better able to give expression to our feelings by a warm pressure of the hand, than to trust our lips to utter them.—(Hear, hear.) It is a privilege and a pleasure, however, to meet here to-day, and in a few imperfect words pay to our friend who is about to leave us this small tribute of respect and esteem. Many of us are witnesses to the faithful and untiring services he has rendered as the Consul-General of the United States at this port. In his office, courteous and attentive to all who have had occasion to seek his advice or official aid. Business applicants have never had their documents more promptly recorded, nor has procrastination or unnecessary delay ever withheld the affixing of the official signature and seal. Of the serious responsibilities, cares, and perplexities attending the duties that he has been called upon to perform in a judicial capacity, no man can appreciate or rightly estimate without having been officially associated with him; and I feel that when I characterize his rulings and decisions on the bench as those of an upright and a just judge, I but speak words of soberness and truth. Decided, uncompromising, and without fear or favour when necessary in meting out justice, but always open to reason and ready to temper justice with mercy. Many instances may be cited by which vexatious litigations have been amicably settled out of Court through Consul General Tillotson's friendly interposition and advice—and his friends can well afford to point to his official record as clean in the sight of a Higher Power than men's.

> From scenes like these old Scotia's grandeur springs,
> That makes her loved at home, revered abroad:—
> Princes and lords are but the breath of kings—
> An honest man's the noblest work of God.

—(Loud Applause.) As to his social life. The common sympathy which brings us here to-day abundantly attests how fully we appreciate his sterling qualities as a man, and the intrinsic value we place upon his friendship. It would be just as impossible to measure the hidden mysteries beneath the great waters that will soon separate us, as to compute the boundless value that true friendship is to the world. You cannot adorn the rose of the garden, or the lily of the field, with the most elaborate decorations; no amount of gilding will add brightness to refined gold; and no speech of man, however ornate or forcible, can add anything to the beauty of the sentiment—friendship. It stands by itself like the diamond in its glistening beauty, shedding its rich light upon the calendar, but itself incapable of receiving lustre from any.—(Hear, hear.) Mr. Tillotson, there are some memories that refuse to grow old, and some recollections that are ever being freshly distilled in the alembic of the heart; no circumstances weaken their hold; they grow with the mind's growth, and strengthen with its strength, and I need hardly add, Sir, that always among such will the friendly intercourse that has passed between us here be cherished. It is our privilege to present to you this testimonial as an earnest of our friendship, and best wishes for your future welfare. May you find in each passing day that this time-measurer records new chapters added to your life, of happy and contented experiences, until the measure of your days has been lengthened into years, each as satisfactory in repetition as to us the associations connected with you will be pleasant in our recollection.—(Applause.) In conclusion, permit me to read to you the memorial that has been

prepared for this occasion, and which, I might add, but faintly echoes the sentiments that your friends in Japan entertain towards you.

TESTIMONIAL

HON W. D. TILLOTSON,
UNITED STATES CONSUL-GENERAL,
KANAGAWA, JAPAN.

The accompanying testimonial is but a slight token of the measure of our esteem for you as a citizen, a gentleman, and a friend.

During your incumbency of the Consulate-General office, you have fully maintained the dignity of American citizenship. Affable, courteous, and obliging, under all circumstances we have learned to appreciate and consider you the embodiment of the modern Consulate officer.

We as personal friends, irrespective of nationality, can but deplore your removal from our midst, and it is unnecessary to add that you carry with you our most fervent wishes that the future has many happy and prosperous years in store for you.

Yokohama, Dec. 23rd, 1893.

The Address was received with loud plaudits of concurrence.

Mr. W. D. TILLOTSON, who spoke with deep emotion and at times could with difficulty be heard, said—My dear friends, I cannot say that I am taken quite by surprise to-day, for it was made public property some little time ago that a presentation was to be made to me by my friends. Yet the present moment finds me without words with which to sufficiently thank you for the overwhelming kindness which you have shown me in this matter. I can but say, as I said before, that I am overwhelmed by the words of praise which have been used by your spokesman. It is only three years ago since I first came amongst you. During that time I have done my best to perform the duties of my public office without fear and without favour. If I have committed any faults, and faults are what every one is liable to, I can assure you that they have been of the head and not of the heart. At the present moment I am painfully aware of the poverty of words, I can only say "I thank you;" but that is not sufficient to my mind, for the expression is cold. Words are cold things, at the best of times; but I cannot just now find, nor am I able to choose, the proper words that would fittingly express to you the hidden feelings of any heart. I have been very happy in Yokohama, and I shall always turn to the recollections of my life here as a source of satisfaction. I shall always look back upon the sojourn which I have spent among you as being the happiest days of my life. 'Tis true that they have not all been seasons of pleasure. Events come along which for the time being are far from pleasant. Just now I am suffering from influenza; a few days ago, while sojourning in the little village of Atami, I was followed by a troop of mangy curs who ran barking at my heels. Now it would not require a very great stretch of the imagination to find analogies for these events in Yokohama; for ill natured folk will always assert themselves whether in the garb of British curs, or clad in uniform, or in priestly robes, or, enshrined behind the dignity of editorial chairs. They are however, merely passing clouds that take but a little time to fade away from the memory, leaving no recollection behind. It is the pleasant things that remain, and they are what we turn to in after years. You have made me this presentation out of your friendship to me. Friendship is the sweetest word that falls from human lips. I will always prize your gift, and will cherish it throughout the days of my future life. I hope to be able to wear it always. As I said before, I feel overwhelmed at this exhibition of your friendship, and regret that I have not been able properly to thank you for all the kindness you have shown towards me since my first arrival in Yokohama. If it is my happy lot to be favoured with long life, I shall endeavour every day I live to achieve something worthy of your esteem and your regard; for such kindness requires a life-time properly to repay.

The Consul General resumed his seat amid loud applause.

The watch, chain, and diamond locket are very handsome and massive pieces of jewelry. Upon the watch will be engraved the following inscription:—"Presented to W. D. Tillotson by his friends in Japan." The initials of the recipient will be engraved in a monogram upon the case

ECZEMA.—Book on "Skin Trouble," net, free for One Stamp by Messrs. NORTH & RAE Limited, Yokohama.

It was, no doubt, quite right of Mr. Irving, in his version of "King Lear," to omit the revolting scene in which Gloster's eyes are put out. It is a horror which a modern audience can well dispense with. But Mr. Irving's judicious omission of the scene need not be taken as following the precedents. One critic, for instance, says that "it may be doubted whether it has ever been represented on the stage." But the doubt is not warranted. Phelps certainly included the scene at Sadler's Wells; and no doubt it was played in its integrity on the Elizabethan boards.

REVIEW.

*Two Books on Buddhism.

It is as impossible to conceive a beginning of creation as to imagine finite limits to space. A man looks upward and wonders what end there is to the blue sky above him. Instinct and association make him at first see an end to everything. But, if he be capable of reasoning, he discovers by-and-by that space can have no end. Beyond every boundary towards which his mind projects itself, he perceives that there must still be something, and beyond that something still something more, till finally he arrives at the conviction of infinity. So it is also of creation. There can be no beginning of creation. There can be no first act of creation. The very idea of an exercise of creative power involves the idea that something must already have been created. If God is the creator he must have existed from time immemorial. Time can never have existed for him. Of these things reason convinces us. But imagination can not picture them. The infinity of space and time, the beginningless of creation—these are ideas entirely beyond the grasp of human intellect. Yet these are precisely the postulates that meet us on the threshold of any attempt to formulate a supernatural religion. The difficulty pervades every statement of every creed. It is proclaimed by the very vagueness and inexactness of the language used by compilers of scriptures. When Shaka taught about something intangible, something inconceivable, something indescribable, to which all the phenomena of nature must ultimately be referred, he did not grope more perplexedly in the region of the unknown than does the revelation which speaks of a God that was in the beginning, is now and ever shall be, an existence derived from no other source and absolutely without development or change. Nevertheless, one creed is more frank than another in its treatment of these enigmas, a fact very clearly set forth by the Rev. A. Lloyd in an interesting, closely reasoned, and erudite brochure just published under the title of "The Higher Buddhism in the Light of the Nicene Creed." The Christian makes God—a personal God—the foundation of all his Faith; the Buddhist denies the existence of a personal God, though he acknowledges the *Shunnyo*, or Universal mind, "something which, though beyond the power of human words to describe, is yet absolutely existent and absolutely true, unlimited in time, space or duration, out of which have sprung all the phenomena of the Universe." There may be some to whom the complete mysticism and uncertainty of the subject will commend the attitude of the Buddhist mind towards it. Mr. Lloyd, however, prefers the strong, confident belief of the Christian, and counts it an argument distinctly in favour of the Christian system that it "openly puts the Absolute Unconditioned Essence in the forefront of its teaching, whereas in Buddhism this absolute existence is only put forward when the logic of circumstances compels its teachers to have recourse to it." But it must not be inferred from this that Mr. Lloyd's purpose is to establish differences between Christianity and Buddhism. On the contrary, his aim in the little volume before us is to demonstrate their identity, in the sense that "Christianity is the higher Buddhism; the logical conclusion of Buddhist speculation; the completing teaching which gives consistency to the half-developed truths lying hid in the Oriental system of metaphysics." How he proves this, we shall not attempt to show here, for the 39 pages that he devotes to the task could scarcely be abbreviated without loss of lucidity or completeness. But his work is full of the greatest interest to students of the two religions. He is an enthusiast who finds no difficulty in believing that the return of Christ is very near, as also is the time assigned for the appearance of the last great Buddha, that Christianity will then be completely vindicated, and that its doctrine will receive final and conclusive proof.

* * *

"The Doctrines of Nichiren," compiled by the Right Virtuous Abbot Kobayashi, is the second book referred to in our caption. There is some ambiguity about the authorship, for whereas we read on the title page that Abbot Kobayashi compiled the work, the Abbot himself tells us in the preface that "this essay is from the pen of the late Most Learned and Virtuous Archbishop Nissatsu Arai, of the Ikegami Monastery." As to the route by which such a clear and luminous exposition of Nichiren's doctrines became accessible to the English-reading public, we are told that Captain J. M. James, of Shimagawa, who "by the unfolding of his predestined nature and the high intellectual power he exercised in testing and observing truths," had acquired at once knowledge of and faith in the Nichiren doctrine, was the means of introducing to the Abbot Mr. F. H. Balfour, and the latter undertook to convert into pure syntactical English the translation made by Mr. K. Tatsumi, Professor of Sociology in the Nobles' School. Need we say that, coming from the pen of such an accomplished writer as Mr. F. H. Balfour, the little volume leaves nothing to be desired in point of style or verve? The language alone carries one pleasantly through its 29 pages, which, for the rest, do credit to the printer and the paper-maker. There are many sects of Buddhism in Japan. Each naturally claims a monopoly of the truth for itself, but by none is the claim advanced more dogmatically than by the devotees of the Nichiren. A thousand years in the lowest of the hells is the atonement prescribed by the Nichiren folks for the priests of all other sects. Any less uncompromising attitude would not become them, for never was there a more self confident man than Nichiren himself. He believed profoundly in his own insight. "Nothing could ever move me," he wrote, "except being outreasoned by a wiser man than myself, and I do not believe that such a man will ever be discovered." That is a colossal declaration. It commands our admiration. When Nichiren died his disciples scarcely out-numbered the books he had written. Now the sect he founded has five thousand temples, seven thousand priests and more than two millions of adherents. He taught that the differences and varieties which apparently distinguish one thing from another have no real existence, but are purely subjective: they exist only in the consciousness of each individual; are, in short, representations of his own physical and mental states. To arrive at the truth is to discover this. The discovery has several essential corollaries. It involves, for example, the belief that even Buddha and the common people are identical, and that the inhabited world is one with the Paradise where all the Buddhas live. "When enlightenment is attained, all worlds are found to be equally glorious and splendid." "This world, so full of evils as to appear like a fiery furnace in the eyes of the vulgar, is perceived by the Buddha to be a peaceful and happy realm inhabited by beings of a high spiritual order." Every one of those beings, abject, ill-endowed, degraded as many of them seem, "may become Buddhas here and now." Idolatry never had such potentialities. Sakyamuni, as interpreted by Nichiren, taught that the Mandala, or chief object of worship, was his own body, and he also taught that "the body of any ordinary person, nay of any living creature, may be the object of worship, since it is identical with the body of Buddha himself." By contemplating the Mandala, or pictorial representation of the truth, a man may perceive his own identity with Buddha. It seems a hard feat. Nichiren declares that any one may perform it. But he nevertheless makes provision for those who, on trial, prove incapable of such perception. They are allowed to substitute a formula for enlightenment; mechanical discipline for moral luminosity. They have only to repeat often enough the seven ideographs forming the title of the Holy Book. It sounds a tame process, yet is it not in truth a subtle prescription to wean the mind from those passions and prejudices that warp our nature and hold us captive to the worst influences of humanity? Calmness, mental abstraction, moral quietude, these are the conditions most conducive to keen retrospective effort, and just as the professor of hypnotism prepares his subjects by recourse to mechanical trivialities like a revolving disc or a glittering coin, so Nichiren would have the searcher after truth segregate himself from his surroundings and from his every-day self by a thousand repetitions of the seven ideographs. "If we repeat the Daimoku, and rigourously purify all our thoughts, our bad appetites and passions will disappear of themselves, and we shall become inspired with the pure and lofty ethics of our sect. In walking or resting, standing or lying, speaking or keeping silence, acting or refraining from action—in all these situations we may attain to the mysterious deliverance; birth, old age, disease and death will disappear of themselves; fears, sorrows, pains and troubles vanish away for ever, leaving nothing behind them but eternity, purity, enlightenment and peace." Truly it is a tempting forecast. Did Nichiren really make this discovery? Did he really, while yet in this world, enter the "Land of Glorious Light?"

* "The Higher Buddhism in the Light of the Nicene Creed," by the Rev. A. Lloyd. "The Doctrines of Nichiren, compiled by the R. V. Abbott Kobayashi."

A well-brought-up child was seen secretly to purloin and pocket an orange from the laid out dinner-table, but was afterwards seen to enter the empty room and secretly again return it to the dish and triumphantly exclaim, "Sold again, Satan!"

CHESS.

(All Communications to be addressed to the Chess Editor.)

The Yokohama Chess Club meets at the Club Rooms, No. 88, Main Street, on Mondays and Thursdays from 5 to 11 p.m.

The Tokyo Chess Club meets at the Hotel Métropole on Fridays from 1 to 11 p.m.

SOLUTION OF PROBLEM No. 101.

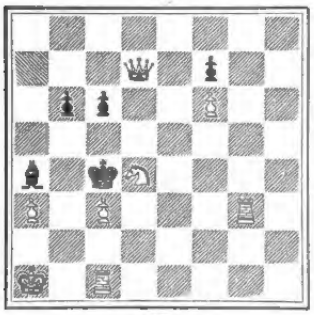
WHITE.	BLACK.
1—K — Kt 8	1—Anything.
2—Q mates accordingly.	

Correct solutions received from W.H.S., Digamma, J.D., P.E.F.S., Omega, O.B., and J.W.E.

PROBLEM No. 103.

BY G. B. VALLE, SPEZIA.

BLACK.



WHITE.

White to play and mate in two moves.

The problem solving tournament for the current year closes with the pretty position by the distinguished Italian composer in this week's issue. Although several of our solvers retired early from the field, the contest between those who have stuck to their colours has been remarkably keen, and we hope to publish the result in a week or two. No prize is offered for the coming year, but the usual record will be kept of all correct solutions which reach us.

The Chess journals from home are, of course, full of the great Tarrasch-Tschigorin match, and also chronicle the proceedings at the opening of many Chess-clubs in Europe for the Winter season. We hope to give some interesting clippings at an early date.

The match between the Yokohama and Tokyo Chess Clubs is likely to come off on the 30th January or 3rd February. At least, so says Rumour, we have heard nothing official on the subject as yet.

We publish below the correspondence games between Nagasaki and Yokohama. The honours lie with the Southern port, and Mr. A. L. Jordan (who played the games at that end) shines forth resplendent as a bright particular star in our Chess firmament. The Yokohama team (Messrs. Balk and Griffin) will doubtless play more carefully with such a fuseman in time to come.

NAGASAKI VERSUS YOKOHAMA.

GAME A.—RUY LOPEZ.

(NOTES BY MR. O. BALK).

WHITE. Nagasaki.	BLACK. Yokohama.
1—P to K 4	1—P to K 4
2—Kt to K B 3	2—Kt to Q B 3
3—B to Q Kt 5	3—P to Q R 3
4—B to Q R 4	4—Kt to K B 3
5—Castles.	5—Kt × K P

..... This move is recommended by the authorities; but it seems doubtful if either side can profitably take the K P with Knight. In this game Black's subsequent embarrassment is chiefly on account of this advanced Knight.

6—P to Q 4	6—P to Q Kt 4
7—B to Q Kt 3	7—P to Q 4
8—P takes P	8—Q B to K 3
9—P to Q B 3	9—K B to K 2
10—K R to K sq.	10—Q to Q 2
11—K B to Q B 2	

A quiet move which seriously threatens the Knight: and beyond it the King's wing.

11—Q R to Q sq.

Indirectly protecting the Knight. If ..... B takes Kt now, P can take B without danger. Retiring the Kt to B 4 is undesirable on account of P to Kt 4 which would drive it badly out of play. Black has also the option of protecting the Kt by B to B 4, or P to B 4; the latter, however, has the objection that it gives White a passed pawn. The position here is full of interest.

12—Q to K 2

B to B 4 seems a very threatening move for White at this point.

	12—Q B to K B 4
13—Q B to K 3	13—Castles.
14—K Kt to Q 4	14—Q B to K Kt 3
15—P to K B 3	15—K Kt to Q B 4
16—P to K B 4	16—Q B takes K B

Black gladly avails himself of the opportunity to change off the hostile Bishop; especially as his own Bishop is more or less out of play.

17—Q takes Q B	17—P to K B 3
18—Q Kt to Q 2	18—Q Kt takes P

Black is tired of his cramped position; and thinks that by giving up Kt for the two advanced pawns he can turn the tables, hem in the White forces with his centre pawns, and be free to attack the K side.

19—P takes Q Kt	19—P takes P
20—K Kt to K B 3	20—K R to K B 4
21—P to K Kt 4	

A fine move which destroys Black's chance of developing the threatened attack. The next two or three moves are forced.

	21—K R takes K Kt
22—Q Kt takes K R	22—Q takes P ch.
23—Q to K Kt 2	23—Q takes Q ch.
24—K takes Q	

Now the game seems in favour of White, who has a Rook against three pawns; but the end-play is likely to be long and tedious. As a matter of fact a draw was agreed upon after White's 30th move, as below.

	24—K Kt to Q 6
25—K R to K 2	25—P to Q B 4
26—Kt takes P	26—Kt takes Kt
27—B takes Q B P	27—K B to K B 3
28—Q B to Q Kt 6	28—Q R to Q 2
29—Q R to K B sq.	29—K Kt to Q B 5
30—K R to K 6	30—Drawn game.

NAGASAKI VERSUS YOKOHAMA.

GAME B.—PETROFF'S DEFENCE.

(NOTES BY OUR CHESS EDITOR).

WHITE. Yokohama.	BLACK. Nagasaki.
1—P to K 4	1—P to K 4
2—Kt to K B 3	2—Kt to K B 3
3—Kt takes P	

3—Kt takes P, 3—P to Q 3; 4—Kt to K B 3, 4—Kt takes P 5—P to Q 4, 5—P to Q 4, etc., is the usual continuation. 3—P to Q 4 is recommended by Steinitz and the modern school. Lasker favours 3—B to B 4, while Dufresne holds that 3—Kt to Q B 3 is quite as good as 3—Kt takes P.

3—P to Q 3

4—Kt takes K B P

The Cochrane attack! Brilliant enough in an ordinary game; but far too risky to be ventured upon in a correspondence match where there is time for the adversary to weigh every move and take every precaution.

	4—K takes Kt
5—B to Q B 4 ch.	5—Q B to K 3
6—B × B ch.	6—K × B
7—P to Q 4	7—P to Q B 3
8—Q to K 2	8—K B to K 2
9—Q Kt to B 3	9—K R to K B sq.
10—Q B to K 3	

Longman says:—"White may now Castle with Q R and advance the pawns on the K side with a capital game." Staunton also advises similarly, and actually goes so far as to blame Cochrane (the inventor of this attack) because he castled on the K side always to his own detriment! We are inclined to think that in this instance C. knew more about the matter than S. did.

10—Q Kt to Q R 3

.... Excellent play in view of the future operations of this piece.

11—Q P to Q 5 ch.	11—B P × P
12—K P × P ch.	12—K to K B 2
13—Castles Q side.	13—K to Kt sq.
14—P to K Kt 4	14—Q Kt to Q B 2!
15—P to K Kt 5	15—K Kt to K sq.
16—P to K R 4	16—P to K Kt 3
17—P to K B 4	

The critical point of the game. The move in the text seems to be loss of time. Black's Knights at this crisis, and later on, manœuvre admirably. If White had played:—17—P to R 5 and Black responded by P takes P, White should have a won game, or by any other move a decidedly superior position. Whatever line of play be adopted by Black, the necessity of the R at Q sq. will be apparent. (White no doubt found out by this time that they had better have followed Cochrane and castled on K side. It was a risky operation to place the K on Black's open file, and if Nagasaki had been merciless he could have made them smart for it on the Q wing.)

	17—K Kt to K Kt 2!
18—Q Kt to K 4	18—K Kt to K R 4!
19—Q to K B 3	19—Q Kt to K sq.!
20—Q Kt to K Kt 3	20—Q Kt to K Kt 2!

This Knight's play on Black's part is very fine, and fully deserves the crowning success. From this point onward White has no show, and Black emerges triumphant.

21—Q B to Q 2	21—Q to Q 2
22—Q R to K B sq.	22—K Kt × Q Kt
23—Q × K Kt	23—Q Kt to Q R 4!
24—Q to K 3	24—K R to K B 4
25—Q to Q 4	25—K B to K B sq.
26—Q B to K B 3	26—K B to K Kt 2
27—Q to K B 2	27—Q to Q Kt 4
28—Q R to Q Kt 3	28—Q × P
29—K R to R 3	29—P to Q Kt 3
30—Q R to Q R 3	30—K B to K 4

and White resigned.

LATEST TELEGRAMS.

(REUTER "SPECIAL" TO "JAPAN MAIL.")

London, December 23.

The United States Government is sending a large fleet to Rio de Janeiro, it is supposed with the intention of preventing the restoration of the monarchy by the insurgents.

The Italians have had an engagement near Massowah with 10,000 Dervishes, upon whom they inflicted a heavy loss, the Italian force losing four officers and one hundred men.

London, December 25.

The Sultan of Morocco has promised to surrender his authority over the Kabyle tribes who were the aggressors at Melilla, and has agreed to pay an indemnity and arrange for a neutral zone.

It is believed that France meditates sending an expedition to Madagascar against the organised marauding bands that have been attacking outposts.

London, December 26.

Mr. Cecil Rhodes has wired Her Majesty's Government to the effect that the Matabele have been completely subdued.

The Australian Premiers have unanimously decided to invite the Duke of York and his wife to visit the Colonies some time during 1894.

London, December 28.

The bombardment of Rio Janeiro, has been vigorously resumed, and several persons have been killed and wounded in the streets.

[SPECIALLY TELEGRAPHED TO THE "JAPAN DAILY MAIL."] (FROM THE "NORTH CHINA DAILY NEWS").

London, December 20.

Negotiations are being carried on in St. Petersburg for the settlement of the Pamirs question, but are proceeding slowly. China desires to retain territory comprising the Murghab Valley and consents to a rectification of the frontier, but objects to the Russians using territory that may eventually become a route to India.

The India Loan Bill, which increases the borrowing powers of the Secretary of State for India, has been read a third time and passed.

The House of Commons has prolonged the Parliamentary Session until the 20th of January. The Session is exhausting members of the House of Commons as well as the officers of the House, and *The Times*, in commenting on the general deadlock of Parliamentary business, discusses the rumour that the Government is riding for a fall. *The Times* also doubts the probability of a dissolution, the Government being aware that the result would be adverse to them.

December 21.

Sir Philip H. M. Currie, K.C.B., a Secretary in the Foreign Office, has been appointed Ambassador to Constantinople in succession to Sir Clare Ford.

The India Loan Bill passed the House of Lords, and during the debate the Marquis of Salisbury said that the acceptance of the Bill was the only course open to the House, and that he regretted the absence of a fresh attempt to negotiate a bimetallic agreement, as it would be an act of justice if Great Britain helped to bear a portion of India's loss through the fall of silver.

The French Commissioners that have been appointed to delimitate the frontier of the Siamese Buffer State are MM. Pavie, Portales, and Sugau. Amongst the British Commissioners will be Mr. Scott, Superintendent of the Northern Shan States, acting with the British Minister to Siam.

December 22.

The "contracting-out" amendment, made in the House of Lords in the Employers Liability Bill, has been rejected in the House of Commons by a majority of sixty-two.

December 23.

Mr. Reese, Recorder of Manchester, has been re-elected for the Accrington Division of Lancashire, defeating Mr. Hermon Hodge, Conservative candidate, by a majority of 258.

Mr. Gladstone stated in the House of Commons yesterday that the Government had acquiesced in the decision of the Duke of Edinburgh to renounce the annuity of £15,000 voted to him by the country, while retaining the marriage annuity of £10,000. Mr. Labouchere objected to such a settlement, and moved the adjournment of the House to discuss the matter, permission for which was refused by a majority of 188.

REPORTS.

The American steamer *City of Peking*, Captain R. R. Searle, reports:—Left Hongkong the 15th December at 6.34 a.m. Arrived at Nagasaki the 19th at 8.59 a.m. and left the 20th at 12.19 a.m. Arrived at Kobe the 21st at 1.30 p.m. and left the 22nd at 4.42 a.m. Arrived at Yokohama the 23rd December at 9.30 a.m. Had pleasant weather the entire voyage.

LATEST COMMERCIAL.

IMPORTS.

Coming events, in the form of the New Year holidays, cast a gloom of inactivity over the various departments of the Import Trade. Yarns have met with but few enquiries, while Piece Goods are practically unnoticed. Fancies and Woollens also participate in the general depression, but holders maintain prices, as they hope for a revival in the New Year.

COTTON PIECE GOODS.

	PER PIECE.
Grey Shirtings—8¼ lb, 38½ yds. 30 inches	$2 20 to 2.75

METALS.

Nothing fresh to note in this market, the situation being unchanged. In the hope of a revival early in 1894 holders refuse to lower their quotations.

	PER PICUL.
Flat Bars, ¾ inch	$3.90 to 4.10
Flat Bars, 1 inch	4 10 to 4 20
Round and square up to ¾ inch	3.30 to 3.40
Iron Plates, assorted	3.35 to 3.45
Sheet Iron.....	4.55 to 4.70
Galvanized Iron sheets	9.00 to 9.20
Wire Nails, assorted	5 40 to 5.75
Tin Plates, per box.....	6.00 to 6.20
Pig Iron, No. 3	1.50 to 1.55

KEROSENE.

Buyers do not seem anxious to continue operating, and transactions are falling off in both size and number. Prices also show a declining tendency.

Chester	$1.85 to 1.87½
Comet	1.82½ to 1.85
Devoe	—
Russian Anchor.....	1.80 to 1.85
Russian Moon	1.77½ to 1.80

SUGAR.

Browns have again relapsed into quiescence, even the auctions failing to attact purchasers. Whites continue to meet with a light demand which, however, appears to be falling off at closing. Prices show no change.

	PER PICUL.
Brown Takao	$4.40 to 4.50
Brown Manila	5.15 to 5.25
Brown Daitong	4.00 to 4.10
Brown Canton	4.10 to 4.45
White Java and Penang.....	6.90 to 7.00
White Refined	7.50 to 9.10

EXPORTS.

RAW SILK.

Our last issue was of the 22nd instant, since which date settlements on this market are 862 piculs, divided thus:—*Filatures*, 540 piculs; *Reels*, 257 piculs; *Kakeda*, 65 piculs. Direct shipments have been 190 bales, making the total export trade for this week equal to 1,062 piculs.

At the early part of the week there was a large business doing, silk being sent into godown every day in spite of the holidays. Prices were further advanced by holders, a drooping exchange helping them, and these prices they succeeded in getting; but during the last day or two buyers held off and consumers are wiring in lower offers, say about $20 under present quotations. These offers holders will not accept; they now declare their intention of waiting until after the New Year holidays are past in the hope of better news, increased limits, and lower exchange, combining to give them the prices they wish to get. Should no better news come in after New Year, they will probably be very glad to entertain the offers now made them.

Digitized by Google
Original from UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

two per cent. under last week's rates.

Arrivals continue on a fair scale, and the stock shows but a slight reduction upon our last. Present arrivals are, however, showing distinct signs of "cold weather," and the stock of really prime summer reelings is rapidly diminishing.

There have been three shipping opportunities since we last wrote. The English mail *Verona*, 23rd instant, took 566 bales for European ports; the United States mail, *City of Peking*, 24th instant, had 629 bales for the New York trade, and the steamer *Tacoma*, sailing on the same day, carried 149 bales for the same destination. These departures make the present total export 24,501 piculs, against 35,102 piculs last year, and 31,287 piculs at the same date in 1891.

Hanks.—Nothing done this week; prices more or less nominal. The small supply of these silks during this present season leads us to expect that in a year or two's time they will no longer exist in merchantable quantity on our market.

Filatures.—The principal business has been done in these. In fine sizes $800 has been paid for a parcel of Shinshu *Rokkosha*; *Ueno* and *Mino* kinds, of the better grades, are very strongly held in the neighbourhood of $790. The bulk of the business has been done in the medium kinds, prices ranging from $730 to $750. In full sizes several parcels of good *Shinshu* have been taken at $745 and holders seem inclined to be firm.

Reeels.—A fair amount of business has been done, well known *Joshu* chops like *Five Girl* bringing $710; holders now ask $715 and do not seem to care about going on for the present, thinking that there is a better time coming next month.

Kakeda.—These are held unaccountably strong; *Horsehead* I have been settled at $675, and now holders demand $685 but would probably consider a firm offer of $680. Other grades and chops at proportionate prices.

In other sorts no business.

Available supplies to date	41,500	44,000	48,350

WASTE SILK.

There has been more doing in this branch, the transactions which we mentioned last week as pending having been duly arranged. Settlements for the week are 1,578 piculs, divided thus: *Cocoons*, 41 piculs; *Noshi*, 1,137 piculs; *Kibiso*, 400 piculs. No direct shipments this time.

The demand seems to have revived considerably, although buying has been in few hands; and, as a rule, purchases have been made in medium qualities apparently for price. Quotations are the same as last week; and while here and there some concessions may be made on medium or inferior qualities, yet the best grades are very firm all round.

Arrivals come in fairly well, the native spinners —so that the stock shows a reduction of 900 piculs upon the week.

There has been only one shipping opportunity since we last wrote, the English mail steamer *Verona*, 24th instant, taking 71 bales various Waste for Europe. This departure makes our present export figures 12,245 piculs, against 22,205 piculs last year, and 17,827 piculs at the same date in 1891.

Pierced Cocoons.—One solitary sale of the aftermath at 14 *ka*. The remaining stock is very undesirable and will, no doubt, be absorbed for home consumption.

Noshi.—A good large trade has been done; *Filatures*, $140 to $145; *Oshu*, $135 and $130; *Hachoji*, $120, all in large lots. *Joshu* has also been done heavily, prices ranging from $60 to $65 for ordinary stock; a small quantity of better grade has been done at $75, but in "Best" there have been no transactions.

Kibiso.—Here also there has been a fair demand, running chiefly on low grade *Filatures* at from $80 to $82½, with some a little better at $86, and some fair quality at $95 to $100. *Sendai* has also been done at from $80 to $85, and this closes the list for the week.

Nothing done in *Low Curlies*, *Mawata* or *Neri*.

QUOTATIONS.—(NEW WASTE).

Pierced Cocoons—Good to Best		—
Noshi-ito—Filature, Best		$140 to 145
Noshi-ito—Filature, Good		130 to 135

Offices—Bishopsgate House, London, E.C.

"MONEY AND TRADE" is a fearless critic and exposer of all shams, frauds, and swindles

"MONEY AND TRADE" is THE JOURNAL for Investors, Speculators, Manufacturers, and Traders

"MONEY AND TRADE" is a thoroughly up-to-date Weekly Record of all Monetary, Trading, and Business Matters. Bankers, Manufacturers, Merchants, Storekeepers, and Wholesale Buyers all over the world say it is indispensable.

"MONEY AND TRADE" is *not* subsidised by any financial association, clique, or syndicate, but is absolutely free, independent, and honest.

BALANCE SHEETS of Assurance, Banking, Shipping, Trading, Manufacturing, and Trust Companies are fearlessly and impartially criticised in "MONEY AND TRADE."

"MONEY AND TRADE" enjoys a very large circulation, not only in Great Britain and Ireland, but also in all Foreign markets where English goods are sold; and, as it goes *direct into the hands of the wholesale and retail buyers*, it offers unique advantages to advertisers.

THE MONTHLY FOREIGN AND COLONIAL EDITION is published on the last Wednesday in each month, and is forwarded direct to the Foreign Agents and Correspondents of all the leading English Merchants, and to all the large Wholesale Buyers and Storekeepers in the Colonies, India, China, Japan, South America, and other countries.

THE GREATEST WONDERS OF MODERN TIME.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In I short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies, hem of their value."

SIMPLE, SAFE, AND CERTAIN.

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammation.

MR. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 21st, 1890.

AWARDED GOLD MEDAL L'POOL INTERN'L EXHIBITION, 1888.
